

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

# ANNUAL REPORT.

---

STATE OF IOWA,  
OFFICE OF THE BOARD OF RAILROAD COMMISSIONERS, }  
DES MOINES, November 30, 1882.

To HONORABLE BUREN R. SHERMAN, *Governor of the State of Iowa:*

IN obedience to the provisions of chapter 77, acts of the Seventeenth General Assembly, we have the honor to submit herewith the fifth annual report of the Board of Railroad Commissioners, showing the traffic, operating expenses, condition of the railroad companies doing business in Iowa for the year ending June 30, 1882, together with the returns of the several companies to this office, and tabulated statements therefrom. A change in the membership of the Board has taken place since the date of our last report, M. C. Woodruff, of Dubuque county, retiring April 1, 1882, by reason of the expiration of his term of service. James Wilson, of Tama county, was on the same day appointed by the Governor to the vacancy thus created. The Board state with satisfaction that nine hundred and eleven miles have been added to the working mileage of the roads, and that probably, before the close of the year, several hundred miles in addition will have been completed. Always abreast of the times, the prosperity of the past year is nowhere more manifest in practical results than in the field of railway enterprise. No year in the history of the State has added so great a mileage. Every county in the State is traversed by an operated line of railway, and a large per cent of the counties have competitive or rival lines. We congratulate the people of the State upon the growth and increasing efficiency of its railway system, as it is not only bringing the means of speedy, safe, and cheap transportation within the reach of all, but it hastens the day for the development and perfection of a legislative system of railway control that will at once restore confidence between producer and carrier, and carry the service to the highest possible point of efficiency.

## A careful examination of the

## TABLES AND RAILROAD REPORTS

submitted herewith will, we think, disclose facts worthy the attention and study of all who are interested in the transportation problem of the day, and abundantly support the comments and observations thereon submitted as a part of this report.

## MORE COMPLAINTS

have been presented, examined, and decided this year than in any previous year during the existence of the Board. Complaints investigated this year reached the number of sixty-five, and while these cases have grown in importance as well as in numbers, involving, as many of them do, questions of much interest to the companies, it is gratifying to be able to state that the decisions of the Board have been as promptly obeyed and complied with as the mandates of a court of law, thus demonstrating what we have had occasion to remark before, that an appeal to publicity is quite as effective with these corporations as an appeal to the courts. While this condition of things, in this regard, continues, it may not be necessary, perhaps, to discuss the question of providing further legal power of enforcement. Power is frequently quite as effective in reserve as in action. Should these corporations at any future time seem disposed to misinterpret this grace on the part of the State, it will be an easy matter to promptly exercise the power to enforce obedience.

## CAPITAL STOCK.

The total number of miles of railroad in Iowa reported by the various companies to the Board is six thousand three hundred and thirty-seven and forty-three one hundredths miles. The report of the capital stock and debt is based on the entire lines of the roads which run into other States—the entire mileage of these roads is eighteen thousand five hundred and forty-eight and sixty-nine one hundredths miles. The Commissioners' estimate of the stock of these roads representing the parts of them in Iowa, added to the stock of the roads entirely in Iowa, amounts to \$121,160,084.81, or \$19,117.54 per mile. The total number of stockholders living in the State is returned at seven hundred and thirty-four; the total amount of stock reported as owned by persons living in the State, is \$2,096,341.41.

## DEBT.

The total debt of the roads in Iowa as reported and estimated by the Commissioners is \$118,057,183.16, or \$18,628.40 per mile. Of this amount \$112,637,966.05 is funded debt—\$5,419,217.11 is unfunded or floating debt.

## STOCK AND DEBT.

The stock and debt of the roads in Iowa amount to \$239,217,267.97 or \$37,745.94 per mile.

The following table shows the amount of stock and the amount of debt per mile of each company, as returned by them to this office:

| NAMES OF ROADS.                            | Stock per<br>mile. | Debt per<br>mile. | Stock and<br>debt per<br>mile. |
|--------------------------------------------|--------------------|-------------------|--------------------------------|
| Burlington, Cedar Rapids & Northern.....   | \$ 8,696.20        | \$ 15,628.55      | \$ 24,856.74                   |
| Chicago, Burlington & Kansas City .....    | 32,304.97          | 32,304.97         | 32,304.97                      |
| Central Iowa.....                          | 20,236.44          | 19,954.79         | 40,191.23                      |
| Chicago, Burlington & Quincy.....          | 17,956.00          | 16,990.00         | 34,946.00                      |
| Kansas City, St. Jo. & Council Bluffs..... | 18,354.10          | 18,486.95         | 36,841.05                      |
| Chicago, Milwaukee & St. Paul.....         | 8,357.00           | 20,061.00         | 28,418.00                      |

| St. Louis, Keokuk & Northwestern.....      | 18,688.52          | 18,570.46         | 37,258.98                      |
| Wabash, St. Louis & Pacific .....          | 20,054.47          | 30,130.20         | 50,184.67                      |
| NARROW GAUGE ROADS.                        |                    |                   |                                |
| Burlington & Northwestern.....             | 4,364.08           | 5,908.26          | 9,643.37                       |
| Des Moines, Osceola & Southern.....        | 5,000.00           | 7,000.00          | 12,000.00                      |
| Ft. Madison & Northwestern .....           | 7,683.00           | 5,570.00          | 13,253.00                      |
| Cedar Rapids & Marion .....                | 12,000.00          | .....             | 12,000.00                      |

## FIFTH ANNUAL REPORT OF THE

## INCREASE OF CAPITAL STOCK.

The following table shows the added mileage and the increase of capital stock during the year for all roads reported:

| NAMES OF ROADS.                                      | Miles.   | Amount of increase. |
|------------------------------------------------------|----------|---------------------|
| Burlington, Cedar Rapids & Northern .....            | 79.78    | \$ 1,495,200.00     |
| Central Iowa .....                                   | 96.96    | 7,764,000.00        |
| Chicago, Burlington & Quincy (entire line) .....     | 351.99   | 7,155,000.00        |
| Chicago, Milwaukee & St. Paul (entire line) .....    | 462.75   | 1,643,500.00        |
| Chicago & Northwestern (entire line) .....           | 503.12   | 16,773,166.66       |
| Chicago, St. Paul, Minn. & Omaha (entire line) ..... | 396.54   | 2,600.00            |
| Dubuque & Dakota—Iowa line .....                     |          | 6,307,900.00        |
| Wabash, St. Louis & Pacific (entire line) .....      | 999.52   | 201,500.00          |
| Des Moines, Osceola & Southern (Iowa) .....          | 40       | 161,500.00          |
| Fort Madison & Northwestern .....                    | 25       | 42,000.00           |
| Cedar Rapids & Marion .....                          |          |                     |
| Total .....                                          | 2,955.66 | \$ 41,346,366.66    |

The increased mileage reported is 2,955.66; the increase of stock is \$41,346,366.66, or \$13,982.11 per mile.

## INCREASE OR DECREASE OF DEBT.

The following table shows the increase or decrease of debt during the year for all roads reported:

| NAMES OF ROADS.                             | Miles.   | Increase.        | Decrease.       |
|---------------------------------------------|----------|------------------|-----------------|
| Burlington, Cedar Rapids & Northern .....   | 79.78    | \$ 850,229.89    |                 |
| Chicago, Burlington & Kansas City .....     |          | 293,305.77       |                 |
| Central Iowa .....                          | 96.96    | 2,039,000.00     |                 |
| Chicago, Burlington & Quincy .....          | 351.99   | 9,008,525.00     |                 |
| Kansas City, St. Jo. & Council Bluffs ..... | 1.43     |                  | 2,530,300.00    |
| Chicago, Milwaukee & St. Paul .....         | 462.75   | 10,621,846.60    |                 |
| Chicago & Northwestern .....                | 503.12   | 6,491,570.45     |                 |
| Chicago, St. Paul, Minn. & Omaha .....      | 396.54   | 13,136,875.00    |                 |
| Des Moines & Fort Dodge .....               |          | 88,800.00        |                 |
| Dubuque & Dakota .....                      |          | 64,000.00        |                 |
| Sioux City & Pacific .....                  |          | 585,722.90       |                 |
| Wabash, St. Louis & Pacific .....           | 995.52   | 25,674,470.35    |                 |
| NARROW GAUGE ROADS.                         |          |                  |                 |
| Burlington & Northwestern .....             |          | 6,700.00         |                 |
| Des Moines, Osceola & Southern .....        | 40       | 230,000.00       |                 |
| Fort Madison & Northwestern .....           | 25       | 228,363.55       |                 |
| Total .....                                 | 2,955.66 | \$ 69,369,409.51 | \$ 2,530,300.00 |

The increased mileage reported for the year is 2,955.66; the increased indebtedness is \$69,369,409.51, from which deduct the decreased indebtedness, and we have a total increase of \$66,839,109.51. This increase, however, is not all new mileage, as the Chicago, St. Paul, Minneapolis & Omaha and the Wabash represent to a great degree consolidations with other lines; the Burlington, Cedar Rapids & Northern, Central Iowa, Chicago, Burlington & Quincy, and Northwestern represent new roads built.

COMPARATIVE TABLE OF STOCK AND DEBT FOR THE YEARS 1878, 1879, 1880, 1881, AND 1882.

|            | 1878.             | 1879.             | 1880.             | 1881.             | 1882.             |
|------------|-------------------|-------------------|-------------------|-------------------|-------------------|
| Stock..... | \$ 1834,88,642.54 | \$ 186,614,875.77 | \$ 264,482,964.21 | \$ 288,713,878.86 | \$ 345,918,605.27 |
| Debt.....  | 160,360,759.82    | 162,979,886.42    | 228,551,426.04    | 307,585,618.08    | 386,228,328.01    |
| Total..... | \$ 343,849,402.06 | \$ 348,594,212.19 | \$ 493,034,390.25 | \$ 596,299,496.89 | \$ 732,146,933.28 |

The \$343,849,402.06 represented in 1878, 8,367 miles of road; the \$732,146,933.28 represent in 1882, 18,548.69 miles. The increase of mileage in Iowa is from 4,157 in 1878 to 6,337 miles in 1882, or 2.098 miles in the four years. The capital and debt for Iowa reported for 1878 amounted to \$153,601,784.47; for 1882, \$239,217,267.97; an increase of 2.098 miles, and an increase of stock and debt of \$85,615,-483.50, or \$10,808.14 per mile.

COST OF ROADS.

It is difficult to arrive at the cost of the Iowa roads, as many of them came into the hands of the present holders by purchase at foreclosure, consolidation, or through the medium of construction companies—the amount reported is \$215,979,324.81, or \$23,237,943.16 less than the reported stock and bonds. It is hardly probable that the Commissioners will ever be able to arrive at more than an approximation of the cost of the roads.

## FIFTH ANNUAL REPORT OF THE

## COST OF ROADS IN IOWA.

| NAMES OF ROADS.                              | Cost of road and equipment. |
|----------------------------------------------|-----------------------------|
| Burlington, Cedar Rapids & Northern .....    | \$ 13,506,355.92            |
| Chicago, Burlington & Kansas City .....      | 2,479,499.10                |
| Central Iowa .....                           | 11,539,568.77               |
| Chicago, Burlington & Quincy .....           | 19,831,544.25               |
| Kansas City, St. Jo. & Council Bluffs .....  | 2,223,256.67                |
| Chicago, Milwaukee & St. Paul .....          | 88,298,570.84               |
| Chicago & Northwestern .....                 | 19,956,415.24               |
| Chicago, Iowa & Nebraska .....               | 4,662,572.29                |
| Cedar Rapids & Missouri River .....          | 11,459,491.59               |
| Des Moines & Minneapolis .....               | 1,418,850.25                |
| Maple River .....                            | 1,165,352.17                |
| Chicago, Rock Island & Pacific .....         | 39,080,653.98               |
| Chicago, St. Paul, Minneapolis & Omaha ..... | 3,379,142.21                |
| Crooked Creek .....                          | 71,500.00                   |
| Des Moines & Fort Dodge .....                | 6,092,280.00                |
| Dubuque & Dakota .....                       | 1,237,767.35                |
| Cedar Falls & Minnesota .....                | 3,173,500.00                |
| Dubuque & Sioux City .....                   | 5,880,800.00                |
| Iowa Falls & Sioux City .....                | 7,585,000.00                |
| Minneapolis & St. Louis .....                | 6,535,567.22                |
| Sioux City & Pacific .....                   | 4,063,497.38                |
| St. Louis, Keokuk & Northwestern .....       | 1,853,594.50                |
| Wabash, St. Louis & Pacific .....            | 9,343,267.36                |
| NARROW GAUGE ROADS.                          |                             |
| Burlington & Northwestern .....              | 392,508.61                  |
| Des Moines, Osceola & Southern .....         | 280,000.00                  |
| Fort Madison & Northwestern .....            | 480,000.00                  |
| Cedar Rapids & Marion .....                  | 40,769.11                   |
| Total .....                                  | \$ 215,979,324.81           |

## GROSS EARNINGS.

The entire earnings for the roads in Iowa are:

|                                                        |                  |
|--------------------------------------------------------|------------------|
| Passenger, mail and express .....                      | \$ 8,646,470.83  |
| Freight and miscellaneous .....                        | 23,377,495.20    |
| Total earnings for the year ending June 30, 1882 ..... | \$ 32,023,966.03 |
| Total earnings for the year ending June 30, 1881 ..... | 28,452,181.91    |
| Increase of earnings over previous year .....          | \$ 3,571,784.12  |

| NAMES OF ROADS.                            | Increase.     | Decrease.  |
|--------------------------------------------|---------------|------------|
| Burlington, Cedar Rapids & Northern.....   | \$ 480,069.94 | \$.....    |
| Chicago, Burlington & Kansas City.....     |               | 9,447.56   |
| Central Iowa.....                          | 232,698.40    |            |
| Chicago, Burlington & Quincy.....          | 71,476.81     |            |
| Kansas City, St. Jo. & Council Bluffs..... | 54,951.68     |            |
| Chicago, Milwaukee & St. Paul.....         | 1,096,421.53  |            |
| Chicago & Northwestern.....                | 1,038,260.26  |            |
| Chicago, Rock Island & Pacific.....        |               | 90,774.87  |
| Chicago, St. Paul, Minneapolis & Omaha ..  | 120,830.07    |            |
| Crooked Creek.....                         | 1,156.56      |            |
| Des Moines & Fort Dodge.....               | 72,532.95     |            |
| Dubuque & Dakota.....                      | 24,172.19     |            |
| Illinois Central.....                      | 219,527.40    |            |
| Minneapolis & St. Louis.....               | 347,404.25    |            |
| Sioux City & Pacific.....                  | 48,769.45     |            |
| St. Louis, Keokuk & Northwestern .....     | 98,593.72     |            |
| Wabash, St. Louis & Pacific.....           |               | 185,224.84 |
| NARROW GAUGE ROADS.                        |               |            |
| Burlington & Northwestern.....             |               | 9,538.48   |
| Des Moines, Osceola & Southern.....        |               |            |
| Fort Madison & Northwestern.....           | 8,816.95      |            |
| Cedar Rapids & Marion.....                 | 3,717.63      |            |

## MAILS.

The returns enable us to estimate very nearly the amount received for the transportation of mails in the State. By pro rating for those roads that make returns for several States we have the amount earned by this service as \$527,899.79; this amount would be reduced by whatever is paid for collecting and delivering the mails.

## EARNINGS PER TRAIN MILE AND PER MILE OF ROAD.

| NAMES OF ROADS.                                | Passenger. | Freight. | Total. | Per mile of road. |
|------------------------------------------------|------------|----------|--------|-------------------|
| Burlington, Cedar Rapids & Northern.....       | .9751      | 1.3545   | 1.2429 | \$ 4,284.23       |
| Chicago, Burlington & Kansas City .....        |            |          |        | 1,368.22          |
| Central Iowa.....                              | 1.2560     | 1.6800   | 1.5390 | 3,234.97          |
| Chicago, Burlington & Quincy.....              | 1.4883     | 1.5389   | 1.4800 | 7,721.82          |
| Kansas City, St. Joseph & Council Bluffs ..... | 1.1000     | 2.1800   | 1.6000 | 5,533.24          |

| Des Moines & Fort Dodge .....                  | 1.4100     | 2.5500   | 2.0860 | 4,743.45          |
| Dubuque & Dakota .....                         |            | 1.5700   | 1.5700 | 1,904.57          |
| Illinois Central.....                          | 1.7400     | 1.4700   | 1.5400 | 4,870.74          |
| Minneapolis & St. Louis.....                   | 1.1136     | 1.8103   | 1.2660 | 4,148.01          |
| Sioux City & Pacific.....                      | 1.1975     | 1.9395   | 1.6023 | 2,372.23          |
| St. Louis, Keokuk & Northwestern.....          |            |          |        | 1,924.63          |
| Wabash, St. Louis & Pacific .....              | .9440      | 1.3540   | 1.2180 | 4,606.71          |
| NARROW GAUGE ROADS.                            |            |          |        |                   |
| Burlington & Northwestern.....                 |            | .7604    | .7604  | 1,159.09          |
| Des Moines, Osceola & Southern.....            |            |          |        | 1,260.96          |
| Fort Madison & Northwestern .....              | .3100      | 1.7100   | 2.0200 | 2,759.31          |
| Cedar Rapids & Marion .....                    |            |          |        |                   |

## OPERATING EXPENSES.

|                                                                                       |                  |
|---------------------------------------------------------------------------------------|------------------|
| The total operating expenses returned for the Iowa roads for the year 1882 were ..... | \$ 20,512,393.06 |
| Total operating expenses for 1881 were.....                                           | 16,788,404.39    |
| Excess of operating expenses over previous year .....                                 | \$ 3,723,988.66  |
| Excess of earnings over previous year.....                                            | 3,571,774.12     |
| Making the net earnings less than previous year .....                                 | \$ 152,214.54    |

The mileage was increased 911 miles, but the net earnings show but a slight increase for so large an increased mileage. The mileage being much greater than any year since the establishment of this Board. The operating expenses per mile of road were \$3,552.64.

## COMPARISON OF OPERATING EXPENSES AND EARNINGS.

The earnings of the roads for the 11,739.59 miles reported in 1880 were \$64,433.179.53, or \$5.491.23 per mile; the operating expenses for the same year were \$35,624,124.79, or \$3,036.51 per mile. The earn-

ings for the 14,109.37 miles reported in 1881 were \$76,530,450.99, or \$5,083.73 per mile; the operating expenses were \$46,043,845.22, or \$3,346.87 per mile. The earnings for the 16,544.46 miles reported in 1882 were \$92,759,206.22, or \$5,606.66 per mile; the operating expenses were \$58,776,474.53, or \$3,552.64 per mile.

COMPARATIVE TABLE OF EARNINGS PER TRAIN MILE FOR THE YEARS  
1882, 1881, AND 1880.

| NAMES OF ROADS.                                | 1882.  | 1881.  | 1880.  |
|------------------------------------------------|--------|--------|--------|
| Burlington, Cedar Rapids & Northern .....      | 1.2429 | 1.3340 | 1.0400 |
| Chicago, Burlington & Kansas City .....        | .....  | 1.2230 | .....  |
| Central Iowa .....                             | 1.5390 | 1.6111 | 1.6180 |

| Wabash, St. Louis & Pacific.....               | 1.0250 | .000   | .620   |
| NARROW GAUGE ROADS.                            |        |        |        |
| Burlington & Northwestern.....                 | .5212  | .663   | .700   |
| Fort Madison & Northwestern.....               | .8300  | .....  | .....  |

The operating expenses generally have increased during the last two years; the present year is considerably higher than the previous year. This can be accounted for by the floods of the two years, which made the cost of repairs very much larger than before, and the general advance in the price of labor and material. For the year ending June 30, 1881, the total earnings were \$28,452,181.91, and the total expenses \$16,788,404.39. The net earnings for the year were \$11,663,777.52, for the 5,426 miles in the State, or \$2,149.61 per mile of road.

For the year ending June 30, 1882, the gross earnings were....\$32,023,966.03  
 For the year ending June 30, 1882, the operating expenses were 20,512,398.05

Leaving the net earnings for the year.....\$ 11,511,572.98

or \$152,214.54 less than last year. The net earnings for the 6,337 miles were \$1,816.57 per mile; the year before they were \$2,149.61 per mile.

## OPERATING EXPENSES CLASSIFIED.

This table gives the operating expenses of the entire lines except the Chicago, Burlington & Quincy and the Illinois Central, which give the

returns for their Iowa lines only; this will probably differ a little from the actual status in the State, but is the closest approximation that can be given and is very nearly correct:

| CLASSIFICATION.                | AMOUNT.          | Per cent. |
|--------------------------------|------------------|-----------|
| Maintenance of way.....        | \$ 16,354,670.75 | 27.82     |
| Motive power and cars.....     | 7,902,804.06     | 13.44     |
| Conducting transportation..... | 26,634,596.17    | 45.32     |
| General expenses.....          | 7,884,403.55     | 13.42     |
| Total.....                     | \$ 58,776,474.53 | 100.00    |

TABLE OF CLASSIFICATION OF EXPENSES IN DETAIL.

| CLASSIFICATION.                                                       | Amount.          | Per cent. |
|-----------------------------------------------------------------------|------------------|-----------|
| General superintendence.....                                          | \$ 1,995,112.24  | 3.89      |
| Legal expenses.....                                                   | 323,140.83       | .55       |
| Insurance.....                                                        | 104,756.45       | .18       |
| Stationery, blanks, tickets, etc.....                                 | 805,627.95       | 1.37      |

| Fort Madison & Northwestern.....      | .8300                              | 2.0200                   | 1.1900      | 41.00                               | 2.20                                                  | 1.90                                                      |

The roads showing the lowest percentage of operating expenses to earnings were the Fort Madison & Northwestern, 41, Illinois Central, 53, Chicago & Northwestern, 54, Chicago, Milwaukee & St. Paul, 56, Chicago & Rock Island, 58.80, Dubuque & Dakota, 57.75, Des Moines & Fort Dodge, 58.50. The highest percentage of net earnings to capital stock and debt was reported by the Chicago & Northwestern, 8.58, Chicago, Milwaukee & St. Paul, 7.20, Chicago, Rock Island & Pacific, 6.60.

Thirteen roads report an excess after deducting operating expenses, interest, and rental. This excess amounts to \$8,434,176.64. Seven roads show a deficit of \$577,487.70, leaving the net increase \$7,856,688.94, which would give an average of net earnings for all the roads in the State of \$1,239.81 per mile. The cost of operating the Chicago, Burlington & Kansas City road was \$17,858.88 more than its entire earnings, that of the St. Louis, Keokuk & Northwestern, \$63,013.80. The Iowa Central road earned 7.54 per cent on its indebtedness, the Des Moines & Fort Dodge, 6.61, the Minneapolis & St.

Louis, 3.70, the Sioux City & Pacific, 7.10, the Wabash, St. Louis & Pacific, 3.31.

## PROPERTY ACCOUNTS.

The property accounts of the roads reporting have been increased during the year \$45,575,581.89.

| CLASSIFICATION OF ACCOUNTS.                                   | Amounts.         |

| Grading .....                                                 | \$ 1,405,211.16  |
| Bridging and masonry .....                                    | 550,649.80       |
| Superstructure, including rails .....                         | 7,021,592.44     |
| Land, land damages and fences .....                           | 973,388.73       |
| Passenger, freight, and water stations, and coal sheds .....  | 942,368.09       |
| Engine-houses, car-sheds and turn-tables .....                | 1,622,507.95     |
| Machine shops, including machinery and tools .....            | 180,941.93       |
| Engineering agencies, salaries, and construction expenses ... | 208,747.46       |
| Purchase of other roads .....                                 | 24,050,653.70    |
| <b>EQUIPMENT.</b>                                             |                  |
| Locomotives .....                                             | 2,613,150.77     |
| Passenger, baggage, and express cars .....                    | 759,488.64       |
| Freight and other cars .....                                  | 3,534,151.61     |
| Total .....                                                   | 45,096,132.81    |
| Deduct credits to equipment account .....                     | 120,550.92       |
| Total net addition to property accounts .....                 | \$ 45,575,581.89 |

This amount, \$45,575,581.89, covers the addition in other States as well as Iowa. We estimate of this amount as property belonging to the roads in Iowa, an increase of property of \$20,372,206.01, or for the 911 additional miles of road reported for the year \$22,337.92 per mile.

## TAXES.

The amount of taxes paid by the railroads in the State is \$707,660.31, which is nine per cent of the income to the stockholders. The taxes paid in 1878 were \$594,912.65; in 1879 were \$584,169.79; in 1880 were \$591,843.08; in 1881 were \$628,611.51. The largest amount of taxes paid was by the Chicago, Rock Island & Pacific, \$162,629.16; by the Chicago & Northwestern, \$128,914.01; by the Chicago, Burlington & Quincy, \$126,378.50; by the Chicago, Milwaukee & St. Paul, \$94,166.23; by the Illinois Central, \$60,624.16.

## TOTAL TRACK IN THE STATE.

The total track in the State, reported in operation June 30,  
 1882, was..... 6,337.43 miles.  
 There was in addition, completed and in operation, we are  
 informed, November 1 ..... 325.27 miles.

A total mileage for the State..... .. 6,662.70 miles.

This is 383 miles more than reported in Poor's Manual, for New York, at the close of the year 1881; two miles less than reported for Ohio, and twenty-eight less than Pennsylvania.

## ROADS OWNED AND LEASED.

Of the entire railroad mileage of the State 5,182.73 miles are owned by the companies operating them—1,154.27 are leased. Of this amount the Northwestern leases 486.10 miles; the Rock Island 162.20; the Illinois Central 402.16; the Wabash 87.90; the Burlington & Northwestern 15.91.

## SIDINGS.

The total amount of side-track reported is 700.73 miles, or a little more than eleven per cent of the length of the roads. This amount seems small, and is often a source of serious embarrassment in moving trains.

## DOUBLE TRACK.

The total amount of double track reported is 47.06 miles. Of this the Chicago, Burlington & Quincy owns 43.06 miles; the Chicago, Rock Island & Pacific four miles. The Rock Island road reported last year eight miles. We think the error must have occurred in last year's report.

## STEEL AND IRON RAILS.

| St. Louis, Des Moines & Northern.....       |                          | 35.43                   | 35.43                             |
| Total.....                                  | 2,937.24                 | 3,024.71                | 5,961.95                          |

Forty-nine per cent of the entire roads of the State, exclusive of sidings, is steel rail. For the year 1881 there was reported forty per cent; for the year 1880 thirty-two per cent; for the year 1879 twenty-seven and one-half per cent; for the year 1878 twenty-two per cent. This indicates what is the fact, that wherever the traffic is heavy steel rails have been put down. The percentage of steel to iron rails will not increase as rapidly in the future as it has in the last four years.

## ROAD-BED AND TRACK.

The total number of track sections reported for Iowa is 861. These vary in length from five to nine miles, probably averaging six miles.

On each of these there are reported as employed from three to seven men: probably the average would be five. The new ties laid in track during the year were reported 1,541,968. They last about seven years. There were 5,600 tons of new iron, and 190,584 tons of new steel laid in track. The average life of iron rails is reported from four to twelve years, varying with the traffic. There is now no iron in the main tracks of the trunk lines. The steel has not been long enough in use to determine its average duration.

#### FENCING.

The number of miles of fences reported is 4,345, the total cost \$432,160.98, and the average price paid per rod \$1.12.

The Commissioners are pleased to learn that there is a growing disposition to fence the roads, even among the newer lines. As a matter of safety for the trains, this is important as well as for the economy of running them. The landholder, the railway company, and the traveling public, would all be safer in person and property if all the roads in the State were fenced, and this Board believe that the cost would soon be repaid by the savings made in damages and repairs, and also in the diminished cost of doing the work.

#### TELEGRAPH LINES.

The telegraph lines are mainly owned by the Western Union Company. The railroads report in their offices 815 telegraph stations, and 895 miles of wire as owned by them and operated exclusively for their business. They report 4,344 miles of lines owned by the Western Union Telegraph Company.

#### TRAIN MILEAGE.

|                                                                         |               |
|-------------------------------------------------------------------------|---------------|
| The total number of miles run by passenger trains was.....              | 18,575,194    |
| The total number of miles run by freight trains was.....                | 39,106,906    |
| The total number of miles run by switching trains was.....              | 14,005,754    |
| The total number of miles run by construction and other trains was..... | 6,744,011     |
| Total train mileage....                                                 | 78,431,865    |
|                                                                         |               |
| The total number of passengers carried was.....                         | 20,927,026    |
| The total number of passengers carried one mile... ..                   | 787,021,961   |
| The total number tons freight carried.....                              | 81,062,765    |
| The total number tons freight carried one mile.....                     | 4,631,564,735 |

The average distance traveled by each passenger, leaving out the short lines, varies from twenty-eight to sixty-two miles; forty-five miles would probably be a fair average. This indicates plainly that little effort has as yet been made to develop local travel. The rates charged for passenger fares generally are the maximum fixed by statute. Mileage tickets are sold on many of the roads at a reduction varying with the roads.

The speed of passenger trains varies from twenty to twenty-six miles per hour—of freight trains from ten to sixteen.

#### FREIGHT CAR MILEAGE.

|                                                               |             |
|---------------------------------------------------------------|-------------|
| The number of miles run by loaded freight cars east and south | 199,746,836 |
| The number of miles run by loaded freight cars west and north | 231,253,733 |
| The number of miles run by empty freight cars east and south  | 89,049,397  |
| The number of miles run by empty freight cars west and north  | 61,664,638  |
| Total freight car mileage.....                                | 591,616,101 |

Several of the roads have neglected to report freight car mileage. This is a source of regret, and also of embarrassment to the Commissioners. Some things that are left out of the reports may be supplied by an estimate that does not materially affect results. This, however, cannot be done in the mileage, and the report is defective in this particular. The Board sees no reason why this may not be given, and in the future will insist on complete answers to the questions asked.

#### FREIGHT RATES.

The average rate of freight per ton per mile varies from nine cents on the Crooked Creek road, 4.24 on Burlington & Northwestern, 3.08 on the Des Moines & Fort Dodge road to 1.60 on the Chicago, Milwaukee & St. Paul; 1.47 on the Northwestern; 1.24 on the Rock Island; and .96 on the Wabash. The rates are a little higher than last year.

#### EQUIPMENT.

The total number of locomotives reported is 2,652, the weight varying from twenty-eight to sixty-seven tons; the total number of cars is 85,206. Of these 1,031 are passenger cars, 601 are baggage, mail, and express cars, 125 parlor, sleeping, and dining cars, 49,864 box freight cars, 7,846 stock cars, 18,240 platform or coal cars, 7,499 other cars.

## STATIONS.

The total number of stations reported in Iowa is 947.

## EMPLOYES.

The total number of persons regularly employed in operating the roads of the State is 28,397; the amount paid them for their services is \$14,071,612.54, or two and one-half millions more than the earnings of the roads of the State above operating expenses and the taxes. The figures are large, but we have reason to believe that they are nearly correct.

## TRUSS BRIDGES.

The total number of wooden truss bridges is 464, the length 38,774 lineal feet; of combination truss bridges 110, length 13,358 feet; of iron truss bridges 140, length 14,724 feet.

## WOODEN TRESTLE AND PILE.

The total number of wooden trestle and pile bridges is 7,559, their length 531,014 feet; these bridges put together make a total of more than one hundred and thirteen miles.

## ARCH CULVERTS.

There are thirty-four arch culverts reported—the total opening is 209 feet; 3,352 wooden box culverts, and 926 stone box culverts.

## BRIDGES BUILT WITHIN THE YEAR.

There were built within the year 50,072 lineal feet of bridges, including those rebuilt.

## CATTLE-GUARDS.

The number of cattle-guards reported is 6,975. This number we are sure is too small.

## RAILROAD CROSSINGS.

The number of railroad crossings at grade is 136; over or under another road twenty-five.

## HIGHWAY CROSSINGS.

The number of highway crossings reported at grade is 4,677; over the track, sixty-one; under track, eighty-four; at which there are flag-

men, forty-eight. Bridges eighteen feet above track, fifty-eight; less than eighteen feet, two.

#### ACCIDENTS TO PERSONS.

During the year one hundred and sixty-five persons were killed; of these seven were passengers, eighty-nine employes, and sixty-nine others. Five by derailment, two by collisions, four caught in frogs, sixteen coupling cars, thirty-one falling from train, nineteen getting on and off trains, four at highway crossings, forty-one from miscellaneous causes, ten stealing rides, twenty-one while intoxicated, and thirty-three while trespassing on track. Of this number three were reported as suicides.

There were six hundred and thirty-five persons injured during the year; sixty-one were passengers, five hundred and two were employes, and seventy-two others. By derailment fifty-nine, collisions thirty-seven, caught in frogs four, coupling cars one hundred and eighty-two, falling from trains fifty-seven, getting on and off trains fifty six, at highway crossings ten, miscellaneous one hundred and ninety-two, overhead obstructions six, stealing rides eight, trespassing on track twenty-four.

#### COUPLING CARS.

One great source of accident resulting in a very large percentage of injury and death to the railroad employe, is the present method of coupling cars. While we believe the theory is, and most of the time tables require the use of the coupling hook, in practice men go between the cars, and if for any cause the deadwood of the different cars fails to meet they are crushed; others are caught in frogs, the car wheels catching them before the foot can be removed. In the report for this year four employes were killed, being caught in frogs, and sixteen in coupling cars; four were injured, being caught in frogs, and one hundred and eighty-two in coupling cars. There is evidently something wrong in the entire arrangement of coupling cars, for in no legitimate business should there be such a liability to injury and death. We are not able to suggest a remedy, but believe that something might be provided that would do away with much of this.

#### WALKING ON TRACK.

We would not feel ourselves to be entirely free from censure if we allowed an opportunity to pass without calling attention to the danger

of this practice. It has become so common as to have almost, we believe, established for the public, in the judicial mind, an element of acquired right of way or joint occupancy. During the year 1878 there were reported to this Board killed while walking on tracks twenty-two, injured nineteen; in the year 1879, killed twenty-four, injured twenty-three; in the year 1880, killed twenty-two, injured sixteen; in the year 1881, killed twenty-eight, injured twelve; during the year 1882, killed thirty-three, injured twenty-four. Or for the five years, killed one hundred and twenty-nine, injured ninety-four. The Board feel that this useless waste of life should be avoided, and that the only way to accomplish it is through legislation. Railway trains must and will always be run at high rates of speed; this is a necessity, and sooner or later the railway track must cease to be regarded as a highway. Until that time comes, the compiler of statistics will continue to report the long and sickening list of killed and injured while trespassing on track, and juries will continue to speculate whether the man in charge of the locomotive might or might not have been able to stop his ponderous train in time for the injured to have stepped off the track.

## TONNAGE CLASSIFIED.

| ARTICLES CARRIED.                                    | Tons.     | Per cent. |
|------------------------------------------------------|-----------|-----------|
| Grain .....                                          | 2,471,036 | 25.29     |
| Flour .....                                          | 199,405   | 2.04      |
| Provisions .....                                     | 115,138   | 1.18      |
| Animals .....                                        | 980,618   | 10.03     |
| Other agricultural products .....                    | 160,003   | 1.65      |
| Lumber and forest products .....                     | 1,551,515 | 15.87     |
| Coal .....                                           | 1,767,047 | 18.07     |
| Lime, cement, etc. ....                              | 108,265   | 1.11      |
| Salt .....                                           | 110,846   | 1.13      |
| Oil, petroleum, etc. ....                            | 31,458    | .33       |
| Iron and castings .....                              | 139,707   | 1.43      |
| Stone and brick .....                                | 207,916   | 2.13      |
| Manufactures .....                                   | 109,362   | 1.12      |
| Merchandise, and other articles not enumerated ..... | 1,820,215 | 18.62     |
| Total .....                                          | 9,777,415 | 100.00    |

Add to this amount an estimated tonnage for the Chicago, Burlington & Kansas City, the Kansas City, St. Joseph & Council Bluffs, the St. Paul, Minneapolis & Omaha, the Minneapolis & St. Louis, the St. Louis, Keokuk & Northwestern, the Wabash, St. Louis & Pacific, and the Fort Madison & Northwestern roads (whose officers were unable to sep-

arate their Iowa tonnage), 1,198,427 tons, and we have a total tonnage of 10,975,842; deducting from this the freight twice reported, that is, the freight delivered to and received from the smaller roads by the trunk lines (as estimated by the Commissioners), 380,688 tons, and we have the Iowa tonnage as 10,595,174.

TONNAGE CROSSING THE MISSISSIPPI RIVER FOR THE YEAR ENDING  
JUNE 30, 1882.

| LOCATION OF BRIDGE. | Tons west-bound. | Tons east-bound. | Total tons. |
|---------------------|------------------|------------------|-------------|
| McGregor .....      | 146,356          | 137,529          | 283,885     |
| Dubuque .....       | 108,375          | 183,463          | 291,838     |
| Sabula .....        | 257,462          | 159,327          | 416,789     |
| Clinton .....       | 502,311          | 706,964          | 1,209,275   |
| Davenport .....     | 960,437          | 937,383          | 1,897,820   |
| Burlington .....    | 906,369          | 1,143,470        | 2,049,839   |
| Keokuk .....        | 63,947           | 50,694           | 114,641     |
| Total .....         | 2,945,257        | 3,318,830        | 6,264,087   |

TONNAGE CROSSING THE MISSOURI RIVER FOR THE YEAR ENDING  
JUNE 30, 1882.

| LOCATION OF BRIDGE OR CROSSING. | Tons west-bound. | Tons east-bound. | Total tons. |
|---------------------------------|------------------|------------------|-------------|
| Sioux City .....                | 82,565           | 15,255           | 97,820      |
| Blair .....                     | 86,594           | 47,876           | 134,470     |
| Council Bluffs .....            |                  |                  |             |
| East Plattsmouth ..             | 432,180          | 269,584          | 701,764     |

|                                                                           |           |
|---------------------------------------------------------------------------|-----------|
| The tonnage of the Mississippi River bridges as reported amounts to ..... | 6,264,087 |
| Tonnage of roads not crossing bridges going east .....                    | 1,198,427 |
| Tonnage originating in Iowa going west (estimated) .....                  | 992,000   |
| Total .....                                                               | 8,454,514 |

Leaving the tonnage originating from points in Iowa destined to points in Iowa 2,140,660. This is twenty and two-tenths per cent of the entire freight hauled by the roads in Iowa.

THE AMOUNT OF TONNAGE THAT CAN BE CARRIED OVER THE ROADS IN IOWA, EXCLUSIVE OF THE WEIGHT OF CARS, BY AN ENGINE OF GIVEN WEIGHT.

| NAMES OF ROADS.                                    | Weight of engine<br>in tons. |                                                 |      |
|----------------------------------------------------|------------------------------|-------------------------------------------------|------|
|                                                    | Net freight car-<br>ried.    | Net freight per<br>ton weight of<br>locomotive. |      |
| Central Iowa.....                                  | 50                           | 315                                             | 6.80 |
| Chicago, Burlington & Quincy—Eastern Division..... | 51                           | 330                                             | 6.47 |

| Des Moines & Fort Dodge.....                       | 36                           | 270                                             | 7.50 |
| Dubuque & Dakota.....                              | 28                           | 160                                             | 5.43 |
| Illinois Central.....                              | 30                           | 140                                             | 4.66 |
| Sioux City & Pacific.....                          | 32                           | 255                                             | 8.00 |
| Burlington & Northwestern.....                     | 20.35                        | 160                                             | 8.00 |

These reports are unquestionably correct, and yet they make a showing that surprises us. The Sioux City & Pacific can haul only eight net tons of freight to one ton weight of locomotive; the Kansas City, St. Joseph & Council Bluffs road can haul only 9.58 tons. These roads in Iowa have probably no grades to exceed ten feet to the mile. The Burlington & Northwestern hauls over grades from forty to fifty feet per mile eight tons to a ton weight of locomotive, as much as the former and but little less than the latter. This is the strongest argument we have ever known to be advanced in favor of the narrow gauge road. We would have some doubts of the accuracy of the statistics did we not know that they were carefully compiled by competent men, and conscientiously sworn to after examination by the very able managers of the respective roads.

#### CONGRESSIONAL LAND GRANTS.

The Chicago, Burlington & Quincy Railroad received from congressional grant 358,442.09 acres; they have sold 329,987.03 acres, at an average of \$12.22 per acre; they received from cash sales \$137,917.47; there is unpaid on outstanding contracts \$2,367,241.62; the gross amount from sales, contracts, etc., up to June 30, 1882, was \$3,976,559.42; the amount expended in the sale and management of

the lands, \$570,298.79; the taxes paid on them, \$242,011.97; the amount realized from the sale of lands above expenses incurred in the management and taxes is \$3,164,248.66.

The Chicago, Milwaukee & St. Paul road received from congressional grants 312,930.07 acres; about 15,000 acres more will inure to the company, not including about 180,000 involved in the suit with the Sioux City & St. Paul company. The number of acres sold is 245,214.57, at an average price of \$4.65; the purchase price of the land sold was \$1,139,456.48; the amount unpaid on outstanding contracts is \$666,022.27; the gross amount received, including outstanding contracts, is \$1,218,061.22; the amount expended in the sale and management of the lands was \$64,897.88; the taxes paid on the lands are \$23,464.34; the amount realized from the sale of lands above the expenses incurred in the management and taxes, including the amount unpaid on outstanding contracts, is \$1,129,699.

The Chicago, Rock Island & Pacific Railroad received from congressional grants 550,193.51 acres; sold 502,406.86 acres at an average price of \$8.25 per acre; received from sales, \$2,733,080.59; there is due on outstanding contracts, \$1,590,955; the gross amount received from sales and contracts up to June 30, 1882, is \$3,404,022.88; the amount expended in the sale and management of the lands is \$230,161.49; the taxes paid on the land, \$576,552.78; the amount realized from the sale of lands above the expenses incurred in the sale and management and the taxes is \$2,597,308.61.

The Iowa Falls & Sioux City road received from congressional grant 683,076.55 acres, has sold 583,265.64 acres at an average price of \$6.76 dollars per acre; the amount received from sales is \$1,513,202.56; the amount due on outstanding contracts is \$1,006,255.45; the gross amount received from sales, contracts forfeited, contracts, etc., up to June 30, 1882, was \$3,122,864.29; the amount expended in the sale and management of the lands is \$279,874.33; the amount of taxes paid on lands is \$613,160.72; the amount realized from the sale of lands above the expenses of management and taxes was \$2,229,829.24.

The Des Moines & Fort Dodge road received from congressional grant 35,545 acres, and there is yet to inure to the company 7,000 acres; 6,863.45 acres were sold at an average of seven dollars per acre; the amount received from sales was \$6,114.50; the amount unpaid on outstanding contracts is \$27,413.90; the gross amount received from sales, contracts, etc., to July 30, 1882, was \$18,154.76; the amount expended

in the sale and management of the lands was \$813.68; the taxes paid on the lands were \$2,407.60; the amount realized above the expenses of management and taxes was \$14,933.48.

The net amount realized from congressional land grants by the railroad companies to date of report is as follows:

|                                                           |                 |
|-----------------------------------------------------------|-----------------|
| The Chicago, Burlington & Quincy.....                     | \$ 3,164,248.66 |
| The Chicago, Milwaukee & St. Paul.....                    | 1,129,669.00    |
| The Chicago, Rock Island & Pacific.....                   | 2,597,308.61    |
| The Iowa Falls & Sioux City.....                          | 2,229,829.24    |
| The Des Moines & Fort Dodge.....                          | 14,933.48       |
| The Cedar Rapids & Missouri River (956,597.40 acres)..... | 63,961.60       |
| The Sioux City & Pacific.....                             | 200,000.00      |
| The Sioux City & St. Paul (report of 1878).....           | 786,919.43      |
| Total.....                                                | \$10,186,870.02 |

We have in a former report suggested that the management of some of these lands had not been such as to apparently produce the best results for the companies to which they were granted. This, however, has long been past remedy. The Railroad Commissioners of Illinois, under the authority given them by statute, have during the last year lowered the tariff of maximum rates in Illinois, and also changed the classification, reducing materially (estimated about eighty per cent), as we learn, the local rates in that State, and, as is claimed by many of the roads, brought the local haulage to a rate that hardly pays the actual ordinary operating expenses. It is not our province to discuss the wisdom of the acts of the Illinois Commissioners, nor is it probable that the *ex parte* statements or the views of those running the railroads are entirely correct and without bias, but we may, we think, without transgressing the bounds of comity, give expression to our views on the establishment of rates that would contribute nothing towards paying interest charges, or any return to the owners of the property in the shape of dividends, how they would affect the interests of Iowa, and all the other Western States whose products must pass through Illinois to reach their market.

That the State has the power to fix the rates has been so often affirmed by the highest authority that no question on that point now remains. It is the duty of the State when it assumes to regulate rates, to do so with a just regard to the rights and interests of the railway as well as the citizen—both parties are in the hands of the State, and have no appeal. The one has the right to reasonable rates for trans-

portation of himself and his property, the other to a reasonable remuneration for its services, which includes a fair return on capital, provided that it is reasonably and judiciously expended. If the local rates are made so low that they barely pay transportation charges, then whatever profit is made by the roads is from through traffic. If this principle is established in Illinois, there is no reason why Indiana, Michigan, Ohio, Pennsylvania, Maryland, Virginia, New Jersey, and New York, may not also require the through business to pay the entire interest on the railway property of those States. The extreme west must either bear the greatest proportion of this burden, or under ordinary circumstances retain its great staples at home, except so far as its producers are able to put them in the condensed forms that would increase their value, and reduce the percentage of freight to value.

In fixing rates, if this is the best method to reach the question, great care should be taken to cover the entire ground, every circumstance should be considered that goes to make up or modify rates. The commerce of the country is now largely carried by the railways, and no State, we think, for a little advantage can afford to use its position and power to fetter it, or disregard the general good of the country.

Iowa commerce passes over Illinois to reach the lake system and Eastern trunk lines. The Commissioners of Illinois vary very greatly in the uniformity of the rates they fix for the commerce of that State. When they are ranged very low the through freight must be taxed higher to equalize incomes. As great injustice can be done to our State by shifting the burdens of local State commerce in Illinois from where they belong, to rest on our through traffic, as by too heavy charges from Iowa to the lakes or trunk lines. Where the territory of one State lies between another and its market, it is evident that the power to arrange freight tariffs should not be wholly in the hands of State authorities. The United States Congress owes it to the States and their citizens to interfere to the extent to which State authorities may be disposed intentionally or insensibly to compel their neighbors to pay part of their transportation bills.

The growth of knowledge of the cost of hauling freight will indicate what the comparative cost should be of carrying local and through commerce. To violate this determination will suggest a remedy, as wrongs in State hauls are now being remedied by State authority, and wrongs in inter-State hauls suggest remedy by Congressional action. This is an additional reason why Congress should take

steps to bring inter-State commerce within rule and regulation, so that burdens may be equitably distributed between local and inter-State commerce.

REGULATION OF INTER-STATE COMMERCE BY THE STATE.

The Supreme Court of Iowa has decided in the case of *John A. Carton & Co. v. The Illinois Central Railroad Company*, that the State has not and can have no control over inter-State commerce. The language of the court is "that an act of the State legislature whose object and purpose is to control and regulate the shipment of freight to points in other States, is in violation of Art. I, Sec. 8, of the Constitution of the United States, as being legislation on inter-State commerce, a subject which in its nature is national and requiring the exclusive legislation of Congress. An inter-State contract of shipment entered into by a common carrier is an entire contract, and the laws of the State wherein it is made, so far as they attempt to regulate inter-State commerce, do not enter into it as a part of the contract, being repugnant to the Federal Constitution."

In the case decided, the act approved March 23, 1874 (being an act to establish reasonable maximum rates of charges for the transportation of freight and passengers on the different roads in this State), was in operation. There was a similar law in Illinois, and it was in evidence that the maximum rate in Illinois was lower than the maximum rate in Iowa. It was contended that the contract for shipping was an Iowa contract and followed the freight from the point of shipment to the point of delivery; that the Iowa contract could not be repugnant to any rights or interests of Illinois, as the maximum rate of Iowa was higher than of Illinois; that it was not in conflict with any law or right of the general government, because Congress had not attempted to regulate; the Iowa statute, it is true, had the effect of regulating inter-State commerce; it was enacted in the exercise of a power vested concurrently in the State and National governments, and as it was not in conflict with any law of the general government, it cannot be regarded as an encroachment upon its authority. Until Congress assumes to exercise authority over the subject, it is proper for the State to legislate upon it.

The court held that it was not the intention of the Iowa statute to do more than fix the maximum rates to be charged on

freight shipped within the State. That the fixing of rates of freight shipped from one State to another is a regulation of inter-State commerce; that it is a regulation in conflict with the Constitution of the United States, which gives to Congress the power to regulate commerce among the several States. The court admits that it is competent for the States, in the absence of congressional legislation, to legislate respecting inter-State commerce in a certain line of cases, but these cases have been such as relate to bridges, or dams across streams wholly within a State, police laws relating to pilots of vessels, health laws, and the like, but that the power to enact laws upon subjects in their nature national, and not merely local, is exclusively with Congress. That the holdings of the Supreme Court of the United States in the Granger cases does not sanction the validity of the act of the State legislature, if intended as such, regulating commerce between the States. These decisions determine the power of the State to fix the limit of reasonable warehouse and transportation charges within the boundaries of the State, and when such power is exercised, although it may incidentally affect commerce between the States, yet the laws of the State are not regulations of inter-State commerce because of such incidental results. If the Iowa law became part of the contract for shipment, we would have it control the transportation of freight to its destination, even though it passed through several lines of carriers and several States, the local distance carried being only a small part of the distance. The court held that such regulation should be national in its character.

Judge Beck dissents, and in a minority opinion suggests that the Constitutional prohibition extends only to those regulations that impose burdens and restrictions upon inter-State commerce; that the statutes that remove burdens and restrictions, which protect it from the unjust exactions of common carriers, are not regulations of commerce contemplated in the Constitution of the United States. He further says that the intention of the statute of the State brought in question was of this character, and that it operated to protect and stimulate commerce.

The transportation question is a broad one. While much good has probably resulted from a knowledge of, and a decision that the States have the power to regulate, yet it is a question whether more interests have not suffered from the exercise of this power than have been benefited by it. The Granger tariff of 1874 seems to have been as nearly

framed to meet the needs of the time as any tariff that was entirely without elasticity could be, and yet we understand the popular verdict after four years of trial was that it was a burden rather than a benefit to commerce.

The Supreme Court of Illinois, in a case brought before it, held the other view from the Iowa court. Messrs. Bailey & Swanell, of Gilman, Illinois, complain that the Wabash Railway Company charge them twenty-five cents per one hundred pounds for freight from Gilman to New York, while their charges for the same class of freight from Peoria to New York, which is a greater distance, was but fifteen cents per one hundred pounds. The defense was that the legislature of Illinois did not, and had no power to, pass a law regulating the charges for the transportation of property from a point within the State of Illinois to a point within the State of New York. The power of the State to fix rates was really the only question involved. The court says that section 8, Article I, of the Federal Constitution, which declares that Congress shall have power to regulate commerce among the States, does not refer to cases of this character; that the law of a State that may incidentally affect commerce between the States has never been regarded as falling within the inhibition. The court says that the law does not purport to exercise control over any railroad corporation that does not operate a road in the State, or such companies as have domestic relations with the State. It quotes from the opinion as rendered by Chief Justice Waite, in the case of *Peik v. The Northwestern Railroad*, as to the effect of the statute as a regulation of inter-State commerce, that the statute was not passed for the purpose or with the view of regulating commerce among the States; its object was to reach railway companies which derived their powers to transact business from the State. The Wabash company is engaged in State as well as inter-State commerce, and the State must be permitted to adopt such rules and regulations as may be necessary for the promotion of the general welfare of the people within its own jurisdiction, even though in so doing those without may be incidentally affected. Should Congress pass a law regulating the charges of railroads engaged in inter-State commerce, it may be that Illinois would be confined to charges for the transportation of property wholly within the State, but no such law has been passed.

We have examined the two decisions, and the diametrically different conclusions are evidently to a great degree influenced by the construc-

tion put on the meaning of the statement of the opinion of the court in the case of *Peik v. The Northwestern Railroad*, where it says "the law "is confined to State commerce, or such inter-State commerce as directly "affects the people of Wisconsin. Until Congress acts in reference to the "relations of the company to inter-State commerce, it is certainly in the "power of Wisconsin to regulate its fares so far as they are of domestic "concern. With the people of Wisconsin this company has domestic "relations. Incidentally they may reach beyond the State, but certainly "until Congress undertakes to regulate for those without the State "Wisconsin may provide for those within, even though it may indirectly affect those without."

We think the construction of this section by the Iowa Supreme Court to be the correct view. Wisconsin may fix a maximum rate of fares and freight transportation within the State. Even if this rate should incidentally (for the purpose of paying interest or dividends upon the property invested in the road), increase the cost of through transportation, the Supreme Court of the United States would not hold it to be a regulation of inter-State commerce,—its relation is purely domestic, and the company, whether chartered by the State, or operating a road in the State under the sanction of State authority, has such domestic relations as would authorize the State legislature to fix rates within the State. The court held the relation of the lessee to the State was the same as if the company was chartered by the State. We are the more convinced of the correctness of this view, from the treatment of the subject in two cases subsequently decided by the United States Supreme Court: *Hall v. De Cuir*, and *Railroad Company v. Hannan*, reported in 95 U. S., 465 and 485. These cases go to the extreme the other way, determining that even in the exercise of police regulations, and for purely sanitary purposes the State may go beyond the proper limit, even in matters over which it is conceded that the jurisdiction belongs to the State.

In the latter case the court says "whatever may be the power of a "State over commerce that is completely internal, it can no more prohibit or regulate that which is inter-State, than that which is with "foreign nations."

We understand that the Wabash company terminates its lines at Toledo, and that the larger portion of its freight reaches New York over the lines of the Canada Southern and the New York Central roads. A regulation by the State of Illinois of rates to New York

might dictate rates to both these lines. There can be no pretense that the legislature of Illinois could fix or enforce rates on a Canada road, and we think it equally true that it could not on a New York road. The former derives its charter from a foreign nation, which alone has the power to fix its charges and regulate its business; the latter road is entirely within the limits of the State of New York, and subject solely to its control.

#### FREIGHT WAR OF RATES IN 1881.

During the month of July, 1881, a war of rates broke out between the trunk lines connecting the West with the sea-board, and continued during the remainder of the year. Rates were reduced to a point that the loss of net earnings for the six months was estimated at more than six millions of dollars below what had been regarded a reasonable rate. The danger of such a loss inflicted upon the railroad interests, the failure to earn dividends, and the consequent depreciation of so large an amount of property, led them to terminate their differences by compromise. After squandering their resources in fighting, the solvent roads of the country always end their difficulties this way: the insolvent roads having no interest to pay, and no dividends to provide for, continue the fight until they are absorbed by some strong line. It was not very difficult to settle upon the proportion of through freight to which each line was legitimately entitled, but a new question arose, or rather a solution of an old question on a different basis arose, which was termed

#### DIFFERENTIAL RATES.

Or, in other words, the representatives of the New York lines claimed that the rates from the West to New York should be the same as those to Philadelphia and Baltimore, the difference having been before the July contest two cents less to Philadelphia, and three cents less to Baltimore per one hundred pounds. Some difference had hitherto been satisfactorily based on the difference of ocean freight from New York, less that from Philadelphia and Baltimore. It was claimed by the New York roads that by improved facilities at the latter places for receiving, hauling, and loading, and fortunate arrangements with the steamship lines, that the ocean freights had become nearly the same from all three ports. The representatives of the lines terminating in New York were well satisfied with the different rates, until the possibility of losing a large amount of their business dawned upon them.

The city of New York was aroused, and the controversy was carried from the railways to the terminal cities, the public in each demanding that the railways should protect the interests of their respective cities.

#### AN ADVISORY COMMITTEE.

An advisory committee was appointed by the officers of the four roads interested, consisting of Messrs. Thurman, Washburn, and Cooley, to determine whether uniform rates should be adapted to each of the three cities, or whether differential rates, and to what extent, should be maintained. The railway companies stated the case to the commissioners, and volunteered to furnish them any information that peculiarly belonged to their lines, whenever called for, and seem to have left the people interested to furnish the commission the facts and circumstances that affected their localities. The Produce Exchange, Board of Trade, and Chamber of Commerce of New York, and similar organizations in Philadelphia and Baltimore furnished the commissioners statistics, industriously collected, and supported their positions by arguments carefully and thoughtfully prepared, as the representatives of cities whose life blood, their commerce, might be gradually sapped by an unfavorable policy recommended by this commission. In July, 1882, the commissioners made their report, and the railway companies have accepted it as the basis of their action. Their report continued for the present the differential rates previously in force, and concludes with a striking suggestion, that although the rates are just and proper to-day, it does not follow that they will be just indefinitely, and that whenever they shall be found to give a forced or unnatural direction to trade, or whenever they shall deprive any of the seaports of the proportion of business that would naturally come to it under the operation of normal competition, then it would be right to modify or abolish them.

These gentlemen examined and discussed the principle of mileage and thought this was not the basis to determine the question upon; they studied the effect of competition and concluded that it was not the basis; they examined the cost of service rendered, and concluded that this was the proper basis; but they did find that the ocean freights during the year 1881, averaged from Philadelphia two cents per hundred pounds, and from Baltimore three cents per hundred pounds more than they did from New York by steam and sail vessels, and that under this condition there was no evidence that Philadelphia and

Baltimore business, to which the differentials were applicable, is now increasing more rapidly in proportion than New York, and concluded that so long as this condition lasted the rates were right. We think they have settled the question in the only way that it can properly be done, taking the entire western freight of grain or other produce from Chicago and the Mississippi and Missouri River points to the final market, Liverpool or London, and give to each of the Atlantic cities the through rate less the ocean freights. They further suggest that accurate statistics of the railway commerce be kept, and that they be furnished to the public. Publicity they claim will correct many of the evils of which the people complain. They do not think that questions of this character can be determined arbitrarily, but that large powers of self government have been left by law with railway managers, and it is their duty to serve the public with fairness, and to distribute the benefits and burdens incident to their occupation fairly and justly.

These gentlemen reached the conclusion that all men who have thoughtfully and impartially studied the subject have hitherto arrived at, that the questions that arise in solving the transportation problem cannot be decided or settled aright by any inflexible law or preconceived opinion; that they are so varied in character and surrounded by such a multiplicity of circumstances that each case must be determined separately and by itself; must be studied with reference to underlying principles and conditions that fail to attract superficial notice.

A careful study of transportation as it affects the industries of Iowa will suggest that volume of products seeking transportation, and location of competitive producers has much to do with cost of carriage. A car load of butter is shipped from central points in Iowa to the eastern sea-board with profit to the carrier at one cent a pound. A dairyman living one hundred miles from the same destination pays more than one cent a pound. The volume of the product in Iowa is such that it is desirable business to haul butter by the car load at one cent a pound, while the hauling of small lots at more than a cent a pound one-tenth of the distance may not be profitable to the railroad doing the service. On the other hand, if Western butter paid charges per pound according to distance hauled it could not be profitably manufactured. With regard to location of competing producers in relation to the market in which they sell it has been determined from experience that like products from Iowa factories must reach

their common market at nearly the same rates, or the ones farthest from market will be shut out by the larger rate. When New York is the market for cured meats Iowa packing-houses must have nearly uniform rates—half a cent a pound takes cured meats to the sea-board from Iowa—and from one county as cheap as another; they must have rates about as low as packing-houses located in States farther east, and on products sent west of the Missouri rates from Illinois are made nearly as low as from Iowa. Factories located in Iowa making farm machinery require low rates on raw material that will enable them to compete in Iowa with the same products manufactured in States farther east where material is cheaper. This principle is at the basis of all manufacturing in Iowa, and interference with it beyond insisting on like rates for like customers for like uses would stop most of the wheels in the State. Classification of roads cannot interfere, neither can distance be closely estimated. A weak railroad must give as favorable rates as a strong one or the new industry will locate on the strong road. Carrying done for new manufactures is based to some extent on future prospects; while it may need special favors from a railroad that could not be extended to all freight of the same class, its prospective business when developed will justify the anticipation of lower rates on all freight, as increased freight always brings about lower charges.

It would be well for the public and the railway system if Congress should pass a commissioner law and place upon the commission men of the learning, fidelity, and fairness of these gentlemen to determine the differences that arise between the people and the railway corporations. The student of the railway problem fears congressional or State legislation that would tend to abridge the freedom of commerce, by prescribing rules or enactments made by the most fair and expert legislators. With all the ability with which the subject has been studied for the last fifty years, no rule has yet been found that would give the cost of any special service, although the railway managers have made every effort to arrive at it. They know that by charging high rates for carrying valuable articles, and low rates for cheap articles, that the business can be done satisfactorily, and if the volume of business is sufficient the road can be profitably operated. A computation of averages is the nearest approach to cost arrived at.

It may be proper to give the means of forming a correct idea of the volume of business carried by the roads whose differences these com-

missioners have settled. The New York Central & Hudson River Road, in 1881, carried 11,591,379 tons of freight, which is 996,205 tons more than was carried on the six thousand three hundred and thirty-seven miles in the State of Iowa. The cost of handling this freight per ton per mile was .562 cents, the charges .780 cents, leaving a net profit of .218 cents per ton per mile. The Erie road moved 11,086,823 tons at a cost per ton per mile of .529 cents, at a charge of .805 cents, leaving a net profit of .276 cents. Fifty-two and one-half per cent of all the freight handled by this company for the year 1881 was coal. The Pennsylvania road, in 1881, moved 18,229,365 tons at a cost per ton per mile of .437 cents, at a charge of .799 cents, and a profit of .362 cents. We have no means of determining what proportion of this freight was coal, but presume about as large as the Erie. We have not the tonnage of the Baltimore & Ohio road for the year, but judge that it will not fall short of the Erie—five millions of this tonnage is reported as coal in Poor's Manual.

It is by the rate charged on these lines that the values of Iowa products are measured more than by local rates. The people of Iowa are specially interested in low rates for long haulage.

Reduction of cost and annihilation of time comparatively have brought the Iowa farmer and the eastern consumer closer together, resulting in the steady rise of Iowa lands. The reduced cost at which our products are placed in European markets, has a tendency to equalize the value of land here and abroad. The value of lands abroad has for a number of years gone steadily down, while the value of our lands goes steadily up. There is good reason to expect a continuance of this condition regarding landed property as the volume of traffic increases and the rates consequently go down. Cheaper money and plentier home capital will compete while there is profit in the carrying trade.

#### MR. VANDERBILT'S SUGGESTION.

Mr. Vanderbilt is credited with at one time having made the assertion "that railroads take all they can get." This frank acknowledgment has been the theme of censure, and the public have looked with anything but favor upon the avowed greed of the representative of one of the great corporations.

The idea of Mr. Vanderbilt is more aptly expressed by the railway manager in the phrase "what rate will the commodity bear?" The freight agent who is seeking to transport any class of produce from

one point to another, must make his rate with reference to the value of the commodity where he gets it, and the value at the points to which he sends it, and the prevailing rates from other points that are competitive, as well as values at those points; from these he can determine what rate the produce will bear and he must either take it at that rate, or not move it at all. It is true, as can be shown, that his roads, the New York Central, reduced its rates from 2.743 cents per ton per mile in 1868 to .879 cents in 1880. The Lake Shore from 2.336 in 1868 to .758 cents in 1880. The Michigan Central from 2.450 in 1868 to .842 cents in 1880. These wonderful reductions in twelve years of sixty-six per cent have not by any means been due to any special concession to the public welfare, but to the fact that his roads had the capacity for an immense business, with a full equipment, but at the same time the freight must be carried at such rates as it would bear, or abandoned to his rivals. His interests were served by moving freight which would have availed itself of lake and canal transportation if he had not offered rates that made it desirable to ship it over his roads. A fuller illustration of the correctness of his statement is shown in the railway classification. Valuable goods are classified differently and charged higher rates, not merely for the insurance risk, nor that the cost of carriage is any greater, but that they will bear the higher rate without being materially felt by the shipper on account of the slight percentage of freight to value. Products of small value that will hardly bear transportation charges, are often moved at no profit, at times when business is dull. It is often found to be policy to keep men employed and cars moving if the freight pays simply the cost of transportation.

The roads reporting to this Board give a total of equipment of 2,562 locomotives and 85,206 cars, or a total value of about \$50,000,000. This is probably not far from the value of the equipment of the roads controlled by the Vanderbilt parties. The interest on this equipment at six per cent is \$3,000,000 per year, or \$8,219.18 per day. It is all important to keep this property employed, and the lowest rate can be made when all cars are fully loaded in both directions, and when all the wheels are kept moving.

Our views on this subject are expressed very fully by Edward Atkinson, one of the ablest collectors of statistics in this country, and one of the most philosophic writers on the relations of the railroad and the producer. He says "it cannot be too often repeated that the railway

"and the steamship have eliminated distance. The Western farm and Eastern work-shop, the Southern plantation, and the Northern factory have been brought near each other, and in the process the very lines of railroad that have been most profitable to their owners, are the specific lines that have performed the largest service at the least cost to those who use them. One day's wages of a common mechanic in Massachusetts, will pay the cost of moving his year's subsistence from Chicago to Boston.

"When we consider this we may realize that Mr. Vanderbilt, and his associates who led the way to the consolidation of railway service and thus rendered low costs possible, were the great communists of the day. They brought a community of subsistence, and carried abundance to the door of the common laborer. For every cent they earned in the railway traffic and added to their great fortunes, the people have saved a dollar's worth of labor in the work of earning their subsistence by the reduction of the charges that steadily accompanied the increase of the traffic upon the railroads. It matters little whether their motive was of pure selfishness, or enlightened self-interest, the result is the same."

#### RAILROAD REPORTS.

Mr. Poor in his Manual for 1881, suggests that all railroads be required to report at one time. We might add that if some system of accounts that would cover all statistical information needed could be adopted, and uniformly reached, comparisons of great value could be made, and correct ideas of the cost and value of the service be obtained. This Board has struggled through five reports, and sought in every way to secure uniform information. The answers to very many questions asked being derived from different methods of keeping accounts, have been far from satisfactory, and very many things have been of necessity estimated by the Commissioners. If all the roads would make their reports on the 30th of June, and adopt the system recommended by the Railroad Commissioners, or some other, the information furnished would be the same from each, and the reports would give a much more intelligible statement of facts and conditions.

#### STRIKE OF THE FREIGHT HANDLERS IN NEW YORK.

During the past summer there was a strike among the men handling freight at the depots of the roads in New York. The strike was general and seriously hindered the forwarding of goods. We have no means

of knowing whether the wages paid these men were suitable compensation for their services or not. A strike is always unfortunate for the laborer who loses his time, and the employer who suffers in about the same ratio. It would seem that some plan might be devised by which the equities could be reached without this loss. The public, we think, rather sympathized with the freight handlers, and the commercial organizations of the city showed a strong disposition to force the railways to terms at advanced rates. The difficulties were finally adjusted in accordance with the law of supply and demand, which seems to be the final arbitrament of all such difficulties.

#### CAPACITY OF FREIGHT CARS.

Until within a few years the freight cars of the standard gauge roads were not allowed to carry more than ten tons of freight, and any excess of this amount was charged double rates as a penalty for overloading. The generally received opinion of the railroad manager was, that this was about the limit of capacity for eight wheeled cars. These cars then, as now, weighed not far from ten tons.

The introduction of the narrow gauge was heralded by the claim that the amount of dead weight was less to the load than could be carried on the standard gauge, the original cars weighing about five tons being rated for loads of seven and one-half tons. This seems to have set the reflecting railway manager to thinking whether the cars of the standard gauge might not be arranged to carry a similar proportion of tonnage to dead weight. The result has been that at the present time but few eight-wheeled cars of standard gauge are built with a carrying capacity of less than twenty tons. This seems to determine that there is greater economy in moving freight in cars of the greatest carrying capacity. This is one of the reasons why the rate per ton per mile is being reduced, as but little more power is required to haul thirty cars each loaded with twenty tons than loaded with ten tons. The expenses for train men are the same, and the cost and maintenance of cars about the same. If the narrow gauge road had done nothing more than educate the car builder and the railway manager as to the capacity to which cars could be increased with safety, it is worth to the public and the railway system all that it has cost.

A committee was appointed by the Master Car Builders Association to examine and report whether the carrying capacity of freight cars could be safely increased above twenty tons. They issued a circular in

which they state some of the most important advantages to be gained in transporting any given amount of tonnage in thirty ton cars, less cost of cars, of repairs, of dead weight, less number of way-bills, shorter trains, shorter side tracks, less number of brakes, journals to oil, wheels to inspect, and less number of train men. They submit the following table, showing the number of box cars required to transport 1,000 tons of freight, the cars of different capacities:

|                                                                           | With ten ton cars. | With twenty ton cars. | With thirty ton cars. |
|---------------------------------------------------------------------------|--------------------|-----------------------|-----------------------|
| Number of cars to carry 1,000 tons .....                                  | 100                | 50                    | 34                    |
| Weight of cars to carry 1,000 tons .....                                  | 1,000              | 550                   | 412                   |
| Length of train to carry 1,000 tons .....                                 | 3,100              | 1,550                 | 1,400                 |
| Cost of cars to carry 1,000 tons .....                                    | \$ 57,000          | \$ 30,000             | \$ 21,450             |
| Number of brake shafts, levers, and connections to carry 1,000 tons ..... | 500                | 250                   | 170                   |
| Number of brake heads, shoes, and wheels to carry 1,000 tons .....        | 900                | 450                   | 306                   |
| Number of brake beams to carry 1,000 tons .....                           | 200                | 100                   | 68                    |
| Number of draw-bar stops to carry 1,000 tons .....                        | 800                | 400                   | 272                   |
| Number of draw-timber fixtures to carry 1,000 tons .....                  | 400                | 200                   | 136                   |
| Number of draw-bars to 1,000 tons .....                                   | 200                | 100                   | 68                    |
| Number of bolster and draw-springs to 1,000 tons .....                    | 600                | 300                   | 204                   |
| Number of journal bearings to 1,000 tons .....                            | 800                | 400                   | 272                   |
| Number of journal boxes to 1,000 tons .....                               | 800                | 400                   | 272                   |
| Number of axles .....                                                     | 400                | 200                   | 136                   |
| Number of wheels .....                                                    | 800                | 400                   | 272                   |
| Weight of tracks .....                                                    | 450 tons.          | 250 tons.             | 175 tons.             |

The committee submits a series of questions to the master car builders of the various roads, of which the following is the answer in at least three-quarters of the replies: That the difference between the cars of the capacity of twenty tons and ten tons, so far as wear and breakage of wheels, is very little; that greater weight is required in wheels, but not much; that the extra wear of journals is slight, if any; that there are no more hot boxes nor is better oil required; that the repairs to cars generally are no greater; that there is no more tendency to deflection in car bodies; that cars from thirty-four to forty feet in length can be run as safely as shorter. About one-half think the carrying capacity could be increased from twenty to thirty tons with economy, and that the size of journals and weight of wheels should be increased over the master car builder standard. The others seem to regard the twenty ton car a success, and think it unwise to

attempt to enlarge the capacity beyond that point. They were unanimous in the opinion that 1,000 tons of freight could be hauled with greater economy in twenty than ten ton cars.

The committee concluded that freight can be carried in thirty ton cars with as much safety and greater economy than in cars of less capacity, and recommend the building of a few cars as an experiment of thirty tons capacity, increasing the weight of wheels to five hundred and seventy-five pounds, and use the master car builders' standard axle, or a larger size.

The conclusions of a majority of the men who have devoted the most time and thought to this subject are valuable, interesting, and if correct, will go to form another factor in cheap transportation. The limit of weight in this case is probably a little more than five tons to the wheel. This is considerably less than the weight of the locomotives generally and successfully introduced on most of the roads. The general use of cars carrying thirty tons would be a reduction in the carriage of every thousand tons of paying freight, of the haulage of five hundred and eighty-eight tons of dead weight, or nearly sixty per cent over the ten ton car, and one hundred and thirty-eight tons or twenty-five per cent over the twenty ton car. The extra power required to haul the dead weight of the car has always been one of the heaviest burdens imposed on products that must be moved by rail. The effect of strong winds on a long train, particularly in a prairie country, has also seriously decreased the moving capacity of a given power. A thirty ton car would probably be as little affected by this as a ten ton car, and the percentage of its moving capacity would be correspondingly increased. The low grades, the steel rail, and the minimum percentage of dead to paying weight are three important factors in cheap transportation.

#### CONGRESSIONAL REGULATIONS.

There have been many suggestions as to congressional legislation in regard to railroads, and a multiplicity of views advanced. The Hon. Charles Francis Adams, Jr., prepared a bill for the last Congress by which he proposes to establish a bureau of the Interior Department, consisting of three commissioners who should exercise a supervision over that portion of the business of railroads that passes from one State or Territory to another, but limiting the supervision to questions of commerce between the States, and the methods of operation affect-

ing it. The duty of the commissioners was to investigate all complaints of discrimination of charges, or method of rendering service as a common carrier in commerce between the States by any railway corporations, to furnish copies of their findings to the railway companies, and the parties complaining, and also to the Secretary of the Interior.

The board should endeavor to procure the data necessary for the gradual enactment of an intelligent system of national legislation regulating inter-State commerce, and was required to make an annual report to the Secretary of the Interior.

The bill varies but little in the underlying principles from the Iowa Commissioner law, which was framed mainly from the Massachusetts law, probably Mr. Adams's plan, after having studied the workings of the commissioner system in England.

To use his own words, "the policy of Great Britain adopted in 1865, "was an expectant one. The railroad system was to be left to develop "itself in its own way as a recognized monopoly, held to a strict accountability as such. Whenever it should appear that it abused its "privileges and power, then the time for action would have arrived. "To better watch over it an exceptional piece of government machinery was provided in the form of a board of commissioners, whose "duties were to hear complaints of private parties and intervene in "cases of difficulty between the companies themselves."

#### THE REAGAN BILL.

Mr. Reagan introduced a bill in Congress on December 19, 1881, which made it unlawful for the railway companies to charge or receive any greater or less amount of compensation from one person than another for like and contemporaneous service; that all charges must be reasonable; that all services shall be performed alike for all parties; that no rebates or drawbacks should be allowed; that pooling freights on different and competing roads, or any contract or agreement between them as to rates, should be unlawful; that schedules of rates, containing the classification, the stations, and the charges for hauling, storing, and handling, shall always be kept posted; that no schedule shall be changed until copies of the new schedule shall have been posted at least five days; and it shall be unlawful for any company to charge or receive either more or less than the schedule rates; that it shall be unlawful to charge more for a shorter than a longer distance

in one continuous carriage. That for a violation of this act, the corporation shall pay to the party damaged by greater charges, three times the amount of damage sustained, which in no case shall be assessed at less than five hundred dollars; and for each offense in addition, a penalty of one thousand dollars shall be recovered by the United States, one-half of which shall go to the informer; that it shall be the duty of the United States District-Attorney to prosecute, and the action shall be in the nature of an equity procedure; and that the parties accused shall be compelled to testify against themselves, and produce books and papers for the purpose of convicting themselves. The directors, officers, and managers, or agents, are made liable if they directly or indirectly aid or abet any infraction of the act, and are to be fined not less than one thousand dollars for each offense. The bill refers to car load lots, and is confined to inter-State commerce. It makes one exception: the roads may carry for the United States at less rates than for the general public. Many other bills were introduced, but generally betrayed a total lack of information or thought upon the subject, so that it is reasonable to suppose they were gotten up for home distribution, without any expectation of their being acted upon. There is, however, one exception; Senator McDill, of Iowa, introduced a bill in the Senate which provided for a board of railroad commissioners, three in number, one of whom should be a civil engineer with practical railroad experience, one familiar with the agricultural, commercial, and manufacturing interests of the country, and one a specialist in railroad questions or of approved legal attainments. That this board shall exercise a supervision over the transportation companies, limited, however, to inter-State commerce, whenever called upon to do so by the railroad commissioners of the several States, and all discriminating charges shall be investigated if desired by the complainants at the place where the cause of complaint originated; that it is the duty of the board to collect statistics bearing on inter-State commerce, and it may require annual reports from all persons or corporations engaged in inter-State commerce; that on the first day of October of each year, the commissioners shall make a report of their doings to the President of the United States, embodying such facts, statistics, and data, as are deemed important for the proper regulation of inter-State commerce; that the commissioners, in all cases of complaint of a violation of law, or the failure to perform the duties of a common carrier of inter-State commerce, shall give notice of their find-

ings to the parties interested and report the same to the President with recommendations in relation thereto; that every unjust discrimination against persons or places, that all extortions, that all concessions of rates or drawbacks, and all devices whereby one shipper or locality is given an undue advantage over another, are declared to be against public policy, and it is specially the duty of the commissioners to investigate such cases and report them fully in their annual report.

The bill introduced by Mr. Reagan met the combined hostility of the entire railroad interests of the country. It was contended that this bill prevented any discriminations; whether just or unjust; that the entire transportation business, to be a success, must be discriminatory in its character,—high rates were charged on valuable goods largely in excess of the cost of transportation and insurance, in order that more bulky and less valuable property could be moved at low rates. It was contended that the railroads were now carrying the products of the country cheaper than any form of railway transportation known; that the tendency of the bill would be to destroy the elasticity of the system; that the rates under the provisions of the bill must necessarily be increased. It was claimed that the pooling of earnings forbidden by the bill was beneficial rather than detrimental to the public interests, the pool being defined as “an agreement among them for each to accept as its share of the competitive business at a moderately remunerative rate common to all, what shall be judged to be its just proportion by an umpire or board selected by them all to make such apportionment.”

If every business interest is better served by reasonable uniform and steady rates than by those subject to constant and often extreme fluctuations, if every market is accessible to the shipper and variation of rates to different points due only to natural or acquired advantages, then their reasoning is correct, and any law prohibiting pooling works a hardship on the railway and the shipper. The railway companies object to being held strictly to posted rates; they claim that it is absolutely necessary to vary their rates at times to meet circumstances that constantly arise; that no one can be injured by change of rates if all parties under similar circumstances are treated alike.

Mr. Depew, in an argument before a railway committee of the New York legislature, gives the following illustration: They quarry the stone and manufacture cement at Roundout, a station on the line of the New York Central & Hudson River road. A large contract is to

be let at Indianapolis; at Louisville, within one hundred miles of Indianapolis, they manufacture cement as cheaply as at Roundout; the Roundout manufacturer can only compete for this contract by getting rates to Indianapolis as low as the Louisville manufacturer does. The New York Central and connecting lines, by carrying the freight at less than cost, enable him to get the contract; an important industry is kept going and sustained by this and like concessions; a large population is kept employed; the railroad company gets its pay by charges for supplying this community with what they eat, drink, and wear. His road does the same for the iron-smelter; it carries ore to his furnace for less than cost; a village is built up and a population brought together that pays back to the railroad for supplies and otherwise, largely more than the loss on the transportation of the ore. If every article must be carried below cost, because the iron and cement were, then the cement man and the iron man must either abandon their business or reduce its proportions to paying rates. The railway company and the locality, he claims, are both benefited by this low rate, and no one injured thereby, unless it may be the Louisville man, who has no business relations with the road.

If the manufacturing interests of Iowa are developed to any great degree it must be by the extension to them of special rates, and the only way in which the Iowa manufacturer can succeed is by special rates, to enable him to meet his competitors on equal terms. If the oat-meal manufacturers of central Iowa, as they have done recently, can place their goods in London and Glasgow for fifty cents per one hundred pounds, they can compete with the Scotchman on his own ground and in his own product; otherwise the oats must be fed to stock at home in the place of cheaper food. The railways get their support from the communities and interests they help to build up, and no other industry suffers if under similar circumstances all are treated alike.

For a violation of the law heavy penalties are enacted, one feature of which is peculiarly distasteful to fair minded men, that is the provision that one-half the penalty, which shall in no case be less than one thousand dollars, goes to the informer; that congressional legislation should, in cold blood, set the spy and the informer to destroying the prospering industries of the country, is to us monstrous. This character at his best estate is detestable, and if in the prosecution of criminals he is sometimes necessary, it is no reason why he should

be injected into, and made an instrument to rob the industrious. If parties are injured by the violation of law by these corporations, it is proper that their losses should be repaid, and that in addition they should be paid their reasonable expenses incurred in obtaining their rights; beyond this they have no legitimate claim, and any attempt to give them more is a more serious offense against justice than in charging them a higher rate for railway service than some one else. We regard punitive damages in this character of cases as injurious, and an exercise of arbitrary power utterly at variance with the principles of commercial legislation.

The exception to the ironclad law that railways may carry for the United States cheaper than for anyone else, is a striking proof that the underlying idea of perfect equality in all things should be sometimes varied. Why the government that makes the law should offer itself as the only exception to its provisions may be a subject of profitable study.

The bill offered by Senator McDill, like that of Mr. Adams, provides for a board of railroad commissioners. These two gentlemen have both served some time as railroad commissioners, and have educated themselves upon this subject with the same surroundings; both have spent years studying the subject from a philosophical standpoint, and with an eye to the best interests of their respective States and the general good of the country, have sought to fasten upon the transportation companies only such restraints as would benefit the public without injuring the service; that they have done this intelligently no one will question.

Senator McDill makes the commission an independent body and requires reports to be made to the President direct. Mr. Adams makes the commission a bureau of the Interior Department, and requires reports to be made to the Secretary. We think Senator McDill's bill is better, as the subject is too important to be made subsidiary to any of the departments. Senator McDill defines what shall be unlawful in the way of unjust discrimination, extortion, special rates, devices whereby one shipper receives an unjust advantage over another, and declares them to be against public policy. Mr. Adams leaves the determination of these matters to the commissioners. They both evidently contemplate a commission of high character as to its *personnel* and leave much to be developed in its workings. Both contemplate that this board shall collect the data from which an intelligent system of National legislation regulating inter-State railroad commerce shall be evolved.

## DOMESTIC EXPORTS.

Mr. Nimmo says that the value of the domestic exports of the United States for the year ending June 30, 1871, was \$442,820,178; for the year ending June 30, 1881, was \$902,319,473, or an increase of \$459,499,295; that this increase is chiefly in the products of the Western and Northwestern States, a large proportion of which was transported to the sea-board by railroad, and he credits much of this increase to the reduction of rates from the Mississippi and Missouri rivers to the ocean. He says they were reduced from 1.77 cents per ton per mile in 1873 to 1.07 cents per ton per mile in 1881, a decrease of thirty-nine and one-half per cent.

No stronger argument could be presented to show that inter-State commerce flourishes best with the fewest restrictions possible, and it must be admitted that the West has been enriched by its freedom.

## FREE CANALS IN NEW YORK.

This Board learns with great satisfaction that the amendment to the Constitution of the State of New York was passed at the November election by more than two hundred thousand majority. The effect of this is to free the canals from tolls and maintain them at the expense of the State. This course was probably necessary to hold the supremacy of the port of New York and prevent the grain of the West from seeking an outlet for Europe at New Orleans or other ocean ports.

We regard this as a great and permanent gain for the Western States, and a constant and reliable avenue for cheap transportation. The canal will always act as a regulator of rates from Chicago to New York, and will never furnish less facilities than it does now. It may in the future be so enlarged that the lake vessels will carry their cargoes to New York instead of making the transfer at Buffalo.

The influence the improvement of transportation facilities in one section of the country has upon another, is aptly illustrated by the abolition of tolls on the State canals of New York. The improvement of the Welland Canal and the deepening of the mouth of the Mississippi River naturally induced New York to look to her commerce. Cheapening of carriage over a part of the route to the sea-board will decrease the price paid to the producer, and the farther improvement of the Mississippi and tributaries will have a tendency to reduce far-

ther the cost of transportation, not only over that commercial highway, but over all competing routes to the sea-board.

#### POOLS.

During the summer past the Northwestern, the Chicago, Rock Island & Pacific, and the Chicago, Burlington & Quincy railroads meeting at Des Moines, disagreed concerning the distribution of freight, and a war of rates followed continuing till October, disturbing business for one hundred miles wherever Des Moines merchants competed with others within that distance.

The Chicago, Milwaukee & St. Paul, the Chicago, St. Paul, Minneapolis & Omaha, the Chicago, Rock Island & Pacific, the Burlington, Cedar Rapids & Northern, the Minneapolis & St. Louis, and the Illinois Central railroads operating in Iowa, are now cutting rates wherever they come into competition, disarranging business entirely throughout the State.

There is something startling in the reflection that the business of the whole Northwest should be deranged by misunderstandings between railroad men relative to their share of freight and passengers at given points, and the several deleterious results that attend and follow a war of rates are far reaching in their consequences. Weak railroads, built as competing lines are wrecked, and the investment lost to the owners. Merchants are ruined or paralyzed, when competitors can get goods for as much lower freights as more than equal customary profits. Non-competing points must make good the loss endured at the points where the cut rates carry freight and passengers for less than cost. Every station within competitive distance pays higher rates and suffers in consequence. Producers are charged too much at non-competing points, and the profits of their business unjustly curtailed, or entirely appropriated. Uncertainty prevails regarding future enterprise. Dissatisfaction ensues, and a sense of wrong results. There is no practical remedy under any existing law for any of the abuses mentioned. If a railroad cannot stand out against a stronger one it must succumb, and be eventually incorporated with some stronger line, thereby lessening the number who control our transportation systems. It is difficult to lay down a rule that would prevent unjust discrimination at every point, and difficult to fix a minimum rate, as the volume of business at any given point enables the carrier best to gauge the rate, but the burden of proof should rest on the car-

rier to show why car load lots going eastward from stations in Iowa should pay as much as lots from stations farther west. We have half the railroads of the world. Our railroads are fast developing every State and Territory. The evils incident are trivial in a general sense compared with the good consequent upon commercial development by rail. The community, however, is made up of the individuals composing it, and neither passion, prejudice, power, nor pelf, in him who controls a railroad, should be permitted to destroy the estate or prosperity of the individual, as cutting of rates during the past season and at present is doing in Iowa. The first requirement in transportation is a fair rate, and the next a steady rate. Our people are slow to complain of a high rate if it is unvarying, but when one town in the midst of an hundred gets unusually low rates, in consequence of cutting or pooling that the others cannot have, derangement follows that affects every business relation of the whole, and discontent ensues that reaches every relation in life. There is urgent need of a power commensurate with the jurisdiction of through railroads, that can interfere to settle differences between railroads, to prevent a railroad being wrecked, to prevent a town being unjustly discriminated against, and to whom an individual may go for justice be he the poorest citizen of the republic.

The strongest barrier in the way of instituting a power by the federal government able to deal with a railroad, or system of railroads, is the apprehension in the minds of railroad men that such a power would go too far. No power yet called into being has gone too far. Congress and State legislatures have created courts that are found competent, but too slow, and too expensive, for practical relief. The States have created commissions that are not likely to go so far that public opinion will not bring them back, but are gradually collecting facts for general information, and establishing precedents that will grow into codes of authority governing State commerce. State commissioners can establish no precedent that fails to meet the approbation of intelligent men in railroading and out of it. A federal commission need give no more apprehension to inter-State commerce, than a State commission gives to State commerce. It is to be hoped that it would gradually stop the practices prejudicial to commerce, that will be stopped, either this way or by methods more heroic.

The producer is often forgotten in fixing rates; nobody represents him; satisfaction may be general while he is unheard and overlooked;

unrest and dissatisfaction may be prevalent, while other classes are accommodated.

The most prominent complaints regarding rates are from non-competing points that suffer in competition with points where pool rates on one or more sides are lower. Farmers selling or buying at such points feel the discrimination more than the merchant, and the Commission in determining cases will be induced to regard the rates fixed at the competing points as *prima facie* fair and reasonable for like amounts of Iowa freight.

If the losses consequent upon the wars of rates that have prevailed in Iowa during the past season were equalized, and reductions in transportation of freight and passengers as much lower as the loss will make general incomes, increased travel would result, and encouragement given to the industries of the State that create freightage for the railroads. The Commission therefore are justified in recommending lower rates for freight and passengers uniformly distributed.

Iowa products that aggregate in the hands of individuals, like butter and meats, and in some instances live stock, and other products, command low through rates. The manufacturer, to be enabled to compete with more favorably located rivals, with regard to material and markets, has rates commensurate with his requirements. The wholesale dealer in the State, to be able to compete with his more formidable Eastern rival, requires rates, and gets them. The theory of the carrier is to ignore to some extent time and distance in overcoming the comparative disabilities of the growing industries of the State. Representatives of those industries have a hearing, can press their claims with detailed statements of facts. Heavy shipments are controlled by individuals who are acquainted with railroad men, who associate with them in public and private life, and who bring to bear the combined influences, knowledge of the situation and the advantages of association. There are classes in Iowa that possess none of these influences: that is the producer, the small shipper, and country merchant, and it is the especial duty of the Railroad Commission to see that they are not unjustly discriminated against.

Iowa railroads have about one thousand stations. Freight trains stop at each of them every day to gather the products of the State bound for markets abroad. It is very rare that reasons exist for giving one shipper lower rates for car load lots than can be had by all shippers. It is very rare that reasons exist for charging as much for

a given distance as for a longer distance. When unjust discrimination exists regarding shippers, or distance, it is nearly always at the expense of the carriers, and always makes resentment in the minds of those who are denied like favors.

Publicity of all that concerns the corporation will do more to correct abuses through enlightened public opinion than will speculative statute. We believe it due to the public, that when corporations are created to conduct undertakings too extensive for private enterprise, it should be made the duty of public officials to keep close watch over all their operations, making public full details of their growth, so that remedy may be suggested for abuse, the mysteries removed, and suspicion allayed in the public mind where no cause exists for it.

#### TERRITORIAL ASSIGNMENT.

The settlement of the war of rates that has been prevalent during this fall among the railroads on the theory that certain territory must be sacred to the uses of one or more companies and that no other shall build a competing line, is wrong, unwise, and alarming. If railroad building has arrived at a point where sections of the country must be left to the caprice of one railroad directory, very prompt measures should be adopted.

Public moderation has been asked while the railroad systems were being perfected; large freedom has been given while facts were being collected upon which to base judicious action. Annoying discrimination has been tolerated while development progressed. While different systems opened the way to different markets, the hope was lively that competition would gradually lower cost of carriage and industrial development justify lower rates to market. But when the element of territorial division arbitrarily stops the competition looked for, legislative interference should at once determine what rates are fair to the producer in such territory. Competition by water, competition of capital, competition of enterprise, are all negatived when territory is assigned exclusively to one combination. The arrangements by pooling and distributing have been understood as temporary, pending the coming of new factors into the transportation problem, and the encouragement given new manufacturing enterprises at general expense has been conceded pending the infancy of new industries; but, if assignment is made of territory to certain corporations, with agreed prohibition of competitive extension, the case is made and issue joined

it is then incumbent on the States and nation to determine the rights of all parties interested, so that producers, dealers, and consumers may be as well assured of their future as carriers.

The extension of new corporations into our State has resulted in competition in many articles, and at many points. Development of certain products, and increase in their value, has commanded lower rates. Year by year the products that commanded lower rates to the Eastern markets have increased in number, and the extension of railroads has multiplied the points where competition obtained. While this development continues, considerable flexibility in charges can be endured, because the carrier is adjusting himself to new relations and the producer is adjusting himself to the new world of commerce with which the railroad is bringing him into contact. Experiment goes on where the world has provided no common law, and social development very regularly follows commercial enterprise. When assignment of territory intervenes, the will of the carrier regarding rates takes the place of rates suggested by the circumstances that attend growth and change and the new factors they introduce, and at that juncture the will of the government should protect the producer, shipper, merchant, and consumer.

The fullest freedom compatible with safety should be allowed during growth; when growth stops, habits should be settled.

#### DEVELOPMENT.

The development of our State, through better farming, manufacturing, mining, wholesaling, and commerce by rail that is the handmaid of these diversified industries, presents the transportation problem in a different view from that shown when agriculture in its less profitable shape was the principal party interested. Ten years ago the producer needed a low rate for bulky cheap articles. He was in debt at harvest, and compelled to market promptly. Stock-raising has superseded grain-raising to a great extent, and a railroad car carries to market much more value than it did a decade ago.

The perfection and extension of the dairy has solved the transportation problem to him who keeps the cow. Manufacturing cities are springing up and are vitally interested in fair uniform rates on incoming material and outgoing product. Competing cities engaged in manufacturing and wholesaling suffer more now from the inability of carriers to arrange uniform rates than any class in Iowa suffers from

excessive rates. Farmers in eastern and central Iowa can wait for markets, such is their financial independence generally, but the merchant, the manufacturer, and wholesaler cannot stop business for a day without serious inconvenience and loss.

A small per cent of the complaints made to this Board are from farmers concerning rates, and those that complain are generally aggrieved concerning bulky cheap products. It appears then that as the State grows and exports from it change from low-priced to high-priced, a different class becomes vitally interested in transportation. It is the duty of this Board to get fair usage for the most modest citizen, but it is pleasant to notice as the citizen changes his business from an exporter of corn to an exporter of butter, meat, or wool, he helps himself as far as transportation is concerned.

No pool, or division of business, or agreement of rates, however sacred, is strong enough to prevent the owner of one hundred head of cattle from getting a special rate on some road his stock can travel to, but a city is fixed as the railroad that waits upon it is fixed. Its merchants are at its mercy and its manufacturers and wholesalers must have as low rates as their competitors in neighboring towns or their business suffers. The self-interest of railroad men generally protects the business man in town, but, during the past season very great differences in rates to towns in this State equidistant from Chicago, have caused loss, inconvenience, and lively apprehension. This state of affairs regarding the business men of our cities is the most interesting and important feature of the transportation question, as it affects Iowa people at present. The condensation of raw material into more valuable products places the manufacturer between the farmer and transporter, and it is vital to the prosperity of the State that he have a uniform rate as well as a fair rate, and, also, that his rate corresponds with that of his competitor in neighboring towns. Iowa merchants have gone to Eastern distributing and wholesaling points heretofore for goods to supply the retail trade. Within a few years several enterprising cities in our State have been building up wholesaling establishments. They buy direct from Eastern factories, and in many instances buy from manufacturers in Iowa, thus perfecting our society and industries, and retaining all the profits of such business within the State. When transportation charges from Eastern importing cities and manufacturing towns vary considerably to competing towns in Iowa, the difference often exceeds the profits of the merchant

and entails loss or ruin. Want of ability to prevent the above mentioned conditions relative to manufacturing and wholesaling, seems quite as evident as disposition to disturb commercial harmony. These evils are mostly beyond State jurisdiction and call loudly for remedy or prevention. The railroad freight agent who has studied the details of his office so as to become an expert in his line of business, with dividends to the stockholders and harmony with competitors as his aim in life, may not comprehend the wants of the producer as progression in the departments of the farm requires more extensive and more minute consideration. Nor can he be expected to add a thorough knowledge of diversified industry in a rapidly developing country to the knowledge of his peculiar vocation, the most exacting on earth. He fears interference, and uses his influence to prevent it. He is in charge of the most potent agent that serves the civilization of the century, and doubts the consequences of unskilled meddling. He staggers often under the weight of growing responsibility and demonstrates that in the wise conservation of varied interests, varied experience should be consulted, and when the industries of a State are affected by misunderstandings between carriers, and the State is helpless to protect its citizens, and can neither prevent discrimination nor preserve harmony, the Nation should supply the lacking power.

### ADDITIONAL QUESTIONS.

#### EXPRESS COMPANIES.

What express companies run on your road, and on what terms, and what conditions as to rates, etc.; what kind of business is done by them, and do you take their freights at the depot, or at the office of such express company? American Express Company. Railroad company furnishes cars, and express company furnishes all carriers and agents.  
Earnings in Iowa for year, \$67,250.45.

#### TRANSPORTATION COMPANIES.

What freight and transportation companies run on your road, and on what terms and on what conditions as to rates, use of track, machinery, repairs of cars, etc.; do they use the cars of your company, or those furnished by themselves, and are their cars or their freight given any preference in speed, or order of transportation, and if so, in what particular? No transportation companies have special arrangements with the railroad company, or run their cars over its lines except on same basis as any foreign cars.

What amount have you paid other corporations, car loaning companies (stock companies), or individuals, not operating railroads, for the use of cars, stating name of individuals or company, place of location of general office of said company, and amount paid to each? No account except regular mileage accounts for foreign cars running over Chicago, Burlington & Quincy Railroad.

#### SLEEPING-CARS.

Do sleeping, parlor, or dining-room cars run on your road, and if so, on what terms do they run, by whom are they owned, and what charges are made in addition to regular passenger rates? Run Pullman sleeping-cars; sleeping-car charges, \$2 per double berth per night. The railroad company runs its own dining cars.

What is the total amount paid by your company to palace or sleeping-car companies, to what companies, and the amount paid to each? Please state fully the arrangement by which these cars run on your road, the terms, and who receives the earnings. The railroad company maintains and repairs the cars, and the Pullman Palace Car Company maintains everything relating to the sleeping apparatus. The Pullman Palace Car Company receives the entire earnings.

## U. S. MAIL IN IOWA.

What is the compensation paid you by the U. S. Government for the transportation of its mails, and on what terms of service? Main line two times each way, daily (except Sunday), for large stations on main line. On branches and at small stations, one time each way, daily. Receipts for the year ending June 30, 1882, \$100,911.60.

What amount have you paid for receiving and delivering mail to and from stations on your road? In Iowa, \$1,480.20.

## TELEGRAPH.

How many miles of telegraph are owned by your company? In Iowa, 728 miles.

What other company, if any, owns a line of telegraph on your right of way, and how many miles does each own? No other company owns telegraph lines on our road.

## LANDS—CONGRESSIONAL GRANT.

|                                                                                                               |              |

| Same in Iowa, about .....                                                               | 95            |
| Amount paid employees, including officials, on all roads operated by this company ..... | \$ 822,456.22 |
| Same in Iowa (approximately) .....                                                      | 52,154.40     |

## BRIDGES IN IOWA.

|                                                | NO. | AGGREGATE<br>LENGTH. |
|------------------------------------------------|-----|----------------------|
| Wooden A bridges under 100 feet in length..... | 2   | 160                  |
| Wooden trestle and pile, feet.....             | 82  | 2,100                |

## BOX CULVERTS IN IOWA.

|                                 |   |
|---------------------------------|---|
| Timber, open pile culverts..... | 6 |
|---------------------------------|---|

## CATTLE-GUARDS.

|                        |    |
|------------------------|----|
| Number of in Iowa..... | 68 |
|------------------------|----|

## RENEWAL OF BRIDGES AND CULVERTS IN IOWA.

|                                                                                       |       |
|---------------------------------------------------------------------------------------|-------|
| Amount of timber used in renewals of wooden bridges during the year (feet B. M.)..... | 5,592 |
| Amount of trestle work replaced with earth during the year (lineal feet).....         | 180   |

Give the average number of years the trestle and pile bridges last on your road in Iowa. About nine years.

Give the average number of years that wooden truss bridges last on your road in Iowa. About ten years.

## ROAD-BED AND TRACK.

|                                                                            |        |
|----------------------------------------------------------------------------|--------|
| Number of track sections in Iowa.....                                      | 10     |
| Average length of sections, miles ...                                      | 5      |
| Average number of men in each section gang....                             | 6      |
| Number of new ties laid in track during the year in Iowa....               | 12,000 |
| Average number of new ties per mile of road.....                           | 325    |
| New rails laid in track during the year in Iowa—steel 205 tons, miles..... | 2½     |

What is the average number of years that iron rails last in your track on main line in Iowa? Ten years.

\*What is the average number of years that iron rails last in your track on branches in Iowa? Have only about 4¼ miles of branch in Iowa.

What is the average number of years that steel rails last in your track on main line in Iowa? We have steel in track which has been in nine years and is in good condition yet.

What is the average number of years that ties last in your track in Iowa? Oak ties last about eight years.

## CROSSINGS IN IOWA.

What railroad crosses your road at grade, and at what locality?

Chicago, Burlington & Quincy Railroad, at Pacific Junction.

Wabash, St. Louis & Pacific Railway, at Council Bluffs.

|                                           |    |
|-------------------------------------------|----|
| Number of highway crossings at grade..... | 36 |
|-------------------------------------------|----|

\*The only branch we have which has been in operation longer than two years, is the Hopkins branch in Missouri, and iron rails last no longer on this branch than on main line, owing to heavy grades.

## FENCING IN IOWA.

|                                                                                     |           |
|-------------------------------------------------------------------------------------|-----------|
| How many miles of fencing have you on your road, miles....                          | 26        |
| What is the average cost per rod.....\$                                             | 2.80      |
| What is the total cost of same.....                                                 | 11,800.00 |
| How many miles of new fencing have been built during the year.....                  | 2         |
| Give the number of miles needed on both sides of your track in each county in Iowa: |           |
| In Fremont county, miles.....                                                       | 11.7      |
| In Mills county, miles.....                                                         | 12.8      |
| In Pottawattamie county, miles.....                                                 | 1.5       |
| Total miles.....                                                                    | 26        |

## ROLLING STOCK.

|                                                                                                                                          |       |
|------------------------------------------------------------------------------------------------------------------------------------------|-------|
| Number of locomotives.....                                                                                                               | 38    |
| Number of passenger cars.....                                                                                                            | 20    |
| Number of baggage, mail, and express cars.....                                                                                           | 11    |
| Number of official cars.....                                                                                                             | 1     |
| Number of box freight cars.....                                                                                                          | 775   |
| Number of stock cars.....                                                                                                                | 22    |
| Number of platform cars.....                                                                                                             | 166   |
| Number of other cars, including 144 combination cars.....                                                                                | 164   |
| Total.....                                                                                                                               | 1,159 |
| Maximum weight of locomotives and tenders, 47 tons, tenders full of fuel and water.                                                      |       |
| Average weight of locomotives and tenders, 44 tons.                                                                                      |       |
| Number of locomotives equipped with train brake.....                                                                                     | 14    |
| Kind of brake, "Westinghouse air."                                                                                                       |       |
| Maximum weight of passenger cars, 19½ tons.                                                                                              |       |
| Average weight of passenger cars, 18 tons.                                                                                               |       |
| Number of cars equipped with train brake.....                                                                                            | 33    |
| Kind of brake, "Westinghouse air."                                                                                                       |       |
| Number of passenger cars equipped with Miller platform and buffer.....                                                                   | 20    |
| The amount of tonnage that can be carried over your road exclusive of cars, by an engine of given weight. Weight of engine 47, tons..... | 450   |

## MILEAGE, TRAFFIC, ETC.

## TRAIN MILEAGE.

|                                                    |           |
|----------------------------------------------------|-----------|
| Miles run by passenger trains during the year..... | 510,770   |
| Miles run by freight trains during the year.....   | 532,420   |

## ADDITIONAL QUESTIONS.

## EXPRESS COMPANIES IN IOWA.

What express companies run on your road, and on what terms and what conditions as to rates, etc.; what kind of business is done by them, and do you take their freights at the depot, or at the office of such express company? United States Express Company pays a fixed sum for transporting within and up to a fixed limit of weight, and 1½ first class rates on excess. The railroad company does not handle or have anything to do with the express matter, or rates thereon as charged by express company, but simply carries when placed in baggage car.

## TRANSPORTATION COMPANIES.

What freight and transportation companies run on your road, and on what terms and on what conditions as to rates, use of track, machinery, repairs of cars, etc.; do they use the cars of your company, or those furnished by themselves, and are their cars or their freight given any preference in speed, or order of transportation, and if so, in what particular? None. Various companies' cars run over this road for which we pay mileage as to railroad companies for similar service.

What amount have you paid other corporations, car loaning companies, stock companies, or individuals, *not operating railroads*, for the use of cars, stating name of individuals or company, place of location of general office of said company, and amount paid to each?

## SLEEPING-CARS.

Do sleeping, parlor, or dining-room cars run on your road, and if so, on what terms do they run, by whom are they owned, and what charges are made in addition to regular passenger rates? The Pullman Palace Car Company's sleepers run on our road; we pay that company same rate per mile as for a coach hired of any railroad company.

What is the total amount paid by your company to palace or sleeping-car companies, to what companies, and the amount paid to each? Please state fully the arrangement by which these cars run on your road, the terms, and who receives the earnings. To Pullman Palace Car Company \$5,206.14. The Pullman Palace Car Company receive the earnings.

## UNITED STATES MAIL IN IOWA.

What is the compensation paid you by the United States Government for the transportation of its mails, and on what terms of service? \$150.48 per mile per annum for main line in Iowa, payable quarterly.

What amount have you paid for receiving and delivering mail to and from stations on your road? \$1,060.

## TELEGRAPH.

How many miles of telegraph are owned by your company? None.

What other company, if any, owns a line of telegraph on your right of way, and how many miles does each own? Western Union Telegraph Company, 312 $\frac{1}{4}$  miles.

## ADDITIONAL QUESTIONS.

## EXPRESS COMPANIES.

What express companies run on your road, and on what terms, and what conditions as to rates, etc.; what kind of business is done by them, and do you take their freights at the depot, or at the office of such express company? The American Express Company, the United States Express Company; doing general express business; freights taken from express companies at depots.

## TRANSPORTATION COMPANIES.

What freight and transportation companies run on your road, and on what terms and on what conditions as to rates, use of track, machinery, repairs of cars, etc.; do they use the cars of your company, or those furnished by themselves, and are their cars or their freight given any preference in speed, or order of transportation, and if so, in what particulars? All fast freight lines doing business between eastern and northwestern points run over Chicago, Milwaukee & St. Paul Road, but no contract or special arrangement exists whereby different rates from those charged the general public, are made on freight secured by such fast freight lines.

What amount have you paid other corporations, car loaning companies (stock companies), or individuals, *not operating railroads*, for the use of cars, stating name of individuals or company, place of location of general office of said company, and amount paid to each?

## SLEEPING-CARS.

Do sleeping, parlor, or dining-room cars run on your road, and if so on what terms do they run, by whom are they owned, and what charges are made in addition to regular passenger rates? We run no parlor or dining car in Iowa; the sleepers in use are owned by the company. Additional charge for accommodations in sleepers is \$1.50 per berth.

What is the total amount paid by your company to palace or sleeping-car companies, to what companies, and the amount paid to each? Please state fully the arrangement by which these cars run on your road, the terms, and who receives the earnings. Sleepers in use are owned by the Chicago, Milwaukee & St. Paul Railway Company.

## UNITED STATES MAIL IN IOWA.

What is the compensation paid you by the United States Government for the transportation of its mails, and on what terms of service?

### ADDITIONAL QUESTIONS.

#### EXPRESS COMPANIES.

What express companies run on your road, and on what terms, and what conditions as to rates, etc.; what kind of business is done by them, and do you take their freights at the depot, or at the office of such express company? American Express Company and United States Express Company. For terms and conditions as to rates, see statement attached. The express companies have no care of machinery, or repairs of cars. They do a miscellaneous business, restricted to lighter articles, properly belonging to express business. The express companies deliver their freight into this company's cars.

*Express Contracts, June 30, 1882.*

\* \$50 per month.

† 56 cents per 100 pounds transported whole length of route.

**TRANSPORTATION COMPANIES.**

What freight and transportation companies run on your road, and on what terms and on what conditions as to rates, use of track, machinery, repairs of cars, etc.; do they use the cars of your company, or those furnished by themselves, and are their cars or their freight given any preference in speed, or order of transportation, and if so, in what particular? The cars of all transportation companies are allowed to run over the lines of this company, paying regular rates and receiving mileage. The freight is carried in cars furnished by such transportation companies (excepting consignments less than a car load). Their freight has no preference over other freight of like class.

What amount have you paid other corporations, car loaning companies (stock companies), or individuals, *not operating railroads*, for the use of cars, stating name of individuals or company, place of location of general office of said company, and amount paid to each?

#### SLEEPING-CARS.

Do sleeping, parlor, or dining-room cars run on your road, and if so, on what terms do they run, by whom are they owned, and what charges are made in addition to regular passenger rates? Sleeping-cars are run owned by the Pullman Palace Car Co., who make their own regular charges therefor. Dining cars owned by this company are run, on which the charges are 75 cents per meal. Parlor cars owned by this company are run on which the charges are: for 50 miles and under, 25 cents; for 85 miles and over 50 miles, 35 cents; for 110 miles, and over 85 miles, 50 cents.

What is the total amount paid by your company to palace or sleeping-car companies, to what companies, and the amount paid to each? Please state fully the arrangements by which these cars run on your road, the terms, and who receives the earnings. Pullman Palace Car Co., \$14,021.82.

#### UNITED STATES MAIL IN IOWA.

What is the compensation paid you by the United States Government for the transportation of its mails, and on what terms of service? Compensation for mail service is not permanently fixed. Service is ordered "subject to the rules and regulations of the Department," and amount paid is dependent on the weight of mail carried over such route.

What amount have you paid for receiving and delivering mail to and from stations on your road? Not kept.

## TELEGRAPH.

How many miles of telegraph are owned by your company? This company owns no telegraph exclusively, but owns certain wires or rights in all lines.

What other company, if any, owns a line of telegraph on your right of way, and how many miles does each own? All owned or controlled by the Western Union Telegraph Co.; about 3,310 miles.

## LANDS—CONGRESSIONAL GRANT.

None in the State of Iowa.

## Contingent liability as guarantor of bonds or debts of other roads:

Should the earnings of the Maple River Railroad Company be insufficient to meet the coupons upon its bonds, this company is under obligations to contribute to such deficiency. The amount of such contribution, if any, cannot be determined at this time.

This company in connection with the companies owning the line from Chicago to Fremont, Nebraska, via C. & N. W. Railway and S. C. & P. R. R. has agreed to contribute an amount necessary in addition to the rental of the extensions of the Fremont, Elkhorn & Missouri Valley R. R. west of Wisner, Nebraska, to meet the interest on the bonds of such extensions issued for the actual cost thereof, in proportion to the earnings of the contributing lines derived from such extensions.

## TONNAGE CROSSING THE MISSISSIPPI RIVER BRIDGE AT DAVENPORT, IOWA, FOR THE YEAR ENDING JUNE, 30, 1882.

|                                  |           |
|----------------------------------|-----------|
| West bound, number of tons ..... | 960,437   |
| East bound, number of tons ..... | 937,383   |
| Total tons .....                 | 1,897,820 |

## ADDITIONAL QUESTIONS.

## EXPRESS COMPANIES.

What express companies run on your road, and on what terms and what conditions as to rates, etc.; what kind of business is done by them, and do you take their freights at the depot, or at the office of such express company? United States Express Company do the usual express business, loading and unloading their own freight in the cars furnished by the railway company, and paying a rate equal to double first-class freight rates.

## TRANSPORTATION COMPANIES.

What freight and transportation companies run on your road, and on what terms and on what conditions as to rates, use of track, machinery, repairs of cars, etc.; do they use the cars of your company, or those furnished by themselves, and are their cars or their freight given any preference in speed, or order of transportation, and if so, in what particular? Cars of all "Color Lines" (so called) are run on this road, but have no preference in speed or rates over freight in this company's cars. No contracts.

## SLEEPING CARS.

Do sleeping, parlor, or dining-room cars run on your road, and if so, on what terms do they run, by whom are they owned, and what charges are made in addition to regular passenger rates? Sleeping cars are run by Pullman Palace Car Company; rates, \$2 per double berth. Dining cars are run by railway company; rates, seventy-five cents per meal.

What is the total amount paid by your company to palace or sleeping-car companies, to what companies, and the amount paid to each? Please state fully the arrangement by which these cars run on your road, the terms, and who receives the earnings. The Pullman Palace Car Company have purchased half interest in the sleeping cars formerly owned by this company, and the net earnings, after paying current expenses are divided equally between the Pullman and railway companies.

## U. S. MAIL IN IOWA.

What is the compensation paid you by the U. S. government for the transportation of its mails, and on what terms of service? Total compensation last year for entire road, \$203,344.23. No contract.

What amount have you paid for receiving and delivering mail to and from stations on your road? \$2,522.36 per annum.

## TELEGRAPH.

How many miles of telegraph are owned by your company? None.

What other company, if any, owns a line of telegraph on your right of way, and how many miles does each own? Western Union Telegraph Company 1,381 miles.

## LANDS—CONGRESSIONAL GRANT.

|                                                                                                                  |                 |

| Total tons .....                | 97,819.490 |

## ADDITIONAL QUESTIONS.

## EXPRESS COMPANIES.

What express companies run on your road, and on what terms, and what conditions as to rates, etc.; what kind of business is done by them, and do you take their freights at the depot, or at the office of such express company? American Express Company; they pay  $1\frac{1}{2}$  times first class tariff rates; the express company handles its own freight.

## TRANSPORTATION COMPANIES.

What freight and transportation companies run on your road, and on what terms and on what conditions as to rates, use of track, machinery, repairs of cars, etc.; do they use the cars of your company, or those furnished by themselves, and are their cars or their freight given any preference in speed, or order of transportation, and if so, in what particular? The cars of all transportation companies are allowed to run over the road. This company pays the usual mileage, three-fourths cents per mile, for same; no preference is given to cars or freight of any company.

What amount have you paid other corporations, car loaning companies, stock companies, or individuals, *not operating railroads*, for the use of cars, stating name of individuals or company, place of location of general office of said company, and amount paid to each?

Northwestern Car Trust Co., Chicago, Ill. .... \$ 44,766.68

## SLEEPING-CARS.

Do sleeping, parlor, or dining-room cars run on your road, and if so, on what terms do they run, by whom are they owned, and what charges are made in addition to regular passenger rates? Pullman Palace Car Company runs sleepers on our main line between St. Paul and Sioux City and St. Paul and Elroy; they charge about one dollar east of St. Paul, and one dollar and fifty cents west of St. Paul in addition to regular passenger fare for distance on this road.

What is the total amount paid by your company to palace or sleeping-car companies, to what companies, and the amount paid to each? Please state fully the arrangement by which these cars run on your road, the terms, and who receives the earnings? This company pays the Sleeping Car Co. three cents per mile for use of sleepers. The Sleeping Car Co. receives all the revenue of the sleepers.

## UNITED STATES MAIL IN IOWA.

What is the compensation paid you by the United States government for the transportation of its mails, and on what terms of service? \$71.82 per mile per annum on main line; \$42.75 per mile per annum on branch lines.

What amount have you paid for receiving and delivering mail to and from stations on your road? For delivering mails in St. Paul, \$360.00.

## TELEGRAPH.

How many miles of telegraph are owned by your company? See next question.

What other company, if any, owns a line of telegraph on your right of way, and how many miles does each own? Telegraph lines extend whole length of main line and branches, owned jointly by railroad company and Western Union Telegraph Co., one-half each.

## LANDS—CONGRESSIONAL GRANT.

No land grant in Iowa.

| Total.....                               |           |           |                           | 4,144              |

Give the average number of years that trestle and pile bridges  
last on your road in Iowa..... 9

Give the average number of years that wooden truss bridges  
last on your road in Iowa, supposed..... 9

## ROAD-BED AND TRACK.

Number of track sections in Iowa..... 7

Average length of sections, miles..... 9

Average number of men in each section gang (including fore-  
men)..... 4

Number of new ties laid in track during the year, on 12 miles  
old track..... 2,790

Average number of new ties per mile of road..... 232

What is the average number of years that ties last in your  
track in Iowa? White oak; supposed eight years.

## CROSSINGS IN IOWA.

What railroad crosses your road at grade, and at what locality?

Illinois Central Railroad, at Waverley.

Burlington, Cedar Rapids & Northern Railroad, at Clarksville.

Number of highway crossings at grade..... 40

## FENCING IN IOWA.

How many miles of fencing have you on your road, rods..... 1,706

What is the average cost per rod, cents..... 51

What is the total cost of same .....\$ 957.60

How many miles of new fencing have you built during the year, miles..... 53

Give the number of miles needed on both sides of your track in each county in Iowa:

In Bremer county..... 26.3

In Butler county..... 27.7

In Franklin county..... 9.2

Total miles..... 63.2

## ROLLING STOCK.

|                                                             | OWNED. | TOTAL. |
|-------------------------------------------------------------|--------|--------|
| Number of locomotives.....                                  | 2      | 2      |
| Number of baggage, mail, and express cars, combination..... | 1      | 1      |
| Number of box freight cars.....                             | 20     | 20     |
| Number of stock cars.....                                   | 10     | 10     |
| Number of platform cars.....                                | 20     | 20     |
| Number of other cars.....                                   | 3      | 3      |
| Total.....                                                  | 54     | 54     |

Average weight of locomotives and tenders, tons..... 28

Maximum weight of passenger cars, tons..... 20

Average weight of passenger cars, tons..... 20

Number of cars equipped with train brake, passenger..... 1

Kind of brake, common wheel.

The amount of tonnage that can be carried over your road exclusive of cars, by an engine of given weight:

Weight of engine, 28 tons.

160 tons exclusive.

320 tons including weight of cars.

53 feet grade, maximum.

## MILEAGE, TRAFFIC, ETC.

## TRAIN MILEAGE.

Miles run by freight trains during the year..... 53,168

## PASSENGER TRAFFIC.

|                                                              |        |
|--------------------------------------------------------------|--------|
| Number of local passengers carried.....                      | 25,211 |
| Number of special ticket passengers carried.....             | 966    |
| Number of 500 mile tickets.....                              | 14     |
| Total number of passengers carried.....                      | 26,191 |
| Highest rate of fare per mile for any distance, cents.....   | 3      |
| Lowest rate of fare per mile for any distance, cents.....    | 2      |
| Average rate of fare per mile for all passengers, cents..... | 2½     |

## FREIGHT TRAFFIC.

|                                                             |         |
|-------------------------------------------------------------|---------|
| Number of tons of local freight carried.....                | 41,500  |
| Total tons of freight carried.....                          | 41,500  |
| Total mileage of local freight (tons carried one mile)..... | 830,000 |
| Total freight mileage, or tons carried one mile.....        | 830,000 |

## SPEED OF TRAINS IN IOWA.

|                                                                           |    |
|---------------------------------------------------------------------------|----|
| Rate of speed of freight trains, including stops, mixed train, miles..... | 18 |
|---------------------------------------------------------------------------|----|

## TONNAGE OF ARTICLES TRANSPORTED WITHIN THE STATE OF IOWA.

|                                                           | TONS.  | PER CENT. |
|-----------------------------------------------------------|--------|-----------|

| Total tons carried.....                                    | 614,048 | 100          |

# TONNAGE CROSSING THE MISSISSIPPI RIVER BRIDGE AT DUBUQUE, IOWA, FOR THE YEAR ENDING JUNE 30TH, 1882.

|                                 |                |
|---------------------------------|----------------|
| West bound, number of tons..... | 108,375        |
| East bound, number of tons..... | 183,463        |
| Total tons.....                 | <u>291,838</u> |

## ADDITIONAL QUESTIONS.

### EXPRESS COMPANIES.

What express companies run on your road, and on what terms, and what conditions as to rates, etc.; what kind of business is done by them, and do you take their freights at the depot, or at the office of such express company? American Express Company. We receive about \$20,500 per annum.

### TRANSPORTATION COMPANIES.

What freight and transportation companies run on your road, and on what terms and on what conditions as to rates, use of track, machinery, repairs of cars, etc.; do they use the cars of your company, or those furnished by themselves, and are their cars or their freight given any preference in speed, or order of transportation, and if so, in what particular? All transportation lines can use these roads on payment of the usual rates. We have no contracts with any of them.

### SLEEPING-CARS.

Do sleeping, parlor, or dining-room cars run on your road, and if so, on what terms do they run, by whom are they owned, and what charges are made in addition to regular passenger rates? Illinois Central and Pullman sleeping cars. The usual rates for sleeping car accommodations.

What is the total amount paid by your company to palace or sleeping-car companies, to what companies, and the amount paid to each? Please state fully the arrangements by which these cars run on your road, the terms, and who receives the earnings. We pay usual mileage for Pullman cars; that company receives the earnings.

## UNITED STATES MAIL IN IOWA.

What is the compensation paid you by the United States government for the transportation of its mails, and on what terms of service? About \$34,000 per annum.

What amount have you paid for receiving and delivering mail to and from stations on your road? At Dubuque, \$650 per annum; at Sioux City, \$270 per annum.

## TELEGRAPH.

What other company, if any, owns a line of telegraph on your right of way, and how many miles does each own? Western Union Telegraph Co.; 402.16 miles.

## ADDITIONAL QUESTIONS.

## EXPRESS COMPANIES.

What express companies run on your road, and on what terms and what conditions as to rates, etc.; what kind of business is done by them, and do you take their freights at the depot, or at the office of such express company? American, special and one-half first-class rates. Take freight at depot. United States, special and one-half first-class rates. Take freight at depot.

## SLEEPING-CARS.

Do sleeping, parlor, or dining-room cars run on your road, and if so on what terms do they run, by whom are they owned, and what charges are made in addition to regular passenger rates? Pullman; two dollars per berth to Chicago; three dollars per berth to St. Louis.

What is the total amount paid by your company to palace or sleeping-car companies, to what companies, and the amount paid to each? Please state fully the arrangement by which these cars run on your road, the terms, and who receives the earnings. We pay the Pullman Company mileage.

## UNITED STATES MAIL IN IOWA.

What is the compensation paid you by the United States Government for the transportation of its mails, and on what terms of service? Route No. 26,021, White Bear to Ft. Dodge, \$71.82 per mile, for 225.48 miles.

What amount have you paid for receiving and delivering mail to and from stations on your road? None.

## TELEGRAPH.

How many miles of telegraph are owned by your company? None.

What other company, if any, owns a line of telegraph on your right of way, and how many miles does each own? Western Union.

## DESCRIPTION OF ROAD.

|                                                                                        |               |        |
|----------------------------------------------------------------------------------------|---------------|--------|
| Length main line of road from Missouri Valley, Iowa, to Sioux City, Iowa, miles.....   | 75.65         |        |
| Length of main line of road from California Junction, to Fremont, Nebraska, miles..... | 31.77         | 107.42 |
| Length of main line of road in Iowa.....                                               |               | 80.47  |
| Length of main line of road in Nebraska.....                                           |               | 26.95  |
| Total length of road belonging to this company.....                                    |               | 107.42 |
| Aggregate length of sidings and other tracks not above enumerated.....                 |               | 15.20  |
| Same in Iowa.....                                                                      |               | 10.26  |
| Aggregate length of track, computed as single track, exclusive of sidings.....         |               | 107.42 |
| Same in Iowa.....                                                                      |               | 80.47  |
| Total length of iron rails in tracks in Iowa, exclusive of sidings.....                |               | 80.47  |
| Weights per yard, iron, 56 pounds.                                                     |               |        |
| Gauge of track .....                                                                   | 4 feet 8½ in. |        |

## ROAD AND BRANCHES BELONGING TO OTHER COMPANIES, OPERATED BY THIS COMPANY UNDER LEASE OR CONTRACT.

## Name, description, and length of each:

|                                                         |        |
|---------------------------------------------------------|--------|
| Fremont, Elkhorn & Missouri Valley Railroad—main line—  |        |
| Fremont to Long Pine, Nebraska.....                     | 212.31 |
| Branch line—Norfolk Junction to Creighton, Nebraska.... | 42.06  |
| Total length of above roads .....                       | 254.37 |
| Total length of above roads in Nebraska.....            | 254.37 |

## If any part of the road was first opened for operation during the past year, state the date:

|                                                         |       |        |
|---------------------------------------------------------|-------|--------|
| August 16, 1881, miles .....                            | 39.38 |        |
| April 1, 1882, miles.....                               | 57.78 |        |
| Total miles of road operated by this company.....       |       | 361.79 |
| Total miles road operated by this company in Iowa ..... |       | 80.47  |

## STATIONS.

|                                                             |    |
|-------------------------------------------------------------|----|
| Number of stations on all roads owned by this company.....  | 16 |
| Same in Iowa .....                                          | 12 |
| Number of stations on all roads operated by this company... | 44 |
| Same in Iowa .....                                          | 12 |
| Number of telegraph offices in stations in Iowa.....        | 11 |

## EMPLOYES.

|                                                                                       |               |
|---------------------------------------------------------------------------------------|---------------|
| Number of persons regularly employed on all roads operated by this company .....      | 870           |
| Same in Iowa.....                                                                     | Cannot state. |
| Amount paid employes, including officials, on all roads operated by this company..... | \$ 335,973.00 |
| Same in Iowa.....                                                                     | Cannot state. |

## BRIDGES IN IOWA.

|                                                   | NO. | AGGREGATE<br>LENGTH. |
|---------------------------------------------------|-----|----------------------|
| Combination bridges over 100 feet in length ..... | 2   | 340                  |
| Combination bridges under 100 feet in length..... | 1   | 75                   |
| Wooden trestle and pile .....                     | 67  | 6,058                |

## CATTLE-GUARDS.

Number of in Iowa..... 182

## RENEWAL OF BRIDGES AND CULVERTS IN IOWA.

Amount of timber used in renewals of wooden bridges during the year (feet B. M.)..... 86,226

Give the average number of years the trestle and pile bridges last on your road in Iowa. 12 years.

Give the average number of years that wooden truss bridges last on your road in Iowa. 10 years.

## ROAD-BED AND TRACK.

Number of track sections in Iowa..... 12

Average length of sections—miles..... 6.7

Average number of men in each section gang..... 7

Number of new ties laid in track during the year in Iowa.... 53,285

Average number of new ties per mile of road..... 662

New rails laid in track during the year in Iowa—(iron 1,220.16 tons)..... 13.87

Total track laid with new rails during the year in Iowa, miles, 13.87

What is the average number of years that iron rails last in your track on main line in Iowa. About fourteen years.

What is the average number of years that ties last in your track in Iowa. About seven years.

## CROSSINGS IN IOWA.

What railroad crosses your road at grade, and at what locality?  
Chicago, St. Paul, Minneapolis & Omaha R. R., at Sioux City.  
Illinois Central (freight track) R. R., at Sioux City.

Number of highway crossings at grade..... 100

## FENCING IN IOWA.

How many miles of fencing have you on your road..... 56.87

What is the average cost per rod, cents..... 59

What is the total cost of same..... \$ 10,737.06

How many miles of new fencing have you built during the year..... 30

Give the number of miles needed on both sides of your track in each county in Iowa:

In Harrison county..... 46.16

In Monona county..... 3.40

In Woodbury county..... 11.42

---

Total miles ..... 60.98

## ROLLING STOCK.

|                                                | NOT<br>OWNED. | OWNED. | TOTAL. |
|------------------------------------------------|---------------|--------|--------|
| Number of locomotives.....                     | 16            | 12     | 28     |
| Number of passenger cars.....                  | 7             | 9      | 16     |
| Number of baggage, mail, and express cars..... | 5             | 5      | 10     |
| Number of box freight cars.....                | 250           | 89     | 339    |
| Number of stock cars.....                      | 190           | 20     | 210    |
| Number of platform and coal cars.....          | 100           | 46     | 146    |
| Number of other cars.....                      |               | 15     | 15     |
| Total .....                                    |               |        | 736    |

|                                                                                                                                                        |    |
|--------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Maximum weight of locomotives and tenders, tons.....                                                                                                   | 45 |
| Average weight of locomotives and tenders.....                                                                                                         | 40 |
| Number of locomotives equipped with train brake.....                                                                                                   | 9  |
| Kind of brake, Westinghouse automatic.                                                                                                                 |    |
| Maximum weight of passenger cars, tons.....                                                                                                            | 28 |
| Average weight of passenger cars, tons.....                                                                                                            | 19 |
| Number of cars equipped with train-brake.....                                                                                                          | 26 |
| Kind of brake, Westinghouse automatic.                                                                                                                 |    |
| Number of passenger cars equipped with Miller platform and<br>buffer, including baggage, mail, office, and express cars...                             | 26 |
| The amount of tonnage that can be carried over your road ex-<br>clusive of cars, by an engine of given weight. Weight of<br>engine, 32 tons; 255 tons. |    |

## MILEAGE, TRAFFIC, ETC.

## TRAIN MILEAGE.

|                                                    |         |
|----------------------------------------------------|---------|
| Miles run by passenger trains during the year..... | 210,854 |
| Miles run by freight trains during the year.....   | 253,130 |
| Miles run by switching trains during the year..... | 243,440 |
| Miles run by other trains during the year.....     | 5,996   |
| Total train mileage.....                           | 713,420 |

## CARS AND WEIGHT OF TRAINS.

|                                                                            |     |
|----------------------------------------------------------------------------|-----|
| Average number of cars in passenger trains .....                           | 3.1 |
| Average weight of passenger trains, exclusive of passengers,<br>tons ..... | 112 |
| Average number cars in freight trains.....                                 | 17  |
| Average weight of freight trains, exclusive of freight, tons...            | 223 |

## PASSENGER TRAFFIC.

|                                                              |           |
|--------------------------------------------------------------|-----------|
| Number of through passengers carried.....                    | 42,953    |
| Number of local passengers carried.....                      | 114,819   |
| Total number of passengers carried.....                      | 157,572   |
| Total passenger mileage, or passengers carried one mile..... | 6,648,054 |
| Average distance traveled by each passenger, miles.....      | 42.2      |
| Average amount received from each passenger .....            | 1.417     |
| Highest rate of fare per mile for any distance, cents.....   | 4         |
| Lowest rate of fare per mile for any distance, cents.....    | 2         |
| Average rate of fare per mile for all passengers, cents..... | 3.36      |

## FREIGHT TRAFFIC.

|                                                                                                              |            |
|--------------------------------------------------------------------------------------------------------------|------------|
| Number of tons of through freight carried.....                                                               | 170,820    |
| Number of tons of local freight carried.....                                                                 | 143,845    |
| Total tons of freight carried.....                                                                           | 314,665    |
| Total mileage of through freight (tons carried one mile).....                                                | 10,754,630 |
| Total mileage of local freight (tons carried one mile.....)                                                  | 14,210,663 |
| Total freight mileage, or tons carried one mile.....                                                         | 24,965,293 |
| Average rate per ton per mile received for through freight, cents.....                                       | 2.7        |
| Average rate per ton per mile received for local freight, cents.....                                         | 1.41       |
| Average rate per ton per mile received for all freight, cents..                                              | 1.96       |
| Average rate per ton per mile received from freight to and from other roads, cents.....                      | 2.7        |
| Percentage of freight originating at, and carried to, stations in Iowa, to total freight carried in Iowa.... | 1.04       |

## CAR MILEAGE.

|                                                                                                       |           |
|-------------------------------------------------------------------------------------------------------|-----------|
| Number of miles run by loaded freight cars east and south..                                           | 1,081,838 |
| Number of miles run by loaded freight cars west and north..                                           | 1,894,069 |
| Number of miles run by empty freight cars east and south...                                           | 1,214,980 |
| Number of miles run by empty freight cars west and north..                                            | 452,834   |
| Percentage of empty freight cars hauled east and south to all freight cars hauled east and south..... | 52.9      |
| Percentage of empty freight cars hauled west and north to all freight cars hauled west and north..... | 19.3      |

## SPEED OF TRAINS IN IOWA.

|                                                                        |       |
|------------------------------------------------------------------------|-------|
| Rate of speed of passenger trains, including stops, miles per hour.... | 22.19 |
| Rate of speed of freight trains, including stops, miles per hour       | 10.75 |

**ADDITIONAL QUESTIONS.**

**EXPRESS COMPANIES.**

What express companies run on your road, and on what terms, and what conditions as to rates, etc.; what kind of business is done by them, and do you take their freights at the depot, or at the office of such express company? American Express Company, one and one-half first class rates on all packages weighing in excess of 20 pounds, except on fresh fish, oysters, fruit, vegetables, butter, eggs, poultry, game, coarse furs, and beer, on which we receive first class rates.

**TRANSPORTATION COMPANIES.**

What freight and transportation companies run on your road, and on what terms and on what conditions as to rates, use of track, machinery, repairs of cars, etc.; do they use the cars of your company, or those furnished by themselves, and are their cars or their freight given any preference in speed, or order of transportation, and if so, in what particular? Cars of all transportation companies are allowed to run over lines of this company, receiving regular mileage; no preference and no contract. What amount have you paid other corporations, car loaning companies (stock companies), or individuals, not operating railroads for the use of cars, stating name of individuals or company, place of location of general office of said company, and amount paid to each? U. S. Rolling Stock Co., New York City; amount paid, \$735.94.

**SLEEPING CARS.**

Do sleeping, parlor, or dining-room cars run on your road, and if so, on what terms do they run, by whom are they owned, and what charges are made in addition to regular passenger rates? Pullman sleeping cars are run between Missouri Valley and Sioux City on through trains between St. Paul and Kansas City, and Chicago and Sioux City. Additional charges on "St. Paul train" between Council Bluffs or Missouri Valley and Sioux City, \$1.50; St. Paul, \$2. On Pullman car between Chicago & Sioux City, \$3. For seat between Missouri Valley and Sioux City, 50 cents.

What is the total amount paid by your company to palace or sleeping-car companies, to what companies, and the amount paid to each? Please state fully the arrangement by which these cars run on your road, the terms, and who receives the earnings. To Chicago, St. Paul, Minneapolis & Omaha R'y Co., for sleepers on Kansas City train, mileage, 3 cents per mile, \$1,678.56. To Chicago & Northwestern R'y Co., mileage on Pullman Sleepers on Chicago train, 2 cents per mile, \$1,009.28.

#### U. S. MAIL IN IOWA.

What is the compensation paid you by the U. S. government for the transportation of its mails, and on what terms of service? The U. S. government withholds all compensation for mail service. The amount charged the government for mail service in Iowa is \$10,231.02 per annum.

What amount have you paid for receiving and delivering mail to and from stations on your road? \$256.00 per annum.

#### TELEGRAPH.

What other company, if any, owns a line of telegraph on your right of way, and how many miles does each own? The Western Union Telegraph Company operate the telegraph line on this company's road (107.42 miles) under a contract for twenty-five years from April 1, 1871.

#### LANDS—CONGRESSIONAL GRANT.

No change since report for 1878.

| Interest paid during construction, discounts, etc.....                       | 6,571.93   |
| Engineering, agencies, salaries, and other expenses during construction..... | 14,219.96  |

All other items charged to construction not enumerated above:

|                  |                 |
|------------------|-----------------|
| Telegraph.....\$ | 918.23          |
| Sundries.....    | 652.50          |
|                  | <u>1,570.73</u> |

Total expended for construction .....\$ 330,724.77

|                                                                     |          |
|---------------------------------------------------------------------|----------|
| †Average cost of construction per mile of road (38.37 miles).....\$ | 8,619.77 |
| Proportion of cost of construction for Iowa.....                    | All.     |

## COST OF EQUIPMENT.

|                                                 |           |
|-------------------------------------------------|-----------|
| Locomotives.....\$                              | 18,564.59 |
| Passenger, mail, baggage, and express cars..... | 9,555.63  |
| Freight and other cars.....                     | 29,985.10 |
| Tools and sundries.....                         | 3,678.53  |

Total for equipment.....\$ 61,783.84

|                                                                                    |          |
|------------------------------------------------------------------------------------|----------|
| Average cost of equipment per mile of road operated by company (52.3 miles).....\$ | 1,181.32 |
| Proportion of cost of equipment for Iowa.....                                      | All.     |

Total cost of road and equipment.....\$ 392,508.61

|                                                                  |          |
|------------------------------------------------------------------|----------|
| Average cost of road and equipment per mile (38.37 miles).....\$ | 9,670.00 |
| Proportion of cost of road and equipment for Iowa.....           | All.     |

\* Calculated on basis 38.37 mileage of our own road and not including third rail on B., C. R. & N. R'y, as we carry no freight to stations on that line, and get but a limited amount of the passenger receipts.

† The third rail used by us on B., C. R. & N. R'y, cost us about \$1,500 per mile for 14.3 miles. For this distance we have no other construction charges, and cannot figure average cost of construction per mile, with reasonable accuracy.

PROPERTY ACCOUNTS.

CHARGES AND CREDITS BY WHICH THE CAPITAL AND DEBT HAVE BEEN INCREASED DURING THE YEAR.

|                                                                     |    |          |

| Amount of stock held in Iowa .....             | 201,500.00 |
| Total number of stockholders.....              | 19         |
| Number of stockholders in Iowa.....            | 15         |

DEBT.

Funded debt as follows:

|                                                          |            |
|----------------------------------------------------------|------------|
| Bonds due July, 1896, rate of interest 7 per cent.....\$ | 120,000.00 |
| Interest paid on same during the year.....               |            |
| Bonds due July, 1896, rate of interest 8 per cent.....   | 160,000.00 |
| Interest paid on same during the year.....               |            |

|                                                           |                   |
|-----------------------------------------------------------|-------------------|
| Total amount of funded debt on road completed June 30. \$ | <u>280,000.00</u> |
|-----------------------------------------------------------|-------------------|

This does not fairly represent the condition, as we had more of the road under construction at the time, and we can only approximate the apportionment on completed road.

|                                         |                   |
|-----------------------------------------|-------------------|
| Total amount of debt liabilities.....\$ | <u>280,000.00</u> |
|-----------------------------------------|-------------------|

|                                                |            |
|------------------------------------------------|------------|
| Amount of debt per mile of road.....\$         | 7,000.00   |
| Total amount of stock and debt.....            | 481,500.00 |
| Amount of stock and debt per mile of road..... | 12,000.00  |

COST OF ROAD AND EQUIPMENT.

|                                        |            |
|----------------------------------------|------------|
| Total expended for construction.....\$ | 214,000.00 |
|----------------------------------------|------------|

This question cannot this year be satisfactorily answered as we had about 100 miles under construction, only a part of the work completed, and most of it in process of completion, and much of the material bought not yet in the road.

## COST OF EQUIPMENT.

|                                                  |     |    |            |
|--------------------------------------------------|-----|----|------------|
| Locomotives, number .....                        | 3   | \$ | 22,500.00  |
| Passenger, mail, baggage, and express cars ..... | 1   |    | 8,500.00   |
| Freight and other cars .....                     | 110 |    | 40,000.00  |
| Total for equipment .....                        |     | \$ | 66,000.00  |
| Total cost of road and equipment .....           |     | \$ | 280,000.00 |

Proportion of cost of road and equipment for Iowa. All.

This equipment should not all be charged to the number of miles of track laid to June 30th, as it was purchased to use on the entire line when completed.

## ANALYSIS OF EARNINGS.

Nothing can be shown under this head as the entire work of the road was construction, and what small earnings there were went to construction account.

## DESCRIPTION OF ROAD.

|                                                                                 |    |
|---------------------------------------------------------------------------------|----|
| Length main line of road from Osceola to R. I. crossing, miles.                 | 40 |
| Length main line of road in Iowa, miles .....                                   | 40 |
| Aggregate length of track, computed as single track, exclusive of sidings ..... | 40 |
| Total length of iron rails in tracks in Iowa, exclusive of sidings, miles ..... | 40 |

Weights per yard, iron, 30 and 35 pounds.

Gauge of track .....

3 feet.

If any part of the road was first opened for operation during the past year, state the date. All of it during the year was built but not opened for business until the road should reach Des Moines.

## STATIONS.

Filed, October 17, 1881.

### DECISION OF THE COMMISSIONERS.

Referring to your letter of December 14th, last, wherein you complain of the high rates on wheat charged by the Illinois Central Railroad Company, and the reduction in charges on Minneapolis flour transported to Iowa markets, the Board has received the following letter from W. K. Ackerman, President of the Illinois Central:

CHICAGO, January 18, 1882.

E. G. MORGAN, *Secretary Board of Railroad Commissioners*:

DEAR SIR—Referring to your letter of the 20th ult., in regard to complaint of the Independence Mills Company, I would say that our rate on flour from Minneapolis to Independence is forty-five cents per barrel, and this is a higher rate than we charge on our Iowa Division locally for the same distances and on the same class of freight. Our wheat rates on our Iowa Division we think are unreasonably low, and the Independence Mills Company has the advantage of them. I do not see that they have any just cause of complaint, because we haul at a higher rate on flour from another State than we charge locally in Iowa.

Yours respectfully,

W. K. ACKERMAN, *President*.

If the through Minnesota rate to Iowa points is higher than the Iowa local rates it would seem that this is all that could reasonably be asked as to the *relation* or *proportion* of the two charges. Such facts show that Iowa local interests already have an advantage over shipments from Minnesota. The next question is, are the Illinois Central local rates reasonable in themselves? In a former letter you asked for the rate from Waterloo to Independence. On examination we find it to be 6.20 cents per 100 lbs. on wheat, or 3.72 cents per bushel. This is almost exactly the rate fixed by the Iowa tariff ("Granger act") law of 1874. To be exact, the rate charged now is 6.20 per 100 lbs.; the "Granger rate" was 6.14 cents per 100 lbs.—an increase of only .06 of a cent per 100. The Illinois Central is still operating

under "Granger rates" substantially, having made but a slight increase since the repeal of that law, and this only on short hauls and partial car loads.

It was everywhere conceded that the rates of the "Granger law" were exceedingly low, and surely the Illinois Central's Iowa business does not indicate anything like profits year by year. As to the rate on wheat from Waterloo to Independence, and from other stations on the Illinois Central, the Commissioners hold that they are not unreasonable. As to the rate on Minneapolis flour to Iowa points: the rate being relatively higher than Iowa local rates for like distances, they see no good ground of complaint. Besides, they have no jurisdiction over rates between different States, and are powerless in the premises.

As to the branch of your complaint referring to the Burlington, Cedar Rapids & Northern, Superintendent Ives writes that their rate on Minneapolis flour to Independence and other points on the Milwaukee Division is fifty cents per barrel. This is five cents higher than the Illinois Central rate for same service, and therefore makes the relative advantage still greater in favor of Iowa local rates on wheat.

If the Commissioners had the power, they would be reluctant to use it in recommending a higher rate on Minneapolis flour. On this subject Superintendent Ives uses this language: "We think if the Commissioners will inquire, they will ascertain that people at Independence imported this flour in consequence of the Mill Company being unable to furnish the local wants through scarcity of milling wheat. The Independence people do not state upon what basis they claim our rate to be too low—what the expense is of the relative flours and reasonable margin for manufacturing and difference in grades, theirs not being equal to Minneapolis flour. I think you will learn that these gentlemen wish all other flour excluded from Independence for the purpose of monopolizing the trade."

The Commissioners have made no inquiry as to those statements, nor are they pertinent to the case. As to the rates of this road on wheat, it should be understood that of the entire run from Northwood to Independence—177 miles, 138 miles is over class "A" road, while 39 miles is class "C." By careful computation we find that the rate now charged exceeds the Granger rate for that distance by one cent and fifty-four hundredths per 100 lbs. The rate on wheat from Postville to Independence, same distance as between Leroy and Postville on the C., M. & St. P. R'y is fifteen cents per 100 lbs., while that of the latter is twenty cents as you know; though they have agreed to make you the same rate as the former, and will probably refund you the five cents overcharge on the shipments in controversy. We do not think their rates unreasonable under all the circumstances; and even if in our judgment they were otherwise, the Board is without authority as to Gordonsville and Glenville shipments, those stations being in another State.

*Des Moines, Iowa, January 23, 1882.*

| CHICAGO, ROCK ISLAND & PACIFIC RAILWAY<br>COMPANY, <i>Respondent</i> . |   |                 |

Filed, October 22, 1881.

#### DECISION OF THE COMMISSIONERS.

This complaint was brought before the Board by Mr. Ayres in writing on the 22d day of October, 1881, and consists of two separate claims for damages.

The first, that on the 9th of October, 1880, he received a box of fancy goods, vases, etc., from the Chicago, Rock Island & Pacific Railway Company, shipped from New York; that he notified the agent that the goods were received in a damaged condition; that at the request of the agent he made a list of the damaged goods at cost price, and has repeatedly since that time asked payment of the claim.

Mr. Sage, general freight agent of the company, in a letter to the president of the road, dated December 15th, says: "The injury was received "from improper packing, that vases were broken, one each of two pairs; "Mr. Ayres retained the single vases in his possession, and the question was "whether the company should pay one-half or the whole of the \$4.37; if the "claim had been pressed no doubt it would have been paid." The deposition of Mr. Ayres with regard to this package is, that the box was stove in at the corner, looking as if some heavy weight had been thrown or dumped upon it; that in his judgment the vases were carefully packed; that two vases out of four pairs were unbroken; that after holding them for nearly a year subject to the order of the railway company, he sold them for about one dollar; that he had used his best endeavors to get payment, and pressed the claim in every way he knew before entering this complaint. In presenting this claim he only charged the railway company what the goods actually cost him. The Commissioners regard Mr. Sage's letter as an admission that with the facts correctly stated, Mr. Ayres should be paid the amount of the claim, \$4.37, and so find.

The second claim of Ayres & Co. is for damage to crockery in a crate, which from the bill of lading seems to have been shipped from New York on the 6th day of April, 1881, and received at Des Moines on the 15th. On the bill, in red letters, is stamped "owner's risk." It appears that the crate was shipped from New York to Baltimore by vessel, and the bill of lading says that the marine risk is assumed by the Baltimore & Ohio Road. H. F. Gleason, agent of the Chicago, Rock Island & Pacific Railway, says that the crate was received and loaded in apparent good order on the 10th of April. On the 18th of April, we find the following signed by the check clerk of the Rock Island Railway in Des Moines: "Notation on delivery, one side and "end partially detached; no appearance from outside of contents being "damaged. The breakage reported could not be caused by the strain of the "crate; probable cause, either bad packing or a heavy fall." This was signed "Fred." On July 1st, 1881, the general freight agent of the Baltimore &

Ohio Railway declined to pay any portion of the damage, as the crate was delivered to the Rock Island Road in apparent good order. Tracing the crate from Chicago, it was found that it was put in a sealed car and reached Des Moines with seals unbroken; the engineers and conductors all agree that the car had no rough handling. Mr. Royce, Division Superintendent, concludes that the damage must have occurred in loading or unloading the car.

On the 20th of August, Mr. Tewksbury, agent, declines to pay the breakage for two reasons:

*First.* The breakage was ordinary.

*Second.* That property was shipped at owner's risk.

This was the situation at the time the case was referred to this Board.

Ayres & Co.'s bill is as follows: For damage to goods in crate earthenware, No. 438, shipped by Thomas Maddock & Bro., *via* Baltimore & Ohio Railway, April 6, 1881.

|                                          |                |
|------------------------------------------|----------------|
| 6 ewers at 34 cents each.....            | \$ 2.04        |
| 5 basins at 34 cents each.....           | 1.70           |
| 2 covered chambers at 42 cents each..... | .84            |
| 1 soap dish cover and drainer.....       | .26            |
| 2 cups and 3 saucers.....                | .15            |
| Total.....                               | <u>\$ 4.99</u> |

With regard to ordinary breakage Mr. Ayres says that it is from one to two per cent, that the breakage on this crate was ten per cent, and his statement seems so reasonable that we do not think it necessary to pursue this defense further. The second, that the goods were shipped at owner's risk, is practically all that there is in the case that would seem to justify a defense.

The obligation of the common carrier is to transport and deliver goods in same condition as when received, unless prevented by the "act of God or "public enemies"; this obligation is changed by what in fact is a modification of the contract, the railway company stamping on the bill of lading "owner's risk." This is done in all goods that are specially liable to injury, without consulting either the shipper or consignor. Of this, however, Mr. Ayres has no reasonable ground to complain, for he says that all his earthenware is received in that way, and he supposes the railway companies will receive it on no other condition. We have examined authorities as to the extent of the modification of the contract, and find the general line of decisions to sustain the following views:

Hutchinson on Carriers, Sec. 248: "A carrier cannot contract for exemption "from liability for losses caused by his own or the negligence of his servants." Some cases are reported as taking a different view, and releasing the carrier from negligence.

Sec. 257. But it will be observed that these cases occurred in States in which the law permits the carrier, by express contract, to relieve himself from the consequences of his negligence. It will consequently be found that in several of the cases heretofore cited as recognizing the right of the

carrier thus to put a limit on the liability to which he would otherwise be subjected, it is distinctly coupled with the condition that whenever the loss can be so traced to his negligence, the contract for limited liability will not avail him, and will be considered out of the way.

SEC. 263. These conclusions, after so thorough an examination of the subject, may be said to have decidedly turned the scale in favor of the exclusion of all contracts between carriers and their employes exempting the former from the consequence of the negligence of every grade of themselves or their employes or servants.

SEC. 262. Case of *Railroad Co. v. Lockwood*, the Supreme Court of the United States held: *First*, that a common carrier cannot stipulate for exemption from responsibility, when such exemption is not just and reasonable in the eye of the law.

*Secondly*, that it is not just and reasonable in the eye of the law for a common carrier to stipulate for exemption from responsibility for the negligence of himself or his servants.

*Thirdly*, that these rules apply to carriers of goods and carriers of passengers.

Schouler on Bailments, page 485: The letters "O" "R", written on a bill of lading, aim in some cases to qualify the common law liabilities. The use of this expression by a common carrier seems to throw back the risk of carriage upon the sender or owner so far as public policy will permit.

Page 492: So strong is public sentiment in some parts of our country against allowing railways to qualify their common law liability by special contract at all, that the legislation of certain States make all such contracts utterly void.

Lawson on Contracts of Carriers, Sec. 187: The term "owner's risk" in a contract for transportation, imports that the owner assumes the risk arising from the ordinary dangers of transportation by the means employed, which the reasonable and ordinary care of the common carrier might be insufficient to prevent, and the latter is liable only for those dangers which with ordinary care and prudence might be avoided. He will still be answerable for his own negligence or misconduct or that of his servants or agents.

Section 1308, Code of Iowa: No contract, receipt, rule, or regulation, shall exempt any corporation engaged in transporting persons or property by railway, from liability of a common carrier or carrier of passengers, which would exist had no contract, receipt, rule, or regulation been made or entered into.

The crate was received in Chicago in apparent good condition; when delivered in Des Moines, it was first reported shaky, and afterward the check clerk reported one side and end detached. His note, is that the breakage probably came from bad packing or a heavy fall. Bad packing certainly never broke the crate; rough handling or a heavy fall might. The company show very satisfactorily that it was not done in transit between Chicago

and Des Moines, as it was in a sealed car, and every conductor and engineer that had it in charge says that the car had no rough usage.

We think the facts as stated show that the burden of proof lies with the railway company, to prove that it was not injured while in their hands. They have shown that one class of their servants did not injure it, and must have had the same means of ascertaining whether another did.

It seems to us entirely within their power to trace this package from its receipt to its delivery, and the company can hardly mean to say, "if Messrs. Ayres & Co. think this company has been negligent, let them say when, where, and in what it was negligent."

Ayres & Co. first saw the crate when it was delivered to them broken; when it came into the hands of the railway company it was in apparent good order.

The conclusion of the Commissioners is, that the Chicago, Rock Island & Pacific Railway Company should pay Messrs. Ayres & Co. the amount of the bill rendered, which is:

|                           |         |
|---------------------------|---------|
| For this claim .....      | \$ 4.99 |
| For the first claim ..... | 4.37    |
| Total .....               | \$ 9.36 |

The amount of this claim is small, but the Board of Railroad Commissioners have given the subject careful investigation, as the principle that underlies it is important, and from the request of the president of the road "that the Commissioners should give expression to their views as to whether "the billing at owner's risk, in consideration of reduced rates, can be considered as a release from claims of this class."

| vs.                                                                     |                   |
| BURLINGTON, CEDAR RAPIDS & NORTHERN RAILWAY COMPANY, <i>Respondent.</i> |                   |

Filed, October 29, 1881.

#### DECISION OF THE COMMISSIONERS.

The complainant alleges that he shipped a car load of melons at Muscatine, consigned to St. Paul *via* the Burlington, Cedar Rapids & Northern Railway; alleges an unreasonable delay in transporting the freight, in consequence of which the melons rotted to some extent before reaching their destination, and claims damages for the alleged loss. In a supplemental letter of complaint it is alleged that the parties saw the car of melons standing on the track at Albert Lea "broken open and a good many of the melons gone"; also, that on application to the company for damages and a release of the freight charged, the company refused and replied, "no one to blame."

Complainant makes demand for \$125.80 damages, "on account of delay." Superintendent Ives, of the railway complained of, makes oath to the allegations as follows, relating to the movements of the melons: The shipment was loaded at Muscatine on Friday, August 5th, and left Muscatine by first train Saturday morning; taken from Nichols by first freight train, and arrived at Cedar Rapids same day, Saturday. As we run no freight trains on Sunday, this car laid at Cedar Rapids until 2:30 Monday morning, and reached Albert Lea at 5:30 same day; left Albert Lea at 2 Tuesday morning, arrived at Minneapolis afternoon of same day and delivered to St. Paul, M. & M. R'y for St. Paul, which point was reached that night, and consignee received property on Wednesday, the 10th, being actually three days in transit, and one additional day (Sunday) making four days in the hands of the railway.

In a subsequent communication, dated December 15, Mr. Ives further says: "I have gone over the matter again and must refer you to mine of October 31st to you, on the same subject, the facts therein stated remaining fully substantiated on the second investigation. Our records show the movement of the car day by day, the trains showing no delay, but car moved by first train every time. As to the statement of his (Richie's) agent, Mr. Barnard, about his seeing the car standing on the track at Albert Lea, broken open, he says: But he is unable at this date to swear positively as to the number of the car. \* \* \* As for the car being broken open, shippers of melons do not want the cars fastened and sealed as with other property, but want to leave the doors partially open with slats nailed on in order to ventilate the car, and it is distinctly understood with shippers. Mr. Richie was particularly told that if he desired cars left in this condition, it must be at his own risk of having them stolen, as when freight of this character is left so exposed it is practically impossible for the railway to defend it from tramps and other irresponsible parties. \* \* \* The statement made by Mr. Richie that our agent at Albert Lea states in his letter to them that he found my car standing on the track broken open and a good many of the melons gone, is erroneous, as no such statement was made by our agent."

It is the judgment of the Commissioners, therefore, that there was no detention of this car of freight, entitling complainant to damages. The other branch of the complaint, that the car was broken open and a part of the melons taken out and destroyed while the car was at Albert Lea, Minnesota, has not been sustained by any competent evidence. Indeed, it is admitted in complainant's letter of November 26th, that his agent, Mr. Barnard, "is unable to swear positively to the number of the car." Complainant asserts that the railway company's agent at Albert Lea states in his letter to them that he "found my car standing on the track broken open and a good many of the melons gone." Replying to this, Superintendent Ives says: "The statement is erroneous, as no such statement was made by our agent." The Commissioners have waited patiently for proof from the complainant, but up to this time nothing beyond the allegation of complainant

has been supplied. But the fact that the contract to carry the freight was for inter-State service, takes the case as to the question of damages out of the jurisdiction of this Board, their powers extending only to business and contracts for service wholly within the State of Iowa.

The proper remedy for complainant is in the courts.

| R. B. FISHER, KNOXVILLE JUNCTION, IOWA,<br><i>Complainant,</i>        | } <i>Petition for Crossing.</i> |
| CHICAGO, ROCK ISLAND & PACIFIC RAILWAY<br>COMPANY, <i>Respondent.</i> |                                 |

Filed November 4, 1881.

KNOXVILLE JUNCTION, MAHASKA CO., IOWA, }  
November 2, 1881.

*To the Railroad Commissioners, State of Iowa:*

The undersigned complainant, R. B. Fisher, respectfully represents that he is the owner of land on both sides of the Chicago, Rock Island & Pacific Railway, at Knoxville Junction; that he has a residence on one side of the said railway, and has a tract of about nine acres on the south side of said railway, and a tract 66 by 133 feet on north side of said railway; his residence is on the north side and his place of business on the south side of said railway; that on October 11, 1881, he gave to the agent of said railway company, at Knoxville Junction, a notice, a duplicate as follows:

STATE OF IOWA, }  
COUNTY OF MAHASKA. } ss.

To the Chicago, Rock Island & Pacific Railway Company: Take notice that I own a tract of land at Knoxville Junction, Iowa; said tract consisting of about three acres of land, lying on both sides of your railway. I desire that a good and convenient crossing be made over your railway; said crossing to be immediately west of the end of your platform at said junction; said crossing suitable for teams and persons. I desire that said crossing be constructed immediately.

R. B. FISHER.

*October 11, 1881.*

That said company has not made any crossing over said railway as requested, and has violated its duty in that respect, and he asks the said Commissioners to take cognizance of said grievance and to require said company to comply with said request, and to give him such relief as he may be entitled to.

Respectfully,

R. B. FISHER.

Subscribed in my presence and sworn to before me, this second day of November, 1881, by the above named R. B. Fisher.

JOHN D. LACEY, *Notary Public.*

#### DECISION OF THE COMMISSIONERS.

The complaint as to failure of the Chicago, Rock Island & Pacific Railway Company to construct causeway for R. B. Fisher over its track between lots or parcels of his land either side thereof, was duly referred to the president of said company. Reply has been received, together with a plat of the

town, which shows that not only several side-tracks intervene between his lots, but that a public street also intervenes. And it is also shown by the respondent that these streets and lots have been laid out since the construction of both lines of railway. And the Board further finds that were the foregoing facts wanting, he still would not be entitled to the causeway he demands, as the point he designated is unsafe, and consequently an unreasonable place. And it is further shown by his own letter that there is a public street between his north lot and the railway. Consequently, section 1268 of the Code of Iowa has no application in this case.

The Commissioners are, therefore, clearly of the opinion that complainant is not entitled to the causeway he requests of the railway company.

*Des Moines, Iowa, January 27, 1882.*

HUTTUN & DURETTE, RANDOLPH, IOWA, }  
*Complainants,* vs. }  
 CHICAGO, BURLINGTON & QUINCY RAIL- }  
 ROAD COMPANY, *Respondent.* }

Filed November 26, 1881.

SIDNEY, IOWA, November 22, 1881.

DEAR SIR—We have been refused the justice of the payment for the loss of ten hogs that were killed for us in shipment on or about May 23, 1881. We billed the hogs to be fed at Ottumwa and Galesburg, but they run right on past Ottumwa and fed them at Burlington, and we had ten dead hogs. Our commission men presented a bill for the same to the general agent, I believe, at Chicago. We have written several times and get no answer at all lately. They wrote us last spring that our bill was on file and the account would be considered when our turn came; we think our turn ought to come pretty soon. Will you please write me in regard to the case.

Our commission men are Rosenbaum, Bass & Co.

Yours truly,

HUTTUN & DURETTE.

Address: Randolph, Fremont county, Iowa.

P. S.—We ship a great deal of stock, and feel we ought to have pay for this without any trouble; they violated the contract, and certainly ought to pay for that reason. A collision killed the stock, and we understand there was a collision about that time, near that place, in the eastern part of the State. H. & D.

A copy of this letter was sent the general manager of the Chicago, Burlington & Quincy Railroad, which was answered as follows:

CHICAGO, December 9, 1881.

E. G. MORGAN, Esq., *Secretary Railroad Commissioners, State of Iowa,*  
*Des Moines, Iowa:*

DEAR SIR—Your favor of the 28th ult., addressed to our general manager, containing complaint of Huttun & Durette, is referred to me for answer. In reply have to say that this claim has been in process of investigation since presented, and while H. & D. may be technically correct in saying that they have written us several times in regard to same without reply, they

must be aware that the papers have been in Sidney once or twice and that they have seen them there.

The facts are substantially as stated; namely, that in May last they shipped sixty-five hogs in a car for Chicago, with orders to feed at Ottumwa and Galesburg. For some reason the car was not unloaded at Ottumwa but run to Burlington before unloading. Whether this was done through any negligence on the part of the company's employes, or whether it was done at the request of the party in charge of the stock we have been unable to ascertain, for the reason that the man who was then in charge of our yards at Ottumwa has left the service.

The real questions at issue, and those we are trying to decide, are these: 1st. Was the feeding point changed by order of the party in charge of the hogs; and, 2d. Were the ten dead hogs which were found on arrival of the car in Burlington killed by reason of overloading or because of the extra four hours occupied in the run from Ottumwa to Burlington before being unloaded. It seems altogether probable that the loss was occasioned by overloading, but inasmuch as it is one of those questions which can never be settled in a manner satisfactory to both parties, we have been aiming to get all the facts, before further negotiating with H. & D. as to settlement. The complaint of H. & D. to you is a little premature. It is questionable if we owe them anything. If we do, we are ready and willing to pay it, but the investigation of doubtful claims like this, necessarily takes a good deal of time. We shall be ready in a few days to say to them that we will or will not pay the claim. Yours truly.

E. P. RIPLEY, *General Freight Agent.*

On the 20th of February, the complainants informed the Commissioners that they had settled with the railroad company.

J. Q. HANNA, GOLDFIELD, IOWA, *Complainant*,  
vs.  
CHICAGO & NORTHWESTERN RAILWAY COM-  
PANY, *Respondent*.

Filed, November 29, 1881.

GOLDFIELD, IOWA, Nov. 22, 1881.

HON. M. C. WOODRUFF:

DEAR SIR—I wish to call your attention to the T. & N. W. R. R. Co., in regard to the location of their depot, and also their manner of operating trains.

1st. The T. & N. W. asked the people of Goldfield to assist them by voting a five per cent tax, agreeing on their part that if the tax was voted, they would act in good faith with the people, build their road and depot according to terms set forth in their proclamation. The people voted the tax, and the company went to work as though they intended to accept the conditions, representing to owners of land along the line that they expected to build their road and depots as set forth in their election proclamation, and in settlement for right of way deducted the five per cent from the damage, really collecting from some of our citizens the five per cent tax. After securing the right of way in the manner above stated, they located their depot one and one-half miles from the point agreed upon, and one mile from the crossing of the B., C. R. & N. R'y, and they now refuse to deliver freight or mail or passengers at Goldfield, making it very inconvenient for our people. We doubt not that the N. W. Co. are *able* and *willing* to ignore our rights, but we are not disposed to submit tamely.

I have every reason to believe that their action in regard to Goldfield has been governed by spite and envy of little great men. I would like very much to hear from you in regard to this matter.

Very respectfully,  
J. Q. HANNA.

A copy of this letter was sent the General Manager of the Chicago & Northwestern Railway, and the General Superintendent of the Burlington, Cedar Rapids & Northern Railway. Mr. Hughitt replied as follows:

CHICAGO, JULY 26, 1882.

E. G. MORGAN, ESQ., *Secretary Railroad Commissioners, Des Moines:*

DEAR SIR.—Referring to the complaint of Mr. Hanna, of Goldfield, Iowa, respecting the construction of the Toledo & Northwestern Railway, I have to say: The company has no knowledge of any misrepresentation or deception practiced by the agents appointed to procure the right of way, and station grounds for that road. There was a large amount of tax aid voted to the company, but not one dollar has been accepted by it. The company preferred to be free from the conditions usually imposed under such circumstances. The right of way has been paid for as agreed in all cases. I do not know of any unsettled claims against it. Stations have been located at such points as, in the judgment of the management, the interests of the company and its patrons would be well served. The branch of the Burlington, Cedar Rapids & Northern Railway, to which Mr. Hanna refers, did not exist at the time the Toledo & Northwestern road was built.

Very truly,  
MARVIN HUGHITT.

GOLDFIELD, IOWA, February 6, 1882.

E. G. MORGAN, ESQ., *Secretary Railroad Commissioners:*

DEAR SIR—Yours of January 27th received, and in reply thereto I beg leave to submit the following: 1st. The proclamation calling the special election, and fully setting forth the conditions. The agents of the Toledo & Northwestern Railway did often assert that all the people had to do was to vote the tax, and that the road would be constructed as set forth in the proclamation, or notice. If desired I can furnish you many affidavits that they so represented. They have built the depot about one and one-half miles from the place named in the notice.

They have been running trains thereto about nine or ten months, and all that they have now to prove that they located the depot "so as to accommodate the public, etc.," is *one store* and a *hay press*. You will see by reading the notice, that a depot was to be built within half a mile of the southwest corner of section 34, 92, 26. As soon as the tax was voted, they proceeded at once to secure the right of way, representing to the citizens that they intended to accept the tax, and build according to said notice. In proof whereof I herewith attach evidence of county recorder.

In order to explain the method pursued to secure right of way, I will explain the settlement with George W. Hanna.

They agreed that his damages would amount to \$200, that his five per cent tax would amount to \$150. They paid him \$50, and released him from tax. It is plain to be seen Geo. W. Hanna has paid the Toledo & Northwestern \$150, for something or nothing, which?

If they had built according to proclamation they would have earned the tax, and Geo. W. Hanna would have had no reason to complain of unfair treatment. But as they did not build the depot as agreed, they are certainly \$150 or more ahead in this one transaction.

The above is a fair illustration of the methods used to secure this right of way. Was there no deception used? These people worked earnestly to

comply with all demands of the company, and succeeded in securing the aid demanded, and they did it in good faith. What we now ask is, that the Toledo & Northwestern put in a depot at Goldfield, and that the Toledo & Northwestern and Burlington, Cedar Rapids & Northern Railways, unite in putting in a transfer or Y.

Very respectfully,

J. Q. HANNA.

CLARION, February 3, 1882.

MR. J. Q. HANNA:

DEAR SIR—I find upon records of this county deeds given by residents of Liberty township to the Toledo & Northwestern Railway Company for right of way. I also find in the deeds first, as a consideration, the sum of one dollar up to forty dollars. Also deeds say that in further consideration, the company agrees to remit the railway taxes due from these several parties.

J. S. Braden, through southwest southwest 3, 91, 26.  
W. Nees, through south half northeast 33, 92, 26.  
John Kelling, through southeast quarter 6, 92, 26.  
Lucy Barnes, through west half southeast 28, 92, 26.  
Geo. W. Hanna, through east half southwest 21, 92, 26.  
J. H. McHenry, through south half northwest 8, 92, 26.  
Chas. D. Fields, through land in 8, 92, 26.

And I further say that W. Nees has never received one cent for his right of way. The company agreed to remit his railroad tax and build fence and make crossing by January 1, 1882, and these stipulations are in the deed, and they have failed to comply with any of them.

I hereby certify that the above stipulations and conditions are contained in the several deeds above mentioned.

ED. HARTSOCK, *Recorder*.

#### NOTICE OF SPECIAL ELECTION.

Whereas, on the 21st day of May, 1880, a petition signed by a majority of the resident freehold tax-payers of Liberty township, Wright county, Iowa, was presented to the undersigned, trustees of said township, asking the submission to the qualified electors thereof the question of whether a tax of five per centum shall be levied upon the present valuation of the taxable property of said township for the purpose of aiding in the construction of the Toledo & Northwestern Railway from a point near Callanan, Hamilton county, Iowa, to a point on the north line of the State of Iowa, under the provisions of chapter 123, laws of the Sixteenth General Assembly of Iowa, and amendments thereto contained in chapter 157, laws of the Seventeenth General Assembly of said State, and chapter 28 of the laws of the Eighteenth General Assembly of said State, said tax to be due and payable and collectible as follows: One-half thereof in twelve months after the said road is fully completed to Goldfield, and a depot built within one-half mile west of the southwest corner of section 34, township 92 north, range 26 west, and the remaining half of said tax shall be due, payable, and collectible one year thereafter; provided, also, that the whole of said road shall be completed between said points on or before the 31st day of December, 1881, and that the said railroad company shall, within ninety days after said tax is voted, file with the auditor of Wright county, their acceptance of the aid so voted, and their agreement to build the proposed railroad.

Therefore, notice is hereby given that on the 5th day of June, 1880, at the school-house in Goldfield, the place where the last general election was held, a special election will be held for the purpose of submitting the above ques-

tion to the qualified electors of said township, in the following form: For taxation, or against taxation.

Given under our hands this 22d of May, A. D., 1880.

E. C. MCINTOSH,  
JAMES MACK,  
A. MCINTYRE,  
*Trustees of Liberty Township.*

Attest: S. B. KIMBALL, *Township Clerk.*

I hereby certify that the above is a true copy of the proclamation upon which aid was voted to the Toledo & Northwestern Railway.

J. E. ROBBINS, *Township Clerk.*

#### RECOMMENDATION OF THE COMMISSIONERS.

A copy of this recommendation was sent to Marvin Hughitt, General Manager C. & N. W. R'y, and to C. J. Ives, General Superintendent B., C. R. & N. R'y, on the 10th day of February, 1882.

The Board are in receipt of another letter from Mr. J. Q. Hanna, of Goldfield, Iowa, requesting that a "Y" be put in and a station-house built at the intersection or crossing of your road at said town, with the Burlington, Cedar Rapids & Northern Railway. He also claims that you have accepted the tax voted by the people of Liberty township, and violated the conditions on which you accepted it. This branch of the case, however, the Board decline to entertain for want of jurisdiction. As to the request for the "Y" and the station-house, it is the judgment of the Board that you comply therewith. Section 1292 of the Code of 1873, as amended by chapter 18, laws of the Fifteenth General Assembly, provides: Any railway corporation operating a railway in this State, intersecting or crossing any other line of railway of the same gauge, operated by any other company shall, by means of a "Y," or other suitable or proper means, be made to connect with such other railway so intersected or crossed. Section 1293 of same act amended as above, provides that "when such corporations are unable to agree upon the methods and terms of such connections \* \* \* either or any person interested in having such connection made may make application to the District or Circuit Court in any county in which said connection may be desired or located, or to the judge of said courts if in vacation, after ten days written notice to the companies," and then goes on to provide the method and means of accomplishing said connection. The first section quoted makes it imperative that intersecting railways *shall* connect by means of a "Y," and the next section provides the method and terms of connection when such intersecting railways cannot agree upon them; and it provides further, that any person interested may avail himself of the provisions of this section to secure the connection desired.

Section 3, of chapter 77, of the acts of the Seventeenth General Assembly provides: "Whenever, in the judgment of the Railroad Commissioners, \* \* \* any addition to, or change of, its station or station-

"houses, \* \* \* is reasonable or expedient, in order to "promote the security, convenience, and accommodation of the public, said "Railroad Commissioners shall inform such railroad corporation of the "changes which they adjudge to be proper."

The Commissioners are of the opinion that the Chicago & Northwestern Railway Company in connection with the Burlington, Cedar Rapids & Northern Railway Company should put in a "Y" as required by law, and that such platform and station-house should be erected at said crossing as will "promote the security, convenience and accommodation of the public" at said crossing. A duplicate of this recommendation has been sent to Mr. C. J. Ives, Gen. Supt. B. C. R. & N. R'y, who it is expected will join you in the accomplishment of this work.

*Des Moines, Iowa, February 10, 1882.*

CEDAR RAPIDS, IOWA, Feb. 17, 1881.

E. G. MORGAN, ESQ., *Secretary Railroad Commissioners, Des Moines:*

DEAR SIR—In reply to yours of February 10, regarding complaint of J. Q. Hanna, Goldfield, Iowa, would say, that no application has ever been made to us by Mr. Hanna or any one else at Goldfield for a "Y" or depot at the junction, and probably for the very good reason that none is needed. Our depot is but a few rods from the crossing of the C. & N. W. track. There being no interchange of business between our two roads at that point no Y is needed either by Mr. Hanna or any one else. As you probably may remember from the previous correspondence regarding the Y at Abbott, our views do not accord with those expressed by the Commissioners in regard to the peremptoriness of putting in such Y's, but that in case of non-agreement of such matters between roads a way is provided for settling them. I have written Mr. Hughitt in regard to what his views may be in this case.

Very respectfully,

C. J. IVES, *General Superintendent.*

DES MOINES, IOWA, Feb. 21, 1882.

C. J. IVES, ESQ., *Gen. Supt. B., C. R. & N. R'y, Cedar Rapids, Iowa:*

DEAR SIR—I am instructed by the Board to acknowledge the receipt of your letter of the 17th inst., and to say that if they understand you rightly, you deny the right of the Commissioners to direct the putting in of a "Y," as provided for in chapter 18, acts of the 15th General Assembly. If those are your views, please state so specifically, that the law may be amended during the present session of the legislature. Be kind enough to answer immediately. By order of the Board.

E. G. MORGAN, *Secretary.*

CHICAGO, February 20, 1882.

E. G. MORGAN, ESQ., *Secretary Railroad Commissioners, Des Moines, Iowa:*

DEAR SIR—Referring to the complaint of J. Q. Hanna, of Goldfield, Wright county, Iowa, that a connecting track between the Burlington, Cedar Rapids & Northern and Toledo & Northwestern Railways, at the crossing of the two roads in that county, has not been constructed, I have

to reply that we are now in correspondence with the B., C. R. & N. Co. regarding the matter, and I have no doubt we will be able to agree with them on terms under which it may be built. Yours truly,

M. HUGHITT.

CEDAR RAPIDS, IOWA, Feb. 23, 1882.

E. G. MORGAN, ESQ., *Secretary Railroad Commissioners, Des Moines, Iowa:*

DEAR SIR—I have yours of February 23d, and would again state the objections to the Commissioners' interpretation of chapter 18, acts of the 15th General Assembly. It seems to me that it was not contemplated in that act to compel railways to put in connecting tracks when not needed for the transaction of business between two roads, but that in case of disagreement between two companies, a way was provided by which the connection should be made. If any legislation is needed in the matter, I think it would be well to empower the Commissioners to investigate all such cases and hear the testimony of both roads and then advise as to what they think best to be done under the circumstances.

I have a letter from Mr. Hughitt in regard to the Goldfield "Y," in which he says there is not the slightest necessity for such connection, and I understand from people of Goldfield that the complaint against that road was of a vindictive spirit and feeling that they had been aggrieved by the action of the road building an opposition town a short distance away, and not that there was any necessity for a connecting track or depot at the junction. You will readily see that the citizens of Goldfield could ship freight either to or from without the necessity of any track connecting the two roads, provided each had depot facilities of their own, and this is in my mind another proof of the faulty construction of this section compelling roads to build these connecting tracks. I trust this matter will not be insisted on to put us to such an extraordinary expense at that point, when we have provided all the facilities necessary to do the business of the town.

Yours truly,

C. J. IVES, *General Superintendent.*

DES MOINES, IOWA, March 16, 1882.

C. J. IVES, ESQ., *Gen. Supt. B., C. R. & N. R'y, Cedar Rapids, Iowa:*

DEAR SIR—Again referring to the complaint of J. Q. Hanna, in regard to the "Y" at the intersection of your road with that of the Chicago & Northwestern at Goldfield, and in reply to yours of the 23d of February, I am instructed to say: The Commissioners have again carefully and critically examined chapter 18, acts of the 15th General Assembly, amending sections 1292 and 1293, of the Code of 1873, in regard to the construction of Y's at the intersection of all railways of the same gauge, and they are of the clear and firm conviction that the legal requirement is unconditional and imperative. The law reads: "Any railway corporation operating a railway in this State intersecting or crossing any other line of railway of the same gauge operated by any other railway company, *shall* by means of a "Y, or other suitable or proper means be made to connect with such other "railway so intersected or crossed."

The Board are unable to see how language could be more explicit or more imperative; and certainly there are no conditions in the act which create any discretion in the railways so intersecting. The next section merely provides for the appointment of Commissioners by the Judge of the District or

Circuit Court "to determine the method and terms of connection" in cases where such intersecting corporations are unable to agree upon the method and terms of connection, etc. The Commissioners did not enact the law and whether it be oppressive in some particular cases, it is not their province to pass upon. The least they can do, when complaint is made under it is to declare the law and recommend compliance, and in case of a refusal to comply, to point out to the complainant the remedies which the laws supplies. This law, as it affects the interests of the people at Goldfield may or may not be of any practical use, and the complaint may proceed from a "vindictive spirit" towards the railroads, yet neither of these circumstances can in the least change the plain terms of the law. Answering the complaint, which was also made against the Chicago & Northwestern Company, General Manager Hughitt says under date of February 20th: "I have to reply that we are now in correspondence with the B., C. R. & N. Co. regarding the matter, and I have no doubt that we will be able to agree with them on terms under which it may be built."

By order of the Board.

E. G. MORGAN, *Secretary*.

DES MOINES, IOWA, March 30, 1882.

HON. J. TRACY, *President B., C. R. & N. R'y Co., Burlington, Iowa*:

DEAR SIR—Complaints of individuals and of whole communities are on file in this office asking the Board of Commissioners to secure compliance with the laws of Iowa by your railway in regard to the construction of a "Y" at all points of intersection of the road with other roads of like gauge; also for buildings to provide shelter for passengers who may change from one of the roads so intersecting to the other. One case of complaint comes from the town of Abbot, in Hardin county, the other from Goldfield, Wright county.

The Board instruct me to call your attention to sections 1292 and 1293 of the Code, as amended by chapter 18 of the acts of the Fifteenth General Assembly, and to section 3, chapter 77, of the acts of the Seventeenth General Assembly; also to published decisions of the Board upon complaints under these laws, in their report for 1880, pages 136 to 141, and in report for 1881, page 143.

Your attention is also called to the following letter yesterday addressed to C. J. Ives, General Superintendent of your company, and particularly to the last paragraph. I am instructed to say that the recommendations of the Board on the complaints in which the Burlington, Cedar Rapids & Northern and the Central Iowa are the intersecting lines, are the only ones which have not been complied with by the companies interested, all other roads in Iowa promptly complying under like circumstances. The Commissioners did not enact the law, and whether it be oppressive in some cases it is not their province to inquire. The most they can do under it, when complaint is made, is to declare the law and recommend compliance, and in case of

refusal to comply, to point out to complainants the remedies which the law supplies.

Yesterday's letter to Mr. Ives was as follows:

DES MOINES, March 29, 1882.

C. J. IVES, Esq., *Supt. B., C. R. & N. R'y, Cedar Rapids, Iowa*:

DEAR SIR—On the first of December, 1880, nearly sixteen months ago, the Board of Railroad Commissioners, on the complaint of J. M. Lieser, recommended the construction of a "Y" at the intersection of your road with the Central Iowa at Abbot. In correspondence with you in this case, the Commissioners have your letter of November, 1880, in which you state that you had written Secretary Morgan that "a platform had been put in at the "junction," and that "a building would soon be put up," etc. On this assurance, the Board made no recommendation as to the station building, or building for the comfortable shelter of passengers who may wish to change cars at said crossing, but contented themselves with quoting to you the clear terms of the law as to the power of the Commissioners to require such a building. A similar recommendation was made to Supt. Pickering, of the Central Iowa. November 24, 1881, nearly a year after the recommendation of the Board in the case of Leiser, J. T. Miller made complaint that there was much suffering endured by passengers who changed cars at the Abbot crossing, for want of shelter; that many persons change there daily, and that among them were ladies who could not safely endure the inclemency of bleak winter weather.

On this complaint, the former recommendation of the Board in the Leiser case was repeated to you and to Supt. Pickering.

On the 10th of December, 1881, the Commissioners received a petition from thirty-eight citizens of Abbot, praying that the "Y" and the building for shelter might be ordered by the Board.

The complaint of J. Q. Hanna, Goldfield, in November last, asking for the construction of a "Y" at the intersection of your line with the Toledo & Northwestern raised the same question, and the same recommendation was made by the Board. The Commissioners have the opinion of the general solicitor of the Chicago & Northwestern Railway, through General Manager Hughitt, that the interpretation made of the laws on these questions by the Board is unquestionably correct, and that there was no legal alternative on the part of the roads intersecting but compliance, and this assurance was emphasized by Mr. Hughitt expressing the purpose of his company to construct a "Y" at all points of intersection with other railways of like gauge in Iowa. In a letter dated March 16th inst., the Commissioners wrote you at length their decision in the Goldfield case. They quoted to you the expressed intention of the Chicago & Northwestern Railway Company to comply with the recommendation, and hoped to get prompt response from you of like import.

I am instructed by the Commissioners to ask you to state at as early a day as you can, whether it is the intention of the Burlington, Cedar Rapids & Northern Railway Company to comply with their recommendations. This specific answer is required in order that the respective complainants may be notified of your intention, and that they may avail themselves if they so desire of the provisions of section 1293, chapter 18, acts of the Fifteenth General Assembly, if your company refuses to heed the recommendations. It has been a favorite belief of this Board, as it has been of other Commissioners, that the simple power to investigate and recommend was quite sufficient to secure prompt compliance with the law. It has often been asked of its members if more power—power to enforce its recommendations—would not increase the efficiency of the Board and the commissioner system. The invariable answer has been that the best results had come from the exercise of mere advisory or recommendatory powers; that compliance, without employing the usual powers of judicial execution, was practically voluntary, and hence far more satisfactory to the public. The Board, therefore, wish to know if the B., C. R. & N. Co. proposes to put this most prominent feature of the commissioner system to such a test as will logically challenge the enactment of amendments supplying power to enforce execution of recommendations.

Will you please make reply to this at your earliest convenience?

The Board deemed it advisable to forward you a copy of the letter to Supt. Ives, and to invite your attention to the matter complained of. They would be pleased to hear from you on it as soon as you shall have given it such consideration as you think it merits.

By order of the Board.

E. G. MORGAN, *Secretary*.

BURLINGTON, IOWA, March 31, 1882.

E. G. MORGAN, Esq., *Secretary Railroad Commissioners, Des Moines, Iowa:*

DEAR SIR—In reply to your favor of 29th inst., I beg to say that this company now contemplates the removal of the station named Cleves, near Abbott, to the point of crossing of the Central Iowa track, and if such removal is made, the additional facilities for the transaction of business at that point, the putting in of a "Y," etc., will be attended to. There is really no necessity for the putting in of a "Y" at the point of crossing the B., C. R. & N. Co.'s line by the C. & N. W. at Goldfield.

No one would be benefited by it; but if insisted upon by the applicant, the recommendation of the Commissioners will be complied with.

Although not uninformed as to the provisions of the Iowa statutes you have referred to, I am nevertheless under obligations to you for the pains you have taken in pointing them out to me. It is barely possible that the courts of this State may not fully agree with the Honorable Commissioners in their construction of the statutes referred to. I am quite willing, however, to accept their construction of the law as applicable to the two cases involved, and expect that this company will take action accordingly.

Yours respectfully,

J. TRACY, *President*.

DES MOINES, IOWA, April 1, 1882.

HON. J. TRACY, *President B., C. R. & N. R'y Co., Burlington, Iowa:*

DEAR SIR—Your letter of 31st ult. received and contents noted. The Commissioners are pleased to note that you are "quite willing, however, to accept their construction of the law as applicable to the two cases involved, and expect that this company will take action accordingly." In that case it is quite immaterial whether the courts of the State agree with them on the construction of the several statutes referred to.

Very respectfully,

E. G. MORGAN, *Secretary.*

CEDAR RAPIDS, IOWA, April 4, 1882.

E. G. MORGAN, ESQ., *Secretary Railroad Commissioners, Des Moines, Iowa:*

DEAR SIR—I have yours of March 28th, and under instructions from our president have delayed reply, as I now understand from him that he has been in correspondence with the Commissioners on the same subjects.

You say you have the opinion of the general solicitor of the C. & N. W. Railway in regard to the mandatory interpretation of the law, regarding the putting in of Y's or connecting tracks by railways. This opinion does not coincide with that of our president, Judge Tracy. I do not wish, however, to argue this point as it is to my mind a legal one, but will only suggest that if strictly enforced, great injury might be done to the railway companies by irresponsible parties making complaints, and compelling railroads to be at a large expense, when it is entirely unnecessary. The officers of the roads necessarily should be better informed as to the business on their lines, and the necessity of connecting tracks rather than outside parties, who have no use for the tracks, but simply complain that such are not put in, knowing the interpretation placed by the Commissioners on the statutes.

I am most favorably inclined to the Commissioner system, and have the very highest respect for the gentlemen comprising it, and certainly do not wish to place our line in antagonism to their rulings; but where the end sought for, which is the accommodation of the people, can be had without the additional expense of connecting tracks, which are not needed, I am in favor of such accommodation being furnished, and in regard to the two points now under consideration, would ask the opinion of the Commissioners in regard to the Abbott crossing, whether, if our depot at Clevs should be removed to a convenient point at Abbott, but not at the crossing, this would in their opinion relieve the two companies from the maintenance of a joint depot at the intersection of the two roads. In case their decision is adverse to this, I will say that our company is ready to join with the Central Iowa Railway, in the erection and maintenance of a joint depot at the junction whenever the officers of the other road are ready to co-operate. We must, however, ask to be relieved from the expense of purchasing grounds, and the laying of connecting tracks, until such time as any business is offered on either road, for which such track would be needed.

In regard to the Goldfield matter, I have had some correspondence with Mr. J. Q. Hanna, the complainant in the case, and finally, after an interview with him, I learned what I supposed was the trouble at the time, which is, they wish the C. & N. W. R'y Co. to build and operate a depot at Goldfield, instead of at Thrall, a mile and a half distant. They admit that the connecting track at Goldfield would be of no consequence to them, and that a depot at the junction, while it might be a convenience to the traveling public passing from one road to the other, would be more of an imaginary than an actual benefit to the people of Goldfield. Mr. Hanna, however, objects to the entire withdrawal of his complaint, but wishes that such pressure might be brought upon the C. & N. W. people as would compel them to establish a depot according to their original contract.

As I understand the decision of the Commissioners in this case, it is that they have no jurisdiction, but can only advise as to the junction depot, and connecting tracks. A connecting track in this case as in the other, is entirely uncalled for, no business having been presented to either road as yet to be transferred to the other, at that point. As to the depot at the junction we have no use for it, but if insisted upon I am willing to join with the C. & N. W. Co. in its erection, but would prefer to have the matter of the intersecting track deferred, until such time as there seems to be a call for it. I have had some correspondence with Mr. Hughitt, in regard to this matter, and have no doubt but we can come to a satisfactory arrangement. In regard to the Abbott matter, I have written Mr. Pickering several times, but have received no response from him in regard to what he is willing to do at that point. On receipt of your reply regarding the Abbott affairs, will take the matter up again with him and try to push it to some conclusion.

Yours truly,

C. J. IVES, *General Superintendent.*

DES MOINES, IOWA, April 15, 1882.

C. J. IVES, ESQ., *Gen. Supt. B., C. R. & N. R'y, Cedar Rapids, Iowa:*

DEAR SIR—Your letter of April 4th received, and contents noted. We received a letter from Judge Tracy written March 31st, in which he seems to hold the same opinion that you do, "that the Iowa courts might not interpret the law as the Commissioners did"; at the same time he agrees, as we understand him, to have the connecting tracks put in as called for by the law, and the station houses as suggested by the Commissioners. This we supposed was the situation; your letter throws some doubt upon it, and as it is some three days later in date than Mr. Tracy's, we would be pleased to learn whether yours or Mr. Tracy's is the final conclusion of the company.

This Board did not enact the law, is not responsible for its wisdom, but is required by law "to inquire into the neglect or violation, and inform the "company of what they adjudge to be proper." We regret the manifest disposition to disregard the adjudication of the Board, and whatever may be the determination of the company, whether your position or that of Mr. Tracy, please inform us as at once.

By order of the Board,

E. G. MORGAN, *Secretary.*

CEDAR RAPIDS, IOWA, April 24, 1882.

E. G. MORGAN, ESQ., *Secretary Railroad Commissioners, Des Moines, Iowa:*

DEAR SIR—Since receipt of yours of April 15th, I have seen Mr. J. Wilson, of the Railroad Commissioners, and at his request have delayed final answer to your inquiries until he shall have made his report, and indicated exactly what his views are in regard to the accommodations that are necessary both at Abbott and Goldfield. For our part, we are willing to waive any differences of opinion and wish to meet the views of the Commissioners, and also the parties from whom complaints have been made, and do what seems best for all parties interested.

Yours truly,

C. J. IVES, *General Superintendent*

CEDAR RAPIDS, IOWA, May 1, 1882.

E. G. MORGAN, Esq., *Secretary Railroad Commissioners, Des Moines, Iowa* :

DEAR SIR—I am in receipt of a letter from Mr. James Wilson, who has visited Goldfield and Abbott, and has made report to the Commissioners in regard to matters at those points. As I wrote you before, we are willing to waive points of difference in regard to connecting tracks, and have arranged with the C. & N. W. people to put in the track at Goldfield. Mr. Wilson writes me that the matter of a road at Abbott is under consideration by your Board, and when determined on, the matter of location of depot can then be brought up. Yours truly,

C. J. IVES, *General Superintendent.*

Since the letter of Mr. Ives, of May 1st, was received, the Y has been put in at Goldfield as called for by the law.

The Board have published the correspondence very fully, as it was one of the few cases where there seemed to be a persistent determination on the part of one of the companies to ignore the requirements of the law and the findings of the Commissioners, the theory being that the managers of the road were the judges of the necessity of the connecting tracks, and that the law being founded in reason, they should not be required to obey its mandates if there was not a demand for the interchange of cars at that station. That this company were under a misapprehension of the needs of business at this point, will appear from the following letter:

GOLDFIELD, IOWA, Nov. 24, 1882.

GENTS—I am having goods shipped from Des Moines to Goldfield on the N. W. R. R., and cannot unload on Y, and Burlington folks refuse to transfer. What am I going to do, please inform me. Yours,

E. E. GOULD.

F. C. ASHALL, CHICAGO, ILLINOIS,  
*Complainant,*

vs.

CENTRAL IOWA RAILWAY COM-  
PANY, *Respondent.*

} *Extra Baggage.*

Filed, December 9, 1881.

CLEAR LAKE, IOWA, Dec. 6, 1881.

*To the Railroad Commissioners, State of Iowa :*

GENTLEMEN—I wish to bring under your notice a law the Iowa Central Railway has just issued in regard to baggage. The principal points in it are, to-wit: No person shall be allowed to carry *any samples free*. If they do, all under 300 pounds shall pay for 300 pounds excess baggage, and in no case shall any traveler be allowed to carry on any passenger train more than 600 pounds. Baggage must be at the depot thirty minutes before the specified time of leaving.

Now, I think the above conditions are great pieces of imposition, as you are aware that if a traveler has to have his baggage at the depot thirty minutes before time for train to leave, it will cause a great deal of incon-

venience and loss of valuable time. They have a card with these rules tacked up in their depots. Wish I could have sent you one. Hoping that you will look into the matter as early as possible.

I remain your obedient servant,

F. C. ASHALL.

*Traveler for Seeberger, Breaky & Co., Chicago.*

#### DECISION OF THE COMMISSIONERS.

The complainant avers that the Central Iowa Railway Company has issued a rule on the transportation of baggage and the sample trunks of commercial travelers which is oppressive; that no sample trunks will be carried free; that the 300 pound rate is charged on sample trunks, even though they may not weigh so much.

The order complained of is a special notice to commercial travelers and others dated November 14th, 1881; that "all persons with sample trunks or "other packages (not strictly personal wearing apparel) will see that their "trunks are at the station from which they are to be forwarded on passenger trains, not less than thirty minutes, and ticket for passage shown to "baggage man at the station, and baggage pointed out and weighed, before "the same will be allowed to be checked, and before the schedule time for "leaving, or the same will not be put on the train except at the convenience "of the company."

"One hundred and fifty pounds of baggage (strictly personal wearing apparel) will be allowed free of charge for each person over fourteen years "of age."

"Sample trunks taken on passenger trains will be charged at regular excess baggage rates for 300 pounds; all over 300 pounds will be charged "double the rate of the first 300 pounds for such excess, and no person will "be allowed to take on passenger trains more than 600 pounds; and any "trunk or package exceeding in one piece more than 300 pounds, can only "be taken on freight trains, regularly way-billed at the station and freight "prepaid to destination." "Persons having baggage (strictly personal "wearing apparel) will be required to purchase ticket and show the same to "baggage man at station from which the baggage is to be forwarded, at least "fifteen minutes before schedule leaving time for train, and must be claimed "on arrival of the train or the same will be at the risk of the owner." This notice was modified by a circular dated November 20th, so as to permit holders of excess baggage books to have their baggage checked to the extent of such weight as their baggage excess books cover till such time as their books are used up, but from that date, agents will not issue excess baggage books covering more than 450 pounds, which added to the amount carried free, 150 pounds, makes the maximum weight allowed, 600 pounds.

The Commissioners find the following to be well settled principles with regard to carriers of passengers: That the carrier is regarded as an insurer of baggage and must answer for any loss not occasioned by the act of God or the public enemies.

That a carrier cannot restrict his liability by a general notice, though brought to the knowledge of the owners of the property.

That the carrier may demand statement of the value of baggage and premium in proportion thereto.

That the contract with the carrier is to carry the passenger and his personal baggage. The definition as legally given to personal baggage is such as passengers usually carry for their personal use, comfort, or amusement, according to the position in life and occupation of the traveler. This includes clothing.

It has been decided in many cases that a merchant cannot carry merchandise in his baggage to avoid the payment of freight upon it, and recover of the carrier. This rule extends to the samples carried by traveling salesmen upon the road.

For extra baggage the carrier is entitled to demand and receive special compensation in addition to the fare paid for the carriage of his person. When such extra compensation is paid, the carrier is responsible for such baggage in the same manner and to the same extent as carriers of goods. Although the correct rule seems to be that a carrier cannot limit his liability by notice that he will not be responsible beyond a certain extent, yet there is no reason why he may not make for his own protection and for the greater safety of baggage, such reasonable regulation for the checking, custody, and carriage of the baggage as may be suggested by reason and experience, but the regulation must be of a reasonable and proper nature.

It is the duty of the passenger to remove his baggage within a reasonable time after reaching his destination; failing to do this the liability of the carrier is changed, and he assumes the relation to the baggage that a warehouseman holds to goods in store.

From the above quoted authorities the Commissioners conclude that the Central Iowa Railway Company may carry or not, at their option, the trunks of traveling salesmen on their passenger trains (not being personal baggage), and may if they elect to do so, prescribe the time when and the conditions on which they will be received; that they may draw the line of distinction between this class of goods and the ordinary baggage, as they have done in the notice of the time in which it will be received, and that they may require it all to be shipped as freight if they so determine.

The passenger as to his personal baggage might raise a question as to the reasonableness of the time he was required to present his baggage for checking before the time for the arrival of the train, and possibly might compel them to check at any time before the train was due. After that the company's agents may properly refuse to check baggage or sell tickets. That the requirements complained of will often be a waste of valuable time is probably true, and possibly if the regulation is rigidly enforced, may work hardship, but we have failed to find anything in the law of carriers as interpreted by the courts that will furnish relief.

It is the duty of the passenger to remove his baggage on arriving at his destination. If he fails to do so, he relieves the carrier of special liability.

But the new relation of warehouseman does not arise until it appears that the baggage was stored in a safe and secure warehouse; then the company becomes liable as a warehouseman or bailee for hire.

*Des Moines, Iowa, December 28, 1881.*

CHICAGO, January 2, 1882

*Railroad Commissioners, Des Moines, Iowa:*

GENTLEMEN—Yours in the matter of the Central Iowa Railway, of Dec. 30th, received. Many thanks for your courteous treatment of my complaint.  
Yours truly, F. C. ASHALL.

MASHALLTOWN, IOWA, December 31, 1881.

MR. E. G. MORGAN, *Secretary Railroad Commissioners, Des Moines, Iowa:*

DEAR SIR—To yours of 30th, inclosing copy of your decision in case of F. C. Ashall, "a traveler for Messrs. Seeberger, Breaky & Co., of Chicago," against the Central Iowa Railway Company, at hand, and the same has been read with satisfaction. I am quite sure if your able exposition of this matter was in the hands of and read by every son of Japhet who writes himself as "a traveler," the wholesome effect produced would be a luxury that every road in the State would make the effort to indulge themselves in.

Not infrequently "a traveler" has arrived at the station just as a train is ready to pull out, with samples weighing in the aggregate some 1,500 to 2,000 pounds. It is the intention to have the "traveler" at the station with his baggage at a seasonable time, if he desires his luggage to go by that train, else it will be loaded at convenience of the company. Striving at all times to meet the just and reasonable demands of our patrons,

I am very truly,

D. N. PICKERING, *Supt. and Treas.*

R. B. TOMLINSON & Co., CEDAR RAPIDS, IOWA,  
*Complainants,*

vs.

ILLINOIS CENTRAL RAILROAD COMPANY, *Respondent.*

*Discrimination.*

Filed December 9, 1881.

CEDAR RAPIDS, IOWA, December 8, 1881.

*To the Honorable Board of Railroad Commissioners, Des Moines, Iowa:*

GENTLEMEN—Some weeks since we applied to the general ticket agent of the Illinois Central Railroad, at Chicago, for a thousand mile ticket over their road at the customary rate of two cents per mile, for traveling salesmen in Iowa, but they declined upon the plea that we did not patronize their road. All other railroad companies to whom we have applied for thousand mile tickets at the established rate of two cents, even those over which we do not ship, have cheerfully acceded.

Is this not discriminating against the interests of shippers in this city? We hope that you will be kind enough to look after these narrow-minded fellows, if it comes within the province of your judicial investigation.

Yours, very respectfully,

R. B. TOMLINSON & Co.

## DECISION OF THE COMMISSIONERS.

Your charge is that the Illinois Central Company refuses to sell 1,000 mile passenger tickets at the reduced rate of two cents per mile, the same rate it charges to passengers who transport their merchandise over its line.

The law fixes the rate which the Illinois Central Company may charge for passengers: see sections 1 and 2, chapter 68, acts of the Fifteenth General Assembly.

The Board of Commissioners has no authority to alter the rate thus prescribed. That the Illinois Central Company sells 1,000 mile tickets to persons for a less rate is a matter not within control of the Board. That in doing so the company has a right to affix certain conditions, as for instance, that the purchaser shall transport his freight over their line, cannot admit of question.

That other railway companies make no distinction in sales of such tickets between persons who do and who do not do their freight business over their lines respectively, does not impose a like reduction upon the Illinois Central.

If this doctrine were maintained, one or two companies would have the power to control the passenger rates of all the other roads in the State. Companies of large business would practically have control of rates on other lines, no matter how limited their traffic.

Section 11 of the Commissioner law, passed March, 1878, provides that "no railroad corporation shall charge, demand, or receive from any person, company, or corporation, for the transportation of persons or property, \* \* \* a greater sum than it shall at the same time charge, demand, or receive from any other person \* \* \* for a like service." It also provides, that "all concessions of rates, drawbacks, and contracts for special rates, shall be open to and allowed all persons alike," etc. But these conditions are modified by the conditional phrase that "these provisions shall be open to all alike upon like conditions and under similar circumstances." If one person obtains special passenger rates on condition that he transports his freight over that company's lines, another cannot avail himself of this rate, except on complying with the terms of the special rate, except "upon like conditions and under similar circumstances."

There is no discrimination against you in the action of the railway complained of, because you evidently do not intend to accept the "condition" along with the special rate.

BURLINGTON, CEDAR RAPIDS & NORTHERN  
 AND CENTRAL IOWA RAILWAY COMPANIES,  
*Respondents.*

*Application for depot and  
 transfer track.*

Filed, December 12th, 1881.

ABBOTT, IOWA, December 10, 1881.

M. C. WOODRUFF, Esq., *Dubuque, Iowa:*

DEAR SIR—I herewith enclose a petition of the business men and citizens of Abbott, praying you to use all honorable means in your power to cause the Burlington, Cedar Rapids & Northern and the Iowa Central Railways to put in such accommodations for the benefit of business men and the traveling public as are required by law. As I understand it, a transfer "Y" is required at all crossings where the roads are of the same gauge, and the traveling public surely demands of the Burlington, Cedar Rapids & Northern Railway a comfortable place to wait for trains. There is a daily transfer of from eighteen to twenty-four persons, and this would be doubled if there were any accommodations. Travelers go out of their way to avoid such usage. The company recognizes this place, sells tickets, and are very glad to stop and take them on half frozen, and charge them first-class fare, and not a passenger ever fails to curse the Burlington, Cedar Rapids & Northern Railway Company. The building they built is fit for nothing but a hand-car house, and has been so defaced and misused by tramps, as to be unfit for any person to step into. I don't think there is a crossing in the State so totally neglected as this. Trusting this may receive your immediate attention,

I remain very truly yours,

I. M. LIESER.

ABBOTT, IOWA, December 6, 1881.

*To the State Board of Railroad Commissioners:*

GENTLEMEN—We, the undersigned dealers in grain, stock, lumber, and coal, do petition your honorable body to use your legal authority as Railroad Commissioners to cause a "Y" to be put in here at this place, connecting the Iowa Central and the Burlington, Cedar Rapids & Northern Railways, as contemplated by law, so that we can take advantage of the different markets, have the benefits of railroad competition, and not be entirely under obligation to the Central Iowa Railway.

(Signed)

J. W. MCGINNIS,  
 N. J. RICE,  
 J. CATTELL,  
 E. H. HUBBARD,  
 N. F. JONES,  
 I. M. LIESER,  
 And thirty-five others.

DUBUQUE, IOWA, December 6, 1881.

I. M. LIESER, Esq., *Abbott, Iowa:*

DEAR SIR—Yours of the 10th enclosing petition of the citizens of Abbott in regard to station building at connection of the Central Iowa and the Burlington, Cedar Rapids & Northern Railways, received this morning. On the complaint of a citizen of Iowa Falls, made some ten days ago, the Board directed the Burlington, Cedar Rapids & Northern Company to put up a

building at the crossing sufficient to afford shelter, comfort, and accommodation to the public, and they expect that it will be done at an early day.

I will also urge your petition upon the company in order to emphasize the action of the Board and hasten the work.

Respectfully yours,

M. C. WOODRUFF.

DES MOINES, IOWA, January 13, 1882.

D. N. PICKERING, Esq., *Superintendent and Treasurer Central Iowa Railway, Marshalltown, Iowa:*

DEAR SIR—Various complaints, written and verbal, have been received at this office, from which the Board instruct me to quote the following:

“NOVEMBER 24, 1881.

“I call your attention to the transfer at Abbott, between the Burlington, Cedar Rapids & Northern and the Central Iowa Railways. I spent time enough last night crouched behind a two-inch plank to freeze an Esquimaux, and with a stiff northwester blowing. I found that several ladies had a similar experience yesterday. Perhaps twenty-five passengers, on the average are transferred there daily, and it is too unbearable. They sell tickets and then dump you on the plank there night and day. Many come here not knowing the situation and so are unavoidably caught. Can't you devise a remedy?”

Both railways are important lines of passenger travel, and each is under obligation alike of law and humanity to provide for the comfort and safety of its passengers. It is perhaps a nice question whether a railway company is not liable for any damage by exposure from the delivery of passengers at a railway crossing—the almost universal custom at crossings being to provide a depot or waiting room. Whether this be so or not, the case in question calls for the intervention of the Commissioners.

Section 3, of chapter 77, acts of the Seventeenth General Assembly, provides, that “Whenever in the judgment of the Railroad Commissioners it shall appear that any addition to, or change of, its station or station-houses, or any change in the mode of operating its road, and conducting its business is reasonable and expedient, in order to promote the security, convenience, and accommodation of the public, said Railroad Commissioners shall inform such railroad corporation of the *improvements and changes* which they adjudge to be proper, by a notice in writing,” etc.

The case in question is one which, in the judgment of the Commissioners, demands their intervention on behalf of the traveling public. It is their judgment, and this is to notify you, that such a building or waiting room be erected at so near the point of intersection of the two railways as shall afford reasonable shelter, comfort, and accommodation to passengers who may desire to change from the trains of one railway to those of the other. As the transfer between the two roads at Abbott is presumably equal, the Com-

missioners have directed a like letter and notice as this to be served upon the superintendent of the Burlington, Cedar Rapids & Northern Railway.

It is the judgment of the Board that the expenses of such building should be borne share and share alike by the two railways intersecting. They have an intimation from the Burlington, Cedar Rapids & Northern Company that they are ready to bear their proportion of the expense. They suggest that it be built at as early a day as the evident necessities of the occasion demand.

By order of the Board,

E. G. MORGAN, *Secretary.*

MARSHALLTOWN, IOWA, January 16, 1882.

MR. E. G. MORGAN, *Secretary Board of Railroad Commissioners, Des Moines, Iowa:*

DEAR SIR—Yours of the 13th inst. is at hand, and the same shall have early consideration and will further advise.

Very truly,

D. N. PICKERING, *Supt and Treas.*

ABBOTT, IOWA, October 5, 1882.

TO JAMES F. WILSON, Esq., *Fairfield, Iowa:*

DEAR SIR—The Burlington, Cedar Rapids & Northern Railway crossed the Central Iowa Railway at this place two years ago, and have not as yet put in a "Y," nor a decent waiting-room with a daily transfer of from two to three dozen passengers. It seems that if the company did not for its own sake, it *should* for humanity's sake be *forced* to build at least a comfortable ticket office, and furnish an agent for the same. Nothing short of that would be of any use at all, as they have tried putting up a little shanty which in a few days was so defaced by filth and obscenity that it could not be used, and finally burned down. At this writing there are ten passengers standing on the ground in a dripping rain, waiting for the train to come in to what they advertise in their time-card as a "Union Depot." If there is anything within the power of the Railroad Commissioners of Iowa to alleviate this state of things, we ask in the name of our community and the traveling public that it be looked after as soon as time will permit.

Very truly yours,

I. M. LIESER.

DES MOINES, IOWA, November 23, 1882.

I. M. LIESER, *Abbott, Iowa:*

DEAR SIR—Yours of October 5th received and has been considered by the Board. The location mentioned by you has been visited personally by some of its members. The railroads interested, the Burlington, Cedar Rapids & Northern and the Central Iowa Railway, would, the Board have been assured by the Burlington, Cedar Rapids & Northern management, erect a suitable station-house, but the question is raised whether there is any highway to the point of intersection of the two roads. Will you please inform the Board on this point at your earliest convenience.

Very respectfully,

E. G. MORGAN, *Secretary.*

P. S. The delay in answering your letter was caused by your writing to Hon. Jas. F. Wilson, of Fairfield, in place of Jas. Wilson, Des Moines.

E. G. M., *Secy.*

ABBOTT, IOWA, November 25, 1882.

*To the Hon. Board of Railroad Commissioners, Des Moines, Iowa:*

GENTLEMEN—Yours of recent date received, and in reply would say: There is no highway to the point where the Burlington, Cedar Rapids & Northern Railway and the Central Iowa Railway cross, nor within some distance. But where the building should be, and where the traveling public's convenience demands it, is at the platform built on the Burlington, Cedar Rapids & Northern (by the Burlington, Cedar Rapids & Northern Railway Company,) about three-quarters of a mile south of the point of crossing.

This platform is at a point on the Burlington, Cedar Rapids & Northern, nearest the Central Iowa Railway depot, and is also on a good public road, and is the place where all the passenger transfer has been done, notwithstanding a shanty was built at the crossing, and as it was not used by passengers there, it was moved by the railway company down to the said platform.

Very truly yours,

I. M. LIESER.

DES MOINES, IOWA, November 28, 1882.

I. M. LIESER, Esq., *Abbott, Iowa:*

DEAR SIR—Yours of the 25th instant asking that a building be erected opposite the town of Abbott, on the Burlington, Cedar Rapids & Northern Railway, three-quarters of a mile south of the junction has been considered. The Board are of opinion that a joint depot should be erected at the junction by the two companies, where an agent could be permanently kept. They do not think the public would be well served by a building three-quarters of a mile south of the junction, unless the building were kept warm and lighted when necessary. It seems waste of buildings, time of agent and other expenses, to require two buildings, when a joint building would answer every purpose at half the expense.

By order of the Board,

E. G. MORGAN, *Secretary.*

DES MOINES, IOWA, November 28, 1882.

D. N. PICKERING, *Superintendent and Treasurer Central Iowa Railway Company, Marshalltown, Iowa:*

DEAR SIR—There is a desire to transfer from the Burlington, Cedar Rapids & Northern Railway to your road at Abbott. The Railroad Commissioners having been appealed to respectfully request you to have a "Y" put in at that place, to accommodate those desiring such facilities.

By order of the Board,

E. G. MORGAN, *Secretary.*

| CHICAGO & NORTHWESTERN RAILWAY COMPANY, <i>Respondent</i> .            |                            |

Filed December 14, 1881.

*To his Excellency, JOHN H. GEAR, Governor of the State of Iowa:*

The undersigned citizens of Ellsworth, in the county of Hamilton, and State of Iowa, would respectfully represent that in the year 1880 the Toledo & Northwestern Railway Company purchased the land upon which the said village of Ellsworth is built; that said company caused said land to be surveyed and laid out into lots, blocks, streets, and alleys, and caused the same to be platted and said plat to be recorded according to law in the recorder's office, in said county, under the name of Ellsworth; that subsequent to the recording of said plat, said company for a valuable consideration sold and conveyed to different persons a large number of said lots, the purchasers erecting thereon private residences and business houses; that the said purchasers at the time believed, and still believe, that said railway company by virtue of their charter, a franchise granted by the sovereign State of Iowa, were bound to manage said railway in the interest not only of said company, but also of the people of Iowa, and more particularly for the benefit of the people living along the line of said railway. Notwithstanding these obligations, said company has for some time refused and still refuses to deliver coal to the citizens of Ellsworth, as well as other points on the line of said railway, although said company has been repeatedly requested to do so. Your petitioners further represent that at the present time there is not in Ellsworth five tons of coal, nor is there a prospect of any; which great want is viewed with alarm by the citizens in view of the fact that great suffering would ensue should a cold season set in, such as we had last winter. In view of the above facts we ask of you, the executive officer of this great State, that you lay our case before said company, and use all power vested in you for that purpose, to compel said railway company to use their franchise so as to subserve the purpose for which it was granted.

(Signed)

JAMES STEWART,  
D. M. KELLEY,  
GEORGE ALLEN,  
L. JOHNSON,  
D. H. PALMER,  
C. A. RUMMELL,

And thirty others, citizens of Ellsworth, Iowa.

STATE OF IOWA, }  
EXECUTIVE DEPARTMENT, }  
DES MOINES, Dec. 14, 1881. }

*To the Honorable Railroad Commissioners:*

GENTLEMEN—I am instructed by the Governor to transmit you the inclosed petition, and to ask that you give to the matter therein set forth immediate attention, to which purport he has advised the petitioners.

Very truly yours,

WM. H. FLEMING, *Private Secretary.*

DES MOINES, IOWA, December 14, 1881.

MARVIN HUGHITT, Esq., *Gen. Man. C. & N. W. Ry, Chicago, Ill.:*

DEAR SIR—This office is in receipt of the following communications:

[Here was sent copy of each of the letters preceding; viz., the petition from citizens of Ellsworth and the Governor's letter to the Board.]

This complaint, coming as it does, signed by so many residents of the village of Ellsworth, seems to the Commissioners to demand your immediate attention. They, therefore, instruct me to say that they hope you will attend to it at once, and report your action to this office at your earliest convenience.

Very respectfully yours,

E. G. MORGAN, *Secretary.*

CHICAGO, December 16, 1881.

E. G. MORGAN, *Secretary R. R. Commissioners, Des Moines, Iowa:*

DEAR SIR—Replying to your letter of December 14th, inclosing a copy of a communication from the citizens of Ellsworth to his Excellency, the Governor. Our business is to haul coal, which we are doing promptly, furnishing every day at all of the coal mines on the line of the Chicago & Northwestern Railway all of the cars called for by the mining companies. We are now able, with our increased equipment, to furnish more cars than are called for for the shipment of this commodity.

We are not coal dealers, and are not engaged in the coal traffic, except as transporters. We will inquire of the Ellsworth people respecting their accusation that the company is refusing to transport coal.

Very truly,

MARVIN HUGHITT.

CHICAGO, December 22, 1881.

E. G. MORGAN, *Secretary Railroad Commissioners:*

DEAR SIR—Again referring to complaints of citizens of Ellsworth, as stated in their communication to his Excellency, the Governor, that the Chicago & Northwestern Railway Company was refusing to furnish coal at that station, I have to say that the complaints have been fully investigated, and we learn that there is an adequate supply of coal at Ellsworth. Notice has been given to dealers and business men generally that the company would furnish cars promptly for the transportation of coal from any point accessible to its line, and there need be no lack of fuel on account of supposed scarcity of transportation.

Very truly,

MARVIN HUGHITT.

DES MOINES, IOWA, December 23, 1881.

*To his Excellency, HON. JOHN H. GEAR, Governor of Iowa:*

DEAR SIR—The Board of Railroad Commissioners have received the second communication from Marvin Hughitt, Esq., general manager of the Chicago & Northwestern Railway Company, of Chicago, in relation to the petition of the citizens of Ellsworth, Iowa, regarding the supposed coal famine, of which the following is a copy:

[Here was sent the letter of Mr. Hughitt, preceding, dated Dec. 22, 1881.]

The Commissioners are led to believe that, from the foregoing statement of Mr. Hughitt, the causes of complaint have been removed.

If this is not satisfactory to the complainants, the Board will examine the matter in person. I have the honor to be,

Very respectfully yours,

E. G. MORGAN, *Secretary.*

INDEPENDENCE MILLS COMPANY, INDEPENDENCE, IOWA, *Complainants*,

vs.

ILLINOIS CENTRAL RAILROAD COMPANY AND BURLINGTON, CEDAR RAPIDS & NORTHERN RAILWAY COMPANY, *Respondents*.

} *Discrimination.*

Filed, December 16, 1881.

INDEPENDENCE, IOWA, Dec. 14, 1881

*To the Honorable Railroad Commissioners:*

GENTLEMEN—The Independence Mills Company is a corporation owning and operating a flouring-mill at Independence, Iowa. We are using annually about 100,000 bushels of wheat, most all of which we have to ship in by the Iowa Division of the Illinois Central Railroad and by the Burlington, Cedar Rapids & Northern Railway. These roads have brought in for us during the past year over 200 cars of wheat for milling purposes. We have repeatedly tried to get a reduction of the freight on our wheat, from both these railroads, but have always failed.

We depend for our sales almost exclusively upon the local market. Of late, however, these roads have both made a reduction on their freight on flour shipped from Minneapolis. This reduction has been made in the interest of the Minnesota mills. It is such a discrimination in favor of Minnesota flour and against Minnesota wheat shipped for grinding at our local mills as is unjust to the milling interests of Iowa. The reduction lately made by each of these roads is fifteen cents per barrel on flour from Minneapolis here. This margin is sufficient to take off all our profits.

We most earnestly request your honorable body to inquire into this matter, and to see if the same or corresponding reduction cannot be had on wheat shipped for milling purposes.

We have tried to procure such reduction, but cannot get any favorable answer.

Yours most obediently,

Z. STOUT, *President*.

A. B. CLARK, *Secretary*.

#### DECISION OF THE COMMISSIONERS.

The complainant states that he is a manufacturer of flour at Independence Iowa; that he obtains his wheat in part over the Illinois Central Railroad; that their rates are too high; that the railroad company transports flour from Minneapolis to Independence at a rate lately reduced by the amount of fifteen cents per barrel; that with such a flour rate complainant is unable to compete against Minnesota flour, under the present Iowa local rates on wheat.

Replying to these statements, Mr. W. K. Ackerman, president, says: "Our rate on flour from Minneapolis to Independence is 45 cents per barrel, "and this is a higher rate than we charge on our Iowa Division locally for "the same distance on the same class of freight. Our wheat rates we think "are unreasonably low, and the Independence Mills Company has the advantage of them."

If the through Minneapolis rates to Iowa points are higher than the Iowa local rates, it would seem that this is all that could reasonably be asked, as to the *relation* or *proportion* of the two charges. Such facts show that Iowa local interests already have an advantage over shipments from Minnesota.

The next question is, are the Illinois Central local rates reasonable in themselves? In a former letter you asked for the rate from Waterloo to Independence.

On examination we find it to be 6.20 cents per 100 pounds on wheat, or 3.72 cents per bushel. This is almost exactly the rate fixed by the Iowa tariff (Granger act) law of 1874. To be exact, the rate charged now is 6.20 cents per 100 pounds; the "Granger rate" was 6.14 cents per 100 pounds, an increase of only .06 of a cent per 100 pounds. The Illinois Central is still operating under "Granger rates" substantially having made but a slight increase since the repeal of that law, and this only on short hauls and partial car loads. It was everywhere conceded that the rates of the "Granger law" were exceedingly low; and surely the Illinois Central's Iowa business does not indicate anything like profits year by year.

As to the rate on wheat from Waterloo to Independence, and from other stations on the line of the Illinois Central, the Commissioners hold that they are not unreasonable. As to the rate on Minneapolis flour to Iowa points, the rate being relatively higher than Iowa local rates for like distances, they see no good ground of complaint. Besides they have no jurisdiction over rates between different States, and are powerless in the premises.

I hereby certify that the foregoing is a true copy of the original, now on file in this office.

E. G. MORGAN, *Secretary.*

*Des Moines, Iowa, January 25, 1882.*

vs.

Filed, December 21, 1881.

VILLISCA, IOWA, December 5, 1881.

MAJOR ANDERSON:

DEAR SIR—I am shipping corn from this point and have been wanting to ship to Kansas City, but the railroad company refuses to give rates. At last I filled a car of corn and offered to consign it to Kansas City, but the company refused to take the corn unless I loaded it in a Kansas City car. The agent telegraphed an order for a Kansas City car, but I have no idea that the car will be sent. In this way we will be prohibited from sending corn to Kansas City. I suppose the point of the matter is, that the C., B. & Q. line only runs to Burlington Junction, thirty-six miles, and this company would only get a small fee for handling the corn, and if it goes to St. Louis or Chicago it will pay twenty-five cents per hundred weight. Another point, I have consigned corn from Burlington Junction to East St. Louis, for twenty-two cents per hundred, and the corn comes through Villisca, thirty-six miles further than corn is drawn that is shipped from this point, but from here the cost is twenty-five cents per hundred.

I state these facts to you as a Railroad Commissioner hoping that by virtue of your office you may be able to prescribe a remedy.

I remain, truly yours,

F. H. JEROME.

*To the Honorable State Board of Railroad Commissioners of Iowa, E. G. MORGAN, Secretary:*

We the undersigned address this petition and complaint setting forth the following facts; viz.,

From Villisca to Chicago, a distance of 433 miles, the C., B. & Q. R. R. Company charge twenty-five cents per hundred on corn in bulk. From Villisca to Kansas City, a distance of about 180 miles, the C., B. & Q. R. R. Company charge the same rate as to Chicago, twenty-five cents per hundred on corn in bulk. The C., B. & Q. Company own the track from Villisca to Burlington Junction, Missouri, a distance of thirty-six miles, and the Kansas City & Council Bluffs Company own the track from Burlington Junction to Kansas City, 144 miles. The C., B. & Q. Company have the right to make the rates on all freights from Villisca through to Kansas City. Upon the branch road running from Creston to Kansas City, a freight rate of sixteen cents per hundred in bulk is given.

We consider these rates as unjustly discriminating between points, and ask your honorable body to procure, if possible, for the grain dealers at Villisca, the same rate for corn as is charged from Creston to Kansas City, or the same per mile as is charged from Villisca to Chicago, and that we may be supplied with cars for shipping corn to Kansas City. We the undersigned state that the above mentioned facts are a true and correct statement of conditions as they now exist.

Witness our hands and seals this 19th day of December, 1881.

[L. S.]

F. H. JEROME, *Grain Dealer*.  
SMITH & BURLESEN.

STATE OF IOWA,                     }  
MONTGOMERY COUNTY. } ss.

I, the undersigned a notary public, hereby certify that the above named persons whose signatures appear to the above instrument, subscribed the same and swore to it before me, this 20th day of December, 1881.

[L. S.]

F. P. GREENLEE, *Notary Public*.

DES MOINES, IOWA, December 23, 1881.

F. H. JEROME, Esq., *Villisca, Iowa:*

DEAR SIR—Your several letters of complaint against the Chicago, Burlington & Quincy Railroad, on account of alleged excessive charges on corn to Kansas City are at hand. In reply the Board instruct me to say that as the service is between points in different States, the rates are not within the jurisdiction of the Iowa Commissioners. Their jurisdiction is necessarily limited to rates between stations within the State. The same is true as to the other point of complaint you make, the difficulty to get cars of the company, to be transported off its lines upon other lines of road. Although the matter is wholly without our jurisdiction, we nevertheless have laid it before the managers of the C., B. & Q. Railroad, in the hope that whatever ought to be done in the premises will be.

By order of the Board,

E. G. MORGAN, *Secretary*.

DES MOINES, IOWA, December 22, 1881.

E. P. RIPLEY, Esq., *General Freight Agent C., B. & Q. R. R.:*

DEAR SIR—Herewith I hand you the original letters of complaint made by Frank H. Jerome, Villisca, Iowa, to which your attention is called. The

Board well understand that the matter complained of relates to inter-State transactions, and is, therefore, not within their jurisdiction. As to that point of the complaint, your refusal to allow your cars to be loaded, and sent long distances off your line upon other lines, the Board long ago settled the doctrine sustaining your action (see case of *Alex. Risk v. The I. C. R. R.*, Report of 1880, pp 115, 118). If there is anything that demands correction in the matter of charges, the Commissioners are very confident it will be promptly done. Please make reply at your earliest convenience.

Respectfully yours,

E. G. MORGAN, *Secretary*.

CHICAGO, December 28, 1881.

E. G. MORGAN, ESQ., *Secretary Railroad Commissioners, Des Moines, Iowa* :

DEAR SIR—I am in due receipt of your letter of the 22d inst., inclosing sundry communications from Mr. F. H. Jerome, of Villisca. The burden of this complaint seems to be—first, that we have not always been able to furnish cars in which to load corn for Kansas City. Second, that our rate to that point is twenty-five cents per 100 pounds.

To both of these indictments we plead guilty, and while we realize the fact that your Board has no jurisdiction in matters of inter-State commerce, we are not disposed on that account to refuse an explanation, which will, I hope, justify us in your eyes. This company has no interest in any grain market beyond its revenue for the carriage of the grain—all markets are alike to it.

But it does make a great difference to us, in the matter of cars, whether the Iowa grain crop is moved east or west. For the last six or eight months our west bound business has been unusually heavy, and our east bound unusually light.

The great demand of the extreme west and southwest for merchandise of all kinds resulted in the months of October, November, and the first part of December, in much of our equipment being scattered about in New Mexico, Colorado, and Arizona, with heavy demands for cars in Chicago, and an absolute necessity for hauling empty cars four or five hundred miles into Chicago to provide for our pressing necessities, and to forward valuable merchandise and perishable freight. A car spared from this work and put into the service of carrying Mr. Jerome's corn to Kansas City (with great probability of its going thence to the wilderness and not returning for months) would lose us far more money by its absence than the amount we proposed charging Mr. Jerome for the service. It is not true, as Mr. Jerome states, that the rate from Creston branch points to Kansas City is less than from points on the Villisca branch. Many things are done and many orders issued by railroad officers which appear to others as arbitrary and unreasonable, but they are always explainable on business principles, and are never issued with intent to harass or annoy shippers; most of the latter class know this, and from them we have no complaints; in fact, I believe they would bear witness to our fair dealing with them. Mr. Jerome, who, I observe, styles himself "note broker and claim agent," is evidently unacquainted with the transportation business, and such little experience as he has had has been gathered at an unfavorable time.

I trust he will be more fortunate in future, and I beg to assure him through you, that any *just* complaint he may have against us will be promptly met by our own officers and the cause removed, whenever such just complaint shall be brought to our notice.

It is proper to state in this connection that Mr. Jerome has not, so far as I can ascertain, made complaint to any officer of this company concerning the matters alleged in his letters to you. Yours truly,

E. P. RIPLEY.

## DECISION OF THE COMMISSIONERS.

This complaint alleges, first, that the Chicago, Burlington & Quincy Railroad Company refused to ship corn from Villisca to Kansas City in its own cars, or unless the same was loaded into the cars of some company who desired to handle grain in the Kansas City trade; second, that the rate charged on corn to Kansas City is extortionate, the complainant alleging that the Villisca rate to that market is twenty-five cents per hundred weight, while the rate on the Creston line—distance about the same, is only sixteen cents. In support of the complaint as to the extortion, it is asserted that the rate from Villisca to Chicago, 433 miles, is twenty-five cents, and the rate to Kansas City, a distance of about 180 miles, the same. Also, that the same company's rate to Kansas City, *via* the Creston branch, is sixteen cents. As the matter complained of relates to shipments from a point in Iowa to a station in Missouri, the Commissioners have no jurisdiction over it. The matter was nevertheless laid before the company, and in reply and explanation General Freight Agent E. P. Ripley, says: "For the last six or eight months our western bound business has been unusually heavy, and our east bound unusually light. The great demand of the extreme west and southwest for merchandise of all kinds resulted, in the months of October, November, and the first part of December in much of our equipment being scattered about in New Mexico, Colorado, and Arizona, with heavy demand for cars in Chicago, and an absolute necessity of hauling empty cars four or five hundred miles into Chicago to provide for our pressing necessities and to forward valuable merchandise and perishable freight."

"A car spared from this work and put into the service of carrying Mr. Jerome's corn to Kansas City, with great probability of its going thence to the wilderness and not returning for months, would lose us far more money by its absence than the amount we proposed charging Mr. Jerome for the service."

As to the first allegation in this complaint the Commissioners have held that no railway company is bound to furnish cars to transport freight over lines not its own. (See case of *Alexander Risk v. The Illinois Central*, report of 1880, pages 115, 118.) In that decision it was held as follows: "The Illinois Central Railroad in Iowa is intersected by ten different connecting roads. If one shipper, residing at any station on its line may demand cars for transporting grain or goods to points at considerable or long distances from its own or connecting lines, every shipper may. If every shipper may do so, the railroad company is at once placed at the mercy of connecting or competing lines. The law as thus interpreted would permit all the cars of the road to be taken from its own line and scattered along the ten connecting lines, or along the twenty or thirty other lines with which these connecting lines connect. Some would soon be at various seaboard points, some at stations on the Gulf of Mexico, others on the plains or Pacific Coast, while all might be scattered into every part of the Union. Combinations among these connecting lines in Iowa in the way of cut or

"cost rates might thus entirely destroy not only the business of the Illinois Central, but its very property. The Commissioners do not so interpret the law. In such case each railroad in the State would be substantially at the mercy of connecting lines, and on the rapid road to bankruptcy. Besides, the law as to the duty of a railroad company in furnishing cars for ship-pers, limits such duty to *the line of its road*."

On this point the law is that no railroad company can be compelled to furnish cars for carrying freight over the roads of other companies. A railway may do so at its own option, but the law does not require it as a duty.

Respecting the charge that twenty-five cents per 100 pounds on corn from Villisca or Creston to Kansas City, 180 miles, is extortionate, the Board is of the opinion that it is. On comparison with the rate fixed by the "Granger act" of 1874, repealed in 1878, the rate of twenty-five cents is found to be thirty-eight per cent higher, for which there does not seem to be justification; the rate prescribed by the repealed law was fifteen and a half cents per 100 pounds. That the Granger rate was a very low one, will not be disputed; but that the present rate of twenty-five cents is an unreasonably high one to us admits of no question. As the service is on inter-State business, however, it is not within the jurisdiction of this Board to afford a remedy. The charge that the Creston rate is only sixteen cents while the Villisca rate is twenty-five cents is unequivocally denied by the general freight agent, E. P. Ripley, his language being as follows: "It is not true, as Mr. Jerome states, that the rate to Kansas City from Creston branch points is less than from points on the Villisca branch." With such a conflict of assertions and testimony it is impossible for the Board to determine which is correct. The complainant has not furnished any shipping bills or receipts, or verified copies to substantiate the statement, and this part of the case rests upon the contradictory averments of the parties.

As the Iowa Commissioners have no jurisdiction over the matter in dispute, it is unable to make any recommendations.

The courts appear to be the only remedy available in such cases.

Filed, January 9, 1882.

On the fifth of January, Messrs. Spencer Brothers complain to the Board that a car load of lump coal shipped them on the 15th of December, had not been received, and could not be found.

The Board instituted inquiries, which resulted in tracing the coal, which was delivered to them about the 15th of January.

SIOUX CITY, IOWA, Jan. 9, 1882.

*To the Board of Railroad Commissioners, Des Moines, Iowa:*

GENTLEMEN—I have just received a package of freight shipped from Chicago that weighed ten pounds, and paid the charges, ninety cents. The package is a crate containing four hand bellows, and was billed at twenty pounds, but the actual weight is ten pounds. It was shipped as freight. Had the railroad company a legal right to collect nine cents per pound as freight from Chicago to Sioux City?

W. F. KNOWLES.

DES MOINES, IOWA, Jan. 11, 1882.

W. F. KNOWLES, Esq., *Sioux City, Iowa:*

DEAR SIR—Referring to your complaint of the 9th inst., the Board hold that the charge of ninety cents on the crate of bellows is not an unreasonable one. Such freight is very light and bulky, and if moved in car loads at the rate per pound of heavier and less bulky freight, the freight per car would be anything but a paying one. All small or parcel freight is properly chargeable at a higher proportionate rate than larger quantities; and it is held by the courts everywhere and by the rule of all transportation companies that a pro rata proportion of a large shipment for small parcels, especially when weighing less than 100 pounds, would be an injustice to the corporation.

In the new revised schedule of rates just issued by the Illinois Railroad Commissioners, and which is the lowest ever provided by any railway or any law, it is declared that "no single shipment will be required to be taken at less than twenty-five cents for distances of 150 miles or under; over 150 miles fifty cents. Now the distance from Chicago to Dunleith is 190 miles, which subjects your crate to a charge of fifty cents in Illinois under the new rate. From Dunleith to Sioux City the distance is about 325 miles, and certainly a charge of forty cents addition is not exorbitant for the service.

The Illinois Central places bellows as first class. No package is carried at less than the rate for 100 pounds. The charge per 100 pounds on first class for 325 miles, or from Dubuque to Sioux City, is sixty-three cents. The distance from Chicago to Dubuque is 190 miles, or nearly sixty per cent of the Iowa distance. The sum of these two at the rate for light parcels would therefore be about \$1.

It is the judgment of the Commissioners that ninety cents for the service you mention is not unreasonable. By order of the Board,

E. G. MORGAN, *Secretary.*

Filed, January 5, 1882.

#### DECISION OF THE COMMISSIONERS.

Under date of December 20, 1881, N. J. Bond complained of the Wabash, St. Louis & Pacific Railway Company, as follows: to-wit.,

1st. That after inducing complainant to purchase certain lands at one of its stations, it refused him accommodations to the extent of refusing to stop its trains at said station and otherwise rendering his property for the purpose for which said company induced him to purchase it, worthless.

2d. That for twelve months past complainant has been buying grain at Mineola, a station on the W., St. L. & P. R'y, where he had been at considerable expense in building cribs, placing scales, etc., and had there in cribs 7,000 bushels of corn, and had been for thirty days trying to ship it, but the Wabash agents refused him cars while furnishing them to shippers at other stations on its line.

3d. That complainant offered to furnish foreign cars, and in addition to usual tariff rates, pay trackage for switching, etc., but that the Wabash agents refused to receive them as required, to his great damage.

4th. That the Wabash company refused complainant special rates, while granting the same to other parties under similar circumstances.

5th. That complainant shipped four cars of corn on said road; that it was delayed by the wrongful acts of the agents thereof until it spoiled, and that the company refuse to pay him therefor.

After an unusual delay in settling the issues and presenting the proofs, we have the case before us.

The first count in the complaint having been abandoned by Mr. Bond himself, we dismiss it.

As to the remaining counts there is a conflict of evidence. Complainant Bond says that he had cribbed at Mineola, a Wabash station near Council Bluffs, about 7,000 bushels of corn, and that about November it was ready, in due course of trade, for shipment; that he made application for cars and received a few, but that finally, after waiting some two weeks, he abandoned shelling and shipping his corn for want of cars. J. H. Plumer, his clerk in charge of his grain trade at this point, swears to the same statement of facts, with the addition that at the time that the Wabash was refusing cars to Mr. Bond, it was giving them to parties at Silver City, the first station to the east on its line.

On the other hand, J. W. Blanchard, superintendent of the Council Bluffs & Omaha Division of the Wabash, states most positively that he "never refused Bond cars at Mineola, and that the cars were distributed under his directions," admitting, however, that there had been times when his road could

not supply them for the good reason that they did not have them, but denying very emphatically any unjust discrimination against complainant.

The weight of evidence seems with complainant, and that too without reference to the number of witnesses on a side, but depends to a certain extent upon the means of knowledge of the several witnesses touching the matter whereof they speak. Complainant and his clerk were both on the ground when the cars were needed; both swear they did not receive them, though they were duly demanded, and the clerk adds that during this time the company was giving cars to Silver City.

While it may be true, as Superintendent Blanchard says, and as we presume it is, that he never refused him cars when they were on hand, yet that is not inconsistent with Mr. Bond's statement, corroborated by his clerk, that the cars were, nevertheless, refused him. Mr. Blanchard was at Stanbury, the east end of the Council Bluffs and Omaha Division. Mr. Blanchard does not undertake to say that Mr. Bond received the cars. He does state with great positiveness that there was no discrimination. But this is a conclusion. The burden is on Mr. Blanchard to state the facts that will show there was no discrimination. We do not think, in this instance, he has done so. We find that the W., St. L. & P. R'y Co. refused complainant Bond suitable cars, on reasonable notice, in which to transport his freight, and such refusal to furnish suitable cars to transport the freight of complainant constitutes a violation of section 10, chapter 77, acts of the Seventeenth General Assembly.

In support of the third count, complainant states that being refused Wabash cars by the company's agent, on the ground that they did not have them, he called up, by telephone, F. M. Gault, the Wabash agent at Council Bluffs, and asked if they would take Kansas City cars out to Mineola to load his corn in, and said Gault replied "yes," if he, Bond, would pay trackage, which Gault said was three dollars a car. Bond replied, saying he would take it, and would order Kansas City cars set over at once to be taken out to Mineola; but that afterward, he thinks on same day, having heard there was trouble about the Wabash receiving his K. C. cars, again called agent Gault by telephone and asked him "if they could not take my (his) empty cars to Mineola for me (him) and he replied no"; and that after some further talk about the price, he received the reply from Mr. Gault "that they would not take them at any price."

Christina Laustrum testifies to having heard telephonic conversation between Mr. Bond and the Wabash freight office in Council Bluffs, in which the receiving of Kansas City cars was the subject, and that by Mr. Bond's repeating he learned the Wabash was to take the foreign cars at a certain agreed price. That Mr. Bond then called by telephone to J. H. Plumer, foreman of his elevator at Mosquito Creek, and repeated to him the substance of his conversation with said freight office, and for him to get ready to go to Mineola to load cars; that afterward, on the same day, he thinks he heard Bond again call the Wabash freight office, and alluding to a message his wife said she had received from said office to the effect that the

Wabash could not take foreign cars for him, asked if the same was true, and heard Mr. Bond say further that "if you will not take three dollars a car, what will you take them for?" I heard Mr. Bond say, "then you will not take them at any price." Mr. Bond then called J. H. Plumer and said through the telephone to him, the Wabash will not take our cars to Mineola.

Mrs. Bond, wife of complainant, also testifies on this point, that she received in her husband's absence a telephonic message from the Wabash freight office, saying: "We cannot take those cars to Mineola for Mr. Bond," that she thought it F. M. Gault speaking, and that she repeated the message the same day to her husband.

Mr. J. H. Plumer also testifies on this point, that he received a telephonic message from Mr. Bond while at Mosquito Creek, saying: The Wabash will take out empty Kansas City cars to Mineola to be loaded with corn, and at same time ordered me to make arrangements for shelling and loading the corn at Mineola. And Plumer, further says, that Bond afterward on the same day, or the next, called him by telephone again, and told him that the Wabash had refused to take his empty cars to Mineola for him, and that in consequence we could ship no corn from that point.

In answer to this J. W. Blanchard, superintendent Council Bluffs and Omaha Division, and who, as he says, has charge of the distribution of cars, emphatically states that "Bond never applied to him directly or indirectly to take foreign cars to Mineola or Neoga, consequently I never refused to do so." But the superintendent overlooked, perhaps, the statement which F. M. Gault, local agent of the Wabash at Council Bluffs, made that Bond had applied to him to take Kansas City cars to Mineola, when he says that complainant never applied to him, even indirectly, to take foreign cars. Perhaps the superintendent does not regard the application of Bond to agent Gault, as an application, direct or indirect to himself. But this Board think otherwise. We think Mr. Bond's application to the local freight agent at Council Bluffs, was to the whole company for all practical purposes, and fully broad enough to include the division superintendent. Local agent F. M. Gault further says, that he gave Mr. Bond the charge for taking these cars to Mineola, but told him he had no authority to receive foreign cars and referred him to Superintendent Blanchard.

This is the sum of all the evidence on this point, in the case, and the Board think after a very careful examination of it in all its bearings, that the charge in the third count is sustained. Bond makes the plain straightforward statement that he applied to the agent at Council Bluffs, that the agent gave him the terms for taking foreign cars to the point named, the terms were agreed upon, that the agent said the Wabash would receive the cars, and that afterwards, on the same day, said that the company would not take such cars at any price.

Complainant was applying at the usual and proper office, according to the usual method for the accommodation he desired, and besides, this is corroborated in his statements as to what took place, in several particulars, by other testimony; as well as by agent F. M. Gault himself, who says that

Bond did ask him by telephone what would be the charge for running Kansas City cars to Mineola, having them loaded with corn for St. Louis, and return them to Council Bluffs, and he answered him, "tariff Mineola to Council Bluffs, and mileage on the cars."

The statements on the part of the Wabash agents on this branch of the complaint are brief, rather technical, and some of them somewhat in the nature of conclusions. Hence we find that said company did refuse to receive and transport the empty cars of the K. C., St. J. & C. B. R. R., a connecting road with the Wabash, to be delivered at Mineola, a station on the line of its road, to be loaded with corn and returned to said connecting road; and that in so refusing to receive and transport said foreign cars, said Wabash company did violate the provisions of section 10, chapter 77, acts of the Seventeenth General Assembly.

As to the fourth count we have no hesitation in saying that complainant has not sustained the charge by the proof submitted. The facts that Mr. Bond gives, that he sold his grain to a buyer who could not have afforded to pay him the price he did, unless he had some kind of a drawback or rebate, is sufficient perhaps to excite a very grave suspicion, but it does not furnish that class of legal evidence that will stand against the plain statement of T. B. Gault, general agent of the Wabash, at Council Bluffs, that Mr. N. J. Bond has had the same rates on corn from Neoga and Mineola to St. Louis and other points on our road as all other dealers have.

Mr. Bond states that on April 28, 1881, he billed three cars of corn from Neoga, Iowa, to Reynolds Bros., Toledo, Ohio, giving numbers of the cars, and at same time partially loaded a fourth car, and that all four cars were taken to Mineola, where the loading of the fourth car was completed, and it was billed out May 3d, to Reynolds Bros., and that instead of sending said cars forward to their destination, said company permitted them to remain on the side track at Mineola for more than three weeks, and that by reason of said detention said corn heated and spoiled, and complainant was greatly damaged thereby. Complainant further states, that a car of corn billed by him over the Wabash road April 28th, to same parties in Toledo, reached its destination May 10, notwithstanding it was detained by Missouri River floods about one week. And that afterwards on the 13th day of May, he billed out of Council Bluffs to same parties in Toledo, three cars of corn which were reported to him from Toledo, by said Reynolds Bro., on the 21st of May, while the cars first mentioned as billed from Neoga, on the 28th of April, 1881, were yet on the side track at Mineola. And complainant further states, that freight trains were running through regular from Council Bluffs on the Wabash, while the cars mentioned were allowed to remain on the side track at Mineola.

Mr. J. H. Plumer testifies substantially to the same state of facts, adding that on the 19th day of May following the loading of the cars, J. L. Rice, the agent of the Wabash at Mineola informed him that he asked F. M. Gault, agent at Council Bluffs, on the 8th inst., for billing directions for the four cars, and that up to that time, May 19th, no shipping directions for said

cars had been received from Mr. Gault or any one else. And Mr. Plumer adds, that for a week or more prior to the 19th of May business had been resumed on the road, which for a few days had been suspended on account of floods on the Missouri River, and that freight trains had been running through regularly on the Wabash from Council Bluffs.

On the part of the company, Superintendent Blanchard is the only witness who speaks on this point in the case. He says as to the delay of loaded cars (meaning the four loaded with corn above mentioned) "I can only say it "did not occur on this division." "With the exception of perhaps one week "during the very high water at Council Bluffs, loaded cars have been handled "promptly. It would not be surprising if some of his corn did heat. At "various times during last season it, was impossible to ship corn without "heating. It was in bad order, and was not confined to any one shipper. "They all experienced the same trouble." Bond and Plumer were both upon the ground, and show personal knowledge of the matter and things touching which they testify, while Mr. Blanchard was necessarily absent much of the time, and largely dependent for his knowledge of affairs upon the information of others.

On the evidence we have before us, therefore, we are clearly of the opinion that these four cars of corn were unnecessarily detained at Mineola station. And we further find that said Wabash, St. Louis & Pacific Railway Company, in detaining said cars, and refusing to send them forward with all reasonable dispatch, did violate the provisions of said section 10, of chapter 77, acts of the Seventeenth General Assembly.

*Des Moines, Iowa, December 23, 1882.*

|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|--|

Filed January 21, 1882.

APLINGTON, IOWA, January 13, 1882.

M. C. WOODRUFF, ESQ., *Des Moines, Iowa:*

DEAR SIR—Inclosed find petition, which explains itself. On last Monday night the conductor put off at this station an old man and lady for not paying their fare, they being poor and out of money. They were thinly clad, and nearly perished from cold, as there was no place for them to go—the depot being closed. There are many passengers going and coming on nearly every night train, and the depot being closed, they are obliged to stay out in the cold, and in many cases they are obliged to wait until daylight before finding the hotel. There were eight passengers for the east-bound train last night, all obliged to stand out in the storm waiting for the train. Please give this your immediate attention, and oblige.

E. R. SWAN.

APLINGTON, IOWA, December 15, 1831.

*To the Honorable Board of Railroad Commissioners for the State of Iowa :*

We, the undersigned, citizens of Aplington, Iowa, respectfully submit the following, and ask you to take such action as in your judgment the case demands: The first of this month we petitioned the superintendent of the Iowa division of the Illinois Central Railroad to make arrangements for keeping the depot building at this place open till after the departure of the night passenger trains, at about 11 P. M. and 1 A. M. He declined to do so. It would greatly accommodate the traveling public, as well as citizens resident here, especially during the winter months. Trains are often late, obliging passengers to stand out in severe weather, much to their discomfort and also endangering their health. We, therefore, for reasons stated, respectfully petition you for relief.

(Signed)

E. L. BLACKMORE, Mayor,  
S. M. SWAN,  
GEO. W. HANES, M. D.,  
J. M. GROAT,  
A. A. WHALEY,

And fifty others, residents of Aplington.

#### RECOMMENDATION OF THE COMMISSIONERS.

The above petition is signed by fifty-four inhabitants of the town, and we are informed that they comprise about all the business men in the place. From a letter accompanying the petition, we quote the following: "There are passengers going and coming on nearly every night train, and the depot being closed, they are obliged to stay out in the cold, and they are obliged in many cases to wait until daylight before finding the hotel. There were eight passengers for the east-bound train last night (January 12th) all obliged to stand out in the storm waiting for the train."

This is a matter which certainly demands the prompt attention of the company. It is not expected that the company will convert their station buildings into hotels, but it is proper that a waiting-room should be open and supplied with reasonable accommodations for the shelter and comfort of persons who wish to take passage on its trains, such as fire in cold weather, lights, seats, drinking water, etc. Many passengers come in from country places, and the poorer class take their lunch baskets with them and expect the usual waiting-room accommodations, and they should have them.

Section three (3), of chapter 77, of the acts of the Seventeenth General Assembly, provides as follows: "Whenever in the judgment of the Railroad Commissioners it shall appear that any \* \* change in the mode of operating its road and conducting its business is reasonable and expedient in order to promote the security, convenience, and accommodation of the public, said Railroad Commissioners shall inform such railroad corporation of \* \* \* the changes which they adjudge to be proper by a notice thereof in writing," etc., etc.

Under this provision, the Commissioners recommend that the Illinois Central Company keep open its station-house at Aplington every night on which passenger trains run either way until after the departure of the last train, and that such accommodations be provided therein as shall give security and convenience to the traveling public. The Commissioners confi-

dently rely upon the company to do in this matter what the law clearly contemplates as the duty of all railways in furnishing "convenience and accommodation to the public."

It is further recommended that this be done at an early day, as the winter weather particularly requires it.

*Des Moines, Iowa, January 28, 1882.*

CHICAGO, January 31, 1882.

E. G. MORGAN, ESQ., *Secretary Board Railroad Commissioners, Des Moines, Iowa:*

DEAR SIR—Your letter of the 28th inst., inclosing recommendations in relation to Aplington station, has been referred to me. I have this day written Division Superintendent Parker of our Iowa Division, directing that the Aplington station house be kept open for the night passenger trains.

Yours truly,

E. T. JEFFREY, *General Superintendent.*

SAMUEL F. PARKER, EARLVILLE, IOWA,  
*Complainant,*

vs.

CHICAGO & NORTHWESTERN RAILWAY  
COMPANY, *Respondent.*

} *Discrimination and overcharge.*

Filed, January 25, 1882.

JEFFERSON, IOWA, January 20, 1882.

M. C. WOODRUFF, ESQ., *Dubuque, Iowa:*

DEAR SIR—Is it correct and lawful for the Chicago & Northwestern Railway Company to charge fifty cents for thirty pounds fourth class freight from Cedar Rapids to Jefferson. First class freight from Chicago here is only forty-five cents. N. Kuhnen, of Davenport, shipped from his branch house in Cedar Rapids, one butt, thirty pounds, plug tobacco to Messrs. Smith & Wood, December 13, 1881, and the freight bill was fifty cents. If this is law, then it does great injustice to Iowa shippers. Their regular tariff from Chicago to Jefferson, Iowa, is forty-five cents on first class, and they charge on thirty pounds fourth class freight from Cedar Rapids, fifty cents.

Please give this attention as one of the Commissioners. If correct, all right; if not, please correct it. I live at Earlville, Iowa, and travel for N. Kuhnen, of Davenport.

Your old friend,

SAMUEL F. PARKER.

#### DECISION OF THE COMMISSIONERS.

Complainant asks this Board whether a charge of fifty cents on a thirty pound package of fourth class freight from Cedar Rapids to Jefferson is a lawful charge, and emphasizes the inquiry by calling attention to the rate of forty-five cents on first class from Chicago to Jefferson.

They answer, yes. Freight in small parcels of a few pounds—anything under 100 pounds—on a universal custom of transportation companies, is always charged a parcel rate and never a pro rata charge of the rate per 100

pounds. This custom long since became a rule of railways, and is published in most of the tariffs, as, for instance, this which I quote from one of them: "No shipment, however small will be carried any distance for less than "twenty-five cents; over 150 miles, fifty cents."

Another is as follows: "No single shipment will be required to be taken "at less than twenty-five cents for distances of 150 miles or under; over 150 "miles, fifty cents." This last is the exact language copied from the legal tariff of Illinois, applicable to all railways in that State. In the case mentioned the distance barely gets it into the higher charge, the distance from Cedar Rapids to Jefferson being 151 miles. The published rates in all tariffs are for freight in quantities per 100 pounds or car loads, and never for quantities less than 100 pounds, on which a parcel arbitrary rate is charged, as appears in the above quoted rules.

Filed, January 26, 1882.

NEWBURG, JASPER CO., IOWA, Jan. 25, 1882.

*Iowa Railroad Commissioners, Des Moines, Iowa:*

GENTLEMEN—On the 4th of November, 1881, I shipped from Sheldahl, Story county, Iowa, over the Chicago & Northwestern Railway, a box of household goods. They were billed to Jane Raber, Newburg, Iowa, but they have never been received here. I have written to W. C. Porter, the agent at Sheldahl in regard to the matter, but received no reply.

J. R. Wood, the agent of the Central Iowa Railway, at this place, has also made inquiries, but gets no replies. If you can do anything in your capacity as Commissioners to recover the lost box or its value in money, I would be very much obliged, as I am a poor man and feel unable to sustain the loss. The value of the goods is about fifty dollars. I can send a detailed list of the articles and value if desired. I have the receipt of the agent of the C. & N. W. road at Sheldahl for the box, in my possession. Hoping to hear from you soon, I remain respectfully yours,

JOHN RABER.

The Board instituted inquiries which resulted in finding the box, which was received by complainant, at Newburg, about the 11th of February, 1882.

|                                                        |   |                    |

| DAVID MORRIS, LAWN HILL, IOWA, Com-<br>plainant.       | } | <i>Overcharge.</i> |
| CHICAGO & NORTHWESTERN RAILWAY<br>COMPANY, Respondent, |   |                    |

vs.

Filed, February 6, 1882.

LAWN HILL, IOWA, February, 3, 1882.

*To the Railroad Commissioners, State of Iowa:*

I wish to call your attention to the fact that the Chicago & Northwestern Railway Company, are charging freight on nut coal by the car for twenty-four thousand pounds (24,000,) when the facts are that their cars which they charge that for will not contain more than twenty-two thousand (22,000), which we do not think is business, and which should be corrected.

Very respectfully,

DAVID MORRIS.

Mr. Morris in a subsequent letter gives the number of the cars and weight.

CHICAGO, April 4, 1882.

HON. E. G. MORGAN, *Secretary Railroad Commissioners, Des Moines, Iowa:*

DEAR SIR—I have investigated the claim of David Morris, of Lawn Hill, Iowa, in regard to an overcharge on a car of coal, received by him from Muchakinock, on January 31st. Mr. Morris's claim is a just one, and I have ordered a voucher in his favor, refunding all charges collected on this car in excess of actual weight. The overcharge arose from the fact that the agent at Lawn Hill, in his desire to enforce the rules of the company in regard to minimum weight, overlooked another rule which provides that when any car is loaded to its "full visible capacity," charges for *actual weight only* shall be collected provided such weight is at least 20,000 pounds.

The money will be paid Mr. Morris as soon as the voucher can be passed through our accounts.

Very truly yours,

M. HUGHITT, *Gen. Man. C. & N. W. Ry.*

|                                                                 |   |                    |

| CHICAGO, BURLINGTON & QUINCY RAIL-<br>ROAD COMPANY, Respondent. |   |                    |

vs.

Filed, February 6, 1882.

ANDERSON, IOWA, Feb. 3, 1882.

E. G. MORGAN, Esq., *Secretary Railroad Commissioners:*

DEAR SIR—Permit me to call your attention to a small matter, the last of a series of petty thefts that I have been subject to. Inclosed find bill of lading and affidavit of things stolen from same, which is only part, as my daughter could not recollect at that time exactly what was missing. Please send P. O. order or instructions to station agent to pay the same. From what the agent here says these things must have been taken at Galesburg, Illinois.

Yours respectfully,

H. J. HEATON.

NOVEMBER 11, 1881.

Received from R. Heaton, one barrel of merchandise in apparent good order, for C., B. & Q. R. R. Co., to be transported to Edwards, Illinois. Weight, eighty pounds.

A. E. REETZ.

STATE OF ILLINOIS, }  
COUNTY OF PEORIA. } ss.

Mrs. Margaretta Armstrong, being first duly sworn, deposes and says, that a certain barrel of dry goods which was shipped from Anderson, Iowa, to the address of James Armstrong, Edward's Station, Illinois, contained when the same was received by her at said Edward's Station on or about November 28, 1881, \$12.50 worth less of goods than when the same was shipped from said town of Anderson. That said barrel was shipped by the Chicago, Burlington & Quincy Railroad Company, and delivered by them at said Edward's Station to affiant with the head broken out, the barrel open, and said goods missing as aforesaid. That said goods consisted of three pairs of shoes, at \$2.50 per pair—\$7.50; one box containing towels and sundry articles worth \$5; total, \$12.50. That said affiant has not been paid for said goods by said company, and that they were reasonably worth the amount charged therefor.

MARGARETTA ARMSTRONG.

Subscribed and sworn to, before me, by said Margaretta Armstrong, this 17th day of December, 1881.

[L. s.]

JAMES A. CAMERON, *Notary Public*.

[This letter of complaint was acknowledged by the Secretary of the Board on February 6th, and on February 7th a copy was sent to General Manager Potter, of the C., B. & Q. R. R., asking him to investigate and report, and on February 11th, Mr. E. P. Ripley, general freight agent, wrote as follows, in reply:]

CHICAGO, February 11, 1882.

E. G. MORGAN, Esq., *Secretary Railroad Commissioners, Des Moines, Iowa*:

DEAR SIR—Your favor of the 7th inst., addressed to our general manager, and inclosing complaint from H. J. Heaton, in regard to an alleged loss from a package shipped from Anderson, Iowa, November 11, 1881, consigned to James Armstrong, Edward's Station, Illinois, is referred to me.

It strikes me that it is rather an unusual proceeding to present a grievance of this kind to your Board before having presented it to the company. We have never received any claim in this case, and know nothing whatever of its merits, and consequently have had no chance to investigate and no opportunity to judge as to whether the claim is well founded or not. When one party has a bill against another, it would certainly seem to be a reasonable course to present the bill and see if it will be paid, before appealing to a court of law, or commencing suit to enforce payment. If Mr. Heaton or whoever is interested in the claim will duly present the papers substantiating the same to me, I will see that it is properly investigated and either paid or declined for cause.

Yours truly,

E. P. RIPLEY.

DES MOINES, IOWA, February 13, 1882.

E. P. RIPLEY, Esq., *General Freight Agent C., B. & Q. R. R.*:

DEAR SIR—Again referring to the complaint of H. J. Heaton, of Anderson, Iowa, and answering your letter of the 11th inst., I am requested by

the Board to say that not only the original complaint was sent to you, but copies, also, of the receipt issued for the goods by your agent A. E. Reetz, Anderson, Iowa, and the sworn affidavit of complainant's daughter, who lost the goods.

The Board inferred from the tenor of both the complaint and affidavit in which the loss is alleged to have occurred in November last, that application for reimbursement had been made and refused. You will observe that he alleges certain things as stated to him by your Anderson agent.

Whether so or not, you now have the whole matter before you.

By order of the Board,

E. G. MORGAN, *Secretary*.

[February 20th, Geo. H. Ross, division freight agent at Burlington, wrote Mr. Ripley promising to investigate the complaint of Mr. Heaton.

March 16th Secretary wrote Mr. Ripley, asking what had been done in the matter of Mr. Heaton's complaint, and on March 28th, another letter was addressed to Mr. Potter, the general manager, requesting him to look after the complaint and calling his attention to the fact that two letters had been addressed to Mr. Ripley, both of them being as yet unanswered. On March 31st Mr. Potter answered that the matter was in process of investigation, and on the same day wrote, also, as follows:]

CHICAGO, March 31, 1882.

E. G. MORGAN, Esq., *Secretary Railroad Commissioners, Des Moines, Iowa*:

DEAR SIR—Referring again to the Heaton claim for loss on a shipment of sundries from Anderson, Iowa, would say that claim has been in process of investigation. We have just received the papers and they show us to be responsible for the loss, and voucher has been ordered made accordingly. The complainant notified our agent at Anderson that some goods were short, but placed no value on them and made no claim. Our first knowledge of the case, as explained in my former letter, came from you.

Yours truly,

T. J. POTTER.

[On April 3d, Mr. Heaton was notified that the vouchers for payment of his claim had been made, and asking him to report if they were satisfactory, and on the 23d, Mr. Heaton replied that he had not yet received payment, and asked that the case be closed at once.]

[On May 26th the Secretary of the Board wrote Mr. Heaton that he had sent a communication to the officers of the railroad asking why the matter had not been attended to. A letter was addressed to General Manager Potter, asking him to attend to the case at once.]

SIDNEY, IOWA, June 5, 1882.

E. G. MORGAN, Esq., *Des Moines, Iowa*:

DEAR SIR—Yours of May 26th received. I filed a copy of the claim with the freight agent at Edwards, Illinois, and, also, with the agent here at Anderson, some time before sending to you. I expected at the time it would cost more than it would come to, still I did not feel disposed to sit quietly

under the dispensation. I also thought the railroad company ought to be informed of these things, as there were many complaints besides my own. By the way, I shipped last week two car loads horses from Caldwell, Kansas, to Riverton. Freight from Caldwell, on Santa Fe Road to Atchison, \$40 per car. Freight from Atchison to Riverton, about one-fourth the distance, \$37.50 per car. How is that for high on the C., B. & Q.?

Very respectfully,

H. J. HEATON.

SIDNEY, IOWA, July 31, 1882.

E. G. MORGAN, Esq.:

DEAR SIR—May I ask if there is a probability, or even a remote possibility, of the very large claim of mine ever being settled? I should like to have the matter closed up. What's the matter, too much red tape?

Very respectfully,

H. J. HEATON.

DES MOINES, IOWA, August 3, 1882.

H. J. HEATON, Esq., *Anderson, Iowa*:

DEAR SIR—Yours of 31st is at hand. The Commissioners supposed from the fact that General Manager T. J. Potter, wrote them under date of March 31st, that "voucher had been made and would be forwarded," that the claim you refer to had been settled. I have again called the attention of Mr. Potter to the fact that the claim is still unsettled, and asked him to have it attended to at once. As soon as I hear from him I will write you.

Very respectfully,

E. G. MORGAN.

[On August 3d the Secretary also wrote General Manager Potter, asking him if the voucher had been sent to Mr. Heaton.]

CHICAGO, August 11, 1882.

E. G. MORGAN, Esq., *Secretary Railroad Commissioners, Des Moines, Iowa*:

DEAR SIR—I have yours of the 3d, about claim of H. J. Heaton, of Anderson, Iowa. We have a voucher which was receipted March 31, 1882, by whom we supposed to be Mr. Heaton. Since the receipt of your first letter stating that he had not yet got his money, we have been investigating to find out if the signature is a forgery and who perpetrated it. As soon as this is ascertained I will advise you of the result.

Yours truly,

T. J. POTTER.

DES MOINES, IOWA, August 15, 1882.

H. J. HEATON, Esq., *Anderson, Iowa*:

DEAR SIR—In reply to my letter to General Manager Potter in relation to payment of your claim for lost goods, he writes me under date of August 11th, as follows: [Here was sent a copy of Mr. Potter's letter of August 11th, to the Secretary].

The Commissioners regret as much as you do the long delay in this mat-

ter, but they are of the opinion that Mr. Potter has endeavored to do as he promised in his letter to them of March 31st. His letter of the 11th inst., throws a new light on the cause of delay.

Very respectfully,

E. G. MORGAN, *Secretary*.

DES MOINES, IOWA, September 12, 1882.

H. J. HEATON, Esq., *Anderson, Iowa*:

DEAR SIR—I wrote you August 15th in relation to lost goods of your daughter's and sent you a copy of Mr. Potter's letter of August 11th. Did you receive them? Have you heard from the voucher sent you last April? An early reply will oblige,

Very respectfully,

E. G. MORGAN, *Secretary*.

ANDERSON, IOWA, September 14, 1882.

E. G. MORGAN:

DEAR SIR—On my return from Illinois, last week, I found letters from you relative to this contemptible small claim, for which please accept thanks for your trouble. On my way I was interrogated by Mr. James S. Wood, agent at Hastings. It appears some scrub has pushed forward what purports to be a receipt for the money signed by me—I need not say it is a forgery—myself nor any of my family ever received a cent, nor did they ever see any one interested in obtaining it. Have notified Mr. Wood to that effect.

Very respectfully,

H. J. HEATON.

ANDERSON, IOWA, September 15, 1882.

E. G. MORGAN, *Secretary, etc.*:

DEAR SIR—I wrote you yesterday, and last night received yours of the 12th inst. This is getting amusing as well as instructive. As our time is worthless we may as well fill it this way as any other. As I informed you in yesterday's letter, I sent the papers—I forgot what they were—a week ago to the agent at Hastings, who had a copy of the whole proceedings. It is to be hoped he will, with your assistance, be able (perhaps in the course of time) to close the matter up. I presume, had there been no tricking, it would have been finished before this.

Truly yours,

H. J. HEATON.

[September 16th a copy of Mr. Heaton's letter of September 14th was sent to General Manager Potter, and his reply was as follows:]

CHICAGO, September 19, 1882.

E. G. MORGAN, *Secretary Railroad Commissioners, Des Moines, Iowa*:

DEAR SIR—I am in receipt of your favor of the 16th in regard to claim of H. J. Heaton, Anderson, Iowa. I supposed this matter had been disposed of some time ago, as I gave instructions to pay the claim and have done with it.

In reply to a telegram sent our division freight agent at Burlington, to-day, I learn that the money wherewith to pay this claim was delivered to the express company to transmit to Mr. Heaton on the 11th inst., this company having no agent at Anderson. I have asked for date of delivery to Mr. Heaton, and will advise you as soon as I hear.

Regretting that you have had further trouble in this matter,

I am, yours truly,

T. J. POTTER.

[Secretary acknowledged the receipt of Mr. Heaton's letters of September 14th and 15th, and on the 26th of September received the following:]

CHICAGO, September 26, 1882.

E. G. MORGAN, *Secretary Railroad Commission, Des Moines, Iowa:*

DEAR SIR—I am advised by our division freight agent at Burlington, that he has received from the express company H. J. Heaton's receipt for \$12.50, the amount of his claim, dated September 23d. I hope this will put an end to further correspondence on the subject from Mr. Heaton. I am sorry you have been troubled so much in the matter.

Yours truly,

T. J. POTTER

[On the 5th of October, a letter written on the 1st, was received from Mr. Heaton, acknowledging the receipt of the amount of his claim for lost goods from the C., B. & Q. R.R. Co., and thanking the Board for their efforts in his behalf.]

TOM H. MILNER, IOWA FALLS, IOWA, *Complainant,*

vs.

BURLINGTON, CEDAR RAPIDS & NORTHERN RAILWAY, *Respondent.*

} *Inquiry as to classification.*

Filed, February 8, 1882.

IOWA FALLS, IOWA, Jan. 24, 1882.

HON. MARCUS C. WOODRUFF, *Railroad Commissioner:*

DEAR SIR—Will you please inform me at your earliest convenience, what, under the law of Iowa constitutes a first class railroad? Is the Iowa Falls, Cedar Rapids & Northwestern R. R. a branch of the B., C. R. & N. R. R. from Holland, Grundy county, to this place and northward, such a road as the law designates as a first class road? What is the B., C. R. & N. R. R. from Cedar Rapids north to Emmetsburg classed? Do you know what their gross earnings were, respectively, for the years 1880 and 1881, per mile. By giving an early answer you will oblige the writer hereof and a multitude of your numerous friends at this place. Yours respectfully,

TOM H. MILNER.

DES MOINES, IOWA, Feb. 8, 1882.

TOM MILNER, Esq., *Iowa Falls, Iowa:*

DEAR SIR—My absence from the State for several days has prevented earlier attention to your letter of the 29th ult. You ask: (1) "What under

"the law constitutes a first class railroad?" (2) "Is the Iowa Falls, Cedar Rapids & Northwestern, a branch of the B., C. R. & N. from Holland to this place such a road as the law designates as a first class railroad?" (3) "What is the B., C. R. & N. from Cedar Rapids north to Emmetsburg?" (4) "Do you know what the gross earnings were for the years 1880 and 1881, respectively?"

I answer your questions in the order named.

1. Section 1 of chapter 68, acts of the Fifteenth General Assembly defines the classification of railways as follows: "All railroads in this State shall be classified according to the gross amount of their respective annual earnings within the State, per mile for the preceding year as follows: "class 'A,' shall include all railroads whose gross annual earnings per mile shall be \$4,000 or more."

This is the obvious definition of what you designate "first class railroads."

2. The Iowa Falls Branch of the B., C. R. & N. R'y, is not a class "A" or first class road.

3. This branch of the railway to Emmetsburg is a class "C" road, the lowest class prescribed in the law, its gross earnings being less than \$3,000 per mile per annum.

4. Exactly what the gross earnings are, is not known to the Board, as the company has not yet reported for the year 1881, and which is due on or before the 15th instant.

It is known, however, that the earnings are much below the amount prescribed for the lowest class roads. For 1880 no report of the earnings per mile was made, as this new branch was operated for only a few weeks before the close of the railroad year. This, I believe, answers your questions. If there is anything more you desire, write me and I will do my best to answer you.

Respectfully yours,

M. C. WOODRUFF.

| CHICAGO & NORTHWESTERN RAILWAY COMPANY, <i>Respondents.</i> |   |                 |

Filed February 21, 1882.

#### DECISION OF THE COMMISSIONERS.

On the 19th of September, 1881, L. C. Campbell shipped for his father, Daniel Campbell, from Onawa, Iowa, to Amos Edmunds, Disco, Ill., by the Sioux City & Pacific Railroad, one keg of honey, the keg and honey weighing eighty pounds. The company writes on the receipt "O. R.," and in a printed form expressly limits its liability to damage incurred on its own line. This company carried it to Missouri Valley Junction and there delivered the package in good condition to the Chicago & Northwestern Railway

Company, who took it to Council Bluffs and delivered it to the Chicago, Burlington & Quincy Railroad Company. At Council Bluffs the keg was found with one hoop off and leaking badly, which fact was noted on the way-bill. On arrival at Burlington the weight of the keg and contents had been reduced through leakage to twenty pounds. We suppose this station to be the point where freight for Disco, Ill., is delivered. The consignee refused to receive it, and the consignor, on being asked for instructions, disclaimed all interest, and presented a claim for the value of the property. The statements of the parties here differ, the only point in the case where they do. The railway company states that complainant's claim was for \$9.75. The complainant states that he proposed to settle his claim for that amount, if paid without trouble or expense to him. This statement covers all the facts in the case, as far as the transportation of the honey is concerned. The Sioux City & Pacific Railroad Company received and transported it to Missouri Valley Junction, where the Northwestern took it and receipted for it in good condition. This company carried it to Council Bluffs and delivered it to the Chicago, Burlington & Quincy Railroad Company in bad condition, "with one hoop off and leaking badly." The injury to the package occurred while in possession of the Northwestern, and whatever liability for damage there may be rests with this company. As there is no evidence of further injury while in possession of the Chicago, Burlington & Quincy Railroad Company, at least if there was it has not been presented, and is a matter the companies should settle between themselves.

The defenses offered by the Northwestern Company are, first, that the leakage may have been the result of bad cooperage, instead of rough and improper usage on the part of the servants of the railway company; second, that the railway company, having written "O. R." on the bill of lading, was exempted from liability for any loss, and that the complainant became his own insurer, and that the receipt was given for the express purpose of relieving all the companies from liability for just such accidents as the one that happened.

With regard to the first defense: The property was in the possession of the company when the injury occurred, or at least when the leakage began; if it was the result of bad cooperage, the company having the property in their charge should have been able to show this and particularize when, where, and in what manner it was defective. Having failed to do so, and the property having passed through the hands of one carrier and being delivered to the second in good condition, the legitimate inference is that the injury was the result of improper usage.

This brings us to the second defense. It is noticeable that the servants of the railways have too often assumed that the arbitrary affixing of "owner's risk" on packages, gives them the right to handle perishable property carelessly and roughly with impunity for themselves and their companies. This idea has grown from the fact that in most instances the injuries received do not amount to enough in value to justify the expense of contesting them. The obligation of the common carrier is to transport and deliver goods in

the same condition as when received, unless prevented by the "act of God" or the public enemy." He is to that extent an insurer against all risks or injury, except those above stated. The carrier has the right to limit his liability in articles that are specially liable to injury or breakage by receiving them at "owner's risk." This, however, is coupled with the condition that it does not exempt the carrier from the consequence of negligence of every grade, of himself or servants.

The decisions in all the States fully sustain this view of the effect of the "owner's risk" stipulation, even in those that by special enactment have attempted to limit the liability of the carrier. In Iowa the law seems specially to hold the carrier to the extreme of liability, as will be seen by reference to section 1318 of the Code of 1873: "No contract, receipt, rule, or regulation shall exempt any corporation engaged in transporting persons or property by railway from the liability of a common carrier or a carrier of passengers, which would exist had no contract, receipt, rule, or regulation been made or entered into." We think this disposes pretty effectually of the second defense.

The opinion of the Commissioners is that the Chicago & Northwestern Railway Company pay the complainant for seventy pounds of honey at 12½ cents..... \$ 8.75  
For one keg ..... 1.00

Total ..... \$ 9.75

*Des Moines, Iowa, April 26, 1882.*

THOMAS J. HOOPES, EUGENE, IOWA, Com-  
plainant,  
vs.  
CHICAGO, BURLINGTON & QUINCY RAIL- } Overcharge.  
ROAD COMPANY, Respondent.

Filed, February 21, 1882.

Complainant shipped a car of household goods and lumber from Perry, Iowa, over the Des Moines & Fort Dodge Railroad and the Chicago, Burlington & Quincy Railroad to Afton, Iowa. Before shipping he wrote the agent of the C., B. & Q. R. R. at Des Moines, asking for rates on a car of lumber from Perry to Creston, Iowa. The agent replied "lumber to Creston, "\$35.10." When the car containing the goods arrived at Afton, Mr. Hoopes was called on to pay \$67 freight, the company claiming double rates for loading the car with lumber, household goods, etc. The attention of General Manager Potter was called to the matter, and he gave Mr. Hoopes a rebate of \$10, which he accepted and withdrew the complaint.

CITIZENS OF NORTHWOOD AND WORTH COUNTY,  
*Complainants,*

vs.

THE CENTRAL IOWA RAILWAY COMPANY, *Respondent.*

} *Abandonment of Road.*

Filed, March 7, 1882.

This is a case wherein citizens of Northwood complain that respondent has abandoned operation of part of its road, to their damage and inconvenience, in violation of its charter, and contrary to law.

Under the provisions of section 3, chapter 77, laws of 1878, it is made the duty of the Commissioners to "inquire into any neglect or violation of the laws of this State by any railroad corporation doing business therein, and whenever in the judgment of the Railroad Commissioners it shall appear that any railway corporation fails in any respect or particular to comply with the terms of its charter, or the laws of the State, \* \* said Commissioners shall inform such railroad corporation of the \* \* \* changes which they adjudge to be proper, by a notice thereof in writing," \* \* \* and report shall be included in their annual report to the legislature.

It is competent for any citizen to bring to the notice of the Commissioners such matters as are complained of in this case, or the Commissioners can inquire into it on their own motion.

All the facts, including the matter of the complainant, answer and reply, fully appear in the decision. There is but little controversy as to the facts in this case. Some questions of law, however, of more or less importance to railway corporations and to the public, are involved:

1. The complainants allege that The Central Railroad Company of Iowa on the 23d day of June, 1869, organized under the general laws of the State providing for the organization of corporations for pecuniary profit; that "the object of the company was to acquire, construct, maintain, and operate a railroad from the south to the north line of the State of Iowa, beginning at the State line of Missouri, at or near the present northern terminus of the North Missouri Railroad, and running from thence north on the 16th meridian of longitude west from Washington, or as near thereto as practicable, the following points on the line having already been established: Moravia, in Appanoose county, Albia, in Monroe county, Oskaloosa, in Mahaska county, Marshalltown, in Marshall county, and Eldora, in Hardin county."

2. That to aid the construction of the road the people of Worth county granted it, in virtue of a vote of the electors of said county, all the swamp lands of said county, amounting in the aggregate to 32,000 acres, and on the 22d day of September, 1871, a conveyance of said land was duly executed, reciting the performance of the conditions on which the company was entitled to it, which conditions were the "grading, bridging, tieing, and constructing of all that part of said road from the south to the north line of Worth county." The deed also conveys "all swamp land indemnity, money, warrants, etc., granted, or to be granted, to said county in lieu of swamp lands in accordance with the laws of Congress," etc.

3. That there was voted and paid in accordance with the provisions of chapter 102, of the laws of 1870, taxes amounting to fifteen thousand nine hundred and eighty-five dollars and twenty cents, in aid of the construction thereof; that the notice of said election contained provisos that the tax was to be expended only in constructing the road within Worth county, and that the tax should "not be spread upon the books for collection until said railroad company shall have run their cars into Northwood."

4. That Samuel Egbert conveyed to said company lands of the value of twelve hundred dollars, B. H. Becket lands to the value of five hundred dollars, D. McKercher lands to the value of two hundred dollars, and L. L. Woodworth three and three-fourths acres of land, all in consideration of said company building and operating its road from the south line of Worth county to Northwood.

5. That on the 10th day of July, 1877, a tax of three thousand and sixty dollars and thirty-eight cents was voted by the electors of the town of Northwood, in aid of the construction of the Burlington, Cedar Rapids & Northern Railway Company from its then terminus, near Plymouth, Iowa, to some point in section 21 or 28, township 98, range 20, and there making a junction with said Central Railroad Company, and thence over the track of the last named company to the town of Northwood. A further condition of voting this tax aid to said B., C. R. & N. R'y Co., was the construction and operation of its line from Northwood to the north line of Worth county. Also L. and A. J. Dwelle, gave the company the further sum of three hundred and thirty dollars and sixty cents, on like conditions.

6. That the Central Railroad Company constructed its road as agreed, and commenced running its trains thereon into the town of Northwood in October, 1871, and said road was so operated until August, 1880, at which time all trains were abandoned north of Manly Junction; that said abandonment of trains is a great and serious damage to complainants, and the citizens of Northwood and Worth county in the matter of travel and traffic, and in violation of the charter articles of said corporation of its statutory contracts with Northwood township, Worth county, and the people thereof, and contrary to law.

All of which matters of complaint are submitted to the Commissioners for their information and action.

The Central Iowa Railway Co., responding to the complaint denies any legal obligation to operate the portion of its line between Manly Junction and Northwood, and denies any legal liability for its failure to do so, and in support of its position submits substantially the following points:

The Central Railroad Company was organized in 1869, under the general laws of the State, for the purpose of constructing and operating a railroad from the south to the north line of the State of Iowa; that it built and equipped said road and operated it for several years; that in so doing it became indebted and executed first, second, and third mortgage bonds on its road to secure such indebtedness; that the action of the people of Northwood and Worth county in inducing the B., C. R. & N. R'y Co., to run its

trains into Northwood over the Central's track from Manly, divided business, decreased the earnings, and reduced the profits of the company; that such conduct on the part of the people of Northwood and Worth county was unlooked for and unforeseen, as the Central had the right to expect no competing line, but that the people of Northwood and Worth county having helped to build the road, would look upon it as a thing in which they had an interest; that as the result of a series of misfortunes suits to foreclose the mortgages were commenced, and the road taken possession of by a receiver, appointed by the United States Circuit Court: that during his management, under the direction and approval of the court, the receiver, as a consequence, among other things, of the conduct of the citizens of Worth county in inducing the Burlington, Cedar Rapids and Northern Railway Company to run its trains over the Central's track to Northwood, leased that portion of the road between Manly Junction and Northwood, to the B., C. R. & N. R'y Co.; that eventually, *in 1875*, the road was sold "absolutely and unconditionally "out from under the ownership and control of the Central Railroad Co.," to the Farmers' Loan and Trust Co., of New York; that on the 15th May, 1879, The Central Iowa Railway Company was organized under the general corporation laws of the State for the "purpose of acquiring and operating the road"; that the matter and question of the construction of said road did not enter at all into the object of the company's organization, as the road it was organized to acquire and operate was already built; that the Central Iowa Railway Company is and ever has been in every respect, manner, and form, entirely separate and distinct from the Central Railroad Co.; that the Central Railroad Co., did all it agreed to for the aid granted it, in every particular, and as respondent believes, complied with all the requirements of its charter articles and the laws of the State, and that respondent purchased and paid full value for the Central Railroad property, and owns and controls the same free from obligations to citizens of Northwood and Worth county, for aid given to the Central Railroad Company, subject only to the laws of the State regulating the operation of its road. Respondent also says that after purchasing said road it began a suit in ejectment for the possession of the leased portion of its road, but that the court held said lease valid, and that the lessee held on to the end of the term for which the lease was given, not only under the lease, but by judgment of the court, that it should not be disturbed. And respondent further says, that during the intervening time it saw that to continue the lease to the B., C. R. & N. R'y Co., at a fair rental, would probably be a wise thing to do, and so, in August, 1881, at the expiration of the aforesaid lease, for another and greater rental gave another and new lease to the B., C. R. & N. R'y Co., as under and by virtue of the Code of Iowa, section 1300, it lawfully might do, the B., C. R. & N. R'y not then or since having any track from Manly Junction to Northwood, and that the said B., C. R. & N. R'y Co. has ever since continuously operated the same with all the facilities and equipments of a first-class road, and with all the conveniences for passenger travel and freight. And that such a disposition of said division of the road is not an abandonment of it. And for yet other

answer in this behalf, respondent says: Nor can the people of Northwood complain on another ground. The Code fixes the charges for freight and passenger fare, and it costs them no more to do business with one road than two. If they put it on the ground that if they had competing roads, they could get better rates to points out of the State, the answer is that it is not the duty of our home corporations, nor of the Board of Railroad Commissioners, to look beyond our State boundary to assist anyone. Our duties begin and end at home. Nor did the respondent have in view the assumption of any contracts or bargains of any former owners of any road it might acquire, nor did it ever assume any.

In short, respondent says: 1. That it is not the corporation that constructed the road and received the aid and incurred the obligations therefor, but that it is an entirely separate and distinct corporation, operating under an entirely separate and distinct charter: that as such it bought and paid full value for said Central Railroad property, and is in no sense liable for the constructing corporation's obligations, but entitled to operate and dispose of said road under its own charter.

2. That so owning said road, it had the lawful right to lease it as it did, under section 1300 of the Code.

Complainant, replying to respondent's answer, denies any wrongful or illegal acts on their part, or on the part of any person or corporation they represent, towards the Central Railroad Company of Iowa, or towards any of said company's successors in the ownership, control, or management of said road. Complainants admit the appointment of a receiver for the road, the lease and sale of said road, the organization of respondent's company and its purchase of said road, and the lease of a portion thereof, as set out in respondent's answer, but denies that any or all of these acts absolve respondent from its obligation to operate said railroad as a continuous line according to the provisions of the charter of the constructing company, the statutory contracts of said company, by which it procured aid in construction of said road, and existing laws.

Proofs have been submitted for the inspection of the Commissioners on all material controverted questions of fact, and we find from as careful an examination thereof as we have been able to make, that the allegations of fact by complainants are substantially true and virtually admitted by respondent, save as to the swamp land item; and in this the denial only goes to the fact of the railroad company having failed to receive any swamp lands from Worth county,—the vote of the people thereon, the deed from the county in pursuance thereof, the conditions of the deed, and the company's acceptance thereof, are not denied.

An examination of the records in the office of the State Register of Lands reveals the fact that Worth county received but forty acres of swamp land out of all selections made. This tract has, we assume, passed to the railroad company or its assigns. But the failure of the company to receive this portion of the aid stipulated for does not affect the questions to be considered here, as, aside from yet other controlling considerations, the tax and other

aids conveyed by other and independent contracts, are not denied. Respondent virtually admits the aid, saying, "it (the Central Railroad of Iowa) "did all it agreed to for the aid granted it, in every particular, and has in "every way, as we believe, complied with all the requirements of its charter "articles."

It is idle to discuss the action of the people in inducing the Burlington, Cedar Rapids & Northern Railway Company to come into Northwood. They had the right to do this, and the company had the right to comply. Such action affords respondent no possible grounds of complaint. The people of Northwood voted a tax to the Burlington, Cedar Rapids & Northern Company to bring its road to Northwood; that it came in over the respondent's track, is immaterial in this case. Complainants say that company has performed as it agreed.

It is likewise immaterial to discuss the question of the legality of any lease of any portion of the road, prior to the voluntary one executed by respondent, in August, 1881, or as to whether they were made with or without the order or approval of the court. Whatever they may have been they are things of the past. The voluntary lease made by respondent is the only one with which we have to deal.

And it does not alter the case that a court declared said lease valid in a suit between lessor and lessee. The parties represented by these complainants were not parties to the action, and the lease did not exclude the respondent from running its trains over the leased portion of its road except on its own option. Furthermore, it appears in the evidence submitted in the case, that during the management of the receiver, respondent's road was operated as a continuous line, including the portion leased, and that it continued to be so operated for more than a year after it came under the ownership and control of respondent.

If this reasoning be sound we have left for consideration in this case three questions; to-wit.,

1. Was the Central Railroad Company of Iowa legally bound by its charter articles and statutory obligations to operate its road as constructed?
2. Is the Central Iowa Railway Company, the respondent, likewise liable to operate the road?
3. If so liable, can respondent lease or alienate any portion of its road or property necessary to the discharge of its corporate obligations?

As we have already seen, the Central Railroad Company of Iowa was organized under the general laws of the State of Iowa providing for the organization of such corporations. That the object of the company, as stated in its articles of incorporation, was "to acquire, construct, maintain, and "operate a railroad from the south to the north line of the State of Iowa, beginning at the State line of Missouri, at or near the present (then) northern terminus of the North Missouri Railroad, and running from thence "north on the 16th meridian of longitude west from Washington, or as near thereto as practicable." And by the first article of its charter it assumes all the powers and privileges conferred by the law upon like corporations. The

principles of law governing this company, though incorporated under the general laws of the State, are the same as those governing corporations created by special act of the legislature. In *The People v. Albany & Vermont R. R. Co.*, 37 Barbour, S. C. N. Y., 218, the court held that "A railroad charter, like any other legislative grant, is a contract between the incorporated company and the public. When the act is not by its terms subject to repeal, it confers irrevocable rights, and it imposes corresponding obligations. It in no wise alters the case that the rights and privileges conferred, and the duties thus imposed, are so conferred and imposed under a general law, in virtue of the provisions of which persons may associate or incorporate themselves. They still hold under an act of the legislature, which lies at the foundation of all their proceedings, and is essential to give them force and vitality."

It follows, then, that the acceptance by the company of the rights and immunities conferred, and by the exercise of the powers granted, in locating and constructing its road, imposed the obligation to operate its road.

The acceptance and enjoyment by the company of the rights and immunities conferred and the exercise by it of the powers of sovereignty delegated to it by the State to compulsorily locate and construct its road by condemnation of private property for the right of way, and for other purposes obligates the company to operate its road as constructed. This is but the contract as between the public and itself, as found in its charter and the laws of the State into which it voluntarily entered.

The consideration for the grant of powers by the State is that the object and purposes of the corporation, although for private gain, are of public necessity. In *Stewart v. Board of Supervisors of Polk County*, 30 Iowa, page 20, our Supreme Court held "that the exercise of the right of eminent domain in behalf of railroads, canals, turnpikes, plank roads, bridges, mills, and the like, is upon the principle that, being of public utility, although for private profit, they are for public use within the meaning of the constitution."

In this connection it is profitable to notice the marked distinction which the courts have ever made "between charters granted by legislative power, which exact no public duties, and those under which the public acquires such rights that it can compel the corporation to respect them." It is also important to notice the grounds on which this distinction is based. In *The State ex rel. Townsend, etc., v. McIvers et al.*, Withrow Am. Corp. cases, volume 4, page 181, on this point is found the following: "A marked distinction has always been observed between companies chartered as trading associations, or scientific societies, or others of that character, aiming only at objects of their own, and not contemplating any benefit to the public, or taking upon themselves any public government or responsibility, which are exclusively private, and those where, although the inducement to their creation is individual gain, yet the interests of the community are so inseparably connected with them that what affects the one will be sensibly felt by the other. \* \* \*

"the respondents may properly claim to be the official agents of a private corporation. This proposition, however, affords them no exemption from the liabilities which attach by reason of the great purposes of State, which, doubtless to no small extent, induced the grant under which the company enjoys the large immunities conferred upon it. Such has been the rapid increase of railroad companies, with the extended and exclusive privileges which they enjoy, that the material interests of the country are, to no small degree, influenced and controlled by them. The great facility which they afford for the transportation not only of passengers but of freights, has prevented all rivalry by other means and given them almost a monopoly of the whole carrying trade. If the State, through the courts, has no power over them, by a short and speedy remedy, the injury they may inflict, not only on private, but on public interest, might be so prejudicial and detrimental, as to counterbalance all the benefits derived from their establishment. From the number and magnitude of their capital and operations without the means of an adequate check on their encroachments on private rights, they might indeed become a power which the State itself might have cause to fear."

There is entire harmony among the authorities upon the proposition that where a clear right to the performance of a corporate act exists, the law furnishes a remedy for its enforcement. The Central Railroad having been located and constructed under the authority conferred by the charter of the Central Railroad Company of Iowa, and in consideration of the powers and immunities therein granted, it became and was the duty of said company to operate said road "for the uses and purposes, and to the extent contemplated by it and the public, as defined in its charter." Hence the obligation of the company to the public to operate said line of road so far as constructed, as a continuous line. The operation of the road, so far as constructed, as a continuous line, for all the necessities of travel and traffic to and from Northwood, according to the usual and reasonable methods of operating like railroads, is the agreed consideration between the company and the public. Nothing less than this complies with the terms of the charter contract between the corporation and the public. The Supreme Court of the United States, discussing this question in *Brown v. The Railroad Company*, 17 Wall., 445, say: "Having, therefore, constructed its road as it was authorized to do, it will be held to a faithful compliance with all the terms accompanying the grant by which it was enabled to procure a pecuniary advantage." In *The People v. The Albany & Vermont Railroad Company*, *supra*, held that "A railroad corporation which has completed its road between the termini mentioned in its charter or articles, forfeits its franchise by abandoning or ceasing to operate a part of its route. It seems that the corporation owes a duty to the public to exercise the franchise granted to it and that it cannot abandon a portion of its road and incur a forfeiture at its mere pleasure."

In *The State v. The Hartford & New Haven Railroad Company*, 29 Conn. 538, the question of whether a railroad company could be compelled by man-

*damus* to operate its entire line was before the court. The defendant was chartered to construct and operate a railroad from Hartford to the navigable waters of New Haven harbor. A steamboat company was afterwards chartered to run in connection with defendant to New York, making a route. Defendant operated its road for several years, and then constructed a track diverging from the original track at a point a mile and a half from its terminus at tide water, and running to the station of the New York & New Haven Railroad Company, in the city of New Haven, and discontinued the running of passenger trains to the original terminus at tide water. This change inconvenienced travelers who wished to pass by steamboat route to New York, of whom there were many. The court held that *mandamus* ought to issue to compel the railroad company to run passenger trains to the original terminus, and closed the opinion with the following language: "We forbear going into other questions raised on the trial, or commenting on the authorities cited by counsel. We think it unnecessary, and prefer to place our decision upon the simple ground of the corporate duty of the respondent. All judges and jurists will at once agree that chartered companies are obliged fairly and fully to carry out the objects for which they are created, and that they can by *mandamus* be compelled to do so, and it will not be questioned that in the case of public highways, whether turnpikes or railroads, they are bound to keep them fit for use, and in the case of railroads to keep them furnished with suitable cars, engines, and attendants, without which they cannot be used at all. We advise the issue of a peremptory *mandamus*."

But in this case there is more than the usual consideration arising out of the grants of power and immunities contained in the charter of the constructing company, to obligate it to operate its road so far as constructed as a continuous line.

The Central Railroad Company of Iowa made several special contracts with Worth county, with divers citizens thereof, and with Northwood township, wherein, for a valuable consideration named in the contracts, it stipulated and agreed to construct its line of road from the south line of Worth county to the town of Northwood, in said county.

It would seem sufficient to settle the question of the obligation of the Central Railroad Company to operate its road from Manly Junction to Northwood as a part of its continuous line, to show the existence of these contracts by virtue of which it procured valuable aid in construction of its road, and for which it agreed to construct and operate it to Northwood. It would seem that the acceptance of the tax alone by the corporation is sufficient to support the obligation to operate the road as constructed, and in accordance with the terms of its charter. In *Stewart v. The Board of Supervisors of Polk County*, *supra*, the court base the constitutionality of chapter 102, of the laws of 1870, providing for voting aid in the construction of railroads upon the proposition that the objects to be promoted by them are public, and in the course of the opinion say that "it has been abundantly shown that the object for which the right of eminent domain

"is exercised is a public one, for public utility, for public use, within the meaning of the Constitution; that this right can be exercised in behalf of these corporations upon no other ground. If, then, the building of a railroad is a public object so as to authorize the taking of the private real property of the citizen—the highest species of property—for a right of way, is it any less a public object for the purpose of receiving aid through the medium of taxation to assist in building the road upon such right of way? The right of eminent domain and the taxing power are both sovereign powers. \* \* \* If the taxing power cannot be constitutionally invoked in aid of railroads, neither can the power of eminent domain." If, then, it be true that both the taxing power and the power of eminent domain are exercised in favor of railroads, on the same principle it follows, as a matter of course that the beneficiary of the exercise of these sovereign powers accepts each subject to the same limitations and restrictions. In either case the conditions of acceptance are the same, and like duties and obligations are imposed as an equivalent.

The equivalent is the operation of the road as constructed, as far as constructed, in accordance with the terms of the charter of the corporation accepting such grants of power. This the public would have the legal right to demand: was the road being operated by the Central Railroad Company of Iowa?

This brings us to consider the question of the liability of respondent.

Conceding the respondent company to be an entirely separate and distinct company in every shape, manner, and form from the original Central Railroad Company, and that it paid full value for said railroad property, which we do, and still we think there can be no doubt as to its obligation to operate the Central Railroad as constructed, and as a continuous line. The Central Railroad Company of Iowa was organized for the purpose of building and operating a railroad from the south to the north line of the State, as set forth in its charter articles. It accepted all the powers, rights, and immunities provided by law in such cases. It exercised these powers, etc., in its own behalf in the location and construction of its road. It exercised, under this grant of powers, the right of eminent domain in securing its right of way, and it availed itself of the sovereign right of taxation to aid the construction of its road thereon. "It has been abundantly shown," say our Supreme Court in *Stewart v. Board of Supervisors of Polk County*, *supra*, that "the object is a public one, for public utility, for public use," and "that this right can be exercised in behalf of these corporations upon no other grounds." The limitations, restrictions, and conditions imposed upon the corporation accepting these grants of power became a part of the law of its existence, and precludes the idea of its owning its property just as individuals own their private property. In consideration of these grants of power there is a clear right which the courts will promptly enforce to compel a delinquent corporation to operate its road according to the terms of its contract with the public. The Supreme Court of the United States, in the case of *Brown v. The Railroad Company*, *supra*, in speaking of the obligation

imposed upon a railway corporation by its charter settle this question, as we have already seen, beyond cavil.

The limitations and restrictions thus imposed by the charter of a railway company upon the operation and management of its road are a limitation and restriction upon the private property therein. The charter is a matter of record and as much a notice to the world as the laws of the State. Therefore, the purchaser of a railroad acquires no greater property therein than was owned by the vendor. Purchasers and lessees are charged with notice of the limitations, restrictions, and conditions imposed by the franchise of a railroad company, and of its obligations, under its charter and the laws of the State, to the public. We think this position sound on principle and sustained by the authorities. In *Thomas v. The Railroad Company*, 101 U. S., 83, the court say: "Whereas, a corporation like a railroad company has granted to it by charter a franchise intended in large measure to be exercised for public good, the due performance of those functions being the consideration of the public grant, any contract which disables the corporation from performing those functions, which undertakes, without the consent of the State to transfer to others the rights and powers conferred by the charter, and to relieve the grantees of the burdens which it imposes, is a violation of the contract with the State, and is void as against public policy."

In the *York and Maryland Line Railroad Company v. Winans*, 17 Howard, 30, it was claimed, as in this case, that the duties imposed upon the corporation were fulfilled by the construction of the road, and that by alienating its right to use and its powers of control and supervision, it might absolve itself from further responsibility. "This conclusion," say the court, "implies that the duties imposed upon the plaintiff by the charter are fulfilled by the construction of the road, and that by alienating its right to use, and its powers of control and supervision, it may avoid further responsibility." The court then go on to speak of the consequences of such conclusion, and say: "Those acts involve an overturn of the relations which the charter has arranged between the corporation and the community. Important franchises were conferred upon the corporation to enable it to improve facilities for communication and intercourse required for the public convenience. Corporate management and control over these were prescribed and corporate responsibility for their insufficiency provided as a remuneration to the community for the grant. The corporation can not absolve itself from its obligations without the consent of the legislature."

In *The Railroad Company v. Brown*, *supra*, Davis J., delivering the opinion of the court, said: "It is the accepted doctrine in this country that a railroad corporation cannot escape the performance of any duty or obligation imposed by its charter or the general laws of the State, by a voluntary surrender of its road into the hands of lessees."

And our Supreme Court, speaking of this doctrine as presented in the above case say, in the case of *Bower v. The B. & S. W. R. R. Co.*, 42 Iowa,

446, "that there can be no doubt" as to the proposition we quote being the law, "unless it be, as is urged that the provisions of the Code, Secs. 1278 and 1307, making lessees of railroads liable to the same extent as the corporation, inaugurate a different rule. It will be readily seen, however, that the remedy against lessees is cumulative only. The liability against the corporation exists in full force and vigor, without any statutory aid whatever."

In *Black v. The D. and R. Canal Company*, 22 N. J., 130, Chancellor Zabriskie says: "It may be considered as settled that a corporation cannot lease or alien any franchise or any property necessary to perform its obligations and duty to the public."

If the authorities we have here cited and quoted be law, and about that there can be no doubt, then it is clearly the duty of the Central Iowa Railway Company to operate the road constructed by the Central Railroad Company of Iowa, as a continuous line, unless it be, as is urged by respondent, that the provisions of section 1300 of the Code, authorizing a railroad company to sell or lease its road, inaugurate a different rule.

It will be readily seen, however, by an examination of this section, that the construction of it contended for by respondent is unwarranted. The original purpose of this section was, as we view it, to authorize a railway company to sell or lease its road, or to make joint running arrangement with any connecting road. "Without this the directors might not have such power, or, it might be questionable whether they possessed it." The liability of the vendor or lessor was in no manner touched. They were liable "without any statutory aid whatever," and section 1300 left their liability just as it found it. The remedy given in this section against lessees is merely cumulative. Section 1300, as it appears in the Code, and as it now stands, is in lieu of section 4, chapter 86, laws of 1864, which was, as originally enacted, and as it stood until amended by section 1300, as follows: "Section 4. The board of directors of any railroad company shall have power to authorize contracts of lease or joint running arrangements with any connecting road for the operation of such connection upon such reasonable and just terms as may be agreed upon by the parties, and the party thus leasing or operating the railroad of another company, shall, in all respects be liable to the public for their acts or negligence in the same manner as though the road belonged to them."

Section 1300, which is relied upon by respondent as giving the legislative consent, is as follows:

"Section 1300. Any such corporation may sell or lease its railway property and franchises to, or make joint running arrangements with any corporation owning or operating any connecting railway, and the corporation operating the railway of another, shall, in all respects, be liable in the same manner and to the same extent as though such railway belonged to it, subject to the laws of this State."

It will be observed that the only material difference in the two sections is that authority to sell, as well as lease, is given in the subsequent or amended

section, the liability of the "corporation operating the railway of another" being substantially the same in both.

Authority to sell not being given in the first section enacted while authority to lease was, authority to sell was rendered more questionable than prior to said enactment. This gives at once the reason for the amendment to the original section and the full significance thereof. The first section above quoted has been construed by our Supreme Court, and we think the construction not only sound but as applicable to section 1300 as to the one they were considering.

In *Treadway v. The C. & N. W. R'y Co.*, 21 Iowa, 351, in speaking of the legislative intent as found in section four (the original enactment) Dillon, J., delivering the opinion of the court, said: "As we view it the primary object of this section was to authorize the directory of an Iowa railroad company to lease their road to or make joint running arrangement with any connecting road. Without this, the directors might not have such power, or it might be questionable whether they would possess it." As incident to this extension of corporate power, and in consideration thereof, lessees were made liable to the *public* in all respects, in the same manner and to the same extent as though the railway belonged to them, subject to the laws of the State. There was no change or diminution of corporate charter duty or obligation as to vendor or lessor. There was an expansion of corporate power, and the consideration for the grant was the liability of purchasers and lessees. And all this expansion of corporate power and extension of corporate liability, "subject to the laws of the State." So, from the history of this simple section, and the judicial interpretation given it by our Supreme Court, it is most evident that it does not constitute a "consent of the legislature" to a corporation "to overturn the relations which have been arranged between the corporation and the community." On the contrary, a new party is admitted to the "relations which the charter has arranged" between the selling or leasing corporation and the community on the condition that it will not only not overturn those relations, but will see to it that they are fully maintained. *Campbell v. M. & C. R. R. Co.*, 22 Ohio R., 168, was a case somewhat similar in its facts to the one we are here considering. The respondent in that case, as in this, had acquired a portion of road constructed by another company under another charter; it bought it of a receiver under order of the court duly made in an action in court; and insisted that under the laws of Ohio it was entitled to operate the portion of the road thus acquired under and according to the terms of its own charter, and free from the provisions and conditions of the charter under which said road so acquired was constructed. The statute, the subject of construction in the case, certainly contained as broad a grant of power with less restriction and condition attached than section 1300. It provided as follows: "That any railroad company organized in pursuance of law may lease or purchase any part or all of any railroad constructed by any other railroad company, if such company's lines are continuous or connected."

The court held that the State could only confer right of eminent domain upon a railroad company upon the ground that when constructed its road should become a public highway, and said that "we have no doubt as to the right of the public to use the road upon the terms secured by the charter so long as it remains a public highway, unless the legislature shall clearly declare its intention to the contrary."

The court went on to show that the legislature, under the statute, did not intend that the purchased road should be operated under the charter of the purchasing company, but that the duties and obligations of the purchasing company in its conduct of the purchased road, were to be found in the charter of the constructing company, and in this connection said: "If it be that the restrictions imposed by the charter of a railroad company \* \* \* is a limitation upon the private property therein, then it is quite clear that by a sale of the road, no greater rights therein can pass to the vendee than were owned by the vendor."

If, then, the authorities we have cited with reference to respondent's liability to the public, be the law, respondent is liable, in all respects, in the same manner and to the same extent in its operation of said road as would be the original Central Railroad Company of Iowa was it still in the management of said road. But there is another sufficient reason, as we view it, why respondent is legally bound to operate said road as constructed, so far as constructed, and subject to all the obligations and burdens imposed by the charter and statutory contracts of the constructing company. Its charter obligates it to do so. The Central Iowa Railway Company was organized May 15, 1879, under the general laws of this State.

Article I provides that the company "shall be entitled to all the privileges, exemptions, and benefits of like corporations, and shall have all the powers, rights, and franchises now or hereafter authorized by the laws of Iowa relative to railroad, transportation, telegraph, and warehouse companies."

Article II declares "the object of this corporation shall be to acquire, construct, equip, maintain, and operate a railway from the north to the south line of the State of Iowa, embracing the present road and property, both real and personal, of the Central Railroad Company of Iowa, subject to the first mortgage," etc. In consideration of the powers, rights, immunities, etc., enumerated in Art. I, the corporation must do and perform all the acts enumerated in Art. II. Such is the contract as found in the charter and the laws of the State.

The authorities, as we have already seen, sustain this proposition.

It is clear, then, that respondent is legally obligated to operate the Central Railroad as a continuous line between its points of *termini*, in accordance with the terms of its own charter.

But, says respondent, we have rented that portion of our road between Manly Junction and Northwood, and cannot, therefore, operate it.

This brings us to the consideration of the power of respondent to execute such a lease, and we unhesitatingly declare that it has no such power. Respondent cannot lawfully convey to an other corporation the right to the

exclusive use of a portion of its road. The statute only provides for leasing the road.

The statute contemplates such a sale or lease as will put vendee or lessee, as the case may be, in a position to carry out fully the objects of the charter under which the road was constructed. It is such a sale or lease only that is "subject to the laws of this State." Section 1300, which is relied upon by respondent as authority, has already been considered. We do not think it gives such authority. It is incumbent on respondent to operate the road as a continuous line according to the usual methods of operating like roads, and any contract it makes which precludes it from the performance of such duties is beyond the scope of its power and void. The abandonment of trains on the road in question between Manly Junction and Northwood is a practical abandonment of that portion of the road, and is in violation of its charter duties and contrary to law.

We decide, therefore, that respondent is under legal obligation to "equip, maintain, and operate" that portion of its road between Manly Junction and Northwood, and to so equip, maintain, and operate it as a part of and in connection with its entire and continuous line between its points of *termini*, as provided in the charter under which said road was constructed, as well as in accordance with its own charter articles and the laws of the State, and that a failure of respondent to so equip, maintain, and operate said portion of road, and its entire road, is a violation of its charter duties and obligations and contrary to law.

The Commissioners, therefore, recommend that the Central Iowa Railway Company, respondent herein, resume the operation of that portion of its road between Manly Junction and Northwood, in accordance with this decision, and that it do so within a reasonable time.

*Des Moines, Iowa, February 15, 1883.*

|                                                                       |                   |

| vs.<br>CHICAGO, ROCK ISLAND & PACIFIC RAILWAY<br>COMPANY, Respondent. |                   |

Filed, April 14, 1882.

UNIONVILLE, IOWA, April 8, 1882.

*To the Honorable Board of Railroad Commissioners, Des Moines, Iowa:*

GENTLEMEN—In January, 1880, I had two car loads of lumber shipped from Muscatine on the Chicago, Rock Island & Pacific Railway. The cars were billed for Udell spur or switch, five miles west of Unionville, and when the train came through Unionville, the conductor had the cars left there and the station master would not have them moved. I paid the freight on the cars from Muscatine to Udell Switch, and had to haul the two car loads from Unionville to the switch at a cost of \$25.

I wish to call your attention to this for its nothing but swindling. Can you do anything for me? If you can I will take it as a favor.

C. A. HORNADAY.

#### DECISION OF THE COMMISSIONERS.

In the matter of the complaint of C. A. Hornaday, against the Chicago, Rock Island & Pacific Railway Company, the Board find that the shipping order of Messrs. Musser & Co., under date of January 25, 1880, for the two cars of lumber, number 1851 and 215, were billed to Mrs. Hornaday, Udell Spur, Iowa, *via* Unionville, Iowa. The way-bills were from Muscatine to Unionville, the rate, 26,000 pounds, 12½ cents, \$32.50 each. Mr. Warfield, the station agent of the company, states that Udell Spur was not a billing station, there being no freight agent there, and the freight charges unpaid he billed the cars as usual to the nearest station. The president of the Railway Company states that Udell Spur is a plug switch siding, connected at only one end, and was put in solely for the convenience of operating the road, as freight trains bound east were often obliged to take part of their trains to this siding and return for the balance.

It is situated four and one half miles west of Unionville, and two miles east of Sharon. The company have never regarded it as a station, have no agent, no rates, and have not way-billed to or from it.

Complainant must be mistaken in his statement of April 17th, when he asserts that the rate to Udell Spur was \$32.50, which is the rate to Unionville. The President admits that the division superintendent has, at the particular request of farmers living near the switch, left cars there to be loaded, charging for them Unionville rates, but if this is to be construed into discrimination or cause for complaint, will see that in future no cars are left there for the purpose. The grades from Udell Spur being favorable the officers of the road had been disposed to accommodate parties living in the vicinity who were desirous of shipping east.

Under the circumstances the Commissioners are of the opinion that the complainant has no cause for complaint, or claim against the Chicago, Rock Island & Pacific Railway for damages.

OTTUMWA IRON WORKS, OTTUMWA, IOWA,  
*Complainant,*

vs.

CHICAGO, ROCK ISLAND & PACIFIC RAIL-  
WAY COMPANY, *Respondent.*

} *Application for special rates.*

Filed, April 14, 1882.

OTTUMWA, IOWA, April 13, 1882.

E. G. MORGAN, Esq., *Secretary Railroad Commissioners:*

DEAR SIR—Enclosed we hand you reply just received to our application

for rates. We suppose this is every way right and just as it should be. If you have any suggestions we should be glad to hear from you.

Yours truly,

OTTUMWA IRON WORKS.  
By J. T. HACKWORTH.

OFFICE OF THE GENERAL FREIGHT AGENT OF  
CHICAGO, ROCK ISLAND & PACIFIC RAILWAY CO. }  
CHICAGO, April 12, 1882. }

OTTUMWA IRON WORKS, *Ottumwa, Iowa*:

GENTLEMEN—Replying to yours of 11th for rates on coke, iron, etc., Chicago to Ottumwa, would say that we are not taking freight to Ottumwa from Chicago proper, having abandoned that territory to the Wabash and Chicago, Burlington & Quincy Railroads.

Yours truly,

W. M. SAGE, *General Freight Agent*.

CHICAGO, April 24, 1882.

MR. E. G. MORGAN, *Secretary Railroad Commissioners, Des Moines, Iowa*:

DEAR SIR—Replying to your favor of the 14th inst., I cannot learn that our freight agents have refused to take freight from Chicago to Ottumwa, or *vice versa*, except in one or two instances where instructions have been misunderstood, but we have refused to name special or reduced rates between the above named points, being well assured that such action would tend to a demoralization of rates at many other points. Our line from Ottumwa to Chicago is twenty-five miles longer *via* Eldon, and fifty-two miles *via* Oskaloosa than the road *via* Burlington, and we have not worked for freight at rates that will afford us no profit. But I will guarantee any shipper can forward by the C., R. I. & P. R'y at the tariff rates as published from time to time by the general freight agent. I inclose copy of a letter from that officer, giving rates to Ottumwa, and stating how the letter to which you refer came to be written. Respectfully yours,

HUGH RIDDLE, *President*.

CHICAGO, April 22, 1882.

HUGH RIDDLE, Esq., *President, Chicago*:

DEAR SIR—Herewith I beg to return Mr. Secretary Morgan's letter of April 14th.

During my absence I find a letter was addressed to me by the Ottumwa Iron Works, asking for rates from Chicago to Ottumwa on coal, bar-iron, pig-lead, etc. It was replied to in my name by a clerk who had but recently come into my office, and the reply made by him was not in accordance with our policy. Our published rates, Chicago to Ottumwa are: First class, 75 cents; second class, 65 cents; third class, 55 cents; fourth class, 40 cents. Class A, 35½ cents; class B, 30½ cents; class C, 27½ cents; class D, 25 cents.

The C., B. & Q., being a shorter and more direct route quote: First class, 70 cents; second class, 60 cents; third class, 50 cents, and fourth class, 29 cents. Class A, 34 cents; class B, 29 cents; class C, 24 cents; class D, 24 cents.

This virtually has heretofore given the C., B. & Q. and Wabash the business. Our rates to Ottumwa, however, are no higher than we charge to the station nine miles further west. I regret that my clerk, through inexperience, worded the letter in such a manner as would lead our patrons to infer that we refused the business. We do not refuse the business, but we claim tariff rates, and I have written to the Ottumwa Iron Works explaining the mistake in my letter of April 12th.

Trusting this explanation will be satisfactory to Mr. Morgan, I remain yours truly,

W. M. SAGE, *General Freight Agent*.

DES MOINES, IOWA, April 26, 1882.

OTTUMWA IRON WORKS, *Ottumwa, Iowa:*

GENTLEMEN—Referring again to your letter of 13th, in relation to your application for rates on freight over the Chicago, Rock Island & Pacific Railway, the president of the road states that his company never has refused freight from Ottumwa to Chicago; that his line is twenty-five miles longer than the Chicago, Burlington & Quincy Railroad, and giving Ottumwa the same relative rates that he does the other stations on his line, brings his figures slightly greater than those of the other lines.

This the Commissioners suppose the company has a right to do, if the officers think that reducing the rates to that of the shorter lines affords no profit on the business. The president says that the company has always been ready to carry freight at the published tariff rates.

By order of the Board.

E. G. MORGAN, *Secretary.*

|                                                                      |                          |

| vs.                                                                  |                          |
| CHICAGO, MILWAUKEE & ST. PAUL RAILWAY<br>COMPANY, <i>Respondent.</i> |                          |

Filed May 2, 1882.

WAUKON, IOWA, May 1, 1882.

*Railroad Commissioners, Des Moines, Iowa:*

GENTLEMEN—As a corn shipper from this point to Chicago, I feel grieved by reason of the discrimination in railroad tariff from my competing towns, as follows: Waukon to Chicago, twenty-one cents per 100 pounds; New Albin, seventeen cents per 100 pounds; Lansing, sixteen and one-half cents per 100 pounds. I have positive testimony from reliable men. I make this as a complaint against the Chicago, Milwaukee & St. Paul Railway Company, and would like to have you come and get the evidence as the duties of your office requires. I have shipped forty broad gauge cars shelled corn since February 10th, and expect to ship sixty more before season is over. Two and a half cents per bushel is quite an item on sixty cars. Please write me at your earliest convenience, and I will expect you gentlemen to do your duty without delay. Yours truly,

ALBERT ROSA.

#### DECISION OF THE COMMISSIONERS.

The Chicago, Milwaukee & St. Paul Railway Company report to us that their rates from "Waukon to Chicago are 26 cents per 100 pounds; New Albin to Chicago 22 cents per 100 pounds; Lansing to Chicago 22 cents per 100 pounds; but in order to encourage the movement of coarse grains they have made a concession of 5 cents per 100 pounds from the above rates, applicable to all shipments of corn made, as follows: From Waukon "21 cents; New Albin 17; Lansing 17; these rates are in the interest of all shippers at the points named." From this we understand that all shippers

at each of the three points are treated alike, and that the complaint is for discrimination between localities.

As we understand it New Albin is five miles further from, and Lansing five miles nearer to Chicago than Waukon; that they are both on the main line of what is known as the river road, and at these points the road competes with the Mississippi River for the carriage of grain. Waukon is on a narrow-gauge branch of the road twenty-three miles long, on which there is very little local business, and where the grades are very heavy, the elevation of the town being six hundred feet above the grade at the junction, some of the gradients being more than one hundred feet to the mile. The main line from Waukon Junction north, being very favorable in the line of gradients for the transportation of freight. It is true that the grades are with the freight in this case, but the haulage of cars for the grain up this elevation represents a very considerable expenditure of power.

The Board are of the opinion that, considering the situation, the branch, the grades, and the cost of break of bulk and transfer, that a difference of four cents per 100 pounds is not unjust discrimination; that the actual cost would probably be that much greater than from the more favored points mentioned.

*Des Moines, Iowa, May 11, 1882.*

WAUKON, IOWA, May 22, 1882.

*Railroad Commissioners:*

GENTLEMEN—Your decision in the case of A. Rosa against the C., M. & St. P. R'y, on discrimination, came duly to hand, and I would say in reply, I feel there has been a great injustice rendered against myself and Waukon. You speak in your decision of "competing with the Mississippi River, and 600 feet of grade from the Junction to Waukon, and but little "local trade." I will say, in the first place, that Waukon has more railroad business than any other town in northeastern Iowa: viz., 300 cars hogs in a year; 275 cars corn; 175 oats, wheat, merchandise, agricultural implements, and everything in proportion. The cost of transfer on a bushel of corn is not  $\frac{1}{4}$  cent per bushel. I do not understand the law and duties of your office—has the Mississippi River or grades to be taken into consideration? The question is, do they charge more from one point on their road than from another? The same distance is traveled to Chicago. Any rational mind ought to know that from  $2\frac{1}{2}$  to 3 cents per bushel is discrimination. It is not only destructive and ruinous to Waukon, but to all of its immediate vicinity. I cannot but think that a higher tribunal than your body will alleviate the suffering from this great evil. If your body will not do anything to remove this discrimination, I shall make a lengthy argument and put your decision in some of the leading papers in Iowa and show up to the people what a great nuisance and farce the creation of that body called "Commissioners" is. Why, sir, to show you the injustice of the railroad company, after shipping 45 cars of corn to Chicago, I requested of them a trip pass to Chicago and return, expressly to increase my corn business, and they would not give it to me. There are men in this town that never made the railroad company a dollar, and they have annual passes, but I care little for that. I desire the same rates so I can compete with my neighboring towns, and I have asked it of you, and know you have the power to grant it; and then you say to me in your decision, "we do not think four cents per 100 pounds is discrimination." I am of the opinion that the citizens of this community will raise \$5,000 to test this matter in our tribunals.

I hope you will do me the courtesy to answer this soon, so I shall know in the near future what course the citizens will pursue in the matter.

Yours truly,

ALBERT ROSA.

DES MOINES, IOWA, May 24, 1882.

ALBERT ROSA, Esq., *Waukon, Iowa*:

DEAR SIR—Your letter of May 22d received and contents noted. The Commissioners fear that they were not explicit enough in their decision to enable you to fully get their meaning.

That part of the river road between Waukon Junction and Lansing and New Albin is part of a through line of road from Minneapolis and St. Paul to Chicago, and also to St. Louis. The business of these two towns is assisted in paying cost of operation and interest on cost on that part of the main line by a percentage of the through business both ways. The road from Waukon Junction to Waukon gets almost its entire business from the western terminus, Waukon; the intermediate business being small.

They are pleased to note that the business of this terminus amounts to 750 cars, or an average of  $2\frac{1}{2}$  cars per day for 300 days in the year; but large as this business is, there may be some question whether it is sufficient to pay the interest on cost of construction and operating expenses of twenty-three miles of road. As regards the right of Waukon shippers to claim as low rates as are fixed at Lansing or New Albin, on the main line, located at an equal distance from the initial point of the railway in the east, there is a principle, recognized by the State legislature in passing the railroad act of 1874, known as the "Granger Law," that may be considered with interest. Roads were classified according to earnings, and the road earning the least was permitted to charge the most. Where first-class and fourth-class roads come into competition, the fourth-class road was not prohibited from lowering its rates to enable it to compete at points of conjunction, although at points nearer market than the points where it crossed its more powerful rival, it was by the terms of the law authorized to charge more than for the longer haul from the junction.

Minimum rates have never been established in Iowa. Your main line passing Lansing and New Albin competes with the Mississippi River. If it keeps up its rates it will get no business, as the fourth-class road would have got none when it crossed the first-class road if it had kept up its rates to the legal limit. The lowering of the rates at Lansing and New Albin affects your business at Waukon. The Board can help you in one of two ways, provided their jurisdiction in inter-State hauls is recognized. They can ask the lowering of the rate at Waukon if they are able to show that it is too much for the service, or they can ask the raising of the rate at Lansing and New Albin, which, were it conceded, would bring into prominence a troop of new grievances worse than this one.

Their decision was that the rate was not too high from Waukon, all things considered.

If the conditions were alike at Waukon, Lansing, and New Albin, the Commissioners would insist on like rates for similar shipments. The complaint that a through line in competition with water transportation gives lower rates than you get, is kindred to complaints everywhere on our continent and beyond it. In early days of railroading, the question relative to rates was whether they were below the wagon; later it was, what will the product bear?

The Commissioners inquire into the cost of the service, and in your case think the cost is less on the main line. Had they power to prevent the lowering of rates, they would do injustice to New Albin and Lansing should they try to prevent those points from getting transportation as low as the carrier thinks it can be done for. You say, "I do not understand that the duties of your office has 'Mississippi River' or 'grades' to be taken into account." "The question is, do they charge more from one point on their road than from another, the same distance from Chicago?" This is not quite the question, but it is, do they charge more from a point on a branch road than from a point on the main line, the distance being about the same, but other conditions not the same. We think we should consider every factor bearing upon transportation, and in trying to eliminate one evil take care not to call two into existence. If they deny the competition of the main line with the Mississippi River, they refuse it a business that brings money into the general treasury of the company and justifies it in higher general charges to all points. If they decline to consider "grades," they get away from the cost of the service, and abandon a principle that is their only basis of reasoning.

The Commissioners would be pleased to have the question of discrimination in your case reviewed by the courts and also before the broader tribunal of public opinion—through the press, as you suggest. There is much to be learned on this subject, and a full and complete discussion cannot fail to be of value to the people of the State.

By order of the Board,

E. G. MORGAN, *Secretary*.

N. B. MOORE, CLARINDA, IOWA, *Complainant*,

vs.

CHICAGO, BURLINGTON & QUINCY RAILROAD COMPANY, *Respondent*.

*Failure to comply with section 1288, Code of 1873.*

Filed, May 5, 1882.

CLARINDA, IOWA, April 18, 1882.

HON. A. R. ANDERSON:

DEAR SIR—I desire to call the attention of the Railroad Commissioners to a matter, hoping through them to get the question settled. The Nodaway Valley branch of the Chicago, Burlington & Quincy Railroad, running south

from Clarinda, crosses a public highway running east and west on the line dividing section 18, in township 67, range 36 west, Page county. When the railroad was built this highway had not been established; but since the construction of the railroad the highway has been established and opened. The railroad company refuses to put in a crossing and cattle-guards. The road is a very important one to a large section of the country; it crosses the Nodaway, which has been well bridged. There is no way to cross except on this bridge, except by going south three or north four miles. The crossing is one mile west of Morsman, and a large amount of travel so far, by sufferance of myself and Mr. Henry Kunkel, who owned the land through which both the highway and the railroad runs, the travel has gone through our farms, with opening and closing of gates. This has been suffered now for two years, and we cannot afford to watch gates, etc.

I do not believe that the position of the railroad is well taken, that, as the highway has been established since the railroad was constructed, they are under no obligations, etc.

I think if you will call their attention to the matter they will build it. If they will not, and the roadmaster has the crossing and cattle guards built can the cost be recovered? Please let me hear from you.

Yours truly,

N. B. MOORE.

P. S. I write at the instance of road supervisor, township trustees, and by myself.

N. B. M.

[A copy of this complaint was sent to Thos. J. Potter, general manager Chicago, Burlington & Quincy Railroad Company, on May 5th, who replied that he would have the matter investigated immediately.]

CHICAGO, May 13, 1882.

E. G. MORGAN, ESQ., *Secretary Railroad Commissioners, Des Moines, Iowa:*

DEAR SIR—Referring to yours of the 5th inst., with copy of communication from N. B. Moore, of Clarinda, Iowa, about a crossing being established on our Nodaway Valley Branch, in Sec. 18, Tp. 67, R. 36 west, will say: Our superintendent of the Iowa Division reports that the matter has been under investigation, and says he finds the crossing was located some time ago but never opened. He has now given directions to have the crossing put in as early as possible.

Yours, truly,

T. J. POTTER, *3d V. P. and Gen. Man.*

[May 16th the substance of Mr. Potter's letter was sent to Mr. Moore at Clarinda, and on July 19th the Secretary again wrote to Mr. Moore asking if the crossing was put in, and on July 22d Mr. Moore sent the following reply:]

CLARINDA, IOWA, July 22, 1882.

*Railroad Commissioners, Des Moines, Iowa:*

GENTLEMEN—Your favor of the 19th received, making inquiry whether crossing in 18, 67, 36, had been put in. It has not. The road hauled some dirt and unloaded, but have not placed it. There is also a large ditch on each side of the road, made by the road in throwing up dirt for the track, that cannot be crossed. When the railroad was constructed a cattle-guard was made; this is in the highway in the center of it, and the earth unloaded filled this up so that my pastures are thrown open, and I am powerless to remedy it, and it is compelling me to herd my cattle in my own pasture; that is there are no cattle-guards and the stock can go into the highway at any time, unless I guard the gap—100 feet wide. I could build the fence but

I cannot fence the track. The parties on the other side are suffering the same inconvenience. I am now at an expense of a man to herd, by reason of it. I trust you will understand the situation. The highway is on the line and takes thirty feet each side. When the railroad was built, all that was necessary was the cattle guard which they put in. The opening of the highway rendered two guards necessary. They have not built these guards and one they have filled up, so I cannot remedy the fencing in any way.

Yours truly,

N. B. MOORE.

[On July 25th a copy of the preceding letter of Mr. Moore, was sent to General Manager Potter, asking why the matter had not been attended to. August 7th Mr. Potter wrote the Board that he was at first mistaken about the crossing, but that the crossing had now been changed as Mr. Moore desired, and that the latter had expressed his approval of the same. On August 12th, Mr. Moore wrote the Secretary that the matter was now satisfactorily arranged, which closed the case.]

MICHAEL HAYES, WASHINGTON, IOWA, *Complainant*,

vs.

CHICAGO, ROCK ISLAND & PACIFIC RAILWAY COMPANY, *Respondent*.

} *Discrimination.*

Filed, May 8, 1882.

WASHINGTON, IOWA, May 5, 1882.

*To the Hon. Board of Railroad Commissioners, Des Moines, Iowa:*

GENTLEMEN—I am the owner of a warehouse in this city and was engaged in buying and shipping grain, and doing a general forwarding business. There were then, and are now, two other establishments shipping grain from this city. The Chicago, Rock Island & Pacific Railway Company being the only company that own a road here refused to let me have cars to ship grain in, and, also, refuse to let any cars be loaded at my house by other parties, thus discriminating against myself and patrons, and in favor of the other shippers. No cause has ever been assigned why I should not load cars at my house, except that when cars were loading or standing in front of my house they were in the way of the other two houses that were in the rear of those at my place. I have suffered a severe loss of money as well as having my business destroyed and my house standing idle, by the injustice of the railroad company. Can you suggest or point out a remedy for me?

Yours truly,

MICHAEL HAYES.

DES MOINES, IOWA, May 10, 1882.

MICHAEL HAYES, Esq., *Washington, Iowa:*

DEAR SIR—I am in receipt of your favor of the 5th, complaining that the C., R. I. & P. R'y Co., have discriminated against you by refusing to furnish you cars for shipping grain, and also in permitting cars to be loaded at your house by other parties. A copy of your letter has been sent to the president of the C., R. I. & P. R'y Co., and as soon as his answer is returned the Commissioners will write you.

Very respectfully yours,

E. G. MORGAN, *Secretary.*

DES MOINES, Iowa, May 11, 1882.

HUGH RIDDLE, Esq., *Pres't C., R. I. & P. R'y Co., Chicago, Illinois:*

DEAR SIR—A complaint, of which the following is a copy, has been received by the Board, and is forwarded to you for examination and such explanation as your company may see fit to offer. [Here was inclosed a copy of Mr. Hayes' complaint.]

Very respectfully yours,

E. G. MORGAN, *Secretary.*

CHICAGO, May 19, 1882.

E. G. MORGAN, *Secretary R. R. Commissioners, Des Moines, Iowa:*

DEAR SIR—The inclosed correspondence submitted herewith has reference to complaint of Michael Hayes, sent from your office May 11th. Mr. Harvey has been the agent of this company at Washington for fifteen years or more, and is entirely reliable and truthful.

The building referred to I have seen during the present week. It is a rough board shanty-like enclosure black with age and totally unfit for the storage of grain, in short not worth \$50, and I confess to some impatience when I think of the valuable time lost in investigating a claim like this, which is not founded on truth or reason.

Respectfully yours,

HUGH RIDDLE, *President.*

WASHINGTON, IOWA, May 16, 1882.

G. F. WALKER, Esq., *Superintendent:*

DEAR SIR—In reply to your inquiry regarding the subject of the accompanying letter, would say, that Mr. Hayes' "Warehouse" is an old dilapidated board building, which appears to me to be ready to fall down on the slightest provocation. It stands immediately east from Mr. Blair's elevator, and is used at present partly as a carpenter shop and partly as a store-house. Some years ago it was used as a commission store-house, the lessees taking our unclaimed freight in store, and if I recollect aright dealing in grain in a small way. They subsequently gave up the business, it proving to be unprofitable. Since then it has been used occasionally by our regular elevator men as a store-house for grass seed, etc., and also as a carpenter shop. Some years ago some parties, I do not recollect who, desired to rent for the purpose of dealing in grain, and asked if we could furnish cars at the building. On referring the matter to Mr. Kimball, who was at that time superintendent of this division, he said that he did not wish to encourage the building of a lot of small houses which the owners might call elevators, and expect the company to build side-tracks to and furnish cars at them, but preferred that established elevators should do the business, as there was capacity enough among them to handle all the grain offered. I make this statement from memory, and as several years have passed since, I may be at fault verbally, but believe the spirit of it to be correct. Since then there has been no application made for cars to be furnished to do a regular business, but occasionally parties having goods stored there, requested a car put there to load in, and with such request we have invariably complied. Mr. Hayes cannot justly complain of the building standing empty, as he has had several opportunities to rent it to men doing business here and which offers he has refused.

The building is so situated that two cars will barely stand between it and the frog on main track, and on one occasion cars after being loaded were pushed east so as to obstruct it. In conclusion, I would say that Mr. Hayes is one of those men—happily few—who think that railroads are a curse to

the country, and that the world and its inhabitants would be much better without them. Still he seems to want some cars.

I am respectfully yours,

A. HARVEY, *Agent*.

P. S.—Mr. Hayes is a farmer, does not live in town, and has never been engaged in the grain business personally to my knowledge.

A. H.

G. F. WALKER, Esq., *Superintendent*:

DEAR SIR—Since writing you yesterday relative to Mr. Hayes's warehouse, it has been recalled to my memory that on the occasion of Mr. Kimball's conversation referred to in my letter, he offered to furnish cars at the building, if they would move it fifty feet further west or pay the expense of extending the track further east, so as to make it safe in placing cars there.

Respectfully yours,

A. HARVEY, *Agent*.

TRENTON, May 17, 1882.

A. HARVEY, *Agent, Washington, Iowa*:

DEAR SIR—Your letter herewith is full, interesting, and doubtless true, still I am compelled to ask, has Mr. Hayes, having grain in his building to ship, asked for cars and been refused?

Yours truly,

GEO. F. WALKER.

WASHINGTON, IOWA, May 17, 1882.

GEO. F. WALKER, Esq., *Superintendent*:

DEAR SIR—No, sir! there is no grain in his building now, nor has there been for years, that I am aware of; and at any time that there was grain in it for shipment we have furnished cars for its shipment. This matter has been stirred up by Mr. Frank Martin, who is a son-in-law of Mr. Hayes, and lately a section foreman for this company. He proposes, I understand, using the warehouse and dealing in grain, etc., in a small way, provided he can be assured of being supplied with cars at the building when he wants them, and has taken this means to attain his ends. He has made no request from me, or in fact has he spoken to me at all in relation to the matter. I learn the above from other parties.

I am respectfully yours,

A. HARVEY, *Agent*.

DES MOINES, IOWA, May 24, 1882.

MICHAEL HAYES, Esq., *Washington, Iowa*:

DEAR SIR—The Commissioners understand you to assert in your complaint that, having grain in your building to ship, you have asked the Chicago, Rock Island & Pacific Railway Company for cars to ship it in, and have been refused.

The company denies this point blank, and positively, and further say that "there is no grain in your building now, nor has there been for years that they are aware of, and at any time there was grain in it for shipment, they have furnished the cars for its shipment."

Please furnish the Board proof, by affidavit or otherwise, of the truth of your statement, and fortify your position thoroughly, as the Board will give the company an opportunity to rebut your evidence.

By order of the Board,

E. G. MORGAN, *Secretary.*

WASHINGTON, IOWA, May 26, 1882.

*Railroad Commissioners, Des Moines, Iowa:*

GENTLEMEN—Yours of 24th inst. received. Will forward to you evidence in detail soon as I can do so,—the wet weather prevents my getting around.  
Yours truly,

M. HAYES.

WASHINGTON, IOWA, May 29, 1882.

E. G. MORGAN, *Secretary Railroad Commissioners, Des Moines, Iowa:*

DEAR SIR—Mr. M. Hayes has just handed me your reply of the 24th inst. to his letter of the 5th inst., and he requests us to write you the facts which he can establish by proof against the Chicago, Rock Island & Pacific Railway Company.

That he owns a warehouse and grain-house along the track of the railroad, and has owned it for seventeen years. That up to about 1871, shipments were made from his house on that road, the company furnishing cars at the platform of the house for that purpose; that since that time (1871) the company has refused to furnish cars at the house for the purpose of shipping therefrom, though their track runs alongside the same to the other grain-houses. That it is true there is no grain in the house and has not been for some years, for the reason that the company refused to furnish cars to ship the same with, and he was compelled to shut up the house, as it was not so that it could be used for other purposes; that he and others to whom he has at times rented the house have applied for cars at different times, but have been refused. That some time in 1880 he made arrangements with S. M. Lewis to occupy the house as a grain and warehouse, and he (Lewis) applied for cars at that time, and was refused, and he was obliged to abandon the house and throw up the lease. That he has had repeated opportunities to lease the house, and could have done so on favorable terms from 1871, but when it was learned no cars could be had at the house the parties declined to take it. That there has been no grain or goods in the house because no shipments could be made from it. The railroad track runs by the house to the other grain-houses and near enough to ship from the platform of the house. The company has claimed that the switch thus running by his house belonged to the proprietor of the other house, but it runs on the company's right of way.

All these matters can be established by proof, and Mr. Hayes wishes to know if under these facts, when proven, you can afford him the relief he has failed to get from the railroad company.

Respectfully yours,

H. & W. SCOFIELD.

DES MOINES, IOWA, May 31, 1882.

MESSRS. H. & W. SCOFIELD, *Washington, Iowa:*

Your letter of the 29th, in reference to Mr. Hayes's complaint with regard to warehouse on the side track at Washington, is received. From the tenor of your letter the Commissioners infer that no grain has been offered the

railway company for shipment from this warehouse since 1871. The company emphatically deny that they have ever refused to furnish cars to the owner or occupant of the warehouse when solicited for the purpose of loading grain in them.

The Commissioners hesitate to investigate a violation of law that dates back to a period seven years before the passage of the act creating the Board. If Mr. Hayes wishes to test this matter, they would suggest that he put grain in the house and ask for cars, and if refused, the Commissioners will endeavor to have the law complied with.

If the Commissioners are mistaken, and Mr. Lewis did offer the company grain for shipment and was refused cars, please establish this by affidavit or such other proof as you deem best, and they will give the matter immediate attention.

Very respectfully,

E. G. MORGAN, *Secretary*.

[No reply has been received to this letter.—*Sec.*]

Filed May 9, 1882.

The following letter on behalf of the Board was written regarding the cut rates that existed during the summer of 1882, at Des Moines. The Board treat the subject more fully in their report to the Governor. [*Secretary.*]

DES MOINES, IOWA, May 12, 1882.

MESSRS. S. K. BELLAMY & SONS, *Knoxville, Iowa:*

Your representations to the Board of Railroad Commissioners that your business as lumber dealers at Knoxville is seriously interfered with by the unusually low rates at Des Moines, are kindred to a class of cases under consideration. You are injured by rates at a competing point so low that you cannot ask the Chicago, Rock Island & Pacific Railway or the Chicago, Burlington & Quincy Railroad that haul for you to compete with them, as the rates you pay are reasonable. The evil in your case could only be prevented by the establishment of minimum rates, a proposition that is vigorously thrusting itself on the attention of all who make a study of transportation.

As we understand the law, congressional action is necessary to regulate the carriage of lumber from points outside of the State to points in Iowa. We do not hesitate, however, to remonstrate with a railroad company that charges too much on inter-State hauls, and are usually successful, but it is

a startling proposition to demand an increase—the only thing that would bring you relief in this case.

The extension of railroads is raising the same questions regarding Iowa merchants that brought about concurrent action among railroad companies east of the lakes. To prevent this very class of annoyances concurrent action through central boards of control have failed in regard to Eastern roads, and it is proposed by those boards to get federal sanction of their agreements.

Your complaint admonishes us that the volume of Iowa business has brought west the evils that affect merchants in the east, calling loudly for the interference both of State and federal power, the one relative to local, the other to inter-State commerce.

This Board will inquire into the condition of the present quarrel that causes the cut rates at Des Moines, injuring your business, and do all in its power to bring relief.

JAMES WILSON,  
*for the Commissioners.*

J. L. BUDD, AMES, IOWA, *Complainant*,  
vs.  
CHICAGO & NORTHWESTERN RAILWAY  
COMPANY, *Respondent*. } *Railway management.*

Filed May 12, 1882.

AMES, IOWA, May 9, 1882.

HON. JAMES WILSON:

MY DEAR SIR—Permit me to call your attention to a serious question relative to railway management.

Trees are perishable products. Knowing this the companies require freight to be guaranteed and the rates are double first class. If in bundles they are fixed I think still higher, yet they are just as subject to delay as stone or other imperishable products. Annually it gets worse, I sent out very many bundles of valuable experimental trees the current spring. In going to varied points in the State they averaged fourteen days to reach their destination, usually from fifty to one hundred miles. I have now before me a letter from W. J. Newell, of Pattersonville, Sioux county, I shipped him a very valuable collection of trees for experimental orchard, April 11, 1882. The bundle reached him April 29th. He visited the station from his farm a great number of times, and was there when they came in April 29th. I could give a hundred such cases. I find that the officials have no instructions in regard to perishable products, except in the case of stock. Could not a change be made. Yours with respect,

J. L. BUDD.

P. S.—This subject has been discussed in our horticultural societies for years past.

This letter was acknowledged May 12th, and on the same day the following was sent:

MARVIN HUGHITT, Esq., *General Manager C. & N. W. R'y, Chicago, Ill.:*

DEAR SIR—A communication, of which the following is a copy, has been received at this office, and I am instructed by the Commissioners to forward to you, that you may have the same investigated and report to them the cause of long delay mentioned therein.

By order of the Board,

E. G. MORGAN, *Secretary.*

[With this was enclosed a copy of the complaint.]

CHICAGO, ILL., May 19, 1882.

DEAR SIR—I am to-day in receipt of your letter of the 12th instant, embodying a general complaint of delays in the transportation of trees and nursery stock, by Mr. J. L. Budd, of Ames, Iowa. His complaint is so general in its character that there is little to investigate with a view to applying a remedy for the fault, if found to exist on our line of road. In the shipment especially referred to, to Patterson, on another line of railroad, I will cause an investigation to be made with the view of locating the detention. We aim to give all freight prompt dispatch, especially if it is of a perishable character.

Very truly,

M. HUGHITT.

MR. E. G. MORGAN, *Secretary Board of Railroad Commissioners, Des Moines, Iowa.*

CHICAGO, May 29, 1882.

E. G. MORGAN, *Secretary, etc., Des Moines:*

DEAR SIR—We find, on investigation, that the bundle of trees referred to in complaint of J. L. Budd, May 9th, was received by the Chicago & Northwestern Railway Co., on Wednesday, April 12th, and delivered to the Sioux City & Pacific Railroad Company, at Missouri Valley, on the morning of the 15th of April.

Yours truly,

M. HUGHITT.

DES MOINES, IOWA, June 1, 1882.

P. E. HALL, Esq., *Gen'l Man. S. C. & P. R. R. Co., Cedar Rapids, Iowa:*

DEAR SIR—There is now on file in this office the complaint of J. L. Budd, of Ames, Iowa, stating "that on the 11th of April last, he shipped to W. J. Newell, of Pattersonville, Sioux Co., Iowa, a valuable collection of orchard trees; that they reached him April 29th, as Mr. Newell was at the depot when they came in." He further says that he can give a hundred such cases. General Manager Hughitt, of the C. & N. W. R'y, has caused an investigation of the shipment over his road, and reports that the bundle of trees referred to were received by his company April 12th, and delivered to the S. C. & P. R. R. Co., on the morning of April 15th.

The Commissioners request that you trace them, and report when and to whom you delivered them.

Very respectfully,

E. G. MORGAN, *Secretary.*

CEDAR RAPIDS, IOWA, June 21, 1882.

E. G. MORGAN, *Secretary Board of Railroad Commissioners, Des Moines, Iowa:*

DEAR SIR—I have investigated the matter of the complaint from J. L. Budd, stated in yours of June 1st, in regard to a bundle of fruit trees. So far as our line is concerned the facts are these: The trees were offered to us (but not delivered) on April 15th, 1882. Our company refused to receive these trees because the charges were neither guaranteed nor prepaid—this being the usual practice with our line, and all other railroads as far as I know, in regard to perishable property or property of uncertain value.

On the 19th of April the Chicago & Northwestern Railway guaranteed the charges, and on that day we received the bundle and forwarded it to Sioux City—on the 20th delivered the same to the Milwaukee & St. Paul Railway for transportation to destination.

Very truly yours,

P. E. HALL, *General Manager.*

DES MOINES, IOWA, June 22, 1882.

S. S. MERRILL, Esq., *General Manager C., M. & St. P. R'y, Milwaukee, Wis.:*

DEAR SIR—There is now on file in this office the complaint of J. L. Budd, of Ames, Iowa, stating "that on the 11th of April last he shipped to W. J. Newell, of Pattersonville, Sioux Co., Iowa, a valuable collection of orchard trees; that they reached him April 29th, as Newell was at the depot when they came in." He further says that he can give a hundred such cases.

The Commissioners have traced the bundle of trees from the C. & N. W. R'y to the S. C. & P. R. R., and from them to your road, and find they were delivered by the S. C. & P. R. R., to your company on the 20th of April at Sioux City, and they arrived at Pattersonville on the 29th, as stated by complainant.

If this is true is it not an unreasonable delay in the shipment of perishable property for which the railways charge double first-class rates? Please examine this case and report.

By order of the Board,

E. G. MORGAN, *Secretary.*

MILWAUKEE, WIS., July 6, 1882.

E. G. MORGAN, Esq., *Secretary, Des Moines, Iowa:*

DEAR SIR—Yours of the 22d to Mr. Merrill, our general manager, has been referred to me for attention. The matter of J. L. Budd's complaint has been thoroughly investigated. We find that the bundle of trees was forwarded from Sioux City to Pattersonville on the morning of April 21, and that it reached Pattersonville the next day, the 22d, and was there unloaded ready for delivery.

It is customary with all railroad agents to notify consignee of the arrival of freight; though the law does not require us to do this, it is the business of a consignee expecting goods, to be ready to receive them on landing.

There is certainly some mistake about Mr. Newell's statement that the trees did not reach Pattersonville until April 29th, and that he was present when they arrived.

With regard to Mr. Budd's general complaint, I will say that the shipment of trees or nursery stock is always attended with more or less risk of losses

by delay. It is a little singular that shippers who are so well aware of this, do not profit by experience and ship their freight by express.

We do the very best we can in handling small packages of this character. We do not as you well know, undertake to guarantee especially fast time on any commodity. Knowing as well as we do the liability to delay from accidents, we could not afford to undertake to guarantee special deliveries.

It is true that delays sometimes occur, and they are vexatious when they happen to be connected with perishable freight, as much so to us as to the owners of property.

I am very glad that Mr. Budd has given us an opportunity to point out to you in this case at least, just what a great many of these complaints amount to. The carrier has done his whole duty in this particular case, and the fault, if any, rests with Mr. Budd's consignee, so far as the evidence in our possession shows.

It will afford me pleasure to investigate every case of complaint that Mr. Budd has to make, and I hope that in future he will not allow an hundred cases or less, to pass unnoticed, but give us his complaints in the order that they arise. Unless this is done by our patrons we cannot of course, provide proper remedies.

Yours truly,  
GEO. OLDS, *General Freight Agent.*

The Commissioners regret that this case failed, the facts not sustaining the complaint, as there are some questions arising in the transportation of trees and similar perishable property, where the rights and duties of the shipper and carrier should be more clearly defined than they seem to be.

|                                                               |            |
|---------------------------------------------------------------|------------|
| MARSHALL & SON, CHARITON, IOWA, Com-<br>plainants,            | } Damages. |
| vs.                                                           |            |
| CHICAGO, BURLINGTON & QUINCY RAILROAD<br>COMPANY, Respondent. |            |

Filed, May 25, 1882.

CHARITON, IOWA, May 22, 1882.

*To the Honorable Board of Railroad Commissioners of Iowa:*

GENTLEMEN—We present the following bill for loss and damage and statement of facts for your consideration, and for such action in the premises as may come within your jurisdiction.

On the 15th of June, 1881, and from that date until the 20th day of July, 1881, we delivered for shipment by refrigerator car to the Chicago, Burlington & Quincy Railroad Company, at Chariton, Iowa, four thousand three hundred and eighty-three (4,383) pounds of creamery butter. Said butter was of best quality in good condition and in good sound packages when delivered. The delivery was made as to time, and in accordance with the advertised time of said company to meet the refrigerator car at Chariton.

These several lots of butter were consigned to Roberts, Call & Company, of Boston, Mass., and in care of the Star Union Line at Chicago. These several lots of butter arrived in Boston in a damaged condition, and from the inclosed copy of a letter from Mr. Chandler, it appears that the damage occurred while the butter was in the care of the Chicago, Burlington & Quincy Railroad Company.

We have further proof that the Chicago, Burlington & Quincy Railroad Company is responsible for said damage, in the fact their refrigerator cars were often from ten to twelve hours behind time at Chariton, and that too, when the temperature was up among the ninety degrees. During these delays our butter set in the depot unprotected for hours, which melted and ruined it before it ever left their depot at Chariton.

Messrs. Roberts, Call & Company informed us that had our butter not been damaged on the road, it would have sold for from twenty-three to twenty-four cents per pound, whereas it sold at from fifteen to twenty cents, and by reason of its having been melted and slopped out of the tubs it shrank in weight 123 pounds. We charge the difference in price and shrinkage up to the railroad company, as follows:

|                                                                  |           |
|------------------------------------------------------------------|-----------|
| Depreciation on return of sales of 1,712 pounds, at 3 cents..... | \$ 51.36  |
| Depreciation on return of sales of 1,898 pounds, at 8 cents..... | 161.84    |
| Depreciation on return of sales of 650 pounds, at 5 cents.....   | 32.50     |
| Shrinkage in weight of 123 pounds, at 23 cents.....              | 28.29     |
| Total loss to us.....                                            | \$ 273.99 |

Which makes two hundred and seventy-three dollars and ninety-nine cents of loss which we ask the Chicago, Burlington & Quincy Railway Company to pay.

In this bill we are simply asking just what our butter would have brought us if not damaged in shipping. The inclosed copy of Chandler's letter is in reply to a demand made on the Star Union Line, by the Chicago, Burlington & Quincy Railroad Company, and a few extracts from letters of Messrs. Roberts, Call & Company.

Very truly yours,  
MARSHALL & SON.

[Copy.]

December 5, 1881. "Claim MARSHALL & SON."

E. P. RIPLEY, Esq., G. F. A., C., B. & Q. R. R.:

DEAR SIR—We herewith return papers in claim of Marshall & Son for damages to butter by heat while in transit from Chariton to Chicago, and wish to call your attention to the following facts: In statement of claimant you will find that your refrigerator car which is run for the transportation of this class of property, was delayed in one instance from six to twelve hours, and the property was thereby obliged to lay in your depot at Chariton until the arrival of the car, and at a time when the thermometer registered 100 degrees. You will also note that agent Slack's letter of October 12th, states that, "this car was not on number 8, on two or three occasions." The translation of which means that shipments of perishable freight were each time delayed until arrival of car on some other train.

One of these lots arrived in Chicago on July 5th, and as that was a holiday—the 4th coming on Sunday—there was no delivery made until July 6th, and you will note from copies of your expense bills attached, that these shipments with one exception (the shipment referred to was our first and reached Boston in good condition, and is not in our claim. Marshall & Son) were delivered to us in a damaged and heated condition. From the report of the weather bureau we find the temperature on the days in question, was as follows: July 5th, 70 to 92 degrees; July 6th, 66 to 83 degrees; July 16, 71 to 84 degrees; July 18th, 77 to 81 degrees; July 23d, 77 to 76 degrees; July 25th, 79 to 83 degrees.

There was also a rain of over two hours on July 6th, and as the weather was extremely cool for the season of the year, and the transfer wagons provided with covers, there was no possibility of damage during the short haul from your freight house to our depot. As further evidence of this statement we received by the *same trains* and *same loads* shipments of perishable property consigned to various parties in the east, *which were delivered to us in good order*, and were transported by us and delivered in good order at destination, a fact in itself that shows that the damage to property in question *occurred west of Chicago*. Upon receipt of these shipments at our depot, the packages were examined and receipted for in bad order, and receipts of drivers you refer to, are only slip receipts signed for so many packages and are not a receipt for the *condition* of the property. These shipments were loaded in the best refrigerator cars, fully iced and went

through from Chicago in good time, and as no part of said damage occurred on our line; we decline to participate in the payment of this claim or any portion of it, for the good reasons given herein.

Yours truly,

W. W. CHANDLER.

EXTRACTS FROM MESSRS. ROBERTS, CALL & CO'S CORRESPONDENCE.

JUNE 30, 1881.

"We have not been able to place the second lot of butter yet, it is in such bad shape."

AUGUST 1, 1881.

"The fifteen tub lot which is just in, is in as bad condition as the other lots. It is too bad to have butter ruined just by the niggardly policy of your western roads \* \* \*. The fall short, on weights, is on account of the butter being spilled out of tubs."

AUGUST, 1881.

"Butter would have sold for twenty-three and twenty-four cents if it had not been melted."

The foregoing complaint was received, filed, and acknowledged, May 25, 1882, and on same day a copy was mailed General Manager Potter, of the C., B. & Q. R. R., at Chicago, with a request that it be investigated at once, and a report made to the Commissioners. His reply was as follows:

CHICAGO, ILL., May 27, 1882.

E. G. MORGAN, Esq., *Secretary Railroad Commissioners, Des Moines, Iowa*:

DEAR SIR:—I have your favor of the 25th inst., in regard to complaint made by Marshall & Son, of Chariton, for damages on shipment of butter from Chariton to Boston.

We do not think this is a just claim, or that we ought to pay any portion of it.

The delay in getting a decision in this matter is on account of our freight department trying to ascertain if any damage occurred east of Chicago, and if so, whether eastern lines would pay anything, and the papers have been traveling about all winter for that purpose.

It is true that we advertised to run a refrigerator car on certain trains on the Iowa Division, but because the car failed to connect sometimes, or was late, is not a good reason for the claim; no shipper was justified in putting his butter into a hot freight house and not looking after it. Moreover, the butter was hauled through the streets of Chicago in wagons with the thermometer at 90 degrees and over.

Our agent in Chicago, makes the following statement: "There is one thing that Mr. Chandler seems to lose sight of, or ignore entirely, and on which this whole claim depends as I think—the time consumed by butter remaining in C., B. & Q. freight house, after being unloaded before being called for by Star Union teams, and who are at all times notified by telegraph; the time butter is on the teams in the street in the middle of the day in hot summer weather, and the time consumed after butter gets to Star Union Depot before it gets into refrigerator cars, and the fact that we hold these drivers receipts for these same lots of butter delivered to them in good order."

We do not deny but what there was some delay in handling this produce at Chariton, but I believe the law would not hold us responsible for delays that could not well be prevented. Our passenger trains are sometimes late at Chariton, and if Mr. Marshall's claim is good, then every passenger who

is delayed at Chariton, or any other point, would have as good claim for a bill of damages.

We have no desire to quibble or in any other way try to get out of paying just claims, but in this case we think there is no liability, or any good reason why we should pay it.

If the Commissioners are not satisfied with this explanation, I shall be glad to discuss the matter further if necessary.

Yours truly,

T. J. POTTER.

DES MOINES, IOWA, June 1, 1882.

THOS. J. POTTER, Esq., *General Manager C., B. & Q. R. R., Chicago, Ill.*

DEAR SIR—In your letter of May 27th you say: "That it is true that we advertise to run a refrigerator car on certain trains on the Iowa Division, but because the car fails to connect sometimes or was late, is not a good reason for the claim. No shipper was justified in putting his butter in a hot freight house and not looking after it."

The Commissioners are under the impression that there is a very grave question underlying this statement, that is, how far the company are liable for perishable property after advertising special cars running at stated times for moving it with safety, and for which high rates are properly charged, unless some provision is made at the station by which the freight can be protected from injury. The same question may possibly be raised in the case of delayed passenger trains as you suggest.

The Commissioners do not now refer to the measure of damages in either case, but would respectfully ask you to have your attorneys refer them to any text-books that treat on this matter, or any decisions involving principles that would cover both cases which they regard as analogous. If they are correctly informed the line of decisions do not fully agree with the position you assume.

By order of the Board,

E. G. MORGAN, *Secretary.*

CHICAGO, ILL., June 9, 1882.

E. G. MORGAN, Esq., *Secretary Railroad Commissioners, Des Moines, Iowa:*

DEAR SIR—Your favor of the 1st inst., about Commissioners not being satisfied as to the question of liability for perishable property after advertising special cars running at stated times, at hand.

I am advised that it is the general rule of law that a common carrier is not obliged to furnish extraordinary facilities for the preservation of property intrusted to it for transportation, for were the rule otherwise, there would be no limit to which demands would be made for facilities of all kinds. Should we refuse to receive property until it could be loaded and sent forward, great hardship to shippers would result. A shipper of perishable property is supposed to know the condition of the carrier's warehouse into which he puts his property to await the loading and departure of the train. The company is responsible only for reasonable diligence in running its trains, and although advertising to arrive at stations at a given time, is not liable for damages occasioned by reasonable delay of the trains. The circular referred to does not constitute a special contract with the shipper. Under the rule of law requiring the carrier to receive and deliver

goods at stated times, the shipper takes the chances of reasonable delays, which may be long enough to cause perishable freight to spoil. It is well settled in law that a passenger can maintain an action against a common carrier for unreasonable delay in the movement of a train, and the same rule of law holds good in the case of freight trains, but the common carrier will be held only to reasonable diligence in the moving of its trains; therefore, I am led to the conclusion that we are not obliged to furnish extraordinary facilities at our stations for the safety of perishable property until we can forward it.

The following cases are cited as bearing upon the rules above stated. Hutchinson on Carriers, section 328; Delaware Reports, Vol. 3, pages 176 and 123; *Vail v. Railroad Company*, 63 Mo., 230; *Wolf v. Railroad Company*, 43 Mo., 421; 1st Hilton, N. Y. Sup't Ct., 235.

The Commissioners speak of our properly charging higher rates on this perishable property. The fact of the matter is, refrigerator cars were run last year and iced at our expense at the same rate charged as if property was shipped in ordinary cars. The furnishing of refrigerator cars supplied with ice was a voluntary act upon our part, for which we received no extra compensation.

Yours truly,

T. J. POTTER.

CHARITON, IOWA, June 13, 1882.

*Honorable Railroad Commissioners:*

GENTLEMEN—We sent you sometime ago our claim against the Chicago, Burlington & Quincy Railroad Company for damages. We would like to know how you progress with the case. As an example of how their employes do business, their refrigerator car which passed through here going east last Wednesday, June 7th, on which we wished to ship, had only three (3) small chunks of ice in the boxes, one at one end and two at the other. These blocks of ice had been put in we suppose at Creston to keep the car cold to Ottumwa. The thermometer was up to about 75 or 80 degrees. Now such icing of cars will not keep butter.

Very truly yours,

MARSHALL & SON.

DES MOINES, IOWA, June 14, 1882.

MESSRS. MARSHALL & SON, *Chariton, Iowa:*

GENTLEMEN—Your letter of the 13th received and contents noted. The subject of your complaint is being considered by the Board. Many questions arise in the treatment of this case that may involve consequences a great way beyond the case before them, and they propose if possible to make no mistake in the determination.

Please inform the Board whether the rates on refrigerator cars, for butter, eggs, or other perishable property, is higher than for the same property shipped in other cars.

Very respectfully,

E. G. MORGAN, *Secretary.*

CHARITON, IOWA, June 16, 1882.

E. G. MORGAN, *Secretary:*

DEAR SIR—Yours of the 14th inst. is at hand. The rate on butter is the same on all cars. It is rated second class and is 75 cents per hundred pounds from Chariton to Chicago. They put the rate up just as high as it will bear and prevent shipping by express.

We are aware that this is a peculiar case, and may be important as a precedent. But we think the main question is—is the railroad company liable for the damage? if they are, it seems to us that the case is one for the Board. It comes within the Iowa law, and within the jurisdiction of the courts. As to their liability: they hold out inducements to shippers, advertise to run refrigerator cars on certain days. They furnish their schedule of time to the shipper, and say they will be at a certain time at such and such stations. Shippers are induced by these offers on the part of the company to deliver on time at their depots perishable articles, eggs, butter, meat, etc., that they would not entrust to the hazards of common cars, or run the risk of shipping by common freight.

Instead of the refrigerator car being on time as scheduled, it is hours behind in the hottest weather. They receive these perishable articles and make us believe that they will go on the time scheduled. They do not notify us of any delay or of any danger. Besides they do not keep the refrigerator car cold, as the Star Union Company it seems found the butter in bad condition on its arrival at their depot. But the main, and probably all the damage was done here in the depot. Some of the butter remained from 12 o'clock at noon to about midnight—12 hours—in hottest days of July. No after care would remedy the damage, and little could be done to make it worse.

Very truly yours,

MARSHALL & SON.

DES MOINES, IOWA, June 14, 1882.

THOS. J. POTTER, Esq., *Gen. Man. C., B. & Q. R. R., Chicago, Ill.*:

DEAR SIR—In a letter received from Marshall & Son, of Chariton, dated yesterday, they say, speaking of the C., B. & Q. road: "As an example of "how their employes do business: their refrigerator car which passed "through here going east last Wednesday, on which we wished to ship, had "only three small chunks of ice in the boxes, one at one end and two at the "other. These blocks of ice had been put in, we suppose, at Creston, to "keep the car cold to Ottumwa. The thermometer was up to 75 or 80 degrees. Now such icing of cars will not keep butter."

While this is not specially pertinent to the case before them, the Commissioners would be pleased to know whether this statement is true or not.

Very respectfully,

E. G. MORGAN, *Secretary.*

DES MOINES, IOWA, June 15, 1882.

MESSRS. MARSHALL & SON, *Chariton, Iowa*:

GENTLEMEN—Will you please inform the Board whether you were notified when you delivered the butter that is the subject of investigation, that the train was delayed, and the length of time it was behind. What the Commissioners wish to learn is, whether you had such notice of the delay that you might have taken care of the butter.

Very respectfully,

E. G. MORGAN, *Secretary.*

CHARITON, IOWA, June 17, 1882.

E. G. MORGAN, *Secretary*:

DEAR SIR—Yours of the 15th is just at hand. We were not notified of the delay of the car at any time, but were directed by the agent to have our butter at the depot promptly at 11 o'clock. We inquired of him on the delivery of the butter if the train would be on time. He said he could not tell. We asked if there was no way by which he could ascertain when the refrigerator car was delayed. He said there was no arrangement for that matter. The same is true this season. We were anxious to know whether the car would be on time before we delivered our butter, but we could never get any information in advance. If we could have done so, we would not have delivered our butter a great while in advance of the arrival of the car. Remember, their time here was at noon, the hottest part of the day, and it was important with us that the car should be on time. There is no way that we could have saved loss only in part. We might, if we had suspected a delay, delivered our butter at the station and waited until past time for the car, and hired our butter hauled back to the refrigerator. But in that case there was an uncertainty. The train might come in a few hours. Besides, it would be a very singular arrangement if we were compelled to haul our butter back and forth, three-fourths of a mile, through the hot sun upon the uncertainty of trains off of time, when the agent could not give us intelligence as to the matter.

On December 14th, in his reply to our complaint on the delay of the refrigerator car, Mr. Thos. Miller, second assistant general freight agent, says: "We regret the trouble that you experienced during the past summer in your shipments *via* our line to the East, but we think that another season the trouble of this *last season* will not be repeated, as we hope to run the car on the advertised time in the future."

The fact is the company has never denied our loss nor the fact of their cars not being on time.

Very truly yours,

MARSHALL &amp; SON.

DES MOINES, IOWA, June 22, 1882.

THOS. J. POTTER, Esq., *General Manager Chicago, Burlington & Quincy Railroad, Chicago, Ill.*:

DEAR SIR—The Commissioners will go to Burlington on Tuesday, June 27th, so as to leave there on the morning of Wednesday, June 28th, for Chariton, to hear any testimony Messrs. Marshall & Son may desire to offer in support of their claim for damages against the Chicago, Burlington & Quincy Railroad Company for loss on butter shipped during 1881.

If your company desire to be represented at that time you can have an opportunity.

By order of the Board,

E. G. MORGAN, *Secretary*.

[A similar notice was on same day sent Messrs. Marshall & Son, which they acknowledged on the 24th.—*Secretary*.]

CHARITON, IOWA, June 28, 1882.

The Railroad Commissioners met at the Depot Hotel as they had previously notified the complainants and the railroad company, at two o'clock, P. M., when the following witnesses were produced, sworn, and testified as follows:

## TESTIMONY OF R. J. MARSHALL.

R. J. Marshall, the partner and son of Marshall & Son, being duly sworn, says that between the 15th day of June and 20th day of July, 1881, his firm delivered for shipment to the Chicago, Burlington & Quincy Railroad Company 4,383 pounds of creamery butter, and that this butter was in good condition and good packages, and in every particular fitted for shipping. It was from its manufacture until it was brought to Chariton depot kept in a refrigerator room—a corner room with ice in it to keep the temperature low; this room has always kept our butter in good condition.

The first shipment on which we claim damage was June 15, 1881, the amount was fourteen tubs; the total weight was 760 pounds, the net weight or weight of butter was 662 pounds. The second shipment, made June 22d, on which we claim damage, was twenty-one tubs; gross, 1,128 pounds; net weight or weight of butter, 981 pounds. The third shipment was June 29th, 1881, twenty-three tubs; gross, 1,234 pounds; net, 1,073 pounds. The fourth shipment, July 13th, gross, 1,244 pounds; net weight, 1,076 pounds. The fifth shipment was July 20th; gross, 793 pounds; net, 688 pounds.

These shipments of butter were delivered to the company about eleven o'clock on the morning of the respective days before stated. The butter was delivered at that time by order of Mr. Slack, the agent of the Chicago, Burlington & Quincy road at Chariton.

The witness here introduced a printed circular of the railroad company for 1882, which he states, and it is admitted by Mr. Davenport, for the company, to be similar to that issued last year (hereto attached and marked exhibit "A").

All this butter was consigned to Roberts, Call & Co., Boston, Mass., in care of the Star Union Line, at Chicago. These lots of butter, all of them, as we were notified by the consignee, reached Boston in a damaged condition.

At the time of the shipment on the 29th of June, the train was late; my recollection is that it did not reach Chariton until about four in the afternoon; the car should have been here about twelve o'clock, M. At the time of shipment July 13th, the train was delayed until nine o'clock, A. M., of July 14th, a delay of twenty-one hours. Our butter in both of these cases stood in the depot until the arrival of the refrigerator car. The shipment of July 15th was loaded a little late; the other cars I know nothing about, as I had been in the habit of shipping by refrigerator cars on the Northwestern road, and had had no trouble before. This butter was consigned to the care of the Star Union Line, at Chicago. The shipment of June 29th, as I am informed by Mr. Chandler, Chicago agent of the Star Union Line, was delivered to them on the 6th day of July. This is the shipment that left Chariton about four P. M., on June 29th.

I affirm that the bill rendered in our complaint is a fair and equitable charge for the depreciation to the butter while in transit. The weights, as they were made at the creamery, of all this butter, was 4,480 pounds, and the Boston weight was 4,260 pounds. We allow for soakage one pound per tub. This allowance is the customary one, and our experience shows that it is about correct. We haul the butter to the depot, about three-quarters of a mile, in an open dray, protected with a canvass cover thrown over the tubs. It takes in the neighborhood of fifteen minutes to deliver it. I think, protected as this butter is, that this haulage would not affect the butter. When we get the butter to the depot we put it where the agent designates. When we made the last shipment of fifteen tubs, I staid and saw them loaded, and the butter was in good condition when put on the cars.

In reply to Commissioner Wilson, witness said he thought that the car should be iced twice or more between here and Chicago.

JOSEPH F. GRIFFIN,

being sworn, says: That about the middle of July, 1881, I saw Mr. Marshall's butter at the depot. There were quite a number of tubs. I saw them there in the afternoon and again on the next morning, between seven and nine o'clock. I think the butter was loaded about nine in the morning. The tubs were branded with the name of Chariton Creamery. I knew that they were Mr. Marshall's tubs. I think that several of the tubs had been upset, the butter had melted and run out upon the floor.

R. J. MARSHALL'S

testimony resumed: I have been running a creamery for over three years. I consider myself a judge of butter and know how to make it. Our shipments to Boston when uninjured brought the highest market price. Our advices from Denver show that our butter was of first quality (will furnish evidence of this from our customers).

On the two occasions that I have testified to the trains I know were late, for I inquired whether the train was on time. At one time I made the inquiry with the intention of taking my butter back if train was much delayed. On none of the occasions complained of was I able to find out from Mr. Slack, the agent, whether the train was on time or not. I was afterward informed, I think by Mr. Miller, general freight agent, that after the receipt of his letter the agent here would be notified whenever the train was late. Our practice has usually been to come up and give instructions for billing the butter before hauling it. On none of these occasions would I have sent the butter if I had known how late the train was, until the time the car could reach here.

I came with drayman once or twice with the butter, the other times I came before the dray. I do not remember that I ever had any notice from the company that the butter was received by them in bad condition, or that anything of that kind was noted on bill of lading. The total shrinkage was 220 pounds, after deducting 97 pounds for soakage. We claim a loss of 123 pounds for wastage in handling.

We pay freight, Chariton to Chicago, seventy-five cents per 100 pounds. There is no extra charge for shipping by refrigerator car.

ROBERT MARSHALL,

being duly sworn, says: That he is familiar with the facts stated by his son R. J. Marshall, and knows all the circumstances. That he has heard the testimony of R. J. Marshall, and also heard the same read, and that all the facts stated by him in the evidence taken to-day are true as he believes.

EXHIBIT "A."

JUNE 5, 1882.

G. F. O. 882.

CHICAGO, BURLINGTON & QUINCY RAILROAD COM-  
PANY, GENERAL FREIGHT OFFICE, REFRIGER-  
ATOR CARS, CHICAGO, May 25, 1882. }

Commencing May 30, this company will run refrigerator cars, iced, and otherwise appointed exclusively for the transportation of butter, eggs, and cheese for the Chicago market, as follows:

Leave E. Nebraska City every Tuesday afternoon at 1.30, on train No 94; Red Oak at 6.50 P. M., on train No. 10; (Creston at 5.00 A. M., on Wednesday, on train No. 26); Ottumwa at 8.15 P. M., on train No. 20, and arrive at Chicago at 8.20 Thursday evening.

The above car will accommodate all points between E. Nebraska City and Red Oak, all stations on the Middle Division, and at Villisca and Albia, all points on the branches leading therefrom.

Leave Pacific Junction every Thursday morning at 5.40, on train No. 12; Creston at 4.00 P. M.; Ottumwa at 2.05, Friday morning; Burlington at 10.30 A. M., on train No. 40, arriving at Chicago 2.00 o'clock Saturday morning.

This car will receive butter, eggs, and cheese from any station on the east and west division of main line, and at Hastings, Creston, and Chariton, from stations on branches therefrom.

Leave Albany, Missouri, every Wednesday at 11.55 A. M., on train No. 46; Chariton at 12.50 A. M.; Thursday, on train No. 14; Ottumwa at 7.40 A. M.; Burlington at 6.40 Thursday evening, and arrive at Chicago Friday noon.

All consignments for delivery to connecting lines in Chicago, will be immediately transferred on arrival. City parties will be promptly notified.

Agents are requested to give particular notice to dealers of this arrangement for through iced refrigerator cars.

E. P. RIPLEY,  
*General Freight Agent, Chicago.*

On the 30th day of June, 1882, a copy of the foregoing evidence as taken by the Commissioners, at Chariton, was mailed to T. J. Potter, General Manager of the C., B. & Q. R. R., at Chicago, Illinois, who acknowledged the receipt under date of July 3d.—[*Secretary.*]

CHICAGO, June 27, 1882.

E. G. MORGAN, Esq., *Secretary Railroad Commissioners, Des Moines, Iowa:*

DEAR SIR—Answering yours of the 14th instant wherein you quote from a letter of Marshall & Son, of Chariton, I have to say that prior to receipt of your favor we had discovered that on or about the date Messrs. Marshall & Son name a refrigerator car was taken from Creston to Ottumwa with inadequate supply of ice.

This was very early in the working of the line, when employes had not become sufficiently vigilant in noting the requirements of the car for excessively hot weather, and although an occasion of censure to them, we cannot regard it other than as one of the accidents that it is difficult always to avoid.

Yours truly,

T. J. POTTER.

CHICAGO, ILL., July 3, 1882.

E. G. MORGAN, *Secretary Railroad Commission, Des Moines, Iowa:*

DEAR SIR—I have yours of the 30th ultimo, transmitting the evidence taken before you at Chariton, in the matter of claim of Marshall & Son for damage occasioned to butter during transit in summer of 1881.

Mr. Slack, who was at that time our agent at Chariton, is now in St. Louis—we have communicated with him for evidence we think material to explain or rebut the statement of Messrs. Marshall & Son. After we receive information from Mr. Slack we expect to prepare a full statement of the case to lay before you, citing the evidence taken, as well as argument regarding our liability. Hoping you will grant us sufficient time for such purpose, I remain,

Very truly yours,

T. J. POTTER.

DES MOINES, IOWA, July 10, 1882.

T. J. POTTER, *Gen. Man. C., B. & Q. R. R., Chicago, Ill.:*

DEAR SIR—Your favor of July 3d came to hand in due season. In reply the Commissioners direct me to assure you that there is no objection to granting you ample time to get up your evidence and make the argument in the complaint of Marshall & Son v. C., B. & Q. R. R. Co.

Very respectfully,

E. G. MORGAN, *Secretary.*

CHARITON, IOWA, July 4, 1882.

*Railroad Commissioners:*

Below we have made a list of the shipments and the date of the delivery to the Star Union Line, at Chicago, as per W. W. Chandler's receipt enclosed, which gives the time between Chariton and Chicago delivering:

Shipped June 15, 1881, 14 tubs, 760 pounds, delivered June 18, 1881, equal to 3 days.

Shipped June 22, 1881, 21 tubs, 1,128 pounds, delivered June 25, 1881, equal to 3 days.

Shipped June 29, 1881, 23 tubs, 1,234 pounds, delivered July 5, 1881, equal to 6 days.

Shipped July 12, 1881, 24 tubs, 1,244 pounds, delivered July 16, 1881, equal to 3 days.

Shipped July 20, 1881, 15 tubs, 793 pounds, delivered July 23, 1881, equal to 3 days.

Each of the above shipments was delivered at the depot at Chariton on the date above given.

The dates above would indicate that each of the shipments, except that on the 29th, was three days on the road to Chicago. As the time at which the several shipments left Chariton varied from one hour to twenty-one hours in leaving Chariton, some may have arrived in Chicago in the morning, others through the day, and evidently the 23 tubs too late on Saturday evening to be transferred. While they all arrived in Chicago on Saturday, it does not prove that there was not much delay at the time of loading at Chariton.

We have sent to Boston for Roberts, Call & Co.'s evidence, and expect it in a few days.

MARSHALL &amp; SON.

CHARITON, IOWA, July 11, 1882.

*To the Honorable Board of Railroad Commissioners:*

Enclosed we hand you the testimony of Mr. J. M. Call, of the firm of Roberts, Call & Co., Boston, Mass., which fully sustains our petition as to the claim for loss, and shows further that the Star Union Line was not accomplices in the loss after the butter came into their hands. Rutter shipped from Ames, Iowa, at the same time, arrived in good order. We have written to W. H. Chandler, at Chicago, for further evidence, which we have not yet received.

Very truly yours,

MARSHALL &amp; SON.

On July 13th the deposition of J. M. Call was received, filed, and acknowledged, and a copy sent T. J. Potter, general manager Chicago, Burlington & Quincy Railroad, Chicago, Ill.—[Secretary.]

## "A."

Statement of account of sales of creamery butter, made by Roberts, Call & Co., of Boston, Mass., dated August 1, 1881:

MESSRS. MARSHALL & SON, *in account with* ROBERTS, CALL & CO., Cr.

|                    | \$ 100.44     |

Messrs. Roberts, Call & Co., on making these entries, write that this butter would have sold for 23 to 24 cents if it had not been neglected in shipping.  
MARSHALL & SON.

SUFFOLK, ss.

BOSTON, July 8, 1882.

Personally appeared before me John M. Call and makes oath that the answers given by him are correct to the best of his knowledge and belief, to the instrument herewith attached.

ASA JACOBS, JR.,  
*Justice of the Peace.*

J. M. Call, of the firm of Roberts, Call & Co., Boston, Mass., makes answer to the following questions:

1. Please give the date on which you received the following lots of butter from Marshall & Son, of Chariton, Iowa; viz.,

- a. The 14 tubs. Ans. June 24th, 1881.
- b. The 21 tubs. Ans. June 30th, 1881.
- c. The 23 tubs. Ans. July 14th, 1881.
- d. The 24 tubs. Ans. July 23d, 1881.
- e. The 15 tubs. Ans. July 29th, 1881.

2. Please state what was the condition of the 14 tubs when received by you from the Star Union Line.

Ans. It was hard, but showed signs of its previously being melted.

3. Please state the condition of the 21 tub lot when received by you.

Ans. The condition of the butter upon our receiving it was the same as answer given to question 2, *i. e.*, hard, but had been melted down, and butter slopped out and frozen on the sides of the tubs.

4. Please state the condition of the 23 tub lot when received by you.

Same as condition of lot 21, described in answer to question No. 3.

5. Please state what was the condition of the 24 tubs when received by you from the Star Union Line.

Condition same as described in answer to previous questions.

6. Please state the condition of the 15 tub lot when received by you.

The answer to question No. 3 covers the whole thing, as each lot was in pretty much the same condition when received by us.

7. Please state particularly whether any of said lots of butter were in a warm or melted condition at the time that they were delivered to your firm by the Star Union Co., and if so, state which lots and to what extent, etc.

Ans. Each lot when received from the Star Union Line was hard, and had been well taken care of by them; the butter evidently had been melted before it was transferred to the Star Union Line.

8. Please state what length of time that you have been engaged in handling and selling butter.

Ans. Fifteen years.

9. From your knowledge and experience in handling creamery butter, what effect does it have on a good article of creamery butter, to allow it to become melted at any time?

a. Quality: It reduces the quality to a baker's grade. b. Flavor: becomes oily and rancid. c. Its price: depends altogether upon the demand for that kind of goods.

10. You have handled the creamery butter of Marshall & Son at other times than the several lots above referred to; from your knowledge of their butter, what would the above lots of butter have sold at per pound if it had not been previously melted?

As near as we can remember from 23 to 24 cents per pound.

11. What was the market price of the *best quality* of creamery butter in Boston at and during the times that you were trying to sell the above lots of butter?

Twenty-three and twenty-four cents per pound.

12. At the time that you received the above lots of butter, or any of them, did you receive consignments of butter from other parties shipped to you through the Star Union Line?

Ans. We did.

13. If you answer question 12 in the affirmative, state at what points the Star Union Line received said consignments, and what was the condition of the butter when delivered to your firm?

Ans. Butter was shipped from Ames, Iowa, received by the Star Union in Chicago, and received in excellent condition by us in Boston.

14. Please state what knowledge you may have of other parties in Boston receiving butter that had been previously melted and that had been delivered by the Chicago, Burlington & Quincy Railroad to the Star Union Line at Chicago.

Ans. We have no knowledge of the Chicago, Burlington & Quincy Railroad business in Boston with other parties; we are not in the railroad business.

15. If so, did said lots of butter have the appearance of having been *recently melted*, or were they in a warm or melted condition when received from the Star Union Line?

16. From your knowledge and experience in handling butter transported by the Star Union Line, have you had any reason to believe that said line did not keep their refrigerator cars sufficiently cool during the hottest weather, and in *particular* during June and July, 1881?

Ans. We have no such reason.

17. Please state if the copy of the returns of sales to Marshall & Son, hereunto attached and marked "A," is a correct copy of the original returns of the sales of the several lots of butter referred to in questions 1 and 2, and the true exhibit of the prices at which it sold, and the weights of the same at the time of the sale of said lots of butter by the said Roberts, Call & Co.

Ans. The copy of sales attached is correct.

18. Please state whether or not the butter had been slopped out of many of the tubs, which caused a heavy shrinkage in the weights of the same.

Ans. It had.

19. You may estimate the probable aggregate shrinkage by reason of the butter having been slopped out of the tubs while in transit.

Ans. Should say from one to two pounds to a tub.

## EXHIBIT "A."

NOTE—Butter would have sold for 23 and 24 cents if it had not been melted.

ROBERTS, CALL & Co.

CHARITON, IOWA, July 20, 1882.

*Honorable Board of Railroad Commissioners:*

GENTLEMEN—Enclosed we hand you the testimony of an office employe of the Star Union Line in Chicago, which corroborates to some extent the letter of Mr. W. W. Chandler now on file. With this we rest our case. If the Chicago, Burlington & Quincy Railroad Company, introduced testimony touching points not covered by our testimony, we wish to have the privilege of rebutting it, but we think that so far as evidence goes you now have a pretty clear understanding of the facts. As to the shipment which laid in Chicago. Now had the car been on time at Chariton, it would undoubtedly have arrived at Chicago in time for transfer on Saturday. As the delay was caused by the Chicago, Burlington & Quincy Railroad Company, it was their duty to have taken care of the butter and not allowed it to be taken out of the refrigerator car until Tuesday, when it could be delivered.

We think that it is a principal of law that the Chicago, Burlington & Quincy Company were not justified in abandoning the butter, until it was delivered into the care of some one else, and that butter was not delivered to the teams of the Star Union Line until Tuesday—when it was receipted for—and until then the Chicago, Burlington & Quincy Company was bound to take care of it. They sought to avoid the matter by the receipts of the transfer line *teamsters*. Now teamsters are not expected to examine the condition of the contents of packages. If those teamsters had gone to work to knock off the lids of our tubs to see the condition of the contents, they would have been guilty of an unwarrantable act. They receipt for so many

packages and agree to deliver it (inferentially) in as good condition as it is when they receive it. There is no claim that the butter was damaged in transfer from one depot to the other.

MARSHALL & SON.

OFFICE OF THE CHARITON CREAMERY,  
CHARITON, IOWA, July 11, 1882. }

W. W. CHANDLER, Esq.:

DEAR SIR—We wrote you some time ago in reference to our loss last summer. We have not heard from you, we wanted some evidence from you. We want you to establish the fact that you were not to blame for the loss on the lot of butter that laid over in Chicago from the 3d to the 5th of July. The car was due at Chariton at 12 m. on the 29th of June, and did not arrive till 4 p. m. This is in proof. Now if you can show by *affidavits* that the car *arrived too late* on *Saturday* for you to *transfer the butter*, it makes a point. We wish all the evidence you can give that shows that your line was not responsible for that lot of butter laying at, or in the C., B. & Q. depot for two days and three nights. We have secured testimony which establishes the fact, that all of the butter was solid when delivered in Boston by your line. Now we want a statement from you as to the condition of the following lots of butter when received by your line. These lots had all been melted after we delivered them to the C., B. & Q.

Shipped by us June 15, 1882, 14 tubs.

Shipped by us June 22, 1882, 21 tubs.

Shipped by us June 29, 1882, 23 tubs.

Shipped by us July 13, 1882, 24 tubs.

Shipped by us July 20, 1882, 15 tubs.

The Commissioners receive *ex parte* testimony; all that is required is for you to *have all statements sworn to*. Please attend to this as soon as possible, as we wish to close this matter as soon as possible.

Very truly yours,

MARSHALL & SON.

STATE OF ILLINOIS, }  
COUNTY OF COOK. } ss

Nathaniel E. Dillie being duly sworn says that he is an office employe of the Star Union Line; that in pursuit of his business duties he has had occasion to examine and has examined the original papers constituting the office records of his company, touching the consignments of butter mentioned in the letter of Marshall & Sons of July 11th, 1882, and hereto attached and marked "Exhibit A;" that all of said consignments save one were delivered to the Star Union Line in imperfect or damaged condition, and were so receipted for; that as to the shipment referred to in said "Exhibit A" as having lain in Chicago from the 3d to the 5th of July, deponent says, that said shipment arrived at the C., B. & Q. depot on the 3d of July too late for delivery on that day, and that the following day being a Sunday and the next a holiday, the property was not delivered to Star Union Line until the 6th day of July.

And this deponent, by way of explanation, further says that the above facts are extracted from correspondence heretofore had between the Star Union Line and the said railroad company, touching said shipments, and the said correspondence was based upon and substantiated by the original papers and copies of receipts pertaining thereto.

NATHANIEL E. DILLIE.

Subscribed and sworn to before me this 18th day of July, A. D. 1882.

[SEAL]

EDGAR M. SNOW,  
Notary Public.

STATE OF ILLINOIS, }  
 COOK COUNTY. } ss

I, E. F. C. Klokke, Clerk of the County Court of Cook county, the same being a court of record, do hereby certify that Edgar M. Snow, Esq., whose name is subscribed to the annexed jurat, was, at the time of signing the same, a Notary Public in and for Cook county, duly commissioned, sworn, and acting as such, and authorized to administer oaths; that I am well acquainted with his handwriting, and I verily believe that the signature to the said jurat is genuine.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed the seal of said court, at the city of Chicago, in said county, this 18th day of July, 1882.

E. F. C. KLOKKE,  
*Clerk.*

[SEAL]

DES MOINES, IOWA, July 21, 1882.

MESSRS. MARSHALL & SON, *Chariton, Iowa:*

GENTLEMEN—Your letter of the 20th instant, with your "Exhibit A" and the accompanying affidavit of Nathaniel E. Dillie is at hand and the papers filed. As soon as the testimony of the respondent is filed in the case you will be notified and a copy forwarded you.

Very respectfully,

E. G. MORGAN, *Secretary.*

DES MOINES, IOWA, July 21, 1882.

T. J. POTTER, Esq., *Gen. Man. C., B. & Q. R. R., Chicago, Illinois:*

DEAR SIR—With this I hand you copy of a letter received from Messrs. Marshall & Son, of Chariton, Iowa, under date of July 11, 1882, and marked "Exhibit A." Also the testimony of N. E. Dillie, an office employe of the Star Union Line, at Chicago, and dated July 18, 1882, which have been filed in this office by complainants, Marshall & Son, in support of their claim against your company.

Very respectfully,

E. G. MORGAN, *Secretary.*

This letter was acknowledged by Mr. Potter on the 22d of July, and on the 29th the affidavit of Mr. Dillie was returned by Mr. Potter, who wrote the Board that "Mr. Ripley is at present preparing his argument in the case, "which will be forwarded you as soon as it is completed."

CHARITON, IOWA, July 29, 1882.

E. G. MORGAN, *Secretary:*

DEAR SIR—It appears to us that the C., B. & Q. R. R. Co. is using unnecessary delay in filing their testimony. It is now a month since the Commissioners were at Chariton. The company was present by attorney and heard the evidence. We understood by Mr. Davenport that the company did not deny that the loss was not sustained by us, but claimed that the Star Union Line was the party to blame. Why not send in the proof? The policy of railroad companies is to use every means to delay proceedings. We have been laboring with them for a year to get this matter adjusted. We put our

claim at the *actual loss*, which we think we have fully proven. They *know very well* that the butter was damaged by the *carelessness of their employes*.

Yours truly,  
MARSHALL & SON.

DES MOINES, IOWA, August 3, 1882.

MESSRS. MARSHALL & SON, *Chariton, Iowa*:

GENTLEMEN—Your favor of the 29th ultimo received, and I am instructed by the Commissioners to say that while they are as anxious as you to close the case, owing to the extensive interests involved they desire to give ample time to both sides to complete their testimony, after which the decision will be promptly rendered. Trusting that this will not discommode you, I am,

Very respectfully,

E. G. MORGAN, *Secretary*.

CHICAGO, BURLINGTON & QUINCY RAILROAD COMPANY, LAW }  
DEPARTMENT, BURLINGTON, IOWA, September 2, 1882. }

E. G. MORGAN, *Secretary Board of Railroad Commissioners, Des Moines, Iowa*:

DEAR SIR—The case of Marshall & Son against this Company, pending before your Board, has been referred to me by our General Freight Agent.

If you will kindly advise me of the wishes of the Board in regard to this case, I shall be glad to hold myself in readiness to comply.

Yours truly,

J. W. BLYTHE.

DES MOINES, IOWA, September 4, 1882.

J. W. BLYTHE, Esq., *Attorney C., B. & Q. R. R. Co., Burlington, Iowa*:

DEAR SIR—Your letter of the 2d inst. received, and contents noted. The Board has no wishes in regard to the case of *Marshall & Son v. the C., B. & Q. R. R. Co.* On the twenty-eighth of June last, the Railroad Commissioners took testimony in the case at Chariton sufficient, if not controverted, to determine the case. The railroad company was represented by Messrs. Davenport & Moore. A copy of the testimony taken was duly forwarded to General Manager Potter, and the case has been held for more than two months to enable the company to trace the butter and show where the deterioration occurred, if not in their hands. The Commissioners have repeatedly asked the railroad company to forward any testimony they had that would contradict that taken, or change the liability, but as yet have received nothing. They are tired of waiting.

Respectfully,

E. G. MORGAN, *Secretary*.

CHICAGO, BURLINGTON & QUINCY RAILROAD COMPANY, LAW }  
DEPARTMENT, BURLINGTON, IOWA, September 6, 1882. }

E. G. MORGAN, *Secretary Board of Railroad Commissioners, Des Moines, Iowa*:

DEAR SIR—I have yours of the 4th inst. about the case of Marshall &

Son. I am aware that delays have already occurred in this case, which are much to be regretted, and perhaps may seem to the Board unreasonable.

I am sorry they have occurred, but I, personally, have not been responsible for them. I am advised by our General Freight Agent that this company will submit the question to the Board upon the evidence already taken, as this company does not regard the controversy as to the facts as being material in the case. It was believed by the company that the Commission would wish the presentation of some suggestions as to the law of the case, as it was supposed that the Commission, in the decision of the case, would regard the application of legal tests necessary; if, however, the Commission has decided the testimony taken at Chariton sufficient, if not controverted, to determine the case, it is probably unnecessary for me to ask for further hearing. In which case I beg to be informed of the decision of the Commission at as early a day as may suit its and your convenience.

I deem it proper to again suggest that if in the opinion of the Board, I can render any assistance in coming to a correct decision of this case, I shall be glad to put myself entirely at their service.

Yours truly,

J. W. BLYTHE.

DES MOINES, IOWA, September 8, 1882.

J. W. BLYTHE, Esq., *Attorney C., B. & Q. R. R. Co., Burlington, Iowa:*

DEAR SIR—Your letter of the 6th inst. received. If you desire to furnish the Commissioners further authorities, or to make further argument in the case of *Marshall & Son v. The C., B. & Q. R. R. Co.*, please notify them by return mail, and they will keep the case open another week.

On the tenth of July last, I wrote Mr. Potter at the direction of the Commissioners, "that there was no objection to granting him ample time "to get up the evidence and make the argument in this case."

The Board feels that ample time has been furnished. Please to submit argument in writing. Very respectfully,

E. G. MORGAN, *Secretary.*

DES MOINES, IOWA, September 9, 1882.

MESSRS. MARSHALL & SON, *Chariton, Iowa:*

GENTLEMEN—In the affidavit of N. E. Dillie, he says: "All of said consignments save one were delivered to the Star Union Line in a damaged "condition." Was that "one" one of the packages you have asked the C., B. & Q. R. R. Co. to pay you for loss and damage?

By order of the Board,

E. G. MORGAN, *Secretary.*

CHARITON, IOWA, September 11, 1882.

E. G. MORGAN, *Secretary Board of Railroad Commissioners, Des Moines, Iowa:*

DEAR SIR—We suppose N. E. Dillie refers to the shipment made by us on the eighth of June, 1881, one week prior to the shipment of the fourteen tubs included in our bill for damages, and shipped on the fifteenth of June, 1881. The shipment of June 8th was thirteen tubs, and went through all right.

Enclosed we hand you copy of Messrs. Roberts, Call & Co.'s letter acknowledging the return of sales of said thirteen tubs, in which you will notice that they refer to the said "second lot" as being in bad condition.

Very truly yours,

MARSHALL & SON.

(Copy.)

BOSTON, June 30, 1881.

MESSRS. MARSHALL & SON, *Chariton, Iowa*:

Enclosed please find sale of first lot of butter, which we trust you will find satisfactory. We have not been able to place the second lot of butter yet, it is in such bad condition, but will endeavor to do our best on it to get you out.

Yours truly,

[Signed]

ROBERTS, CALL & CO.

BURLINGTON, IOWA, September 11, 1882.

MR. E. G. MORGAN, *Secretary*:

I will file argument in Marshall & Sons case by Thursday.

J. W. BLYTHE.

BURLINGTON, IOWA, September 12, 1882.

E. G. MORGAN, *Secretary Railroad Commission, Des Moines, Iowa*:

DEAR SIR—I inclose to you my argument in the case of Marshall & Son. I regret that the Board could not see their way clear to use oral argument in this case, as the time was very short for the preparation of written argument. Please inform me of the decision of the Board as soon as made.

Yours truly,

J. W. BLYTHE.

IN THE MATTER OF THE COMPLAINT OF MARSHALL & SONS, AGAINST THE CHICAGO, BURLINGTON & QUINCY RAILROAD COMPANY, BEFORE THE HON. THE RAILROAD COMMISSIONERS.

This is a claim for damages on account of deterioration of butter in transit. The complainant alleges only one failure on the part of the company, *i. e.* "that their refrigerator cars were often from ten to twelve hours behind time at Chariton." This fact is not denied by the respondent, but it is denied by the respondent that this fact is sufficient to charge it with a liability for loss resulting from a *deterioration in quality* of the butter.

It is to be presumed that the honorable commissioners do not desire to impose upon the respondent any extra legal liability; nor in the decision of this case to apply any principle except those which a court of law would invoke to its aid in the solution of the questions presented, nor to add to the contract of the carrier. I shall, therefore, content myself with the argument of this case as though addressing a law court.

The undisputed facts of this case are, as shown by the testimony introduced by the complainant, that the respondent advertised that it would run a refrigerator car, iced and otherwise furnished, upon certain of its trains, arriving at Chariton at certain specified times, and that it would carry butter in this car without extra charge to the shippers. That pursuant to this advertisement the complainants took to the station of the respondent at various times certain lots of butter, and finding the trains late, left them in the respondent's warehouse, "with the thermometer in the 90," to await the arrival of the refrigerator car; by reason of which the butter melted and was reduced in quantity and impaired in quality, and the complainants damaged in the sum of \$278.99. The respondent does not introduce any testimony,

controverting the testimony of the complainant, because it believes that conceding the truth of the complaint and the proof in support of it, the complainants have failed in their case.

The respondent, a railroad company, in its capacity of a common carrier, may be under obligations of two kinds to its patrons: First, those obligations which the law imposes upon each several contract it may make; and second, those obligations which it may expressly assume in any particular contract; or, in the words of the law, its contracts are either implied or expressed; and no recovery can be had against a carrier for loss to freight, unless upon a breach of the contract.

*First.* The respondent is under no *legal obligation* to furnish extraordinary facilities for the transportation of perishable property. This has been the universal decision of the law courts through a long line of contested cases, and is now thoroughly established. The transportation of such property is at the owners' risk, and the carrier is not in any sense an insurer of the *quality* of such goods when carried by him. See Hutchison on Carriers, Sec. 219, 220 and 221, with cases cited; Angell on Carriers, Sec. 210, *et seq.*; cases cited, *M. S. & N. I. R. R. vs. McDonough*, 21 Mich., 165.

The carrier did assume to insure the carriage and delivery of the property in question, in its identity; did agree to insure it against all accident, except the act of God and the public enemy, against fire, theft, and the casualties of the road; but it did not assume by any contract imposed, either by law, or its own expressed undertaking, to warrant the *quality* of the property, or to insure it against its natural decay, or from its inherent tendency to deterioration. See Edwards on Bailments, 2d Edition, Sec. 598; *Nelson v. Woodruff*, 2d Black, jr., (U. S. Supreme Court), 156.

"The carrier is not required to answer for losses of this kind, arising from the climate or the nature of the goods." *Clark v. Barnewell*, 12 Howard, 272.

*Second.* The respondent in this case was under no *contract obligations* with regard to furnishing refrigerator cars. The publishing of the circular to which the complainants refers, did not in any respect differ from any other advertisement which its business necessities might prompt. It had no single feature of a contract. There was no consideration; no mutuality; no accord. There was, consequently, no duty created. The complainant was not bound to ship a single pound of butter, and the respondent could not have been held in damages to the complainant, or anyone else, if it had never brought upon its line in Iowa, a single car of the kind advertised. See *Heirn v. McCaughn*, 32 Miss., 17; *Gordan v. R. R.*, 52 N. H., 596.

Any other rule than this would impose upon the carriers an unusual and extreme burden. If the advertisement by circular, by insertion in the papers, by distribution of schedules, amounts in every case to a contract, no amount of care will excuse the least variation. The breaking of an engine, the failure of a bridge, the exigencies of safety and comfort may not be considered; but at all times, and under all circumstances, the carrier is held to the rigid and exact performance of all that he has promised to try to do under the most favorable circumstances.

It is not denied by the respondent that it is under some obligations to try to run its trains according to its published schedule time. But the law in regard to this is satisfied by the use of ordinary diligence. Whether this degree of care has been exercised is, of course, a proper subject of inquiry. But the honorable Commissioners will bear in mind that the want of reasonable care must be established by the complainants. They do not even try to establish this, but content themselves in all their testimony, and even in the allegations of their complaint, with the bare statement that the refrigerator car did not arrive at the advertised time. The burden is on them to show the negligence, and in this they fail.

*Third.* The real contract, the contract actually made, was that the respondent would receive the butter, would transport it, and would deliver it to the consignee. This was actually performed. There is no pretense that the butter of any shipment was lost or stolen, or that respondent neglected it in shipment. The only claim is, that before it was loaded into the refrigerator car at Chariton, its quality was impaired by reason of the heat. The whole claim is based upon the delay of the refrigerator cars in reaching Chariton.

The allegation is that "these cars were often ten or twelve hours behind time at Chariton." It is true that if respondent had contracted with the complainants to undertake the carriage of their goods at a particular time, the failure to have their refrigerator car promptly at the station would entitle the complainant to recover; but there is no proof of any such contract. The only pretense of anything of the kind is found in the printed circular before mentioned. That this did not amount to a contract has been already shown.

*Fourth.* But the respondents claim that the complainants cannot escape the consequences of their own negligence in this case.

The complainants knew that in the conduct of the business of a railroad delays are unavoidable. They were told by Mr. Slack that he could not inform them when the train would arrive. They "put the butter in the place designated by the agent," in the company's warehouse. They knew that no preparation had been made to protect it. They knew "the thermometer stood among the nineties, and knew that butter would melt. They went away and left it there to sit for "twenty-one hours," exposed to a heat which they knew would soon destroy their property. Yet their whole claim is based upon the loss which occurred in the station at Chariton, and the complainants display an unusual impatience when it is suggested that a part of the loss might have occurred in transit through Chicago and over connecting lines east of Chicago.

The entire loss occurred in Chariton. The butter was hauled a distance of three-quarters of a mile to the station, upon an open dray, with the thermometer among the nineties; then stood in the freight house where no special preparation was made for its care, and where the respondent was not required by law, or by its contract, to make any such preparation, and when complainants knew no such preparation had, as a matter of fact, been made. It was subject to its owner's control; had never left that control; he could have, and should have, protected it, even at the expense of taking it away to a suitable place, and there keeping it until the arrival of the refrigerator car. The law clearly and positively imposed upon him the duty of reducing the resulting loss to the minimum, and though it were negligence on the part of the company to fail to have the car promptly at the station at the advertised time, for which negligence it would be liable to respond to the complainant, yet the complainants might have much reduced the measure of the liability.

Failure to do this is negligence, contributing directly to the loss, and on account of this the complainants have lost whatever right to a recovery they might have had. This is a principle so engrafted upon our law that I suppose I need not quote authorities. The doctrine is thoroughly established in the decisions of our own Supreme Court.

*Fifth.* The respondent was entitled to a reasonable time, after delivery of the property for carriage, before beginning the transportation. What is a reasonable time must depend upon the circumstances of each case. In this respect, also, the burden of proof is upon the complainants. They have not shown, and have not attempted to show, the want of proper and reasonable diligence on the part of the railroad company. If no delay occurred, that by reasonable care could have been averted, the respondent cannot be made liable on this account.

*Sixth.* Entirely aside from these considerations, every principle of fairness and equity, every motive of public policy, every dictate of interest of the people, entitles the respondent to the judgment of the Commissioners. It meant, without charge, to furnish new and extraordinary facilities to an infant industry, in the hope of ultimate advantage to itself in the increase of the business and the prosperity of its patrons. It did all it reasonably could do; all it could be expected to do, to make an unaccustomed service prompt and efficient. It probably succeeded, on the whole, better than could have been anticipated. Occasional failure in a new enterprise, to promptly meet all the minute requirements of the service, was to be expected; it cannot be avoided in an established service, much less when the demands of patrons and the exigencies of the undertaking are unknown. If, for a failure like this, the carrier is to be held liable to respond in damages for a loss which it could neither foresee nor prevent, it will be driven

to abandon all experiment, or to hedge itself about for its own protection, at the loss of the public.

To attach this liability would be to embarrass and obstruct the progress of the times, to thwart well-meant endeavor to promote the interests of this State, and of the carrying trade, and to impose upon the carrier a burden unheard of by the law.

I have purposely abstained from discussing one subject that will occur to every one whose attention may be called to this case, and that is, the jurisdiction over the case of the tribunal whose intervention the complainants have invoked. The respondent in this case is satisfied with the fairness and candor of the Commissioners, and its present purpose is to waive all objections to the competency of the tribunal, and in good faith accept the award. It believes it is entitled to a favorable judgment. It is conscious of having exerted all reasonable diligence, and of taking every reasonable precaution. It believes that the damage complained of in this particular case was caused more by the inattention and carelessness of the complainant, than by any negligence of its own.

Respectfully submitted,

J. W. BLYTHE,

*For the C., B. & Q. R. R. Co., respondents.*

#### DECISION OF THE COMMISSIONERS.

On the 22d day of May, 1882, Messrs. Marshall & Son made the following complaint: That between the fifteenth day of June and the twentieth day of July, 1881, they delivered, in several lots and at different dates, at the depot of the Chicago, Burlington & Quincy Railroad Company at Chariton, 4,382 pounds of creamery butter, for shipment in refrigerator cars, consigned to Roberts, Call & Co., Boston, Massachusetts, in care of the Star Union Line, at Chicago; that this butter reached Boston in a damaged condition, and that it was damaged while in the hands of the C., B. & Q. R. R. Co.; that it sold for from fifteen to twenty cents per pound; that it would have brought from twenty-three to twenty-four cents if it had not been injured; that by reason of improper usage it shrank 123 pounds in weight.

They submit the following bill as their losses:

|                                                 |                 |
|-------------------------------------------------|-----------------|
| On return of sales 1,712 pounds at 3 cents..... | \$ 51.36        |
| On return of sales 1,898 pounds at 8 cents..... | 161.84          |
| On return of sales 650 pounds at 5 cents.....   | 32.50           |
| Shrinkage in weight 123 pounds at 23 cents..... | 28.29           |
| Total loss to them.....                         | <u>\$273.99</u> |

This amount they claim the company should pay them.

A copy of the complaint was forwarded to T. J. Potter, general manager of the road. His reply, dated May 27, 1882, states that he "does not think "this a just claim, or that they ought to pay any portion of it."

"It is true that the company advertised to run a refrigerator car on certain trains on the Iowa division, but because they failed to connect sometimes is not a good reason for the claim." He also charges contributory negligence on the part of Marshall & Son in putting their butter into a hot freight house and not looking after it; states that it was hauled through the streets of Chicago with the thermometer at ninety degrees; that it remained

in the C., B. & Q. freight house in Chicago after being unloaded before being called for, although the Star Union Line was always notified by telegraph of its arrival; that his company holds teamsters' receipts for the butter in good order. He admits that there was some delay in the arrival of trains at Chariton, but that his company is not responsible for delays that could not well be prevented.

On Tuesday, September 18, Mr. Blythe, attorney for the company, submits an argument covering the positions taken by Mr. Potter, and claims that the printed circular issued by the company did not amount to a contract to have their refrigerator car promptly at the stations. He also intimates that the Commissioners have no jurisdiction over the case, but decides to waive all objections to the competency of the tribunal.

The Commissioners having furnished the parties copies of all the papers in the case, notified them that they would take any testimony offered at Chariton on the 28th day of June, 1892. Messrs. Marshall & Son appeared for themselves before the Commissioners. Messrs. Davenport and Moore, one a division freight agent, and the other a lost freight agent, as the Board understands, appeared for the company.

There seems to be no conflict with regard to the testimony; the railroad company "does not regard the controversy as to the facts as being material "in the case."

Briefly stated, the testimony is that Messrs. Marshall & Son had been running a creamery for three years, shipping their butter mainly to Boston, some of it to Denver. Their butter, when shipped through without injuring, has uniformly brought the highest market price. Their butter, shipped before June 15th, brought the full market rate. The shipments of butter on which they claim damages, were in good condition, and good packages, and from the time of manufacture until loaded for delivery to the railroad company, were in a refrigerator room, the temperature kept low with ice. This room has always kept butter without injury. The distance of the creamery from the railroad depot was three-quarters of a mile. The time consumed in delivering the butter, about fifteen minutes; it was protected from the sun by a canvas cover thrown over the tubs. The butter was in good condition when delivered at the depot. The practice of Marshall & Son was to go and inquire if the train to which the refrigerator car was attached was on time, and give instructions for billing it before sending their butter to the depot, and on none of the occasions complained of would they have sent their butter when they did, could they have ascertained that the refrigerator car was delayed, and would have hauled it back to their refrigerator room, if they could have found out from the agent how much the car was behind time, if it was. They made every effort to do so, in order that they might protect their property.

The shipments on which damages are claimed are as follows:

|                    | Number<br>tubs. | Gross weight,<br>pounds. | Net weight,<br>pounds. |
|--------------------|-----------------|--------------------------|------------------------|
| June 15, 1881..... | 14              | 760                      | 662                    |
| June 22, 1881..... | 21              | 1,128                    | 981                    |
| June 29, 1881..... | 23              | 1,234                    | 1,073                  |
| July 18, 1881..... | 24              | 1,244                    | 1,076                  |
| July 20, 1881..... | 15              | 793                      | 688                    |
| Total....          | 97              | 5,159                    | 4,480                  |

The usual allowance for soakage is one pound to the tub, or ninety-seven pounds, which leaves net weight of butter delivered at the Chariton depot, 4,383 pounds. They claim the loss of one hundred and twenty-three pounds by leakage while melted. Deducted, this leaves 4,260 pounds, on which they claim a loss, and one hundred and twenty-three pounds total loss. The butter was consigned to Roberts, Call & Co., Boston, in care of Star Union Line, Chicago. A copy of a printed circular for 1882 was introduced (and admitted by Mr. Davenport to be similar to the one issued for 1881), from which the following extract is made: "General freight order 882, C., B. & Q. R. R. Co. General Freight Office, refrigerator cars, Chicago, May 25, 1882. Commencing May 30, this company will run refrigerator cars, iced and otherwise appointed, exclusively for the transportation of butter, eggs, and cheese for the Chicago market, as follows:" Here the time of the arrival of the train at all stations is noted, and the time for the arrival in Chicago. "All consignments for delivery to connecting lines in Chicago will be immediately transferred on arrival. City parties will be promptly notified. Agents are requested to give particular notice to dealers of this arrangement for through iced refrigerator cars.

"E. P. RIPLEY,  
"General Freight Agent, Chicago."

The testimony fixes the injury to the twenty-three tubs shipped on the 29th day of June to be as follows: The train did not reach Chariton until 4 P. M., or four hours late; the butter was in the depot all this time. This lot reached Chicago on Saturday, July 3d, too late for delivery; lay in the Chicago depot on Sunday, the 4th, and Monday, the 5th, the latter being a holiday, and was delivered to the Star Union Line on the 6th. Had the train been on time it would have been delivered on the 3d. The lot of twenty-four tubs, left for shipment July 13, was delayed in the depot at Chariton until 9 A. M. of the 14th, a delay of twenty-one hours. Several of these tubs had been upset and the melted butter had run out on the floor. There is no evidence of injury to the butter at Chariton of the shipments of June 15th, June 22d, or July 20th. They were receipted for by the Star Union Line at Chicago in bad condition. The shipment receipted for in good condition by that line we understand was not included in the bill rendered.

This case has had very full consideration from the Board, as on the rail-

way transportation of dairy products depends the success of a growing interest, and probably in the future one of the most important of the State. The railroad companies have introduced this method of transportation for the purpose of developing this industry. This service on their part deserves commendation; to be valuable it must be prompt. The growing dairy interest and the natural adaptation of Iowa to the successful production of butter, made the refrigerator car a necessity. Before its advent the butter manufactured and sold for shipment, for four months of the year, brought a very low price. The establishment of the creamery made new demands upon the railroads. The exigencies of the case required the extension of the cold storage room from the creamery to the market. To meet this demand the refrigerator car lines were extended into Iowa.

Having stimulated the growth of this interest, it would seem to be the duty and the policy of the railroad companies to make this service reliable. It is true that it is not always possible to have this train on time, but it certainly is in the power of the company to notify the shipper, when he asks information, that the train is delayed, and how long. If this contingency is to happen often, some arrangement might be made by which the shipper could protect it after being brought to the depot. It is certainly bad policy, after establishing and running these cars, which must be expensive, to leave the value of an article as sensitive to heat as butter, to be determined by the chances of a freight train being delayed.

The first defense, "It is true they advertise to run a refrigerator car on certain trains, but because they failed to connect is no reason for the claim." It is clear that the shipper did all in his power to take care of his property; he delivered it at the hour advertised, inquired if train was on time, had his shipping bills made out, and left his butter in the custody of the servants of the railroad company. He had a right to expect the train to be on time, for the company had the means of knowing at all times the exact situation of these trains, and the agent could and should have been informed. Mr. Blythe, in his argument, says: "that if the railroad company had contracted with Marshall & Son to undertake the carriage of their goods at a particular time, the failure to have their refrigerator cars promptly at the station would entitle them to recover." He admits the original contract of the carrier to transport and deliver safely. In our view, the circular adds another obligation to it. The company practically say that if Marshall & Son will bring their butter to the depot at 12 o'clock on a particular day of the week, that they will have a refrigerator car there, properly iced, to carry their butter to the consignee safely, and, so far as temperature is concerned, in good condition, for the sum of 75 cents per 100 pounds. They accept the proposition, and deliver the butter. They do more than this. They endeavored to ascertain whether there is any possibility of the company's failing to perform their part of the contract. It is true that the company received no greater compensation for the butter carried in these cars than in the ordinary car. This is, however, no reason for

neglecting it. The railroad company fixed its own rates. The presumption is that they were satisfactory. They had a right to fix them at such rates as would furnish a reasonable remuneration for the service rendered; if they were not, it is no fault of the shipper, and no reason why his butter should be allowed to depreciate while in the custody of the company if in their power to prevent.

The second defense is that the butter was hauled through the streets of Chicago with the mercury at ninety degrees. This statement is probably intended as a reply, and is met by a report of the Weather Bureau, by Mr. Chandler, which, though not sworn to, is, we presume, correct: Weather: July 5, seventy to ninety-two degrees; July 6, sixty-six to eighty-three degrees; July 16, seventy-one to eighty-four degrees; July 18, seventy-seven to sixty-one degrees; July 23, seventy-seven to seventy-six degrees; July 29, seventy-nine to sixty-three degrees. These figures were furnished the company, and their correctness was not disputed.

The third defense, that one lot remained in the C., B. & Q. freight house in Chicago, after being unloaded, from Saturday until Tuesday. This we think is disposed of by the fact that the consignee could not get it, the train being behind time, so that it could not be delivered on Saturday. The carrier of perishable property will not be relieved of responsibility if he carries it safely over his line, and then places it in a situation where it must suffer loss, unless the consignee was properly notified and could have cared for it.

The railroad company held the Chicago teamsters' receipts for the freight in good condition. What the value of these receipts is we are unable to ascertain, but it is certain, in two instances at least, the butter had been melted before it was loaded on their wagons, and the fact that all of them were receipted for by the Star Union Line in bad condition, negatives the hypothesis that they were injured in being hauled in covered wagons from the C., B. & Q. depot, on days that the weather reports do not make very warm. The teamster's receipt is probably regarded by all parties as a receipt of the number of packages and their identity, not their condition. We think that general freight order 882 is a sufficient notice to the public that their butter will be properly cared for and delivered in accordance with its terms, and that the agent has duties to perform in connection with it. It is hardly necessary to define the relation of the station agent to the public, but in the case in question we regard him as the representative of the company; that it is his duty to do all things necessary to the carrying out of the purpose for which this line of refrigerator cars was placed on the road. He is held out to the public as the representative of the company. The public deal entirely with him, and rarely, if ever, come in contact with other officers. Whatever he may do, or fail to do, is the action of the company, and they are as fully responsible as if it was the action of Mr. Ripley, who signs general freight order number 882.

The duty of the station agent is to give the public, doing business with his company, all the information it may require; and much of the ill-feeling towards railroads in communities arises from the indifference of station

agents. An intimation of this was thrown out in the testimony taken in this case. The transportation merchant owes to his customers the same courtesies and civilities that the merchant of any other commodity owes to his.

We understand that it is a principle of law, sustained by the uniform decisions of the Iowa courts, that in all cases of loss or injury to property entrusted to the common carrier for transportation, the burden of proof is on him to show that the loss was occasioned by unavoidable causes; proof of the delivery of the goods to the carrier and their loss or injury make out a *prima facie* case, that the carrier is held to the strictest liability; that the care he is bound to exercise is measured by the susceptibility of the property to injury, and that the carrier having furnished special appliances for its care and protection, is bound to use them.

The railroad company refers to the following authorities:

Hutchinson on Carriers, section 328, from which we quote: "This duty to deliver within a reasonable time is one engrafted by the law upon the original contract, which is to carry safely. If by unreasonable delay the goods have deteriorated, or their market value has fallen, he may be held liable for damages."

Second reference—Delaware reports, volume 3, pages 176 and 123: "The care and diligence required is to be measured in a great degree by the character of the goods they are transporting, and their liability may be greater or less according to the condition of the property when received by them."

"This obligation is imposed upon them as a public duty, and by their undertaking to carry safely, as far as human care and foresight will permit."

In the case of *Wolf v. American Express Co.*, 43 Missouri, page 431, the court held that "the carrier must not only exercise diligence, but he must use that degree of attention and care which the occasion and the subject committed to his trust demand. What would be sufficient care in ponderous articles not liable to be deteriorated by exposure, might be the most palpable neglect in case of costly or perishable goods. If in consequence of his negligence or defective means a loss occurs, springing out of the agencies which the violence of nature causes, he will not be excused."

The same principle is enunciated by the court in the case of *Vail v. Pacific Railroad*, Missouri Reports 63, page 230.

In the case of *Wing v. The New York & Erie Railroad Co.*, Hilton's New York Reports, page 243, the court says: "The fact that the potatoes were perishable, imposed upon the railway company more than ordinary care and diligence as mere bailees and the obligation to deposit them most securely against cold. The intensity of the cold created also the obligation of additional vigilance. What was usual was not the consideration. What was necessary to be done under all the circumstances was the true criterion."

## MEASURE OF DAMAGES.

The general rule seems to be that the measure of damages is the difference between the market value of the goods, as delivered, and what their value would have been had they not been damaged in the course of transportation.

Marshall & Son's claim is based on the difference between the rates that creamery butter sold at in Boston at the dates these consignments reached there and the amount they received for the damaged butter.

The opinion of the Commissioners is that the Chicago, Burlington & Quincy Railroad Company should pay Marshall & Son the sum of two hundred and seventy-three dollars and ninety-nine cents, as claimed.

*Des Moines, Iowa, September 21, 1882.*

On the 23d of September a copy of the decision was sent T. J. Potter, general manager C., B. & Q. R. R., and the receipt acknowledged by him on the 27th, and on the 27th of September a copy was sent Messrs. Marshall & Son, who replied on the 29th, as follows:

*To the Hon. Board of R. R. Commissioners:*

GENTLEMEN—Yours of the 27th inst. giving us official notice of your decision in our case for damages against the Chicago, Burlington & Quincy Railroad Company is at hand. Please accept our thanks for the prompt manner in which you have conducted this case. We thank you for your decision in behalf of the great dairy interests of Iowa and the West.

*First.* Because we believe it just and wise, fully in accord with the law and the evidence in this case.

*Second.* Because it protects the dairy interest of Iowa, which will, in a very short time, equal any other agricultural industry in exportable value in the State. The dairymen of Iowa are using every possible means to make butter equal to any to be made anywhere on earth. They have the cows, grass, and water; the climate is favorable; they have erected establishments, and supplied them with suitable appliances for making the best. They are careful to use clean, sweet packages; and while under their care to keep them in a cool, sweet refrigerator, free from all manner of taint, and to deliver them to the care of the transportation company in the best possible condition. This is as far as they can go with it. If the agents of the transportation company allow the butter to melt in the depot before loading, or if the car is not sufficiently iced, or if the refrigerator car is contaminated with the stench of rotten eggs, tainted meat, decaying poultry, rotting vegetables, or from any other noxious smell, then all previous care and carefulness on the part of the dairyman is a failure. But on the other hand if the butter is properly handled and cared for by the transportation company, the butter will arrive at its destination in equally as good condition as the day it was churned.

The transportation companies have provided palace cars for the accommodation of the public, and are entitled to great credit for the ample provision that they have provided for the comfort of the traveling public. It seems that the transportation companies, in many instances, have not given that attention to the dairy interest that it demands at their hands. If increased facilities demand an increase of cost of transportation, then let us have the increase cost, but let us have the very best possible facilities, both as to care of the butter and in speed of transportation, and dairymen will pay the increase of cost. The butter dealers in the cities are amply provided with cold storage. On the arrival of the butter it is immediately transferred to a refrigerator where it remains until disposed of. But all of the nice work of the dairyman or carefulness of the commission man may

be lost, by a few hours of negligence on the part of the transportation company. Butter once melted or tainted, is ever afterward ruined as a palatable article of food.

Very truly yours,

MARSHALL & SON.

CHICAGO, ILL., October 4, 1882.

E. G. MORGAN, Esq., *Secretary Railroad Commissioners, Des Moines, Iowa*:

DEAR SIR—Once more referring to claim of Marshall & Son for damage to butter, I desire to call your attention to discrepancy in bill as presented now, and as originally presented; viz.,

ORIGINAL BILL.

|                                                             |               |
|-------------------------------------------------------------|---------------|
| 1712 lbs. butter shipped June 15, 22 and 29, at 3 cts.....  | \$ 51.36      |
| 1898 lbs. butter shipped June 29 and July 13, at 8 cts..... | 151.84        |
| 650 lbs. butter shipped July 20, at 5 cts.....              | 32.50         |
| Melting and slopping out of tubs.....                       | 4.00          |
|                                                             | ————\$ 239.70 |

AMENDED BILL.

|                                               |               |
|-----------------------------------------------|---------------|
| 1712 lbs., at 3 cts.....                      | \$ 51.36      |
| 1898 lbs., at 8 cts.....                      | 161.84        |
| 650 lbs., at 5 cts.....                       | 32.50         |
| Shrinkage in weight, 123 lbs., at 23 cts..... | 28.29         |
|                                               | ————\$ 273.99 |

Thus showing an error in extension of second item of \$10.00, and increase in last item of \$24.29. In consideration of the foregoing, we desire to know if, in your opinion, we should pay the original bill, or the one rendered by you.

Yours truly,

E. P. RIPLEY, *General Freight Agent.*

DES MOINES, IOWA, October 9, 1882.

E. P. RIPLEY, Esq., *G. F. A. C., B., & Q. R. R. Co., Chicago, Ill.*:

DEAR SIR—Your favor of the 4th instant in relation to the claim of Messrs. Marshall & Son is at hand, and I am instructed by the Commissioners to answer you as follows:

The original bill filed by Messrs. Marshall & Son with the Board was for \$273.99. A copy of this bill was sent you, and your answer as understood by the Board was to the effect that you did not dispute the bill as rendered but to the right of Messrs. Marshall & Son to recover damage for loss occasioned by the delay of your trains.

The Board is of the opinion that the clerical error of \$10 should be corrected, but do not think they should open the case to make a deduction in the item of "shrinkage," which was sworn to by complainants and not denied by your company.

Very respectfully,

E. G. MORGAN, *Secretary.*

The receipt of this was acknowledged October 12, 1882.

CHARITON, IOWA, October 14, 1882.

E. G. MORGAN, *Secretary*:

DEAR SIR—It is now nearly three weeks since the Railroad Commissioners rendered a decision in our case. We have not heard what they propose to do. Have you received any information from the company as to whether they will comply with the decision?

Very truly yours,

MARSHALL & SON.

DES MOINES, IOWA, October 14, 1882.

MESSRS. MARSHALL & SON, *Chariton, Iowa*:

GENTLEMEN—Yours of to-day at hand. The Commissioners understood from the general manager of the C., B. & Q. R. R. that his company would settle with you at once. But since then Mr. Ripley, general freight agent, has written them pointing out an error in your bill of June 29th and July 13th of \$10 (which the Commissioners find is an error in multiplication of \$10); also calling their attention to the difference in your last item. As rendered to him it was \$4; as sent the Board, \$28.29.

The Board instructed me to reply "that in their opinion the clerical error "of \$10 should be corrected, but they did not think they should open the "case to make a deduction in the item of shrinkage."

I have no doubt but what you will hear from the company soon.

Very respectfully,

E. G. MORGAN, *Secretary*.

CHARITON, IOWA, October 17, 1882.

E. G. MORGAN, *Secretary*:

DEAR SIR—Yours of the 14th instant at hand and contents noted. The Commissioners did right in correcting the error in multiplication of \$10. We were not aware of the error until we received your letter. They were also right in not allowing a reduction on charge for loss of weight. The charge as placed in our account before the Commissioners is the correct one. There was an error in the bill sent by our attorney to the company on the loss by shrinkage. But had the company settled by that account, without putting us to further trouble, we would have let it pass. Plaintiffs in Iowa have the right to amend their bills any time before the case is closed.

Very truly yours,

MARSHALL & SON.

CHICAGO, ILL., October 30, 1882.

E. G. MORGAN, *Secretary, Des Moines*:

DEAR SIR—In answer to your letter of October 9th have to say that I have to-day given instructions that the claim of Marshall & Son, of Chariton, Iowa, for loss and damage to butter, be paid in full, in accordance with the recommendations of your Board.

In doing this we do not intend to be understood as in the slightest degree conceding the justice of your decision in this particular case, but believing that in the main your intention is to deal fairly with the railroads as well as with the people, and believing that in the past your decisions have been, as

a rule, just and equitable, we are not disposed to further contest this case, although we have not in the slightest particular changed our opinion in regard to it.

Yours truly,

E. P. RIPLEY.

CHARITON, IOWA, November 21, 1882.

E. G. MORGAN, *Secretary*:

DEAR SIR—We are happy to be able to inform you that we received to-day from the Chicago, Burlington & Quincy Railroad Company a check for two hundred and sixty-three dollars and ninety-nine cents, in full for amount of damages awarded us by the Railroad Commissioners. This closes the case to our entire satisfaction. We again thank the Board of Commissioners for the happy termination of this case.

Very truly yours,

MARSHALL & SON.

MILES H. LUTHER, SWEDE POINT, IOWA, *Complainant*,

vs.

ILLINOIS CENTRAL, AND CHICAGO, BURLINGTON & QUINCY RAILROADS, *Respondents*.

} *Lost goods.*

Filed, May 23, 1882.

SWEDE POINT, IOWA, May 23, 1882.

*To the Railroad Commissioners of Iowa:*

GENTLEMEN—Last November I shipped from Springfield, Illinois, on the Illinois Central to Beardstown, and then *via* the Chicago, Burlington & Quincy Railroad to Des Moines, Iowa, one cook stove worth \$25, and have not received the stove or heard from it. I paid the freight in advance, and have been trying ever since to get some track of where the stove had gone to, or pay for it, but so far have been unable to find out anything about where my stove is, or get any satisfaction out of the railroad company in any way.

I left my freight bills with the agent of the Northwestern Railroad, at Des Moines, when I went to Des Moines to get my freight and forward it to Sheldahl. The agent of the C., B. & Q., at Des Moines, said he would look my stove up, but since then I cannot get anything out of anyone in regard to it.

I write to you in hopes that you may be able to help me get my stove, or the pay for it, as I am not able to lose it entirely if I can help it. Hoping for an early reply, and that you may be able to help me,

I remain yours truly,

MILES H. LUTHER.

[A copy of Mr. Luther's complaint was sent to General Manager Potter, of the C., B. & Q. Railroad.]

CHICAGO, May 27, 1882.

E. G. MORGAN, *Secretary Railroad Commissioners, Des Moines, Iowa*:

DEAR SIR—Yours of the 25th, calling my attention to complaint of Miles H. Luther, in regard to one stove lost, valued at \$25, is at hand. Our claim department have been tracing for the stove, but as yet have been unable to get any track of it. It evidently has been loaded in wrong car, or some

other irregularity, which has caused it to get lost sight of. In order to settle the matter and have no more delay, I have directed that Mr. Luther's claim for value of stove be paid at once.

Yours truly,

T. J. POTTER

[On May 29th, a copy of the preceding letter of Mr. Potter was sent to Mr. Luther, with request to notify the Board when all was satisfactory. No reply being received from Mr. Luther, another letter was addressed to him on July 19th, asking him if he had been paid for the stove.]

DES MOINES, IOWA, July 24, 1882.

E. G. MORGAN, *Secretary Railroad Commissioners, Des Moines, Iowa:*

DEAR SIR—Your letter of July 19, 1882, to Mr. M. H. Luther, in regard to claim for lost stove. Will say that we paid Mr. Luther for this stove to-day and have his receipt in full settlement. Hence please close this case in your office. The party could not write and gave me your envelope to answer it.

Yours truly,

ALF. WINGATE.

WM. G. HENRY AND NINE OTHERS, EMMETSBURG,  
IOWA, *Complainants,*

vs.

BURLINGTON, CEDAR RAPIDS & NORTHERN  
RAILWAY AND CHICAGO, MILWAUKEE & ST.  
PAUL RAILWAY COMPANIES, *Respondents.*

} *Failure to comply with  
section 1292, Code 1873.*

Filed May 30, 1882.

The petition of complainants asks the Commissioners to see that the provisions of section 1292 of the Code be complied with by the Burlington, Cedar Rapids & Northern and the Chicago, Milwaukee & St. Paul Railways, and that a suitable "Y" or connecting track be built between the two railways.

After a lengthy correspondence between the Commissioners and the railway companies, the "Y" was completed August 11, 1882.

ANDREW DODD, TRAER, IOWA, *Complainant,*

vs.

BURLINGTON, CEDAR RAPIDS & NORTHERN  
RAILWAY COMPANY, *Respondent.*

} *Highway Crossing.*

Filed May 31, 1882.

Complainant asks that the railway crossing three-fourths of a mile west of Traer be examined and caused to be put in passable condition.

The attention of Superintendent Ives was called to the matter, and after some correspondence regarding the crossing it was repaired.

|                                                                                                                                               |                                                                                           |

Filed May 31, 1882.

#### DECISION OF THE COMMISSIONERS.

This complaint was made by Mr. N. Densmore, and is dated Rockwell, Cerro Gordo county, May 18, 1882. This station is twelve miles south of Mason City, on the line of the Central Iowa railway.

The case as stated by Mr. Densmore is as follows: Passengers coming from the east or north on the Chicago, Milwaukee & St. Paul railway lines, desiring to go south on the Central Iowa railway, arrive at the transfer too late for the regular passenger trains going south in the afternoon, the train from the north reaching the junction at 3:40 P. M., that from the east at 3:45 P. M., the Central Iowa train leaving its terminal point, Mason City, at 2:30 P. M.

In the absence of testimony or statement to that effect, the Board suppose that other and more important connections require the starting of this train before the arrival of what would seem to be its natural terminal connections.

There is, however, a freight train leaving for the south at 4:30 P. M., which, under the regulations of the company, is allowed to carry passengers, and would seem to a certain extent to supply the facilities needed. The station at Mason City of the Central railway is a little more than a mile from the crossing—the grade gradually descending until the crossing is reached, when it rises at the rate of fifty-three feet per mile for 1,100 feet, and for about one-half mile continues nearly level, then rises at the rate of fifty-three feet per mile for more than a mile. This freight train, however, does not stop at the transfer for passengers unless specially ordered to do so by the agent, and passengers are compelled, at great inconvenience and expense, to transport themselves and their baggage a mile or more to take the cars on this train. Mr. Densmore asks the Commissioners that this 4:30 P. M. freight train be required to stop at the C., M. & St. P. Ry. crossing for passengers going south.

Mr. Pickering, superintendent, in reply to a copy of Mr. Densmore's letter, gives two reasons why this train should not stop at this place. First, that the train is nearly always heavily loaded, and this depot crossing being in the bottom of a sag, if the train stops there it is difficult and burdensome to start again. Second, that it is not the desire of the company to carry passengers on freight trains, and that furnishing the traveling public two passenger trains a day each way, (which is certainly a liberal provision for a road doing the business this does.) If the road extends further accommodations on freight trains, the public should conform to the regulations of the company.

The regulations dated July 1, 1878, state that freight trains are not run for

the accommodation of passengers, that they will neither start from nor stop for passengers at platforms, and that as a matter of accommodation passengers are allowed to ride, but that baggage will not be checked; that passengers must provide themselves with tickets to ride on these trains, and that the offices will not be kept open for that purpose.

The circular shows clearly that the company desires to make traveling on these trains as little attractive as possible, and regards the passenger traffic of these trains as hazardous and undesirable.

Two considerations enter, the Board believe, into the proper solution of this question: First, that on the arrival of the 3:40 train from the north, which is one of two passenger trains, and the 3:45 train, which the Board understands is the only passenger train from the east, and with the exception of this 4:30 P. M. freight train there is no opportunity for passengers to go south until 5 the next morning, or for a period of thirteen hours or more (this is a hardship on those who may live along the line between Mason City and the points where the other eastern roads connect with the Central), the circumstances would seem to justify the modification of a rule that in its general application might be correct. The other is the crossing of the C., M. & St. P. Ry. The Board understands that there is no law in this State requiring railroads crossing each other at grade to stop before crossing, but believe that custom has made it a law, and that any accident resulting from failure to stop before making such crossing would properly be regarded as negligence, and that the observance of this regulation would be all that is required by the traveling public. In addition to this, all the laws of this State that refer to railroad crossings seem based upon the theory that passengers and freight should be interchanged at these places, and this Board has construed the law on several occasions as authorizing them to require at the crossing comfortable passenger accommodations.

If these stoppages are necessary at the two crossings, it occurs to the Board that arrangements might be made for the accommodation of passengers so that they can take this train.

It is true that a grade of 53 feet to the mile, of 1,100 feet in length, occurs just past the crossing, but it also is true that the cars going south from what is practically the northern terminus of the road are generally empty, and it is possible that quite as heavy a train could be started on this short grade as could be hauled up the long grade farther south.

The traveling public has some rights acquired by the use of the railway, and among them there is none that partakes more of the character of the railway itself than that they are entitled to the privilege of reaching their destination without great delay, certainly without unnecessary delay, and that delays that in other modes of conveyance might not be serious, in railways are.

The Board is of the opinion that under the provisions of section 3, of the Commissioner law, "that a change in the mode of operating its road and "conducting its business, is reasonable and expedient in order to promote "the security, convenience and accommodation of the public," and say to

the Central Iowa Railway Company that this 4:30 P. M. train should be required to stop at the Chicago, Milwaukee & St. Paul crossing for passengers going south.

*Des Moines, Iowa, September 13, 1882.*

| vs.                                                         |                       |
| CHICAGO & NORTHWESTERN RAILWAY COMPANY, <i>Respondent</i> . |                       |

Filed June 5, 1882.

Complainant alleges that he shipped from Zanesville, Ohio, via the Chicago, Rock Island & Pacific Railway, to Weston, Iowa, one bureau, upon which he paid the freight in advance. At Chicago the bureau was transferred to the Chicago & Northwestern Railway Company, who, finding the article wrongly classified, added \$2.26 to the freight to Council Bluffs. This, Mr. Brent objected to paying, and appealed to the Commissioners. They referred the matter to General Manager Hughitt, who had the alleged overcharge refunded, and the case was dismissed.

Filed June 14, 1882.

Complainant avers that while in the employ of the Chicago, Rock Island & Pacific Railway Company, as foreman on section work, in discharge of his duties and through extreme exposure he caught cold, which settled in his eyes, one of them becoming nearly blind, and asks the Board if they have authority to compel the railway company to pay him for the time lost while he was disabled.

The Board replied that there was nothing in the Commissioner law authorizing them to interfere in matters of contract between the management of railroads and their employes.

| J. C. TAYLOR, DES MOINES, IOWA, <i>Complainant</i> ,               | } <i>Discrimination.</i> |
| vs.                                                                |                          |
| CHICAGO, BURLINGTON & QUINCY RAILROAD COMPANY, <i>Respondent</i> . |                          |

Filed June 15, 1882.

Mr. Taylor complains that he is manufacturing and shipping lumber from Swan, a station on the Chicago, Burlington & Quincy Railroad, southeast of

Des Moines. The railroad company charges him \$14.30 for a car of thirteen tons. On the 5th of June he shipped a car of lumber, weighing 32,900 pounds, on which he was charged \$18.09. He complains that the charge is excessive, and has reason to believe that coal is carried in car-lots, twenty tons to the car, for seven dollars. Mr. Taylor says that he is prepared to ship two car loads of lumber per week. When he bought the timber which he is cutting into lumber the rates were ten dollars per car load, but advanced afterward to \$14.30. He says that the Chicago & Northwestern are carrying lumber from Polk City to Des Moines for nine dollars per car, and he thinks ten dollars a full price from Swan, nineteen miles. He avers that the present rate is prohibitory, and if continued will compel him to quit the business. He ships mainly hard wood lumber, but would ship soft wood if freights were reasonable. He owns timber enough at Swan to cut 1,000,000 feet, B. M., and that he must abandon it unless he can get better rates on freight to Des Moines.

#### DECISION OF THE COMMISSIONERS.

The rate charged Mr. Taylor by the Chicago, Burlington & Quincy railroad from Swan Station to Des Moines, a distance of nineteen miles, is five and one-half cents per hundred pounds.

This is a little less than the rate of the schedule as published in the "Granger Tariff," which was supposed to be reasonable.

The company positively deny that they are shipping coal from that station to Des Moines for seven dollars per car load, and claim that lumber is an article that will and should bear a higher rate than coal.

They state that the cars shipped for ten dollars per car were taken before the scales were put in, and when the load was estimated at 20,000 pounds. By referring to the bills left with the Board it will be seen that the rate of five and one-half cents per hundred pounds has been charged.

The Commissioners have no evidence before them to indicate that this rate for the distance is unreasonable, or that a higher rate is charged complainant than others for a similar service.

ALFRED WOOD, TRAER, IOWA, *Complainant*,

vs.

BURLINGTON, CEDAR RAPIDS & NORTHERN, AND THE  
CHICAGO, MILWAUKEE & ST. PAUL RAILWAY  
COMPANIES, *Respondents*.

} *Lost goods.*

Filed, June 16, 1882.

Complainant shipped a box of plants, etc., to Thos. Sterling, Milton, Dakota, on the 4th of April, 1882. On the 16th of June he complained to the Board that the box had not reached its destination.

The Commissioners upon investigation found that the Burlington, Cedar Rapids & Northern Railway, which received the box at Traer, delivered it to the Chicago, Milwaukee & St. Paul Railway at Emmetsburg on the 14th of April, who transported it to Alexandria Station, Dakota, which point it reached April 23d, and the consignee was notified by mail at Milton, but owing to bad roads he did not call for it until May 1st, *forty-seven days* before complainant filed his claim in this office.

| vs.<br>KANSAS CITY, ST. JOSEPH & COUNCIL BLUFFS<br>RAILROAD COMPANY, <i>Respondent.</i> |   |                    |

Filed June 19, 1882.

#### DECISION OF THE COMMISSIONERS.

The complaint of Groneweg & Schoentgen, of Council Bluffs, against the Kansas City, St. Joseph & Council Bluffs Railroad Company is based upon a freight bill, which is as follows:

"HAMBURG, IOWA, June 15, 1882.

"J. J. Hoppner, To K. C., St. J. & C. B. R. R. Co., Dr.

| Date of way-bill, June 15.                                                                                                                                   | No. 195. | No. of car, 464, K. C. |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|------------------------|
| Three barrels of sugar, two cases canned goods, two sacks coffee, six kits fish, one barrel meat; weight 1,625 pounds; rate thirty cents per 100 pounds..... |          | \$4.90                 |
| One box merchandise, one case lye, one dozen measures; weight 150 pounds; rate thirty-six cents.....                                                         |          | .55                    |
| Two baskets; twenty pounds; rate seventy-five cents.....                                                                                                     |          | .15                    |
| Three sacks meat and two boxes blacking; 220 pounds @ thirty-four and one-half cents.....                                                                    |          | .75                    |
| Total.....                                                                                                                                                   |          | \$6.35"                |

The rate per hundred pounds we have calculated, but they are evidently those charged. The "Granger Tariff" for the distance from Council Bluffs to Hamburg, fifty miles, was under the classification adopted for fourth class goods; viz., sugar in barrels, coffee in sacks, fish in kits, meat salted, canned lye, and sacked meats, allowed a charge of thirteen and one-half cents per 100 pounds; on measures, first class, twenty-two and one-half cents; on baskets, double first class, forty-five cents; and on blacking, third class, eighteen cents. On this tariff a class "A" road was allowed to charge ninety per cent of the established rate, or on this bill of goods:

|                                                                       |        |
|-----------------------------------------------------------------------|--------|
| 1,625 pounds fourth class @ thirteen and one-half cents.....          | \$2.19 |
| 150 pounds first class, dry measures, @ twenty-two and one-half cents | .34    |
| 20 pounds baskets, double first class, @ forty-five cents.....        | .09    |
| 220 pounds meat and blacking, third class, @ eighteen cents.....      | .40    |

---

Total.....\$ 3.02

Or deduct ten per cent for class "A" road, same charges as this bill... .30

---

\$ 2.72

The rates from Harlan and Marne, on the Chicago, Rock Island & Pacific railway, on first class, twenty-seven cents; second class, twenty-two cents; third class, seventeen cents; and fourth class, fourteen cents. On this bill of goods at local tariff rates on that road for the same distance as Hamburg:

|                                                                     |         |
|---------------------------------------------------------------------|---------|
| 1,625 pounds of fourth class @ fourteen cents.....                  | \$ 2.27 |
| 150 pounds dry measures, first class, @ twenty-seven cents.....     | .40     |
| 20 pounds baskets, double first class, @ at fifty-four cents.....   | .10     |
| 220 pounds sacked meat and blacking, third class, @ seventeen cents | .59     |

---

Total.....\$ 3.36

The rates on the Chicago, Burlington & Quincy and the Chicago & Northwestern correspond for same distances. The Granger rate would be forty-three per cent of this charge in controversy, and that of the main lines east from Council Bluffs fifty-three per cent.

While it is possible that the rate established by the "Granger Tariff" and classification was too low on short distances for small lots of goods, it seems to the Board that the rates adopted by the Kansas City, St. Joseph & Council Bluffs Railroad are so high as to place an embargo on the wholesale trade of Council Bluffs, or Missouri river points, so far as that road is concerned.

This does not seem to be the true policy of the railway company, or to best serve the interest of the wholesale or retail merchant. The railway is entitled to a reasonable price for the transportation of property, under the provisions of section 12 of the Commissioner law.

The Commissioners would recommend that a rate be fixed by the Kansas City, St. Joseph & Council Bluffs Railroad Company not materially higher than that charged by the three eastern lines referred to for the same service, which, while paying a fair remuneration for the service rendered, would enable the wholesale dealers in Council Bluffs, and other Missouri River points, to continue their business, and would recommend that the difference between the amount charged on this bill and the amount of modified bill be returned to Mr. Hoppner.

*Des Moines, Iowa, August 16, 1882.*

ST. JOSEPH, MISSOURI, October 21, 1882.

E. G. MORGAN, *Secretary Board of Railroad Commissioners, Des Moines, Iowa:*

Referring to the decision of the Commissioners upon the complaint of Groenweg & Schentgen against this company, I am instructed to say that the company, while most earnestly protesting against the decision, will comply with it by refunding to Mr. J. Hoppner the amount which the Commissioners deemed to be excessive. I beg to say in this connection, that I regret exceedingly not having presented to the Commission more fully than I did the whole of the argument, which I think the company has upon its side in this matter.

It is my belief that upon a further hearing, the Commission could not fail to reach the conclusion that the rates charged by the railroad company are fair and reasonable, but this case having been decided, I suppose there is no course left us but to comply; trusting, should another complaint be made, of our ability to convince the Commission that we are right.

Yours truly,

J. F. BARNARD, *Gen'l Supt.*

|                                                                       | <hr/>   |
|                                                                       | \$ 1.36 |

To replace one broken by carelessness in transit, stove being crated to prevent breakage.

PELLA, IOWA, June 16, 1882.

I hereby certify that the bill for damages hereto attached is true and correct in every particular.

[Signed]

H. F. BOUSQUET.

[On the twentieth of June, a copy of the complaint and bill were sent

Hugh Riddle, President of the Chicago, Rock Island & Pacific Railway Company, to which he replied as follows:]

CHICAGO, ILLINOIS, July 10, 1882.

E. G. MORGAN, Esq., *Secretary Board of Railroad Commissioners of Iowa* :

DEAR SIR—Referring to yours of June 20th, covering a claim of \$1.36 by H. F. Bousquet, of Pella, on account of parts of a gasoline stove broken (or alleged to be) in transportation, I enclose herewith letter of John Given, Superintendent, embodying the information he was able to collect at Pella.

The stoves were shipped by a firm in Chicago who have signed a release exempting the company from claims for loss by breakage in consideration of the lower rates given, and their customers have the benefit of these lower rates. In the classifications furnished by the Illinois Railroad Commissioners, stoves and stove furniture at company's risk are placed in the 1½ (one and a half, first-class); when released, in third class. The party in question had the lower rates, and paid less than half of what he would have been charged had the goods been shipped at the rate authorized when not released.

The agent at Pella states that there was no appearance of breakage when the goods were delivered, but were receipted for as in good order, and no evidence to sustain the charge that the company or their employees were guilty of gross negligence.

Mr. Bousquet did not make any claim of the company's agent, before appealing to the Railroad Commissioners. Courtesy would seem to require that a claimant, *who knew he had a just claim*, should at least present it before resorting to the court.

Awaiting the decision of the Board,

I remain respectfully,

HUGH RIDDLE, *President*.

KEOKUK, IOWA, July 5, 1882.

HUGH RIDDLE, Esq., *President*:

DEAR SIR—Yours 23d ultimo—I find that the stove was shipped from Chicago by C. S. & Co., "released" and "at owner's risk," and freight charged third class, 58 cents per hundred. Whereas, had it been at the company's risk freight would have been \$1.24½ per hundred.

The stove was *crated* and no damage noticed at time of delivery, either by our men or Mr Bousquet's drayman. If any existed it was concealed by the crate, or else it occurred after it left Pella station while being hauled to Mr. Bousquet's store. We hold receipt in *good order*, which I enclose.

There is no evidence of rough handling at Pella station; and I am of the opinion that the stove—being a gasoline one—the castings were very light and *too thin and fragile* to bear even ordinary transportation.

There was no claim made on agent at Pella, and he never heard of the alleged damage until a few days before these papers were sent him for explanation.

I presume "release" for the stove is on file at Chicago station. It is an unusual thing for parties who ship their freight "at their own risk, released," in order to get the benefit of low rates, to afterwards make such claims as this; they know quite well that all such released goods are handled just as carefully as those carried at risk of the company.

Very truly,

JOHN GIVEN, *Div. Supt.*

#### DECISION OF THE COMMISSIONERS.

H. F. Bousquet resides at Pella, Iowa. On June 9, 1882, he received from Cribben, Sexton & Co., of Chicago, Ill., a gasoline stove, *via* the Chicago,

Rock Island & Pacific Railway, which he claims was damaged in transit. J. M. Cox was station agent at Pella, and had in his employ Thos. J. Leiter, as drayman, who delivered goods to consignees.

The railway company was released from liability when they accepted the goods in Chicago, and consequently gave reduced rates.

This Board held in the case of *Sam'l A. Ayres & Co. vs. The Chicago Rock Island & Pacific Railway Company*, that railroad companies are answerable "for ordinary care."

J. M. Cox testifies that the stove was packed in brown paper, then crated with only half-inch slats at corners, and does not consider this way of packing substantial, and does not think the crating would stand ordinary usage in a freight train. He further testifies that the casting broken was too light to be shipped "set up."

Thos. J. Leiter testifies that he remembers hauling gasoline stove for Mr. Bousquet; that the nails in the ends of the boards forming the crate were drawn out; that the crate could be pulled apart with his hands.

The board are of the opinion from the evidence presented that the gasoline stove in question was not properly crated; that the risk of damage that ordinary care would not prevent was taken by the shipper; that ordinary care would not have prevented breakage, and that the Chicago, Rock Island & Pacific Railway Company is not liable for damage as claimed.

*Des Moines, Iowa, December 20, 1882.*

E. S. KENDALL, KELLERTON, IOWA, *Complainant*,

vs.

CHICAGO & NORTHWESTERN RAILWAY COMPANY, *Respondent*.

} *Lost goods.*

Filed, June 30, 1882.

Complainant shipped from Ogden, on June 3, 1882, his household goods, consisting of boxes, sewing machine, bureaus, etc., to Kellerton, Iowa, *via* Council Bluffs, over the C. & N. W. R'y. Not having heard from them, on June the 28th, he asked the Board to hunt them up. To a communication from the Commissioners General Manager Hughitt replied that the goods were delivered to the transfer company at Council Bluffs, June 6th. A card from Mr. Kendall, stating he had received his goods, was received July 5th, and the case dismissed.

S. M. HEWETT, HAMBURG, IOWA, *Complainant*,  
 vs.  
 KANSAS CITY, ST. JOSEPH & COUNCIL BLUFFS  
 RAILROAD, SIOUX CITY & PACIFIC RAILROAD,  
 CHICAGO, AND ST. PAUL, MINNEAPOLIS &  
 OMAHA RAILWAY COMPANIES, *Respondents*. } *Overcharge.*

Filed, July 24, 1882.

#### DECISION OF THE COMMISSIONERS.

Mr. Hewett complains that he was charged, and was compelled to pay, \$59.25 for freight on a bill of castings from Hamburg to Sioux Falls. The weight of the castings on the bills of lading was different—on two of them 4,140 pounds, on the other 4,330. He regards the entire amount as exorbitant, but specially so the charges between Hamburg and Sioux City, amounting to \$37.80.

The charges for transportation were as follows: Kansas City, St. Joseph & Council Bluffs Railroad, from Hamburg to Council Bluffs, 50 miles, weight 4,140 pounds at 36 cents per 100 pounds, \$14.90. It was probably drayed from the depot of the Kansas City road to that of the Chicago & Northwestern Railway, as the charges advanced by the Sioux City & Pacific Railroad Company were \$16.90, or two dollars more than those received by the former company; this would make the drayage one dollar per ton.

The freight charged by the Sioux City & Pacific Railroad Company, which it seems from the way-bill had control of it from Council Bluffs to Missouri Valley, as well as from there to Sioux City, was for ninety-seven miles, 4,140 pounds at 50 cents per 100, \$20.70.

The freight charged by the Chicago, St. Paul, Minneapolis & Omaha Railway Company for 155 miles was 4,330 pounds at 50 cents per 100, \$21.65.

The castings seem to have been weighed by this company, and are charged for 190 pounds more weight than on the other roads.

|                                                                          |          |
|--------------------------------------------------------------------------|----------|
| The K. C., St. J. & C. B. R. R., 50 miles, 4,140 pounds, at 36 cents.... | \$ 14.90 |
| Drayage between depots at Council Bluffs.....                            | 2.00     |
| S. C. & P. R. R., 97 miles, 4,140 pounds, at 50 cents.....               | 20.70    |
| C., St. P., M. & O. R'y, 155 miles, 4,330 pounds, at 50 cents.....       | 21.65    |
| Total.....                                                               | \$ 59.25 |

Under the classification made by the "Granger law," iron castings, light and loose, were rated as first-class freight, and upon the rates allowed by it the freight on this lot would be

|                                 |          |
|---------------------------------|----------|
| K. C., St. J. & C. B. R. R..... | \$ 11.17 |
| Drayage.....                    | 2.00     |
| S. C. & P. R. R.....            | 18.50    |
| C., St. P., M. & O. R'y.....    | 24.55    |
| Total ..                        | \$ 56.22 |

Deducting this from the rates charged, we have an excess of \$3.03. This is greater than would have been charged over a continuous line for the same distance, as the short haul, the handling and transferring on three distinct and separate lines of road add materially to the cost of carriage. There is not now, and probably never will be, any large interchange of business between these lines, as they are parts of systems that are competitors. The amount allowed by the "Granger Tariff" on this lot of freight for the distance, 302 miles of continuous haul on one line, would be \$47.16.

Considering the number of carriers through whose hands the castings passed, and in view of the fact that the rates are the published tariff for the distances on each line, the Commissioners are of the opinion that this is not a case that calls for their interference.

*Des Moines, Iowa, February 10, 1882.*

Filed August 1, 1882.

C. W. Robison and M. H. Moore, both wholesale lumber dealers at Dubuque, called the attention of the Commissioners to the fact that there is no connecting track, or "Y", at Webster City, by which cars could be transferred from the Illinois Central Railroad to the Chicago & Northwestern Railway. The general managers of the connecting roads were notified and the "Y" put in.

Filed, August 4, 1882.

RANDOLPH, IOWA, August 1, 1882.

*Board of Railroad Commissioners, Des Moines, Iowa:*

GENTLEMEN—Within the last five weeks we have shipped four cars brick from Riverton to this point. Tariff rate is nine cents per one hundred pounds, which was \$27.00 per car of 30,000 pounds.

Previous to shipping them we endeavored to obtain a rate of lower price on them, but obtaining no reply we were compelled to ship them at tariff rates. Meanwhile, Mr. J. Johnson, of this place, receives special rate of twenty dollars per car on brick to be used in building an engine house to an elevator already constructed four years. Engine house being rebuilt to *cheapen insurance*.

The railroad company's reply to our complaint of discrimination enclosed. We fail to see how the \$20.00 rate (special) is "in the light of *public convenience*."

We claim we were overcharged on four cars (at \$7.00), \$28.00, and refer it to your honorable body for consideration.

Respectfully,

SPENCER BROS.

#### DECISION OF THE COMMISSIONERS.

The complainants, Messrs. Spencer Bros., of Randolph, Iowa, shipped over the Chicago, Burlington & Quincy railroad four cars of brick from Riverton to Randolph. The cars contained thirty thousand pounds each, and complainants were charged nine cents per cwt., or twenty-seven dollars per car, the usual tariff rate, the brick to be used in a store building. Spencer Bros. asked a reduced rate, because Mr. Isaac Johnson, of Randolph, was conceded a lower rate of twenty dollars per car on brick to be used in building an engine house to an elevator on the company's grounds. The Commissioner law reads:

"No railroad corporation shall charge, demand, or receive from any person, company, or corporation, for the transportation of persons or property, or for any other service, a greater sum than it shall at the same time charge, demand, or receive from any other person, company or corporation for a like service, from the same place, or upon like conditions and under similar circumstances; and all concessions of rates, drawbacks and contracts for special rates shall be open to and allowed all persons, companies and corporations alike, at the same rate per ton per mile by car load, upon like conditions and under similar circumstances." \* \* \*

The railroad company evidently considered an elevator different from a private building, and on that account made the special rates. The law quoted above recognizes special rates, and the question for the Board to settle is whether the distinction is justifiable.

The local business of the railroads requires elevators, and the convenience of the people requires elevators, the erection of which might justify special rates from the companies, completing the railroad as a transporting power.

This case was one where an addition was built to an elevator, to be used as an engine house. It is reasonable to suppose that the additional safety to the elevator, and consequently to railroad property and business convenience, justified the company in making the special rate. It is customary for companies to give rates to public enterprises, and to enterprises in which they are partially interested, such as on materials to make roads to reach their stations, materials to construct factories, and material worked up in them, and product from them.

Both shippers are private individuals, but the use to which they applied the brick is different as regards their relations to the public. The railroad companies generally see to it that elevators are built, that the particular station may get its share of business. The store-keeper is assured more trade after the elevator is built, and further assured of its safe continuance by every safeguard that can be added to it. Elevators are often built by public enterprise to assure general convenience, the railroad company hauling the material, usually, at reduced rates.

The Commissioners think that there is a clear distinction in this case that justifies discrimination contemplated by the law-maker. One elevator man should have the same rate as another for car load lots, and one citizen the same rate as another for the same amount of goods of the same class under like conditions and circumstances.

As the Board interprets the law the same amount of the same class of goods should be carried the same distance for the same price, unless in exceptional cases like the one under consideration, and whenever a difference is made there should be good reason for it outside of favoritism.

The Commissioners therefore do not find that Spencer Bros. were unjustly discriminated against.

*Des Moines, Iowa, September 12, 1882.*

Filed August 26, 1882.

TOLEDO, IOWA, August 26, 1882.

*To the Honorable Railroad Commissioners of the State of Iowa :*

DEAR SIRS—I present for your consideration and adjustment a matter which it seems I can have settled in no other way. The difficulty took place last March, and since then, and now has become somewhat complicated; therefore, please bear with me, and as best I can I will set the matter before you. About the fifteenth of March, 1882, I purchased of Thos. B. Wales, Jr., of Iowa City, Iowa, the imported thoroughbred Holstein heifer, "Alsie," No. 1631 of Holstein herd-book. "Alsie" was two years old March 3d, and was bred to the imported bull "Roclof," No. 889, Vol. v of

Holstein herd-book. Mr. Wales said the heifer was due to calve some time in April. On March 20th, Mr. Wales shipped the heifer *via* Cedar Rapids; consequently, over the Burlington, Cedar Rapids & Northern and the Chicago & Northwestern Railways. The heifer started from Iowa City at 2:15 P. M., March 20th, at which time Mr. Wales telegraphed to me of her shipment. I did not get the telegram until the 21st, about noon. Had there been no delay the heifer should have been in Toledo the 21st, on the 7 o'clock A. M. freight. Thinking, perhaps, she might have come to Tama City, two miles south of Toledo, and the starting point of the Toledo & Northwestern Railway coming to Toledo, some time during the day of the 21st, I went there at 3 P. M., but she had not yet arrived. Early the morning of the 22d, I again went to the depot at Toledo, and was told that the heifer came on the 9 P. M. freight March 21st. Accordingly I paid charges and the car was then opened, when I found the heifer loose in the car without a sign of feed or bedding of any kind, and a dead and frozen calf at her feet. The heifer was very weak from labor, and lack of food and drink. I had no doubt but what Mr. Wales properly cared for the heifer when he shipped her, and I believed the neglect and abuse came through the Northwestern Railway Company, so I immediately filed claims against the Chicago & Northwestern Railway Company for damages and loss to the amount of \$125, of which the following is a copy:

TOLEDO, IOWA, March 22, 1882.

R. C. RICHARDS, *General Claim Agent for Chicago & Northwestern Railway Company:*

DEAR SIR—Allow me to present through E. B. Arnold, station agent at Toledo, Iowa, claims for loss and damage to the amount of \$125, on thoroughbred Holstein heifer, "Alsie," No. 1631, Holstein herd-book, said loss and damage occasioned through neglect and delay of your railway company during shipment from Cedar Rapids to Toledo. The heifer was with calf, and due to calve in April; was found in car this morning with dead calf at her feet; was not tied, and had neither feed nor bedding of any kind in car. She was shipped in good condition by Thos. B. Wales, Jr., from Iowa City, and left there at 2:15 P. M., as per telegram received, March 21st. Had she been forwarded without delay, and provided with feed and bedding, no damage would have been occasioned. Please give the matter careful attention.

Very truly,

H. H. WITHINGTON, Toledo, Iowa.

About April 20th, the station agent gave me a rope halter to which was tied a tag bearing my address. Agent said he found it in the car in which the heifer was shipped. When I took the heifer from the car I saw no rope, nor did any of the persons whom I had to witness the condition in which the heifer was found. Among those who inspected the car were H. B. Bel-den and S. M. Loomer, of Toledo, and John Hogden, of Gladbrook. I do not doubt but what the rope was found in the car, but none of us saw it at the time, not even the agent. On May 5th, I received from R. C. Richards, General Claim Agent for Northwestern Railway Company, an answer to my claim, of which the following is a copy:

CHICAGO, May 3, 1882.

H. H. WITHINGTON, *Toledo, Iowa:*

DEAR SIR—Replying to your letter of March 22d, presenting claim for damage to heifer, and loss of calf by premature birth, would say that I have investigated the same, and find that when the cow was delivered to us at Cedar Rapids she was in poor condition and apparently sick; that she was placed in car by transfer man, and tied by him; that no bedding was furnished us, and we, therefore, left her in car as received. The car in which she was placed was dispatched by the first train after receipt, and we do not consider there was any delay or neglect on our part in any way, and I must

therefore respectfully decline entertaining any claim for injuries received by cow, or death of calf.

Yours truly,

R. C. RICHARDS, G. C. A

After receiving Mr. Richards' reply, I consulted Messrs. Ebersole & Willett, attorneys, at Toledo, and they gave it as their opinion that the Burlington road, having received the heifer in good condition and abundantly supplied with feed and bedding, it was *their* business to properly make the transfer at the Rapids and deliver her as received. I then sent a claim for loss and damage to the Burlington road, of which the following is a copy:

TOLEDO, IOWA, July 1, 1882.

*Gen'l Claim Agt. for the Burlington, Cedar Rapids & Northern R'y Co:*

□ DEAR SIR—Allow me to present claims for loss and damage to the amount of \$125.00. Said damage done to thoroughbred Holstein heifer "Alsie," No. 1631 of Holstein Herd Book, resulting in premature birth of calf, either during transit over your road from Iowa City to Cedar Rapids, or through gross neglect or carelessness in transfer from your road to the Northwestern, on March 20, 1882. Now, my dear sir, I beg your time for the perusal of a somewhat lengthy explanation, which is necessary to set forth the facts in their true fullness. The heifer is an imported animal, and was purchased of Thos. B. Wales, Jr., of Iowa City, Iowa, and by him was shipped from Iowa City, March 20, 1882, as per telegram, of which the following is a copy:

"IOWA CITY, March 20, 1882.

"Shipped heifer; starts at 2:15, by way of Cedar Rapids.

T. B. WALES, JR."

On March 21st I received the telegram, but the heifer did not arrive until sometime during the night of the 21st, and on opening the car early the morning of the 22d, the heifer was found to be *not tied* and without feed or bedding of any kind, and a dead calf at her feet. She was due to calve in April. The night of the 21st and morning of the 22d were very cold, and going so long without food aided in giving her inflammation of the udder which followed, and from which she has not yet fully recovered. Mr. Wales informs me, and is willing to take oath to the same, that the heifer was shipped in good condition and supplied with feed and bedding sufficient to last for a much longer journey. When the heifer arrived and I saw the condition she was in, and the neglect to which she had been subjected, I at once thought the blame belonged with the Northwestern Company, and I at once entered, complying with the conditions of the company in such cases, claims for loss and damage to the amount of \$125.00, a very moderate estimate of the loss sustained. On May 5th I received an answer to my claim from R. C. Richards, Gen. Claim Agt. for N. W. R'y Co. After receiving Mr. Richards' reply I learned from good counsel that it was the business of the road on which the heifer was first shipped to properly transfer her, and to deliver her in same condition as received. Now, had your company transferred the feed and bedding with the heifer, and properly tied her, the chances would have been in her favor to have made a safe journey and at least have exempted you from neglect. Even if bedding alone had been transferred it would have rendered the car bottom less slippery and consequently lessened the danger of injury. Please give this matter your careful attention. Inclosed you will find my sworn affidavit before E. C. Ebersole, J. P., at Toledo, Iowa, to the truthfulness of the foregoing facts.

Address,

H. H. WITHINGTON,  
Toledo, Tama Co., Iowa.

July 14th, I received the following answer:

CEDAR RAPIDS, July 12, 1882.

Your favor of July 1st.—Would say that we delivered the cow to the agents of the Chicago & Northwestern Railway, at Cedar Rapids, so far as external appearances are concerned, in good order.

Yours,

A. L. MOHLER.

To this I replied as follows.

TOLEDO, July 18, 1882.

A. L. MOHLER, *Cedar Rapids*:

DEAR SIR—Your's of the 12th is at hand, but you fail to deal with the real issue of the case. There is no doubt on the part of any one but what "the external appearances" of the heifer were about as good when you delivered her to the N. W. Co. as they were when you received her a few hours before, for she was properly cared for when you received her at Iowa City. But the point is this: Ought not your company to have transferred feed and bedding? And accident and loss having occurred from neglect to so transfer, is not your company responsible for such loss? You say you "delivered the cow to the agents of the Chicago & Northwestern Railway." No doubt of that; but if I ship stock to you do I not also deliver such stock to the agent of the road at the place from which such shipment is made? But does the fact of my delivering the stock to the agent of the road exempt me from responsibility, if loss and damage occur through my neglect to supply the animal with food and bedding? And it seems to me that your company, being properly furnished with things necessary for the comfort and health of the animal, are equally responsible as the first party would be. Please answer.

Yours truly,

H. H. WITHINGTON.

Then on July 21st comes the following:

CEDAR RAPIDS, IOWA, July 19, 1882.

H. H. WITHINGTON:

DEAR SIR—I am prepared to discuss this matter with you personally. I have nothing further to add than our previous expression. I believe that we were right, and fulfilled our obligation up to and including the time of the delivery of this property to our connecting line.

Yours,

A. L. MOHLER.

To this I replied thus:

TOLEDO, July 25, 1882.

A. L. MOHLER:

DEAR SIR—Yours of the 19th received. From both your first and last letter it seems evident that you intend to evade anything like a complete answer. Should I discuss this matter with you further it will be in a few days, and by proxy. But it seems best that I place this matter in the hands of the Railroad Commissioners, where, no doubt, justice may be reached without further parley.

Very truly,

H. H. WITHINGTON.

Mr. Wales, I believe to be an upright man. He tells me that the heifer was abundantly supplied with feed and bedding, and shipped in good condition; says he shipped one to Michigan at the same time, and more forward with calf than "Alsie," and she went through all right. In regard to the

value of the calf, Mr. Wales says that a calf of the pedigree of the one lost is worth \$175, at six weeks old; and reference to any reliable breeder of Holstein cattle would, I think, confirm his statement. Another item, about which I said nothing to the railway company, was the loss of three inches of the heifer's tail by freezing. There being no bedding in the car, her tail became wet in her litter at time of giving birth to her calf, and the bush was found frozen when I took her from the car. I hoped to save it, but in May the end came off. This may seem a small matter, but any stockman would tell you that a stub tail would damage her for the show ring, for which she is otherwise well adapted. Knowing that this matter will receive your careful consideration I will add nothing further. Further information will be cheerfully given, or questions answered if desired.

Respectfully yours,

H. H. WITHINGTON.

*Toledo, Iowa.*

IOWA CITY, March 24, 1882.

MESSRS. H. H. WITHINGTON & SON, *Toledo, Iowa* :

MY DEAR SIR—I arrived home from the east last evening, and then learned through my son that he had just received your letter of 22d inst., with the sad news of the loss of the calf and the illness of the heifer. He had previously received yours of the day before, enclosing draft for \$305.80. The heifer was placed in the car by my son, and properly fastened, and with plenty of bedding and hay; in fact there was so much brought by my team that I understand there was a question of taking some back, but it was all left, enough for three head, the men say. The run from here to Cedar Rapids is only thirty-two miles, and the train left at 2:15, so it must have reached there before night, and the heifer should have been delivered to the Northwestern at once, which probably was the case. Of course I cannot say, but I judge that the fault was with the Northwestern road, who should have forwarded the stock by first train, and probably neglected to do so, hence the delay you mention. I shall be glad to assist you in all possible ways to recover damages; and if I can do you any real service in the matter, will go to Cedar Rapids at any time you may name. While I was away my son sent a heifer, more forward if anything than yours, to Michigan, and no harm came of the journey. I hope you will inform me how the heifer gets on. I am inclined to think she will come out all right, and the only loss will be that of the calf. If you wish to replace it I will let you have one at reduced price, on account of your loss.

Very truly yours,

THOMAS B. WALES, JR.

The complaint was received on August 26, and a copy sent to C. J. Ives, General Superintendent of the Burlington, Cedar Rapids & Northern Railway, and also to Marvin Hughitt, General Manager of the Chicago & Northwestern Railway. Their replies were as follows:

CEDAR RAPIDS, IOWA, September 11, 1882.

E. G. MORGAN, *Secretary R. R. Commissioners, Des Moines, Iowa* :

DEAR SIR—In reply to yours of 6th, I find on investigation that all the papers in claim of H. H. Withington are now in the hands of Mr. Hughitt, general manager of the Chicago & Northwestern Railway, but am advised by our people that the animal was delivered to that railway company in good condition and so receipted for. In this view of the case the liability, if any, for damages, would be with that company.

Yours truly,

C. J. IVES, *Gen'l Supt.*

CHICAGO & NORTHWESTERN RAILWAY CO., }  
LAW DEPARTMENT, CHICAGO, Sept. 14, 1882. }

*To the Railroad Commissioners of the State of Iowa:*

GENTLEMEN—I have received yours of September 6, stating complaint of H. H. Withington, of Toledo, Iowa. I have caused a careful examination to be made of the matters stated in the complaint, and find the facts to be as follows: On the 20th day of March, 1882, a cow was delivered to the Burlington, Cedar Rapids & Northern Railway at Iowa City by T. B. Wales, Jr., consigned to H. H. Withington, Toledo, Iowa. The cow reached Cedar Rapids and was delivered to this company March 21st at about ten o'clock in the morning by the transfer company at that place. She then appeared to be sick, and was very poor. The agent of the transfer company placed her in a car and tied her there. That car left for Toledo at 1:05 P. M. on the same day, and arrived at Toledo the same night. During the trip the cow gave birth to a calf, which was found dead in the car. No bedding was put in the car for the cow, as none was provided for her use. The cow was taken away precisely as she was delivered to this company by the transfer company. No notice was given to this company that the cow might be expected to calve on the route, nor was any suggestion made that any extra care should be taken of her on that account. It is evident that the cow would have come through properly if it had not been for the fact of the calf's being born that night in the car, concerning a prospect of which nothing was said to this company. I submit that it cannot be reasonably required of this company to take notice of the condition of all the animals delivered to it by the transfer company and provide extra accommodations for such animals as might be expected to need them, since indeed no notice was given this company of the condition of the animal, nor could this company be required to furnish bedding for animals shipped in its cars without its being contracted for by the parties shipping the animals. Second: A release was executed by Mr. Wales, the shipper, releasing the Burlington, Cedar Rapids & Northern railway company and all other lines over which the cow might pass from all damages to her not caused by a collision of the train. No contract was made with this company for the transportation of a calf, or for any care to be taken of a calf. The company transported the cow, as was its duty to do, and no serious damage seems to have been done, and none at all by the fault of this company. I submit that the shipper of an animal in the condition in which this cow was should have taken precautions to have provided proper bedding, and have notified the company of the extra care that might be required for the animal. Of course this company does not keep quantities of bedding on hand, nor is it required by law or custom to furnish bedding for animals transported in its cars. This is the duty of the shipper.

B. C. COOK, *General Solicitor.*

DES MOINES, IOWA, Sept. 19, 1882.

B. C. COOK, Esq., *General Solicitor C. & N. W. R'y, Chicago:*

DEAR SIR—Your letter of September 14 in reply to complaint of H. H. Withington, Toledo, Iowa, is at hand, and in reply I am instructed by the Commissioners to send you an extract from the letter of Mr. Wales, of Iowa City, the shipper of the cow, which is as follows: "The heifer was placed in the car by my son and properly fastened, and with plenty of bedding and hay—in fact there was so much brought by my team that I understand there was a question of taking some back, but it was all left, enough for three head, the men say."

The Commissioners would like to hear from you as to whose duty it was to transfer the bedding, etc.; whether the Burlington, Cedar Rapids &

Northern Railway Company, the transfer company, or the Chicago & Northwestern Railway Company; also the relation of the transfer company to the railway company.

You say: "nor could this company be required to furnish bedding for animals shipped in its cars without its being contracted for by the parties shipping the animals."

Was Mr. Wales in fault? Was it his duty to have sent a man along to take care of the cow, or was it his duty to notify the company of the extra care that might be required for the animal?

Please state the charges for the transportation of this animal as compared with the ordinary charge for shipping cattle.

By order of the Board,

E. G. MORGAN, *Secretary*.

CHICAGO, September 21, 1882.

*To the Board of Railroad Commissioners of the State of Iowa, Des Moines, Iowa:*

GENTLEMEN—The letter of your Secretary, of the 10th, is received. Of course I do not know anything of the circumstances under which the heifer was placed in the car of the B., C. R. & N. R'y Co. I only know that the heifer was brought and tied in our car by the transfer company, and that no bedding was placed there. The transfer company is the same to us as any other shipper. That company is not connected in any way with this company, but is employed sometimes in taking freight from the cars of this company to the cars of others, and is employed by other companies in bringing freight to us. In this latter capacity it is not our agent at all. You ask if Mr. Wales was in fault. I answer that in my opinion that either Mr. Wales or the B., C. R. & N. R'y Co. was in fault. Undoubtedly, as a prudent man, it was the duty of Mr. Wales in shipping the cow just ready to calve, to take such measures as would secure bedding for the cow, and proper care. If he shipped the cow on the B., C. R. & N. R'y Co., without having made any provision for the bedding of the cow being transferred, or without sending a man to look after it, shipping the cow just as other animals are shipped, the universal custom being not to furnish bedding, then he was guilty of the want of proper care, and the fault is his. If he contracted with the B., C. R. & N. R'y Co., stating the condition of the cow to them, to furnish or to transfer bedding, then it was the duty of the B., C. R. & N. R'y Co. to see that the bedding was transferred precisely as it was its duty to see that the cow was transferred itself. I repeat that it cannot be the duty of this company, in my opinion, to have known that that cow would have required bedding, and to have had bedding in readiness and in the car when the cow was shipped, or to have provided bedding without compensation, and without being notified to do so, and without being at all notified that it would be necessary. I do not think that your Board will require us to have stacks of bedding in readiness at every point where we ship cattle, and experts to determine in what cases such bedding is necessary; while I think it would be a proper rule to require us to take extra care of an animal in the condition of this one, where we had been notified that such care would be necessary, and the proper bedding had been provided or contracted for by the shipper.

I am very respectfully your obedient servant,

B. C. COOK, *General Solicitor*.

P. S.—As to rates, we have, and I believe all railroads have, a uniform custom of charging more for the transportation of an animal when shipped alone in a car than for a car load. Our rule is to estimate the weight of a

single head at 2,000 lbs. weight, or a single horse at 2,500 lbs. The charges of this company on this cow were \$5.80 from Cedar Rapids to Toledo. We paid the B., C. R. & N. R'y Co. \$6.05, their charges.

B. C. COOK, G. S.

TOLEDO, IOWA, September 21, 1882.

E. G. MORGAN, *Secretary Board of Railroad Commissioners, Des Moines, Iowa:*

DEAR SIR—Yours of the 19th is at hand. I sent the freight-bill, with the claim for damage, to R. C. Richards, General Claim Agent for the N. W. R'y Co. This was in compliance with the conditions of the bill, in case of trouble between railway company and shipper. By my diary I find the freight on the heifer was \$11.85, and if I remember rightly the charges to Cedar Rapids were \$4.35.

Very truly,

H. H. WITHINGTON.

#### DECISION OF THE COMMISSIONERS.

H. H. Withington resides in Tama county, Iowa. About the 15th of March, 1882, he bought a thoroughbred Holstein heifer from Thomas B. Wales, of Iowa City. The heifer was shipped at 2:15 P. M. on March 20th at Iowa City, *via* the Burlington, Cedar Rapids & Northern Railway and Chicago & Northwestern Railway to Tama City. She reached Cedar Rapids on the 20th, and was delivered by a transfer company to the Chicago & Northwestern at 10 A. M. March 21st, and reached Tama City at 9 P. M. of the same day. The heifer was due to calve in April. R. C. Richards, of the Chicago & Northwestern, says she was in poor condition and apparently sick when received from the Burlington, Cedar Rapids & Northern. When the car was opened on the morning of the 22d at Tama City a calf was found with the heifer, dead and frozen. Mr. Withington complains that the heifer suffered because food and bedding were not transferred from the Burlington, Cedar Rapids & Northern car to the Chicago & Northwestern car. When it was cold enough to freeze a calf bedding was undoubtedly necessary, but the transfer company could not be expected to move that which had been under the heifer in the Burlington, Cedar Rapids & Northern cars, and no bundles were shipped with her for that purpose. The Chicago & Northwestern Company had no notice of the condition of the animal that would have suggested extra care, nor does it appear from the correspondence that the train men of the Burlington, Cedar Rapids & Northern had notification of her liability to need special attention. The heifer would not have suffered for want of food from Cedar Rapids to Tama City.

The trip from Iowa City to Tama City was made reasonably fast, and we fail to find negligence on the part of either company. The heifer required expert personal attention during the journey, and if Mr. Withington was not aware of the time of pregnancy of the heifer, Mr. Wales risked her life in shipping her under such circumstances. Correspondence shows that cows have been shipped safely alone in similar condition, but it is well established among stockmen that excitement, such as transportation by rail,

will often cause mishaps. The Board, therefore, are of the opinion that the negligence of the shipper was the cause of the loss, and the railway companies are not liable for damages.

*Des Moines, Iowa, December 19, 1882.*

TOLEDO, IOWA, December 22, 1882.

*Railroad Commissioners, Des Moines, Iowa :*

GENTLEMEN—A copy of your decision on my claim for damages of C. & N. W. and B., C. R. & N. R'y Cos. is received. I thank you for your careful and candid investigation of the case, and I suppose your conclusions are correct, but it turns out different from what I expected. I had no doubt at the start but the railway companies were responsible for the damages, but it appears from the facts gathered by your honorable Board that the shipper, Mr. Wales, was at fault. I shall send him a copy of your decision, and if he is as ready to do justice as he would be to receive justice, he will make it satisfactory. Indeed, it would be for his *interest to do so*.

Very respectfully,

H. H. WITHINGTON.

| WABASH, ST. LOUIS & PACIFIC RAILWAY COM-<br>PANY, <i>Respondent</i> .             |                              |

Filed August 26, 1882.

PLANO, IOWA, August 25, 1882.

*Railroad Commissioners :*

GENTLEMEN—We have been at large expense in sinking a coal-shaft on the line of the Wabash, St. Louis & Pacific Railway, at Plano, Iowa, and had the promise of a side-track by the M., I. & N. R'y, the predecessors of the Wabash. We were to grade and tie the side-track. We have done so. Now the Wabash Company wants to compel us to contract our coal to them without allowing us a living rate, and refuse to put in said side-track unless we work for them for almost nothing.

Have we any remedy, or must we fill up the coal-shaft and quit the business, after investing \$8,000. Please answer.

Respectfully,

M. DAVISON,  
*President Plano Coal, Land & Mercantile Co.*

DES MOINES, IOWA, August 30, 1882.

M. DAVISON, *Pres. P. C. L. & M. Co., Plano, Iowa :*

DEAR SIR—Your letter of August 25th was duly received and contents noted. The Railroad Commissioners understand you to ask them if there is any power in the Commission or the law to compel the Wabash, St. Louis & Pacific Railway Company to lay a side-track from their road to your coal mine. They think there is not, unless through your agreement with their predecessors, the Missouri, Iowa & Nebraska Railway Company. If you will send them a copy of this contract (which they suppose to be in

writing), they will examine it, and if there is any remedy will communicate with the officers of the railway.

The Board judges that you would hardly invest eight thousand dollars in the shaft and fixtures of a coal mine dependent for its successful operation upon railway facilities, without a written contract in which your agreements were fully set forth.

Under the provisions of the general railroad law any company can build a railroad where it chooses by complying with certain conditions. After it is built it is subject to State regulation, but the Commissioners know of no power in the State to compel a company to build a road or a siding to a coal mine.

They understand that it is the duty of the company to operate all roads they have built.

By order of the Board,

E. G. MORGAN, *Secretary.*

A copy of the complaint was sent James F. How, Third Vice-President of the W., St. L. & P. Co., who replied as follows:

ST. LOUIS, MO., Sept. 16, 1882.

E. G. MORGAN, *Secretary Iowa Railroad Commissioners, Des Moines, Iowa:*

Please see your letter to me, Sept. 7th, with correspondence of our General Superintendent in relation to same. I think after reading it that you will feel as I do, that Mr. Davison has nothing to complain about, as he did not keep his part of the agreement he had with our company.

After satisfying yourself that we have done no wrong in the matter, will you please return the papers to me.

Yours truly,

JAMES F. HOW, *3d Vice-President.*

The Commissioners, after an examination of the papers sent by Mr. How, found that Mr. Davison made a new contract with the W., St. L. & P. R'y Co., to have the side-track built on the 7th of September, and as he has never replied to their letter of August 30, they have dismissed the complaint.

RAND LUMBER COMPANY, BURLINGTON, IOWA,  
*Complainant,*

vs.

CHICAGO, BURLINGTON & QUINCY RAILROAD  
COMPANY, *Respondent.*

} *Discrimination.*

Filed Sept. 19, 1882.

OFFICE OF RAND LUMBER COMPANY, }  
BURLINGTON, IOWA, Sept. 10, 1882. }

HON. JAMES WILSON, *Traer, Iowa:*

DEAR SIR—We wish to know if the rates of freight on lumber by the car load as established and charged by the Chicago, Burlington & Quincy R. R. Co. from Mississippi points, namely: Keokuk, Montrose and Ft. Madison,

west, are approved and sanctioned by the Railroad Commissioners of Iowa. The rate from Keokuk to Burlington is  $7\frac{1}{2}$  cents per 100 pounds, Montrose to Burlington  $6\frac{1}{2}$  cents, Ft. Madison to Burlington  $5\frac{1}{2}$  cents. The rate of freight on lumber from Burlington to Chariton, Iowa, 130 miles, is  $12\frac{1}{2}$  cents per 100 pounds; from Keokuk to Chariton  $12\frac{1}{2}$  cents, Montrose to Chariton  $12\frac{1}{2}$  cents, and Ft. Madison the same, the railroad company shipping the lumber up and through Burlington to these points without any additional charge. This is the case to all points west, as far as the Missouri River. Now, we believe this to be an unfair and unjust discrimination against Burlington and our interests. The citizens of Burlington and Des Moines county have made large donations and investments to aid in the construction of said railroad, for which we are now paying heavy taxes, hoping thereby to secure some advantages on account of geographical position, but all such advantages are taken away by the action of the railroad company, and given to such small villages as Montrose, which has contributed nothing for their construction, and is entirely free from local taxation. If such practices are to obtain in Iowa, and are approved and sanctioned by the Railroad Commissioners, we may as well abandon our real estate in Burlington and remove our lumber and business to Montrose, where we can live cheaper and avoid a heavy corporation tax. If the railroad company can haul from Montrose to Chariton for  $12\frac{1}{2}$  cents per 100 pounds at a profit, they can haul from Burlington to Chariton for less than  $12\frac{1}{2}$  cents, Montrose being 32 miles below Burlington. We ask for a fair show for business, on account of geographical position, and must have it.

Yours truly,

WM. HORNER, *Secretary*.

A copy of this complaint was sent T. J. Potter, General Manager of the C., B. & Q. R. R., who replied as follows:

CHICAGO, ILL., Oct. 2, 1882.

E. G. MORGAN, *Secretary Board of Railroad Commissioners, Des Moines, Iowa*:

DEAR SIR—I have before me your favor of 19th inst., transmitting complaint of Wm. Horner, Secretary of the Rand Lumber Co., alleging discrimination against Burlington in the fact (which we admit) that our rates on lumber to points on our road in Iowa are the same from Montrose, Keokuk and Ft. Madison as from Burlington, although the distance is greater. In the course of my experience I have not always found it easy to reconcile the views of the carrier with those of the shipper, but this is the first instance I have encountered in which a shipper complains that others are treated *as well* as he is. It is easy to conceive the feeling which may actuate a complainant when he imagines that others have *lower* rates than he for the same service, but it is not so easy to imagine a business man who actually appeals to your Board to protect him in a monopoly which he fancies should be his by reason of his geographical location. While it is almost unnecessary, perhaps, to make serious answer to so absurd a complaint, it may be well perhaps to point out to what Mr. Horner's theory of a tariff, based wholly on distance, regardless of other conditions, would lead us. All the lumber sold at Iowa river towns comes down the Mississippi from the north, and the further it is rafted the greater is the expense of that rafting.

By agreement between all roads interested the rates from all the river lumber markets to the Missouri river and beyond, are based on the cost of the lumber rather than on the distance; that is to say, the rate from Burlington to Council Bluffs is less than the rate from Clinton to Council Bluffs, though the distance from Burlington is greater, because it costs more to get lumber from the stump to Burlington than to Clinton. Now were the rates based on distance it would be seen that the lower river points, Muscatine, Burlington, Keokuk, etc., could by no possibility share in the traffic in competition with Clinton, since the former would pay higher rates on the

logs in the first instance, and higher rail rates for the lumber when shipped. Consequently it follows that were Mr. Horner's doctrine applied strictly, he might possibly be the gainer in the territory immediately adjacent to his own city, but he would be completely shut out elsewhere. It does not seem to me that the practice of making uniform rates from all the river towns needs any defense before your Board. To adopt any other course would be to close up the line of our road to all markets except Burlington, and create a monopoly in favor of that city. It should be borne in mind that the cost of getting lumber to these lower river towns is greater than to Burlington, and strictly speaking they should perhaps have even a lower rate. We have however thought it just and reasonable to allow these lower towns to compete with Burlington at even rates, and have ourselves shouldered the misfortune of the extra haul in the effort *not* to discriminate against the lumber interests below Burlington. That in doing this we should encounter a complaint from Burlington is unexpected. The president of the Rand Lumber Company personally stated to me not long since that he thought the rates from Keokuk to the Missouri river should be *less* than from Burlington. Possibly it would be well for Mr. Horner to argue this subject with his president. *Distance* cannot in all cases be made the governing factor in the making of rates; to adopt it as such would be to crush out many thriving towns and industries and in many instances create offensive monopolies, and should we pursue such a policy your Honorable Board would be inundated with complaints. Even Mr. Horner would not, I think, be satisfied with the strict application of his own rule. I should be pleased to learn the opinion of the Board in this case, since should we be adjudged to be in the wrong it would work a radical change in the policy and rates of our road, and probably of others in your State.

Very respectfully,

T. J. POTTER, *General Manager.*

#### DECISION OF THE COMMISSIONERS.

This is a case in which Wm. Horner, secretary of the Rand Lumber Company, of Burlington, Iowa, complains that the rate—twelve and one-half cents per cwt.—on lumber from Keokuk, Montrose and Ft. Madison to Chariton, Iowa, is the same as the rate from Burlington to Chariton, and that the same rate is charged all points west as far as the Missouri river from the above mentioned points. He also complains that if the company can haul for twelve and one-half cents per cwt. from Keokuk to Chariton, it can haul from Burlington for less, and to refuse to do so will deny to Burlington lumber men any advantage on account of location and geographical position. By agreement between all roads interested the rates from all the river lumber markets to the Missouri river and beyond are based on the cost of the lumber rather than on the distance; that is to say, the rate from Burlington to Council Bluffs is less than the rate from Clinton to Council Bluffs. The Mississippi river is the furnishing point for all initial Iowa lumber manufacturing markets. It costs more to raft logs to Keokuk than to points farther up the river. If less freight to points west were not charged by the railroads from southern than northern markets the most northerly market on the river would do all the business at points that it could reach by railroad. The principle Mr. Horner asks to be applied for the benefit of Burlington as against points farther south would ruin the lumber business of that town where it came into competition with points farther north. The railroad
